The 32 Paths of Wisdom

At the heart of the Western understanding of the Tree of Life, is the little document titled “The 32 Paths of Wisdom”. Usually, this document accompanies the English editions of the “Sepher Yetzirah” and is seen as an explanation or clarification of the S.Y. However, the *concept* of 32 Paths of Wisdom stems, not from the S.Y., but from the Torah, Genesis, Chapter One. According to the Jewish tradition, the 32 Paths of Wisdom *concept* is derived from the 32 times that the name “Elohim” is mentioned in Genesis, Chapter One.

Sephiroth: "Elohim said:" *

Kether -- "In the beginning Elohim created the heavens and the earth." 1:1*

Chokmah -- "Let there be light" 1:3

Binah -- "Let there be a firmament . . . let it divide . . ." 1:6

Gedulah -- "Let the waters be gathered . . . let dry land appear . . ." 1:9

Geburah -- "Let the earth put forth grass . . . etc." 1:11

Tiphareth -- "Let there be lights in the firmament . . ." 1:14

Netzach -- "Let the waters swarm . . . let fowl fly . . ." 1:20

Hod -- "Let the earth bring forth living creatures . . ." 1:24

Yesod -- "Let us make man . . ." 1:26

Malkuth -- "Be fruitful and multiply . . ." 1:28

Mother Letters: "Elohim made:"

Aleph -- "the Firmament and divided the waters . . ." 1:7

Mem -- "the two great lights . . . and the stars." 1:16

Shin -- "the beast of the earth after its kind . . ." 1:25

Double Letters: "Elohim saw:"

Beth -- "the light, that it was good." 1:4

Gimel -- "that it was good." (the separation of dry land and waters) 1:10

Daleth -- "that it was good" (the earth bringing forth grass, etc.) 1:12

Kaph -- that it was good" (the two lights in the firmament) 1:18

Peh -- "that it was good" (swarming of waters with creatures; of air with fowl) 1:21

Resh -- "that it was good" (the beasts of the earth) 1:25

Tav -- "every thing that He had made, and, behold, it was very good." 1:31

<u>Elemental Letters</u>: "Elohim --"

Heh -- "hovered over the face of the waters." 1:2
Vav -- "divided the light from the darkness." 1:4
Zayin -- "called the light Day, and darkness Night." 1:5
Cheth -- "called the firmament Heaven." 1:8
Teth -- "called the dry land, Earth . . . and the waters, Seas." 1:10
Yod -- "set them [the two lights] in the firmament of the heaven" 1:17
Lamed -- "created the sea-monsters, creatures that creep, and fowl." 1:21
Nun -- "blessed them [sea-monsters, creepers, and fowl] . . ." 1:22
Samekh -- "created man in His own image." 1:27
Ayin -- "created He him; male and female created He them." 1:27
Tzaddi -- "blessed them [male and female]." 1:28
Qooph -- "said: I have given you all . . ." 1:29*****

[*There are two exceptions to this: The first is Gen1:1, and Sephirah 1/Kether, wherein "Elohim said" is assumed. The second is Gen1:29, and Elemental 12/Qooph, wherein the focus is shifted from the "Elohim said", to the "I have given you all . . ."]

The Sepher Yetzirah (circa 1st Century, B.C.E.) incorporates and seeks to explain these 32 Paths of Genesis. The “32 Paths of Wisdom” *document* however, was written about 1,400 years after the S.Y. and speaks of these 32 Paths in the context of the S.Y.’s Tree of Life.

According to recent scholarship, the author of the “32 Paths” document was a member of the 13th Century Castilian conclave of kabbalistic writers known as the “Circle of Contemplation”. Their primary influences were the Torah, S.Y. and Bahir, and the image of the Tree they would have employed was what I call the "Hebrew Tree".

Since the Paths and their correspondences are established by the sequence of Genesis, Chapter One, this was the sequence used by the author of the "32 Paths" document and results in the following set of relationships:

Path #1 = Kether *1:1*
Path #2 = Heh *1:2*
Path #3 = Chokmah *1:3* (= Binah)
Path #4 = Beth *1:4*
Path #5 = Vav *1:4*
Path #6 = Zayin *1:5*
Path #7 = Binah *1:6*
Path #8 = Aleph *1:7*
Path #9 = Cheth *1:8*
Path #10 = Gedulah *1:9*
Path #11 = Teth *1:10*
Path #12 = Gimel *1:10*
Path #13 = Geburah *1:11*
Path #14 = Daleth *1:12*
Path #15 = Tiphareth *1:14*
Path #16 = Mem *1:16*
Path #17 = Yod *1:17*
Path #18 = Kaph *1:18*
Path #19 = Netzach *1:20*
Path #20 = Lamed *1:21*
Path #21 = Peh *1:21*
Path #22 = Nun *1:22*
Path #23 = Hod *1:24*
Path #24 = Shin *1:25*
Path #25 = Resh *1:25*
Path #26 = Yesod *1:26*
Path #27 = Samekh *1:27*
Path #28 = Ayin *1:27*
Path #29 = Tzaddi *1:28*
Path #30 = Malkuth *1:28*
Path #31 = Qooph *1:29*
Path #32 = Tav *1:31*

In my experience, the differences between the Jewish and Western understandings of the Tree of Life are too vast to bridge ***except through the imagery of the Tarot major arcana***. By using these images, along with their Western tradition of Hebrew Letter correspondences, and fitting them to the Hebrew Tree, a Western practitioner can come to a bet-

ter understanding of the Hebrew Tree and by extension, the Jewish kabbalah.

To that end, I invite you to experiment with the following correspondences in your sphere- and pathworking. In the following pages, you will find the text of the “32 Paths of Wisdom” document, juxtaposed with their Hebrew Tree correspondences and their Tarot Arcanum (where appropriate). I've also included Paul Case's "Pattern on the Trestleboard" statements for each Sephira; and for the planetary Sephirot, I've included the Temple images from my own "Eight Temples Meditation Project". Along side all of this, you will find my own personal commentary.

I've arranged the Paths in what I call an “initiatory sequence”. Initiation is a process of the ascent, expansion and integration of consciousness. It begins at the basest personal level of consciousness (Malkuth) and spans the gamut to the Unity of All consciousness (Kether). The Tree of Life expresses this essential process and defines ten stages or levels of initiation, corresponding to the Sephirot. It also defines a sequential path of ascent that integrates all ten of these levels.

By applying the purely Western techniques of sphere- and pathworking to the Hebrew Tree, and using the “32 Paths of Wisdom” document combined with the Tarot major arcana as our illustrated tour guide, a cogent system of self-initiation emerges.

Sphereworking (i.e., experiencing the Sephirot) should precede pathworking. This bias is reflected in the sequence I present here. We begin with Malkuth, followed by Yesod – ***as sphereworkings***. Only then do we pursue the first initiatory path, Tav 9>10 – ***as a pathworking beginning in Yesod and ending in Malkuth***.

In this form of initiatory working upon the Tree, pathworking is reserved for integration of the newly attained level of consciousness and not as a means of ascent proper. However, working the paths that depend from a newly attained sphere is part of the process that enables the initiate to ascend to the next higher level. In other words, the integration of the new level into the old level(s), through pathworking, is what transforms the initiate and empowers their next ascent.

When these 32 Paths of Wisdom are combined with the 16 “Hidden” Paths, the 231 Gates are revealed, but first, here are the 32 Paths . . .

Malkuth: Sephirah #10

#10: *The Kingdom of spirit is embodied in my flesh.*

Path #30 -- "The thirtieth path is called the universal consciousness because through it, masters of the heavens derive their judgments of the stars and constellations, and perfect their knowledge of the celestial cycles."

Above all else, the "32 Paths" document describes the work to be done in relation to each Path. Here we are told that the work of Malkuth is self-analysis which leads to self-knowledge.

The analogy used is that of an astrologer ("master of the heavens") who looks to the movements and positions of the planets ("stars") within the zodiac ("constellations") in order to comprehend the universal forces at play in any given moment. The work of self-analysis is much the same in that one examines the manifest personality and from that, derives certain truths about the universal forces that underlie the personality traits and the general structure of personality itself.

In symbolic terms, the planets represent the basic components of the personality and the zodiacal signs represent the Elemental structure of personality. Thus this self-analysis is performed in the context of the four Elements and each aspect of the personality is assigned an Elemental correspondence.

This analysis of the inner self and of the external universe is the first step along the path of initiation. In essence, it is a process of judging cause by examining its effect -- of trying to understand what is reflected by gazing at a mirror instead of looking directly at the source. The rationale behind this tact is that each material manifestation is an expression of a Universal force. By observing the material manifestation one can, by extension, learn something about the Universal force that causes it. For example, an astrologer looks to the position of a planet within the zodiac and from that derives an indication of what subtle influences are affect-

ing human affairs, but the astrologer is basing this judgment upon the characteristics of the manifestation or end result, not upon the direct perception of the Universal force itself. With this knowledge in hand however, the astrologer can predict behavior and can, to a certain extent, compensate for the subtle influence.

And so it is with the work of Malkuth. By analyzing the inner and outer manifestation, the initiate learns to recognize the subtle influences that affect them and comes to see that indeed, the kingdom of spirit is embodied in their flesh.

Yesod: Sephirah #9

#9: *In thought and word and deed, I rest my life from day to day upon the sure Foundation of eternal being.*

Path #26 -- "The twenty-sixth path is called the renewing consciousness because through it God, blessed be He, renews all things which are newly begun in the creation of the world."

Yesod is the Middle Pillar root of the astral personality. In human terms it is the (predominantly subconscious) psyche. The work of Yesod is the application of the Malkuth self-knowing toward self-transformation. This is the renewal of the "small self" or personality, where "every thought, word and deed" is dedicated to transforming the personality so that it truly reflects the "eternal being". In Yesod, the initiate stands as the source of reflection and consciously casts their image upon the mirror of manifest personality, constantly reshaping their projection until the reflection matches their inner light. This is expressed clearly in the corresponding Genesis passage:

Genesis 1:26 -- *"And Elohim said: 'Let us make man in our image, after our likeness; and let them have power over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth.'"*

"Man" in this case is the astral personal self, who exercises power over the Elements ("sea", "air", and "earth") and all their manifestations within the realm of the personality and life circumstance. The *conscious* exercising of this power-over the personality, causes a "renewal" within the initiate's psyche.

Tav: 9>10

Path #32 -- "The thirty-second path is called the serving consciousness because it directs the motion of the seven planets, each in its own proper course."

Tav describes the task of Yesod -- namely, the *conscious* impressing upon Malkuth (our material life circumstance) of the renewed Yesodic personality. In the symbolism of the "32 Paths" this is described as the conscious directing of the "seven planets" (i.e., the aspects of the personality) in their "***proper***" course. Their "proper" course is represented in the Tarot imagery as occurring within the context of the *balanced* four Elements (i.e., the cherubic signs of the zodiac).

Hod: Sephirah #8

#8: *I look forward with confidence to the perfect realization of the Eternal Splendor of the limitless light.*

Path #23 -- "The twenty-third path is called the stable consciousness because it is the power of sustenance among all the Sephirot."

As the work of self-transformation of the personality progresses, the initiate comes to see that the personality exists between two poles -- rationality or logic, and emotion or instinct. In kabbalah, these poles are symbolized by Hod (rational intellect) and Netzach (instinctual emotion). Along the ascending path of initiation (as opposed to the descending path of creation), the first of these poles that the initiate encounters is the rational intellect, represented by Hod. The work of Hod therefore, is to pursue a rational understanding of the dynamics operative within the in-

ner and outer worlds. This leads to the vision of the "Eternal infinite complexity of the Universe, symbolized here by the "Library of Hermes" which contains *rational* information about every aspect of existence.

Splendor" and the infinite complexity of the Universe, symbolized here by the "Library of Hermes" which contains *rational* information about every aspect of existence.

The "32 Paths" text states that this is the "power of sustenance among all the Sephirot". To understand how this is so, we must refer to the Genesis passage from which the 23rd Path is derived.

Genesis 1:24 -- *"And Elohim said: 'Let the earth bring forth the living creature after its kind, cattle and creeping things, and beast of the earth after its kind.' And it was so."*

The specific phrasing of this passage holds the key. Here we see that Elohim is letting the ***earth*** bring forth these things, *out of its own substance*, as opposed to Elohim creating these things out of nothingness. This indicates a sequential process of self-sustaining self-propagation as opposed to direct creation. It expresses the mechanism of infinite complexity as one thing begets another, endlessly creating subtle shades of difference between the generations. This mechanism fills and thus stabilizes the sequential infinity, and can be seen within the kabbalistic doctrine of emanation at every level of the Tree.

Hod is the terminus of the Pillar of Severity or Form. In the language of the "32 Paths" the Pillar of Severity is the receptacle of the "substance of the Unity", whereas the opposite side-pillar (Mercy or Force) is the receptacle of the "splendor of the Unity" and the Middle Pillar, the receptacle of the "holy powers". In Hod, as Paul Case stated, we "realize" the splendor of the opposite pillar, but this is different from the actual experience of that splendor. Here in Hod, the splendor is seen with the rational mind alone, as it appears reflected through infinite complexity. Thus it is not experienced in its wholeness as a more-than-rational force.

In other words, in Hod we come to a rational understanding of the infinite complexity in much the same way as we came to understand our personalities in Malkuth -- by analyzing their manifestations.

Ayin: 8>9

Path #28 -- "The twenty-eighth path is called the natural consciousness. Through it is completed the nature of all that exists beneath the sphere of the sun."

In Hod, we learn the lesson that how and what we think, shapes our reality. With the path of Ayin, we apply that understanding to the transformation of our personality. The Tarot imagery depicts the natural mechanism that, when left as an unconscious process, binds the personality to the whims of subconscious reaction. Initiation however, demands more of us. It demands that we take this natural mechanism and use it consciously in the work of self-transformation of the personality.

The "32 Paths" passage speaks directly to this, stating that the action of the rational mind is what "completes" the astral matrix or personality. The term "beneath the sphere of the sun" refers to the Sephirot Netzach, Hod, Yesod and Malkuth -- the lower astral realm of the personal self. Thus with Ayin, the initiate's task is that of *consciously* applying their rational understanding of things to the realm of their personality, with the unrelenting aim of transforming it into a closer semblance of their truest Self.

Qooph: 8>10

Path #31 -- "The thirty-first path is called the perpetual consciousness. Why is it called this? Because it directs the movements of the sun and moon according to their natural order, each in its proper orbit."

With the path of Tav, connecting Yesod to Malkuth, the "32 Paths" text mentioned directing the motion of ***"the seven planets, each in its own proper course"***, but here we have ***"the sun and moon according to their natural order, each in its proper orbit."*** The sun is the primary planet of the Individual Self (Tiphareth) and the moon, that of the personal self (Yesod). Thus we see here a more refined sort of direction being imposed, relating to the Individual Self and the personality as whole things *which interact*. Whereas with Tav, the directing concerned the internal components of the personality alone (the seven planets).

"Qooph" translates into English roughly as "back of the head" and as a symbol, refers to the subconscious mind.

In the Western Tree, the path of Qooph is placed on the opposite side and connects Netzach with Malkuth, expressing the concept that the subconscious mind is more closely related to the chaotic instinctual emotions than it is to the ordered rational mind. However, in the "32 Paths" and the Hebrew kabbalah in general, the subconscious mind is seen as the interaction of both ration and instinct, but shaped most immediately by our thinking. In other words, it's our thinking that gives form to the force of instinctual emotion. It is how we complexify the simpler instinct and create our own little manifestation of the infinitely complex Eternal Splendor (Hod).

The task of Qooph then, is to apply the rational understanding gained in Hod to the transformation of one's life circumstances (Malkuth). In effect, the initiate takes conscious control of their subconscious mind. The Tarot image depicts this process in reverse, indicating a journey upwards from Malkuth along the winding path of the subconsciousness which

leads to the sun and moon in their "proper orbit". The task of Qooph however, is to descend along this "natural order" and *consciously* "direct" the motion (i.e., manifestation) of the interaction between Individual Self and personal self.

When this task is complete, the initiate will have integrated their rational Hod understanding into both Yesod and Malkuth -- the personality and life circumstance. This prepares the initiate for their rise to the next level of the personal self -- Netzach and the realm of emotional archetypes.

Netzach: Sephirah #7

#7: *Living from that Will, supported by its unfailing Wisdom and Understanding, mine is the Victorious Life.*

Path #19 -- "The nineteenth path is the consciousness of the secret of all spiritual activities. It is so called because of the influence disseminated by it from the highest blessing and the supernal glory."

Our rational mind reacts to, and interprets, instinct. For example, when we encounter something, our first reaction is at a pre-rational, emotional gut level. It is immediate and spontaneous and we have no conscious control over it. Our ration then takes over and modifies the primary emotional response, crafting it into a more personal form. Generally, our ration focuses not on the we've encountered in and of itself, but upon the force of our own primary response. Another way of putting it would be to say that the primary emotional response is generally the force which ignites the ration to action -- the action of ration being the giving of form to emotion.

Within the structure of the personality or lower astral body, Netzach is the pre-rational, instinctual gut reaction. The work of Netzach therefore, is to look within the rational reaction and penetrate to the initial gut-level instinct. In other words, to experience the force that ignites ration. This force is the "secret of all spiritual activities" because the direct perception of this force is what enables the completion of the transformation of

the personal self.

This force is referred to in the path description as an "influence disseminated by it from the highest blessing and the supernal glory". In the symbol language of the "32 Paths", this is the "splendor of the Unity" emanated from Kether (the supernal glory) unto Chokmah by the path Heh. This splendor becomes Truth (Amen) within Chokmah and then descends unto Chesed/Gedulah via the path of Gimel as pure thought (Transparent Consciousness) where it becomes Loving Kindness. From there it descends into Netzach via the path of Kaph as "Arcanum and veiled ideas". So what we encounter in Netzach are these veiled ideas whose root is the splendor of the Unity.

Netzach is usually perceived as the realm of emotional archetypes and is symbolized by Venus, the goddess of love (quite fitting for the terminus of the Pillar of Mercy or Loving Kindness). In Netzach, one seeks out encounters with the astral images of these emotional archetypes and attempts to penetrate beyond the normal rational reaction in order to reach the direct experience of these forces themselves.

Mem: 7>8

Path #16 -- "The sixteenth path is called the eternal consciousness because it is the pleasure of that glory beyond which is no-glory like unto it. It is also called the garden of pleasure (Eden), which is prepared for the compassionate (Khasidim)."

This is the first horizontal path encountered as one rises up the Tree and it represents a significant experience for the budding initiate. Here, the initiate's task is to *consciously* combine instinctual emotion with rational response. Instead of following the normal path of this being a subconscious, habitual mechanism, one empowers it consciously and predicates their rational response upon the direct perception of the force which naturally ignites it

In relation to the normal function of human consciousness this turns one's perspective topsy-turvy and up becomes down, left becomes right, etc. This has a deeply transformative effect upon the rational mind, described in the "32 Paths" text as "the pleasure of that glory beyond which is no-glory like unto it".

Mem is the Mother Letter corresponding to the Element Water (the solidifying influence). In the structure of the Tree, Mem represents the lower astral manifestation of the "Plan of the Primordial", whose mental manifestation is seen in the path Aleph (Mother Letter of Air, the mediating influence) and whose supernal manifestation is seen in the path Shin (Mother Letter of Fire, the volatile influence). Each of these Mother Letters is attributed to a horizontal path that connects the two side pillars. In other words, they are stabilizing factors, essential to the overall equilibrium of the structure.

Each Mother Letter also defines a veil. Mem is the astral veil which hides the more essential mental reality by dressing it in a clothing of symbol. Aleph is the mental veil which hides the non-sequential supernal reality by dressing it in a clothing of sequentialized thought. And Shin is the supernal veil which hides the essential Unity by dressing it in a clothing of non-sequential duality.

Conversely, these veils also act as filters which distort or refract the descending creative influence. Shin refracts the Unity into non-sequential duality; Aleph refracts the duality into sequential thoughts; and Mem refracts sequential thought into dense astral symbol.

With the path of Mem, the initiate is faced with the task of walking this veil, exploring its natural mechanisms and employing them *consciously*.

Samekh: 7>9

Path #27 -- "The twenty-seventh path is called the exciting consciousness because, through it, is created the life-breath of every created being under the supreme orb, as well as the motion of them all."

The direct emotional forces that underlie the aspects of the personality serve as their "life-breath". With the path of Samekh, the initiate's task is to *consciously* shape the aspects of their personality through the direct application of this life-breath. This comes *after* the transformative Mem work of integrating ration and instinct, and one thus employs a balanced force (well illustrated by the Tarot image) in this aspect of self-

transformation.

The path description refers to "every created being under the supreme orb, as well as the motion of them all". In the specific symbol language of the "32 Paths", this indicates the planets of the personality which, astrologically speaking, exist "under" the orbit of the sun (the supreme orb, from the perspective of the personal self). Thus the work of Samekh has the effect of enlivening these archetypal aspects of the personality and setting them in motion.

Tzaddi: 7>10

Path #29 -- "The twenty-ninth path is called the corporeal consciousness because it marks out the forms and reproduction of all bodies which are incorporated under every cycle of the heavens."

The work of Tzaddi marks the completion of the initial phase in the transformation of the personal self. Here, the task is to integrate the perception of the instinctual emotional forces directly into one's daily life circumstances (i.e., to corporealize them). As the Tarot image implies, this brings the initiate into closer alignment with nature's own fluid mechanisms of corporealization.

The Hebrew word "Tzaddi" translates into English as "fish hook". Symbolically, this is what captures the "fish" of Qooph (Pisces), the subconscious mind. In Hebrew symbolism, the fish is a sign of fertility, so what

we have here with Tzaddi is the capturing or hooking of the fertility of the subconscious mind. With it, the initiate feeds, sustains and nurtures the personality, and anchors it in the material life circumstances.

This final step illumines the personality and allows it to more clearly expresses the solar light of the Individual Self (Tiphareth). It is this illumination of the personal self that empowers the ensuing rise to a *direct* cognizance of the Individual Self. Without this firm foundation from which to rise, a direct cognizance of the Individual Self is, at best, temporary, incomplete and unstable.

Tiphareth: Sephirah #6

#6: *In all things great and small, I see the Beauty of the divine expression.*

Path #15 -- "The fifteenth path is called the constituting consciousness because it constitutes the essence of creation in pure darkness. According to masters of contemplation, this is that darkness referred to in scripture: 'and thick darkness its swaddling band.'"

Having completed the work of transforming the personality into a *conscious* expression of one's understanding of the true self, it is almost inevitable that the initiate will rise to Tiphareth and experience the perspective of the Individual Self. This "Individual perspective" confers a sense of detachment and objectivity in regard to one's own personality and material life circumstance. From this perspective, the initiate looks "downward" at their mundane life and "outward" toward all the other Individual Selves that inhabit this level of the astral realm. One sees and directly experiences the Individual Self within every other thing that has material and astral existence.

The only word that comes close to describing the vision of another Individual is "beauty" (in Hebrew, Tiphareth) because the realization of the fact that this other *IS* a divine expression, is inescapable. Furthermore, the realization that one's own self is also an expression of the divine, is

equally inescapable and this particular realization is a most cathartic one indeed!

Tiphareth is the only Sephira below the abyss that receives the Kethric influx directly. This is through the path of Beth (#4) which transmits the "holy powers" across the Abyss, into the realm of Yetzirah. Within Yetzirah, these holy powers appear as light, hence the solar symbolism of Tiphareth. Each Individualized quanta of this light shines with a star-like radiance, yet has, as its backdrop, the black "darkness" of the Abyss. I think the corresponding Genesis text says it best:

Genesis 1:14-15 -- *"And Elohim said: 'Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days and years; and let them be for lights in the firmament of heaven to give light upon the earth.' And it was so."*

One thing that this passage points out is the temporal nature of the Individual Self (*"let them be for signs, and for seasons, and for days and years"*) and its relationship to incarnation (*" to give light upon the earth"*). The Individual Self is the temporal mental body that incarnates over and over. When its cycle of incarnation is complete, it dissolves into the Greater Self or eternal mental body (spirit). Thus in Tiphareth, the initiate also gains access to all the Individual Self's memories of "past" incarnations.

The work of Tiphareth is to explore the Individual Self in a manner similar to the earlier analysis of the personal self. The rise above Tiphareth to Geburah and then Gedulah, mimics the ascent from Yesod to Hod and Netzach, except at the Individual level instead of the personal. The initiate must strive to completely identify with their Individual Self and then turn their *Individual* attention downward and infuse their personal self directly. This once again transforms the personal self, but this time, the transformation is accomplished from the Individual perspective, instead of from the personal perspective which must, by necessity, look "up" to the descending Individual influx and interpret its meaning. Here though, there is no doubting or guesswork.

Lamed: 6>7

Path #20 -- "The twentieth path is called the consciousness of will because it is the pattern of all that is formed. By this mode of consciousness one may know the actuality of the primordial wisdom."

The Hebrew letter, Lamed, is said to depict a snake uncoiled, symbolizing the unleashed force of Individual will. The task of this path is to direct this Individual, Tiphareth will to the Netzach level of the personality's instinctual emotions. With the light of their Individual will, the initiate illuminates the whole of their emotional nature, transforming and setting aright everything that does not reflect this will with clarity.

The essence of Tiphareth (i.e., the holy powers descending from Kether) is equilibrium or balance, so this willful act of self-transformation seeks to create balance within the realm of the personal Netzach. This conscious act of creating balance mimics the creativity of the "primordial wisdom" (Kether) and it is this to which the "32 Paths" text refers when it says: "By this mode of consciousness one may know the actuality of the primordial wisdom."

Nun: 6>8

Path #22 -- "The twenty-second path is called the faithful consciousness because, through it, the spiritual powers are increased. All dwellers on earth 'abide in its shadow.'"

With the work of the path of Nun, the Individual perspective completely fills the rational intellect, transforming and regenerating it. Every thought and every response to emotional instinct is permeated through and through with the Individual perspective. This, combined with the preceding permeation of the personal Netzach, vastly increases the initiate's spiritual (i.e., mental) powers. This transformation of the personal intellect is so radical that it resembles the death of an old self and birth of the new. The initiate cannot but look at their world through new eyes and from a new perspective.

It is an inescapable fact of the temporal universe that *EVERY* thing is temporary. From the personal perspective, this often brings sadness and fear, but the Individual Self understands that without this cycle of life and death, nothing would flourish. It *KNOWS* that the essence never dies. It *KNOWS* that for the essence to perfect itself and eventually return to its origin, it must pass through the cycle of life and death countless times.

When this knowledge is impressed upon the rational mind by the Individual will, it frees the initiate to fully pursue their spiritual advancement without fear. In fact, it is this death of the fear-of-death that the Tarot image depicts.

In Hebrew symbolism, the fish (Nun) stands for the concept of abundance and fertility. Indeed, it is the rotting matter of dead bodies that feeds the birth of the new and assures continuity. This idea of abundance is echoed in the Genesis text corresponding to the 22nd Path:

Genesis 1:22-23 -- *"And Elohim blessed them, saying: 'Be fruitful and multiply, and fill the waters in the seas, and let fowl multiply in the earth.' And there was evening and there was morning, a fifth day."*

Resh: 6>9

Path #25 -- "The twenty-fifth path is called the consciousness of trial because it is the primary test by which the creator proves the compassionate (Khasidim)."

This is the path of incarnation -- the "primary test" by which we are continuously perfected. The task of the path of Resh is to *consciously* incarnate the Individual Self within the personal self.

Resh is the first initiatory path that crosses another previously traveled path. The path it intersects is that of Mem and the Garden of Eden or lower astral veil. This is the genuine "test" for the initiate since, without the balance conferred by Tiphareth and the subsequent illumination of both Netzach and Hod, descending through the lower astral can be very unbalancing indeed.

In the Tarot image, the Individual Self is represented by the sun and the 13 descending Yods. The newly transformed Netzach and Hod are symbolized by the little girl and boy respectively. They stand, hand in hand, united in purpose and acting in unison with the sun, at the exact point where Resh intersects Mem.

This specific point is one of great balance -- philosophically equidistant from Tiphareth, Yesod, Netzach and Hod, simultaneously. This is the heart of the personal astral matrix itself. The immense fertility of this point is symbolized in the Tarot image by the fact of the green grass and the blooming sunflowers (i.e., *solar* flowers).

Bringing the Individual Self *consciously* into Yesod, further transforms the personality and has the effect of formalizing the Netzach and Hod transformations. Having transformed the lower or personal self in this

way, the initiate is then free to turn their attention upwards and begin the process of transforming the Individual Self.

Geburah: Sephirah #5

#5: *I recognize the manifestation of the undeviating Justice in all the circumstances of my life.*

Path #13 -- "The thirteenth path is named the uniting consciousness because it is the essence of glory. It represents the completion of the true essence of the unified spiritual beings."

Geburah is where the initiate learns about and begins to wield the power of the Individual Self. This is also where, for the first time, the initiate directly perceives the "legality" or rightness of all things. The "undeviating Justice" of the universal legality is absolute and manifests in *ALL* the circumstances of the initiate's life. The inevitability of this fact teaches the initiate to wield their power with great care and respect, lest they burn their fingers and singe their hair. The initiate's experiences during the process of learning about power and its use, afford a degree of completion to the Individual Self. It's akin to adolescence when the youth first learns that they actually do have their own power. At first that power is wielded selfishly and foolishly, but with time and experience, the youth matures and learns that power *with* is far more productive than mere power *over*.

The "32 Paths" text gives a wonderful clue to the work of Geburah when it's considered in the light of Paul Case's statement for Zero: *"All the power that ever was or will be, is here now."* This is the "true essence of the unified spiritual beings" -- the power inherent in the unified or eternal NOW. In other words, in Geburah, the initiate synchronizes with the NOW and therein finds unlimited power. Projecting this power downward and manifesting it within the sequential realm, gives it material form and affords it a certain degree of completion.

The arena in which the initiate learns about their Individual power is the further transformation of Self at the personal and Individual levels.

Yod: 5>6

Path #17 -- "The seventeenth path is called the consciousness of disposition. It provides faith to the compassionate (Khasidim) and clothes them with the Holy Spirit (Ruach Elohim). Within the supernals it is called the foundation of beauty (Tiphareth)."

With the path of Yod, the initiate projects the laser beam of their power upon the perfecting of the Tiphareth Individual Self. This phase of Self-transformation has to do with the direct, *conscious* integration of the higher influx descending from the Greater Self (Binah), into the Tiphareth Individual. The process is as the Tarot image depicts -- a casting of light upon darkness. The words of the corresponding Genesis passage describe this perfectly:

Genesis 1:17-18 -- *"And Elohim set them* [the two lights] *in the firmament of the heaven to give light upon the earth, and to rule over the day and over the night, and to divide the light from the darkness."*

Here we see (for the only time) Elohim "***set*** them". This is a very concrete act that serves as a foundation for Tiphareth (in the words of the "32 Paths"). Elohim also gives a specific set of purposes to these lights and this is reflective of the Geburian power and legality.

The influx from the Greater Self that descends into the Individual Self, is the "Holy Spirit" mentioned in the "32 Paths" text. At the level of Tiphareth, this influx or "breath of Elohim" is perceived as a "clothing" of light.

It's important to understand that in the "32 Paths", the term 'Khasidim' ("compassionate") is a code word for the initiate -- the upward traveler who seeks enlightenment. When the initiate *consciously* projects the aspect of the Ruach Elohim that descends from Geburah unto Tiphareth, a sense of faith in the rightness of EVERY thing, infuses the initiate's consciousness. This has to do with the perception of legality and the recognition of the fact that the undeviating justice does indeed manifest itself in *ALL* circumstances.

Peh: 5>8

Path #21 -- "The twenty-first path is called the consciousness of the desired-which-fulfills because it receives the divine influence which flows into it as a result of the blessing it confers upon all that exists."

Peh is the path that connects Geburah -- the terminus of the mental "plan of the primordial" (Aleph) -- with Hod -- the terminus of the lower astral manifestation of this "plan" (Mem). In essence, the Geburah aspect of the Individual Self is the immediate product of the mental "plan" and when it *consciously* descends into Hod (the direct product of the lower astral "plan") a cathartic transformation of one's cherished belief systems takes place. This is because the perspective of the Geburah Individual includes the perception of legality ***and*** immense power, and this combination shatters any remaining illusions or delusions arising from the astral and physical experience.

In the Tarot image, the descending influx from Geburah is symbolized by the lightning flash that strikes the crown of the tower. Everything inhabiting this mental tower of cherished delusions is forced to either learn to fly or be dashed upon the rocks and destroyed. Yet in the "32 Paths" text, this seemingly destructive event is counted as "the blessing it confers upon all that exists.

The title of this path ("the desired which fulfills") is interesting. On the one hand, it's a warning similar to "be careful what you wish for". This has great relevance since at the Geburah level of attainment, what one wishes for *WILL* come to pass and great care must be exercised.

On the other hand, it's also a deeply kabbalistic statement pertaining to the descent of the "substance of the unity" along the left pillar; specifically its descent from the upper-Yetziratic, mental "plan" (Aleph) to the level of the lower-Yetziratic astral "plan" (Mem). The corresponding Genesis passage (1:21) describes this blessing with the words, *"and Elohim saw that it was good."*

An alternate translation of the title for this path is "the desired and the required" -- two separate needs. Again this speaks of the sustenance provided by the mental level unto the astral level, but it's also a statement of what the initiate must accomplish with the path of Peh -- namely, to differentiate between that which is merely desired and that which is a requirement, between what's essential and what's superfluous within the rational intellect. This is a willful act of paring away the irrelevant and illuminating the relative darkness of the personal self.

When this Geburian transformation of the Individual Self is complete, a new relationship with the NOW and with power emerges and the initiate rises to Gedulah, the realm of "Loving Kindness" and "Mercy".

Gedulah: Sephirah #4

#4: *From the exhaustless riches of the Limitless Substance, I draw all things needful, both spiritual and material.*

Path #10 -- "The tenth path is called the resplendent consciousness because it is exalted above every head and sits on the throne of Binah. It is illuminated with the splendor of all the lights and it causes an influence to flow forth from the Prince of Countenances."

Gedulah is the highest Sephirah of the Individual Self and stands at the border of the Abyss between our sequential, temporal realm and the non-sequential realm of eternity (i.e., the "Supernal realm"). In effect, it's the initiate's jumping off point in their journey across the Abyss. As such, the experience of Gedulah is all about the nature of sequence, for this knowledge is what carries the initiate through the veil of Aleph and across the Abyss to the veil of Shin.

Gedulah and Geburah represent the two poles of sequence -- similarity and difference, respectively. As the Unity descends into Yetzirah, causing the realm of sequence, the first degree of sequence to emerge is similarity or alikeness, where sequence is a matter of attraction. This is Gedulah, "loving kindness", the force that draws all things together.

Here, sequence is expressed as degrees of similarity.

Born from similarity, the second and opposite pole of sequence to emerge is that of difference, where sequence becomes a matter of attraction ***AND*** repulsion. This is Geburah, "might" or "power" (also known as Pachad or "fear"). This is the force that pushes all things that are not similar, apart. This sets the stage for a more complex sort of sequence -- time-space.

In Geburah, the initiate encountered the vast power inherent to the temporal NOW, but in Gedulah, the initiate experiences the temporal NOW directly and to its fullest. Thus the "power" found in Gedulah (i.e., loving kindness) is infinitely greater than what the initiate experienced in Geburah. However, the experience of this greater power is limited only to those who have thoroughly learned the Geburah lesson about the superiority of power ***with*** versus the inferiority of power ***over***.

In Gedulah, the temporal NOW is defined as the infinitely finite point that divides past from future. It is toward the realization and experience of this NOW point that the initiate strives in Gedulah. Once attained, this experience reveals an entirely new, completely objective perspective on the universe. It's also a perspective that is naturally and unavoidably imbued with a loving kindness for EVERY thing.

The temporal NOW point is the sequential reflection of what Paul Case said about the Zero: "All the power that ever was or will be is here NOW". It's the point at which the "splendor of the Unity" enters into the sequential realm and provides "*ALL* things needful, both spiritual and material." This "splendor" gives birth to the path of Aleph and the "plan of the primordial". This "plan", emanated by Gedulah, is what the "32 Paths" text refers to with the words, "and it causes an influence to flow forth from the Prince of Countenances."

Because of Gedulah's position at the crux of time (the NOW point) it is the seat of "prophesies that seers behold in visions" (see Gimel, Path #12). In other words, from the Gedulah perspective, time is an open book. Among the implications of this for the initiate is included the attainment of a specific sort of inclusive temporal perspective upon the sequential universe. This deepens still further the perception and understanding of the universal legality and transforms it into a true faculty that the initiate must then employ in their transformation of the Individual Self.

Aleph: 4>5

Path #8 -- "The eighth path is called the perfect consciousness because it is the plan of the primordial. It has no root where it can abide except in the hidden chambers of majesty (Gedulah) from which its own secret essence emanates."

In the Genesis sequence of creation, Aleph marks the first time that Elohim "makes", indicating the World of Yetzirah for which Aleph provides the "plan".

Genesis 1:7 -- *"And Elohim made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament, and it was so."*

Aleph, the "plan of the primordial", is this "firmament". The Hebrew word translated (most often) as "firmament" comes from the root verb 'resh-qooph-ayin' which means alternately, "to stamp, tread down, beat into thin plates" or "to stretch out, expand and spread". The second definition, indicating an expanse, defines the Abyss (i.e., the "hidden chambers of Gedulah") which, in the symbolism of the Hebrew Tree, lies directly above the path of Aleph.

The first definition however, defines the true nature of Aleph itself -- the Abyssal expanse, "beaten into a thin plate". This "thin plate" is the veil which seems to separate the upward gazing initiate from the Supernal realm. This veil and the Abyss it shrouds are what separate Yetzirah from Briah, "*the waters which were under the firmament from the waters which were above the firmament*".

The Tarot image depicts this "plan" as the descent of an innocent spirit of loving kindness, into the realm of differentiating experience. This is the highest aspect of the Individual Self who, willingly and with full awareness of the consequences, enters into the process that brings involvement in the wheel of incarnation. This is not a blind foolishness; rather, it's a willingness based in full awareness and focused completely upon manifesting the spirit of loving kindness, come what may.

The task of the initiate is to infuse their Geburah awareness with their Gedulah awareness. This integrates the spirit of loving kindness and its unlimited storehouse of NOW power into the Geburah manifestation of power, exponentially increasing and purifying it.

Teth: 4>6

Path #11 -- "The eleventh path is called the scintillating consciousness because it is the essence of the veil which is placed before the ordered arrangement of the powers. Who walks this way acquires a special dignity – he can stand face to face before the cause of causes."

This path completes the triangle of the integrated Individual Self. All of the Individual's powers come together to act in unison and perfect equilibrium with this descent into Tiphareth. In the words of the "32 Paths", this completion confers the ability to "stand face to face before the cause of causes". In other words, the integrated Individual Self looks directly up to Kether, yet there is still a space between -- the Abyss which keeps us face-to-face instead at-one-with. This face-to-face experience gives the integrated Individual a glimpse of the Kethric influx. The sense of self-assurance this produces within the Individual and personal levels of Self is aptly depicted by the Tarot image. Here we see the integrated Individual in perfect sync with the objective reality and functioning in complete power ***with*** it. Such an Individual works ***with*** the universal legality, giving to the effort the fullness of their conjoined Gedulah-Geburah power.

The Hebrew letter Teth is said to depict a coiled serpent. This, along with the association of Teth with the sign of Leo (the lion), indicate the immense reserve of unleashed potential available to the integrated Individual. This "scintillating consciousness" is the essence of Aleph (the "veil which is placed before the ordered arrangement of the powers").

The task of Teth is for the initiate to *consciously* cast their "scintillating consciousness", along with all its reserve of power, into the work of per-

fecting the Individual Self. The aim is to transform the Individuality into a ***clear*** expression of the integrated Individual's perception of the Kethric influx. This completes the transformation of the Individual Self, below the Abyss.

Kaph: 4>7

Path #18 -- "The eighteenth path is called the consciousness of the house of influence. From its inmost center flow the Arcanum and veiled ideas, which "abide in its shadow"; thus is there union with the inmost substance of the cause of causes."

With the path of Kaph, the initiate now turns the same Gedulah force upon their personal self and upon their mundane life circumstance. This integrates the integrated Individuality still further, into the denser levels of personal self.

The "32 Paths" text describes this as a descent of "the Arcanum and veiled ideas" from Gedulah, into Netzach which "abides in the shadow" (i.e., exists below solar Tiphareth).

At the level of Netzach, the universal legality as it's perceived in Gedulah, takes on the astral form of "Arcanum and veiled ideas". In other words, the Netzach perception of legality is normally veiled with astral symbol, represented in the Tarot image as the common conception of fortune or luck-of-the-draw.

The initiate however, brings a different, more inclusive perspective to Netzach and the realm of instinctual emotions as they perform the task of Kaph. Mind you, the initiate's Netzach has already been transformed by prior work, so it's not like the average person's Netzach. When the integrated Individual descends by the path of Kaph into Netzach, they infuse their instinctual emotions with the Gedulah perspective and power. This transforms the entire emotional composition of the initiate into a perfect reflection of the Individual influx of light. This transformation immediately passes from Netzach to Hod and on to Yesod and Malkuth, bringing the whole structure of the Individual and personal Self into a state of

integrated equilibrium. This so deepens the "union with the inmost substance of the cause of causes", that the initiate can then begin their penetration of the veil and crossing of the Abyss.

Binah: Sephirah #3

#3: *Filled with Understanding of its perfect law, I am guided, moment by moment, along the path of liberation.*

Path #7 -- "The seventh path is the hidden consciousness because it is the radiance that illuminates all the powers of the mind which are seen with the eye of the intellect and through the contemplation of truth."

Genesis 1:6 -- *"And Elohim said: 'Let there be a firmament in the midst of the waters, and let it divide the waters from the waters.' "*

With Aleph, Elohim "made" the "firmament" (the compressed, condensed veil), but with Binah, Elohim says "*let there be a firmament*". In other words, this is a statement of *potential* and *intention*, not of "making" or manifesting. Furthermore, it speaks of the potential for sequence (*let it divide the waters from the waters*) within a unified, non-sequential realm (*in the midst of the waters*).

The true Binah stands on the opposite side of the Abyss from Gedulah. It is the realm of undifferentiated, un-sequentialized potential. Of course, hand in hand with this potential is also their inevitable realization or manifestation, but at the level of Binah proper, they exist only as unlimited potential. Gedulah on the other hand, is the point (NOW) where those potentials descend into the realm of sequence and begin their process of realization.

The Abyss is purely mental and is composed solely of our inability as sequentialized units of consciousness, to comprehend non-sequentiality. The crossing of this Abyss is therefore a matter of Understanding non-sequentiality. For the ascending initiate, Binah serves as the immediate goal of the crossing. It is, so to speak, the gateway to eternity.

As the initiate gazes toward the Abyss, Binah appears dark. Its non-sequential light is incomprehensible and therefore invisible to the Gedulah Individual. This is Binah as "Dark Sterile Mother". Yet when the initiate crosses the Abyss and experiences Binah first hand, it grows steadily brighter as Understanding increases and becomes the "Bright Fertile Mother". This is the "hidden" "radiance" mentioned in the "32 Paths" text.

Binah is where the eternal mental body resides. This is the Greater Self which projects its potential into Yetzirah and the realm of sequence, creating temporal mental bodies or Individual Selves. It is the direct causal agent of the Individual Self. For the ascending initiate, reaching Binah means merging with one's own Greater Self. In fact, it is one's own Greater Self that provides the constant guidance mentioned in Paul Case's statement.

The emanation of the Greater Self into the sequentialized Individual is what, in the words of the "32 Paths", "illuminates all the powers of the mind which are seen with the eye of the intellect and through the contemplation of truth." Once the initiate reaches across the Abyss and arrives at Binah, they must begin the work of *consciously* emanating the non-sequential light of the Greater Self into the lower levels of Self.

Daleth: 3>5

Path #14 -- "The fourteenth path is called the luminous consciousness because it is the essence of the Chashmal ["speaking silence"] which is the instructor in the secret foundations of holiness and their stages of preparation."

The key to understanding this "32 Paths" description is the Hebrew word Chashmal (cheth-shin-mem-lamed). Most often it's translated as "brilliant flame", "electrum" or "amber", but in the Talmudic tradition pertinent to kabbalah, it's said to be a special joining of two words: "speaking" (mal) and "silence" (chash). As a kabbalistic term, it refers to Shin (connecting Chokmah to Binah) which was created

from the "Marvelous Light" (Chokmah) and in turn gave birth to the "Arafel" (darkness) or Binah. Thus the Chashmal is a dynamic, fiery thing because of the tension created by this opposition of "speaking" and "silence".

It's this flow of duality emanating from Chokmah that creates non-sequential potential (Binah) out of Unity. With the path of Daleth, we see the dualistic essence of this dynamic Chashmal, emanated into the sequential realm and given form as infinite variety.

The Tarot image expresses this as the workings of Nature herself, which is quite apt considering that Daleth is emanated by Binah, the receptacle of the "substance of the unity".

The Chashmal is the root of the universal legality, expressed in the "32 Paths" test by the words, "the instructor in the secret foundations of holiness and their stages of preparation." Universal legality is what determines the form of EVERY thing, be it potential or actual. In Binah, we see this legality in its barest, most rudimentary non-sequential form and with the emanation of Daleth we see it become sequentialized.

Franz Bardon's truly magical kabbalistic speech, which relies upon the magical manipulation of this stage of the descending legality, is therefore attributed to the path of Daleth. Kabbalistic speech *consciously* employs the same "laws" that Nature follows.

The specific work of the path Daleth will vary for each initiate, but in every case it involves the integration of the Greater Self's perspective into every action and every exercise of one's Individual power. Thus every one of the initiate's actions comes to perfectly reflect and manifest the Universal legality.

Cheth: 3>6

Path #9 -- "The ninth path is called the pure consciousness because it purifies the essence of the Sephirot. It provides and adapts the design of their patterns and establishes their unity. They remain united, without diminution or division."

This is the primary avenue by which the Greater Self fills each of its Individualized emanations.

As the non-sequential Greater Self descends into the realm of sequence,

its essence, which is unified in Binah, splits into countless Individual manifestations, each of which expresses a part of the Greater's unified wholeness. Yet simultaneously, each part remains forever connected to the Greater's wholeness. The Greater's awareness of each of its sequential parts is never split and it remains completely and fully aware of all of its parts simultaneously. Only the parts themselves ever forget the Greater level of Self. This is what the "32 Paths" text is trying to say with, "It provides and adapts the design of their patterns and establishes their unity. They remain united, without diminution or division."

This then, is the initiate's work with the path Cheth -- to manifest the non-sequential Greater level of Self-awareness within their own familiar sequentialized Individual Self-awareness. The Tarot image of the Chariot, when placed upon the Hebrew Tree, accurately depicts this process.

The Chariot image illustrates the relationship between consciousness and time (i.e., sequence). Consciousness ALWAYS occupies a bubble of NOW-ness, shown here as the confining chariot. The charioteer represents the Greater Self after it's been Individualized and adorned with specific form, faculties, traits, etc. Behind this bubble of NOW-ness, lies the temporal past and above the surface of the two-dimensional card, lies the temporal future, yet to take form. No matter which direction the chariot moves, the charioteer ALWAYS exists within their bubble of NOW-ness.

With the work of Cheth, the initiate *consciously* fills their Individual Self with their Greater awareness and *consciously* picks up the reins of their chariot of NOW-ness and begins to *consciously* drive it *as their Greater Self*.

This begins a long temporal process of integrating the Greater Self level of awareness into EVERY aspect of one's life. Or, to use the "32 Paths" symbolism, the initiate "purifies the essence of the Sephirot."

Chokmah: Sephirah #2

#2: *Through me its unfailing Wisdom takes form in thought and word.*

Path #3 -- "The third path is called the sanctifying consciousness. It is the foundation of primordial wisdom and is called "enduring faith [Amen]", and its roots are truth [Amen]. It is the father of trust [Amen], from which the power of faith [Amen] emanates."

Chokmah exists beyond the ken of images and symbols, which explains the lack of a Temple image. This is the realm where "speaking" (Paul Case's "word") and "silence" (Paul Case's "thought") -- the components of the Chashmal -- are still united and exist in a purely potential state.

The author of the "32 Paths" plays with the various meanings of the word "Amen" (aleph-mem-nun) here, perhaps in an attempt to convey some sense of the dynamic between thought and word, between essence and manifestation, force and form, etc. This dynamic permeates Chokmah, yet in a subdued unified state, hence the common attribution of a dove gray color for Chokmah.

With the attainment of Binah, the initiate gained Understanding. Through the process of applying this nascent Understanding to every circumstance of their life, the initiate's Understanding matures into Wisdom. Understanding is situational -- it requires an object to focus upon. Wisdom however, is a continuous state that exists without the need for an object of focus and *automatically* manifests itself through the thoughts and words of the initiate. Here, the initiate not only Understands and manipulates the Universal legality, they ***become*** the legality itself.

At the level of Binah, which serves as the receiving vessel of the dynamism of the unleashed Chashmal, there exist a non-sequentially infinite number of Greater Selves, but in Chokmah, which serves as the source of the Chashmal, there is only one Greater Self. Chokmah is the Unity of infinite parts (8), distinct from Kether which is the Unity without parts (0).

The single Greater Self of Chokmah carries the seed that produces the many, just as the color gray carries the seed of both black and white yet is neither exclusively. Once the initiate attains Chokmah, they then act ***AS*** this single Greater Self.

When the initiate "stands" in Chokmah, they are faced with the choice of which of the countless Binah Greater Selves is to receive this seed. Ultimately, ALL receive the Chokmah seed simultaneously since this occurs at a non-sequential, eternal level; but for the already Individualized consciousness of the initiate, this is experienced as a binary, 'either/or' choice.

From Chokmah, the initiate, acting ***AS*** this single Greater Self, casts the seed of their Wisdom into first their own Binah Greater Self, and then into all the rest, one by one. Unfortunately, these temporal words we must use to communicate cannot accurately describe a non-sequential event -- they always imply the passage of time and sequence. Nonetheless, it must be understood that EVERY thing that transpires above the Abyss occurs without sequence and outside of time.

The corresponding Genesis passage tries to convey this concept of non-sequential simultaneity.

Genesis 1:3 -- *"And Elohim said, 'Let there be light', and there be light."*

In other words, in Chokmah, cause and effect occur in perfect unison, without sequence. Such is the power that the initiate of Chokmah possesses and must wield upon Self.

Shin: 2>3

Path #24 -- "The twenty-fourth path is called the imaginative consciousness because it provides an image to all created things that have an appearance, in a form fitting to each."

Shin, the Mother Letter of Fire, ***IS*** the Chashmal. This is the supernal root or template of the mental "plan of the primordial" (Aleph) and the astral "plan" (Mem). It is the seed which provides the archetypal "image to all created things that have an appearance, in a form fitting to each." With Shin, the initiate, acting ***AS*** the single Chokmah Greater Self, *consciously* implants this seed within the Bright Fertile Mother (Binah). Initially, the initiate's own Binah Greater Self is thus fertilized, but ultimately, ALL the Binah Greater Selves are fertilized.

As the Tarot image illustrates, this fertilization (pictured as a non-verbal sound vibration emanating from the Archangel's trumpet) brings about the birth of a new life amid the old.

Gimel: 2>4

Path #12 -- "The twelfth path is called the transparent consciousness because it is the substance of that phase of majesty (Gedulah) which is called revelation (khazkhazit). It is the source of prophesies that seers behold in visions."

The word "khazkhazit" was coined by the author of the "Book of Contemplation" and is translated variously as "visualizer", "gazing-glass", etc. All of these translations equate to revelation and divine vision. Yet here, quite subtly, is the veil of the Abyss, for revelation is a channeled and guarded thing -- it is received as though through a gazing-glass. This veil defines the separation between Briah (the realm of pure thought or idea) and Yetzirah (the realm of images that symbolize pure thought).

The emanation of Gimel from Chokmah to Gedulah is called "transparent" because it represents the descent of pure thought into the realm of images. Franz Bardon's magical evocation is attributed to this path because the basis of true evocation is the art of working with the pure thought that underlies all images and forms.

The initiate who *consciously* casts the seed of the single Chokmah Greater Self into their own Individual Gedulah, becomes a master of images and of the temporal NOW itself, perfectly manifesting Loving Kindness through their every thought, word and deed.

Zayin: 2>6

Path #6 -- "The sixth path is called the mediating consciousness because through it the emanation of atziluthic influence is increased. It causes that influence to flow unto all those so blessed as to be united to its essence."

The "atziluthic influence" mentioned in the "32 Paths" text refers to the path Beth which descends from Kether directly into Tiphareth, carrying with it the "holy powers". The entry of Chokmah into Tiphareth via the path of Zayin, multiplies this Kethric influx within Tiphareth. The transformation which ensues because of this multiplication is what empowers the initiate's ascent to Kether.

As the Tarot image implies, the work of this path is the *conscious* integration of the single Chokmah Greater Self into the initiate's own Individual and personal Self.

The radiant being that results from this integration of the supernal into the mundane is indeed a blessing to the world.

Kether: Sephirah #1

#1: *I am a center of expression for the Primal Will-to-Good which eternally creates and sustains the universe.*

Path #1 -- "The first path is called the mystical consciousness, the highest crown (Kether). It is the light of the primordial principle which has no beginning; and it is the primal glory. No created being can attain to its essence."

As I said above, Kether is the Unity without parts. It is the completely integrated whole that, in and of itself, experiences no separation into parts. For the Kethric consciousness, ALL is simply Self. In Kether, there is no differentiation into beginning, middle and end; no binary choice even. This is expressed in the corresponding Genesis passage:

Genesis 1:1 -- *"In the beginning, Elohim created the heaven and the earth."*

In other words, from the outset, so to speak, EVERY thing has existed within Kether -- the heaven *AND* the earth, simultaneously.

The initiate who attains to full cognizance of Kether becomes at-one-with EVERY thing; *every* who, what, where, when and why. For such a one, cause and effect occur simultaneously and life becomes a matter of simply BEing instead of willing or desiring or making happen.

Paul Case's statement best describes the initiate's work: one becomes a *conscious* center of expression for the Primal Will-to-Good, and actively participates in the eternal creating and sustaining of the universe.

The "32 Paths" proviso that "no created being can attain to its essence" is a VERY deep mystical statement. The "essence" of Kether is the Ayin, commonly translated as "nothingness". The Ayin is so utterly foreign to creatures that "exist" or have BEing, that it is impossible for us to even begin to comprehend this "realm". Our words cannot even begin to de-

scribe it. The only consciousness capable of comprehending the Ayin is Kether: The One Self, the Unity of ALL BEing. In other words, no *created* being can attain to the Ayin -- only the creator *of* being can do so. Which is another way of saying that unity with Kether brings the initiate their first perception of this essence.

Heh: 1>2

Path #2 -- "The second path is that of the illuminating consciousness. It is the crown (Kether) of creation (Briah), the splendor of the unity, like unto that which "exalts itself as the head over all." The masters of kabbalah call it the second glory."

Here we see the Kethric Light emanating down to Chokmah. This emanation of Light "crowns" Briah. In other words, it stands above the Briatic World of Chokmah-Binah. This descending illumination carries the "splendor" aspect of Kether, the Primal Glory. Therefore, Heh is called the "second glory" and is depicted in the Tarot as an Emperor who "exalts [him]self as the head over all." The Emperor may *wear* and *personify* the power that the Crown confers, but he is not the Crown itself. Heh represents the "first" non-sequential act of creation (Briah) which is/was/will-be a matter of Elohim turning Its attention "downward":

Genesis 1:2 -- *"And the earth was unformed and void, and darkness was upon the face of the deep; and the spirit of Elohim hovered over the face of the waters."*

Here, Elohim "does" nothing more than take notice of the state of potential and "hover over" attentively. Yet this divine attention is what ultimately sustains the universe since it provides the mental pattern for all that follows.

With Heh, the initiate *consciously* integrates this mental pattern which sustains all created things, into the single Chokmah Greater Self.

Vav: 1>3

Path #5 -- "The fifth path is called the root consciousness because it is the substance of the unity, joining itself to that understanding (Binah) which itself emanates from within the province of primordial wisdom."

With Vav, Kether impregnates the infinite potential of Binah with the Light of its substance. The corresponding Genesis passage gives insight into the nature of this "substance".

Genesis 1:4 -- *"And Elohim divided the light from the darkness."*

Thus we see that this "substance" has to do with dividing, which in this case is the same as multiplying since we have divided what was formerly one thing, into two things. In other words, this is the beginning of the potential for an infinite variety of distinct expressions of the One Thing. It's this influx of the "substance of the unity" that establishes the pillar of severity or form.

In the Tarot, this is symbolized by the Hierophant who philosophically divides the light from the darkness and passes on his own Understanding to those of lesser understanding.

The initiate's task with the path of Vav is to *consciously* cast their seed of Kethric "substance" upon the infinite potential within their own Greater Self and upon all the other Greater Selves resident in Binah.

Beth: 1>6

Path #4 -- "The fourth path is named the overflowing consciousness because from it, emanate all the holy powers, all the most ethereal emanations with the most sublime essences: they emanate one from the other through the power of the primordial emanator."

The Hebrew letter name 'Beth' means "house" in English. As the first letter in the Torah, it is said to house all the letters that follow. In other words, it contains within itself all the "holy powers" and conveys them directly to the Individual (Tiphareth).

Beth is the only path on the Tree that crosses two horizontal paths; the path Shin between Chokmah and Binah, and the path Aleph between Gedulah and Geburah. It pierces both the supernal veil of Shin and the Abyssal veil of Aleph, and comprehends both levels of the "plan". It also establishes the middle pillar of equilibrium, upon which are found the Sephirot pertaining to the levels of Self (Supernal Kether, Individual Tiphareth, personal Yesod and material Malkuth) -- the "holy powers of the unity".

The initiate's work of the path Beth is to *consciously* bring down the whole of Kether into the Individual Self. Once brought directly into Tiphareth, the Kethric Light permeates every other level of Self and every other Sephirot of its own accord; or as the "32 Paths" states it, "they (the "holy powers") emanate one from the other through the power of the primordial emanator (Kether)." In other words, the Tiphareth thus illuminated becomes like a radiant sun which casts its light in every direction, giving life and sustenance to all.

This fills the initiate with the constant Kethric awareness of the Unity *at the Individual and personal levels of Self.*

The 16 “Hidden” Paths

The 231 Gates of Initiation are formed out of the 32 Paths of Wisdom and the 16 “unspoken” or Hidden Paths of the Hebrew Tree. These Hidden Paths exist as potentials, whose realization and fulfillment are unique to each traveler who employs them. Consequently, little of value can be "spoken" regarding their individual meanings.

We cannot assign letters to them or define them with scripture or describe their experiential significance, such as we can with the 32 "spoken" Paths. Knowing them is not a thing that can be transmitted by words from one person to another -- only the traveler knows the true meaning of the Hidden Paths involved in their travels -- and it is only by experiencing them first-hand that this knowledge is gained.

These "unspoken" Paths are the hands-on thumbprint of the traveler and are what distinguishes one person’s journey from another. They are avenues of uniqueness and spontaneity. The most that can be said of them is that they integrate the influences of the Sephirot in all the ways that the 32 "spoken" Paths do not.

Therefore what follows is a very brief commentary on each of the Hidden Paths, which merely points out their place in the initiatory sequence. Since the individual uniqueness of each traveler’s experience of these Hidden Paths precludes the use of universal symbolic imagery akin to that used with the 32 “spoken” Paths, I have chosen to visually represent each Hidden Path very simply as a blending of the colors of the two Sephirot the Hidden Path connects.

HP:5>9

Geburah > Yesod:

The first Hidden Path of the initiatory sequence represents the direct integration of the higher will of the Individual Self, into the heart of the traveler’s astral character.

HP:5>10

Geburah > Malkuth:

The second Hidden Path of the initiatory sequence represents the direct integration of the higher will of the Individual Self, into the traveler's mundane awareness.

HP:4>9

Gedulah > Yesod:

The third Hidden Path of the initiatory sequence represents the direct integration of the higher empathy of the Individual Self, into the heart of the traveler's astral character.

HP:4>10

Gedulah > Malkuth:

The fourth Hidden Path of the initiatory sequence represents the direct integration of the higher empathy of the Individual Self, into the traveler's mundane awareness.

HP:3>4

Binah > Gedulah:

The fifth Hidden Path of the initiatory sequence represents the direct integration of the Greater Self into the higher empathy of the traveler's Individual Self.

HP:3>7

Binah > Netzach:

The sixth Hidden Path of the initiatory sequence represents the direct integration of the Greater Self into the emotional structure of the traveler's astral character.

HP:3>9

Binah > Yesod:

The seventh Hidden Path of the initiatory sequence represents the direct integration of the Greater Self into the heart of the traveler's astral character.

HP:3>10

Binah > Malkuth:

The eighth Hidden Path of the initiatory sequence represents the direct integration of the Greater Self into the traveler's mundane awareness.

HP:2>5

Chokmah > Geburah:

The ninth Hidden Path of the initiatory sequence represents the direct integration of the Primal Will into the higher will of the traveler's Individual Self.

HP:2>8

Chokmah > Hod:

The tenth Hidden Path of the initiatory sequence represents the direct integration of the Primal Will into the lower intellect of the traveler's astral character.

HP:2>9

Chokmah > Yesod:

The eleventh Hidden Path of the initiatory sequence represents the direct integration of the Primal Will into the heart of the traveler's astral character.

HP:2>10

Chokmah > Malkuth:

The twelfth Hidden Path of the initiatory sequence represents the direct integration of the Primal Will into the traveler's mundane awareness.

HP:1>4

Kether > Gedulah:

The thirteenth Hidden Path of the initiatory sequence represents the direct integration of the Unitary Awareness into the higher empathy of the traveler's Individual Self.

HP:1>5

Kether > Geburah:

The fourteenth Hidden Path of the initiatory sequence represents the direct integration of the Unitary Awareness into the higher will of the traveler's Individual Self.

HP:1>7

Kether > Netzach:

The fifteenth Hidden Path of the initiatory sequence represents the direct integration of the Unitary Awareness into the emotional structure of the traveler's astral character.

HP:1>8

Kether > Hod:

The fifteenth Hidden Path of the initiatory sequence represents the direct integration of the Unitary Awareness into the lower intellect of the traveler's astral character.

Introduction
Working a Gate

A Gate is the sequential travel from Sephirot to Sephirot which includes the Sephirot AND the 'paths' that connect them. In modern lingo, we use the term 'path' to indicate the connections between the Sephirot, but this is really a misuse of the term, Kabbalistically speaking. In the ancient texts, the term "Path" is used for the Letters AND the Sephirot (e.g., the 32 Paths of Wisdom) and is not an indication of a connection between the Sephirot. So, the individual Sephirot are each "Paths" as are each of the individual Letters.

The first step in working any Gate is to raise your conscious awareness to the "highest" (or first in the sequence noted) Sephirah of that particular Gate. There are many ways of achieving this but the one I'd recommend for you is the "Eight Temples Meditation Project" (8T). I recommend it because it is *experiential* and not *just* intellectual. And, of course, I recommend it to you because I wrote it. ;-) It integrates very well with the 231 Gates of Initiation.

So, first you must raise your awareness to the "highest" Sephirah of the Gate. Then, you must establish a connection with the next Sephirah in the Gate's sequence. One way to do this is to project the image of the corresponding Tarot arcana (except with the "Hidden Paths" . . .) and cause it to become a path which connects the two Sephirot. Then, you (i. e., your conscious awareness) traverses the projected image / pathway into the "lower" Sephirah.

Once you have arrived, you create a similar pathway to the next Sephirah in the Gate's sequence, and so on until you reach the place where you started (or the terminus of the Gate in the case of the 38 simple Line-forms).

Then you reverse your footsteps until you again return to your starting point.

Working the Gates is about the focused and intentional movement of your conscious awareness. This integrates the levels of self-awareness involved in that particular Gate.

To illustrate a simple Gate (which looks like a 'path'), let's look at the first Gate in the Sequence of Initiation: Yesod > Tav > Malkuth. This Gate is composed of three "Paths": #1 - Yesod, #2 - Tav, #3 - Malkuth. It is "worked" or traveled, by first attaining Yesod, and then the 'path' of Tav is pursued "down" into Malkuth. This integrates the Yesod level of one's consciousness, into the Malkuth level, via the journey of Tav. The Gate is then traversed in the opposite direction, upwards and officially ends back in Yesod, thus integrating the Malkuth level of one's consciousness into the Yesod level, via the reverse journey of Tav.

When working a Gate, one always begins with the highest Sephirot and travels first to the lowest Sephirot. In the example of Gate #4 (8.10.9.8), which is composed of six "Paths", one begins in the highest Sephirot of Hod (8) and travels first to the lowest Sephirot in the Gate, Malkuth (10). Then one makes their way from Malkuth to Yesod and then from Yesod back to Hod, completing the form. And then, one works the Gate in the reverse direction by traveling from Hod to Yesod, then to Malkuth and ending once again in Hod.

So, a Gate is composed of *at least* three "Paths" and represents the integration of the various levels of consciousness symbolized by the "Paths". A "Path" on the other hand, represents just a single discrete level of consciousness and not an integration of levels.

Each Gate is a simple geometric form. There are 38 lines (i.e., two Sephirot and one path, like Gate #1), 68 triangles (three Sephirot and three paths), 74 quadrangles (four Sephirot and four paths), 41 pentangles (five Sephirot and five paths) and 9 hexangles (six Sephirot and six paths). The final Gate, #231, is the whole Tree and represents the final integration of the completely self-realized Self.

The 51 Temporal Gates

Gate #1

1st task of **2nd** degree.
1st Lettered Path of 22 total.
Sequence: Yesod <TAV> Malkuth.
Return: Malkuth <TAV> Yesod.
Levels of Self: The Personal Self (Yesod) and Mundane Awareness.
Pillars: Middle-2.

26 Yesod ש

32 The World ת

30 Malkuth ⊗

Gate #2

1st task of **3rd** degree.
2nd Lettered Path of 22 total.
Sequence: Hod <AYIN> Yesod.
Return: Yesod <AYIN> Hod.
Levels of Self: The Personal Self (Hod & Yesod).
Pillars: Middle-1. Severity-1.

23 Hod ☿

28 The Devil ♈

26 Yesod ☽

Gate #3

2nd task of **3rd** degree.
3rd Lettered Path of 22 total.
Sequence: Hod <QOOPH> Malkuth.
Return: Malkuth <QOOPH> Hod.
Levels of Self: The Personal Self (Hod) and Mundane Awareness.
Pillars: Middle-1. Severity-1.

23 Hod ☿

31 The Moon P

30 Malkuth ⊗

Gate #4

3rd task of **3rd** degree.
1st Triangle of 68 total.
Sequence: Hod <QOOPH> Malkuth <TAV> Yesod <AYIN> Hod.
Return: Hod <AYIN> Yesod <TAV> Malkuth <QOOPH> Hod.
Levels of Self: The Personal Self (Hod & Yesod) and Mundane Awareness.
Pillars: Middle-2. Severity-1.

THE PERSIAN RIVAYATS

of Hormazyar Framarz

And others

Their version with introduction and notes

by Ervad Bamanji Nusserwanji Dhabhar, M.A.

Published by the K.R. Cama Oriental Institute, Bombay, 1932

CONTENTS

1. Pahlavi and Avesta Alphabet
2. Yatha-ahu-vairyo prayer in Avesta
3. 21 words of Yatha, and the corresponding 21 Nasks
4. Contents of the Nasks
5. Division of the Nasks into three groups
6. Number of Yathas to be recited on undertaking different works
7. Number of Yathas recited in various Yasna-services
8. Number of Yathas recited in place of various Avesta prayers
9. Efficacy of Ashem-vohu recited on various occasions
10. Commentary on Ashem-vohu
11. Tying the Kusti on the waist. At what age should a child be invested with the Kusti. The three bands and the four knots of the Kusti -- their object. The weaving of Kusti -- by whom woven and of what material should it be
12. The ceremony of Navzud [Naojote], i.e., investiture with sudre and Kusti, according to the practice of the Indian Parsees
13. Avestic formula for ceremonially cutting a newly woven Kusti
14. How far should one keep oneself away, while another is tying on the Kusti
15. In what direction to turn while tying on the Kusti at night, if there be no lamp
16. What kind of sacred shirt (sudre) is to be worn beneath the Kusti
17. sudre and Kusti should be flawless: how far the flaws in a sudre or Kusti are allowable.
18. How far does the appearance of a menstruous woman affect the rite of tying on the Kusti
19. Importance of Patet, i.e., repentance of one's sins
20. A Dastur prescribing punishment out of proportion to the crime is a sinner
21. Patet formula recited by one person for another is allowable in the case of the former's incapacity for its recital
22. An impious Dastur cannot prescribe punishment for sins
23. One must repent of one's sins chiefly in one's lifetime
24. The recital of Patet for one after one's death
25. One should repent of one's sins before a Dastur, chiefly the day Ram, of the month Mihr
26. Can a behdin (a layman) punish a Herbad (a priest) for his sins
27. Manure prepared by a darvand for cultivation
28. Speaking the truth
29. On speaking falsehood
30. On Mihr-druj, i.e. breach of faith

31. On swearing and perjury
32. Saogand-Nama or the Book of Oaths (2 treatises)
33. On loans and the interest thereon
34. The law of evidence
35. Cultivation of land in partnership
36. Loans and extortions from juddins
37. Lawful and unlawful trading and profiteering
38. Industry and unlawful acquisition of wealth
39. Behests of parents to be executed by children
40. Decision about intended gifts
41. The creation of the world: man, fire, and cattle refused to come down to this world
42. Fire and Kershasp
43. Care of fire
44. Rays of the sun should not fall on fire and other precautions to be taken with respect to fire
45. Water in a pot left boiling over fire should not be allowed to overflow
46. Collecting household fires and carrying them to fires of the higher grade
47. Fire lighted at midnight destroys devs
48. Fire to be kept apart from water
49. Household fires to be collected and carried to Atash-gahs
50. Fire before which Darun and Yasna ceremonies are performed, if allowed to be extinguished, will increase the power of devs
51. Food cannot be prepared on fire wherein nasa is burnt
52. Descending order of merit for fires -- whereon a corpse or other impurities are burnt -- removed to Atash-gahs
53. Fire lighted near the Dakhma
54. Names of six kinds of fire
55. Adar Burzin, Adar Khordad, and Adar Gushasp fires
56. Atash Adarans to be established at every place where there are Behdins, and during the Fravardegan days these fires should be collected and carried to Atash Behrams
57. How to consecrate an Atash Adaran
58. Atash Behrams to be established wherever there are Behdins
59. Fire of lightning should not be used in the consecration of an Atash Behram
60. Sixteen fires necessary for the consecration of an Atash Behram -- how they are purified
61. What kind of gospend to be sacrificed for the zur (i.e., fat-offering) of the fire
62. [Miracle of the fire Adar Burzin Mihr]
63. [Atash Behram of Navsari]
64. Out of one Atash Behram, two cannot be made
65. No one can see the fire of an Atash Behram, except Dasturs, and Herbads who are Navazud, i.e., who have been qualified with the greater Khub ceremony
66. About the establishment of fire-temples and the care of fire
67. The fifth question from the Gajasta Abalish about the adoration of fire
68. [Gifts for the Atash Behram may be accepted from those of a foreign faith]
69. Fire and water to be kept at a distance from nasa
70. Punishment for bringing nasa in contact with water and fire
71. Do water and fire kill men?
72. Punishment for throwing nasa frequently in water
73. First and second questions from 'Gajasta Abalish' about water and fire
74. Water to be properly preserved from the impurity of nasa and explanation of rain-water falling on nasa in the Dakhma
75. The nasa of the living is the same as nasa of the dead, when taken to fire or water
76. Hihar-nasa (i.e. the bodily refuse of the living and the dead) coming in contact with a heap of corn in corn fields
77. How far should the Barsom and other sacred implements be kept away from the Nasa of the living
78. Difference observed as regards the culpability of the righteous and the wicked, when the bodily refuse of either comes in contact with water or fire
79. Before cultivating land, care should be taken to free it of nasa, if any

80. Proper precautions about nasa to be observed in the cultivation of the fields of a Zoroastrian under the superintendence of Zoroastrian or non-Zoroastrian servants
81. Cultivation of a field held by a Zoroastrian in partnership with a juddin
82. How should a Zoroastrian act when he sees nasa on a piece of land cultivated by a juddin
83. Precautions about dead matter in flowing and stagnant waters
84. Disposal of the nasa of a non-Zoroastrian lying on the road, by Zoroastrians
85. How should nasa lying on the main road be disposed of
86. How should nasa of Behdins or juddins lying in a cultivated field be disposed of
87. Well-water polluted by nasa
88. Water should not be drunk nor spilt unnecessarily at night and other precautions about water
89. How and when should the water of ponds be used
90. Different kinds of water spilt on the earth mixes with sub-soil water at different periods and about the water of Aredvi Sura Anahita
91. Alburz mountain, Farakh-kart sea and Khar-i talata (i.e., the three-legged ass)
92. The Saokant Mountain
93. The Hom-tree and the Kar fish
94. The Khar-i talata and the Hom-tree, according to the 'Minu-khrat'
95. The birds Amrush and Chamrush
96. [The sea-ox Sarsaok]
97. Walking bare-footed
98. Happy and unhappy lands
99. On making water
100. Foundation laying of the Dakhma (i.e., the tana ceremony)
101. Construction of a new Dakhma and repairing an old Dakhma
102. Water collecting in the inner well, of the Dakhma should be let out by boring a hole into it
103. Quotation from Vendidad 3 about the Dakhma
104. About erecting a new Dakhma, and keeping water away from nasa
105. Controversy raised at Surat about the disposal of the corpse of Nanabhai Punjya in a new Dakhma
106. Plan of the Dakhma
107. How should land be cultivated in which a Dakhma or an old astodan (ossuary) stands, or if there is any bodily refuse of the living on it
108. How should nasa be removed by the nasa-salars in the inner well of the Dakhma
109. Ceremonial disposal of the corpse of a person killed by a wild animal
110. Juddins cannot carry the biers of Zoroastrians
111. Precautions to be taken by the nasa-salars and hammals (i.e., the principal and assistant corpse-bearers), if blood or any matter exudes from the body, or if the paiwand is let slip, or if they utter anything without finishing the baj
112. The dasturi formula
113. What should the nasa-salars do, if any open part of their body or their garments comes in contact with nasa
114. How should one purify oneself after coming in contact with a dead dog
115. Precautions observed by nasa-salars when their hands with the gloves on come in contact with any bare part of nasa
116. Sagdid, i,e., the dog's gaze and the kinds of dog required for sagdid
117. Various precautions to be observed while carrying the corpse to the Dakhma: who, besides the nasa-salars, can carry the corpse, in case of necessity?
118. Precautions to be observed with regard to the corpses of persons dying unnatural death
119. Precautions to be observed if death occurs in a Yasna-gah
120. Death in an Atash Behram
121. Nasa on a high road or in a cultivated piece of land
122. Nasa coming in contact with a wooden couch, or a plastered piece of ground or a piece of land set with stones, or with felt-rugs, &c.
123. Death on the upper floor or a terrace; death by hanging; death on the ground-floor; death in a common passage leading to two rooms
124. On a davand throwing nasa the house of a Behdin, out of spite

125. Nasa coming in contact with a wooden structure
126. About the door or threshold of a house polluted with nasa and about horses or draught-animals coming in contact with nasa
127. One coming in contact with nasa should undergo Bareshnum purification
128. Death of a person seated upright
129. Death on a tree
130. How far does pollution go, if one amongst a multitude of men dies
131. Nasa lying in a heap of wood, or in corn, or in corn-fields, or in stalks, or straw
132. Bricks, earth, mortar, dung-fuel, and ashes, &c., coming in contact with nasa
133. Nasa in a jar of wines or of oil
134. Death occurring on the sea
135. How sagdid should be performed over a corpse buried underneath a debris of brick-bats or earth
136. Precautions to be observed by Behdins when juddins carry a corpse
137. Bones of men or animals found in the folds of garments
138. Spines of a hedgehog found in the dung of animals
139. Bareshnum purification to be undergone by one polluted with nasa
140. Difference between the nasa of a Behdin and of a darvand
141. About coming in contact with nasa in mown grass
142. About dead matter crushed with a stick
143. Keeping a lamp or light near a dead body at night, and the1 space of ground polluted by nasa
144. About food cooked in a house where death occurs
145. After how long does the ground of a covered place become pure after death
146. Temporary nasa-khana or, Zad-marg should be erected for the dead
147. When is pollution of nasa worse
148. The shroud (Kafan) for the dead
149. The legs of the dead should be bent, before taking them to the Dakhma
150. Precautions to be observed by the nasa-salars from the time when the dead body lies in the house up to the time when it is finally disposed of in the Dakhma
151. The gah-sarna (Yasht-i gahan)
152. Juddins cannot carry the biers of Zoroastrians to the Dakhma: precautions to be observed by the corpse-bearers
153. Consumption of a corpse by vultures
154. A person going in a funeral procession as well as those who have seen the corpse must, take a bath
155. Fresh meat should neither be cooked nor eaten for three days in a house where death occurs
156. Mourning for the dead prohibited
157. The form which the soul assumes for the first three days after death and the places frequented by it during that period
158. Tars-i Studan ceremony in honour of Srosh
159. How do the souls of the righteous and the wicked feel when the corpses are eaten away by vultures
160. What becomes of the five spiritual faculties of a man after death
161. The journey, to the Chanvad bridge of the souls of the righteous and the wicked
162. On the Srosh ceremony of the dead and the consecration of pure white garments with Darun
163. The dignity of Srosh Yazad
164. Ceremonies of the dead for the whole year
165. White garments (jama-i ashodad) consecrated in honour of the dead
166. Principal ceremonies of the dead for the first year
167. Sidab (rue) to be prepared with garlic on the third day's ceremony of the dead
168. Dahman Afrinagan to be recited on the dawn of the fourth day after death
169. If the three days' after the death of a person have not been performed owing to unavoidable circumstances, they should be performed thereafter
170. The souls of the pious come down here on their rojgar ceremonies
171. Ceremonies of one dying during five Gatha days
172. Invocation, in ceremonies, of a dead person whose name is unknown
173. Ceremonies on the death of a child aged one day up to seven years
174. Children dying aged one day up to 8 years will look like those aged 15 years, in the next world

175. Zinda-ravan ceremony can be performed for a boy or a girl 11 years and 3 months old, and not of one under that age
176. Dastur Noshervan Marzban's last testament: advice to his son as to what he should do after his father's death
177. Ceremonies to be performed for one year on the death of a person aged 15 years and upwards
178. On the bringing up of children
179. On the duty of educating children
180. Submission to the authority of parents and teachers and abstaining from harassing them
181. Which parent is created superior to the other -- the father or the mother
182. Children should not neglect the duties towards their parents
183. Disobedient children to be deprived of patrimony
184. Ritual prescribed for one who dies aged 12 years and under
185. On adoption -- its varieties
186. Proper age of betrothal and marriage
187. On the merit of contracting marriage
188. On negotiating marriage contract
189. Five kinds of marriage
190. The marriage ceremony, the dowry, and the announcement of the mahr, or, the marriage gift
191. The status of the five kinds of wives under different circumstances and the remarriage of widows
192. Patrimony to be divided among survivors
193. On divorce
194. Consorting with one's wife
195. Nocturnal pollution
196. On suckling a child
197. On adultery
198. On the hamemal sin, or, sin affecting the accusers
199. Obedience of wives to their husbands and of children to their parents
200. About menstruous women and the davazda-hamast ceremony performed for the expiation of sins committed by them
201. Treatment of women after childbirth and still-birth and about a woman who dies during her periods or pregnancy
202. About purifying the clothes of the carriers of the dead and those which have become riman (i.e., defiled) otherwise
203. On the purification of metals, stones, etc. which have become defiled
204. On cooking and drinking vessels
205. Pollution of wood
206. Trimming the hair and ceremonial disposal thereof
207. Nail paring
208. On swallowing a tooth unawares: on a sore mouth: on the soreness of any part of the body
209. Blood-letting
210. About a child biting another child
211. About burns and brands
212. About a child falling in water
213. On suckling a child (see p. 196)
214. About a child defiled by coming in contact with the dead
215. Kinds of animals regarded as nasa when dead
216. About Jam and Jame and different species of men and animals
217. The dog zarrin-gosh
218. About protecting a hedgehog and killing a tortoise
219. Story of Jam and Jame
220. Animals, birds, and fish which are fit to be eaten
221. On the lawful slaughter of cattle and fowl
222. Eating unconsecrated flesh of cattle is unlawful
223. Offering the fat of a gospand, lawfully slaughtered, to the fire of the Atash Behram on the fourth day after death
224. Domestic animals to be properly taken care of

225. On the domestic animals and the cock: the head of a domestic animal lawfully slaughtered can be consecrated
226. On wearing silken clothes and on the use of honey and opium
227. On drinking wine
228. On the consumption of ghee or clarified butter prepared by darvands
229. Fruits and vegetables sold by juddins
230. Hot water does not remove druj-i nasush
231. Hides tanned by juddins
232. On killing noxious creatures and on the eating of the flesh of a kharfastar
233. Food gnawed by noxious creatures
234. About the cattle which have eaten dead matter
235. Dead matter taken as medicine
236. How should Barashnom purification be administered to one of a foreign faith, who wished to be cleansed of the pollution by nasa
237. On peaceful and forcible conversion
238. On the treatment of juddins: their conversion
239. Diseases and their remedies
240. Amahraspands and Yazads to be propitiated, to avoid calamities and to ward off diseases
241. The blind and the maimed to be contented with their lot
242. On being grateful to God: Adarbad Marespand on gratefulness -- his miracles
243. How man brings on himself calamities: prevention is better than cure
244. Behdins on attaining to majority should do various good deeds, chiefly six; penalties prescribed for not doing them; enumeration of greater and less sins and margarjan crimes
245. Degrees of crimes and margarjan sins: sins which make one riman or margarjan
246. The merit of Kwedodas
247. On sodomy
248. On padyab (ablution) with gomez and water: story of Ibliis (Satan) and Tehmuras, illustrating the efficacy of bull's urine
249. Nirang to be recited on applying gomez
250. Different prayers to be recited during the five gahs: the duration of each gah
251. The Rapithwin gah: its celebration
252. The Afrinagan of Rapithwin -- when recited: the Afrinagan given in Avesta
253. Afrin-i Rapithwin (p. 303)
254. Recital of Niyayeshes (p. 304)
255. Number of Yatha [Ahunwar] to be recited in place of different Avestas
256. Khwarshed Niyayesh with translation
257. On the performance of Niyayesh in general
258. On the Mah Niyayesh
259. The waxing and waning of the moon (p. 305)
260. On seeing the new moon in different constellations every month
261. On recitation of Ohrmazd Yasht
262. On recitation of Srosh Yasht
263. Ohrmazd Yasht with translation from the beginning up to the 20 names of God
264. Nothing to be given to the wicked (p. 306)
265. Gifts to be given to the worthy and the good
266. [On charity] (p. 307)
267. [Delay is dangerous] (p. 308)
268. [Proper maintenance of Atash Behrams] (p. 310)
269. Baj to be recited before and after taking meals, and on eating meals with baj, i.e., by observing silence: the manner of cleansing the mouth after eating: meals not to be eaten by two persons together from the same plate: meals supplied by darwands, not to be taken: cleansing the mouth with hot water after meals and spitting it out on the ground is a sin -- the way in which the mouth and the teeth should be cleansed (p. 310)
270. On fasting
271. On the recital of Afrinagans (p. 313)
272. Dibache, or, Introduction of the Afrinagans

273. The last portion of the Dhup-nirang (or, nirang bui dadan)
274. Afrinagan of Ardafravash, as recited in Iran (to be recited with the karda of Tao ahmi nmane)
275. Afrinagan with the Khshnuman of Mihr
276. Afrinagan of Warharan Yazad
277. Afrinagan of Mino Ram (to be recited on occasions of joy, entertainments, and marriage)
278. Myazd ceremony to be performed five days in a month
279. Khshnuman of the Afrinagan of Rashnu Yazad
280. ... of Ashtad Yazad
281. ... of Anagran Yazad
282. ... of day Ohrmazd, month Frawardin
283. ... of Vanant Yazad
284. ... of day Hordad, month Frawardin
285. ... of day Tishtar, month Tishtar
286. ... of day Mihr, month Mihr
287. ... of day Aban, month Aban
288. ... of day Adar, month Adar
289. ... of day Frawardin, month Adar and of day Khwarshed, Month Dae
290. ... of day Vohuman, month Vohuman
291. ... of day Spandarmad, month Spandarman and of Haft Amahraspandan
292. ... of day Hordad, month Spandarmad
293. ... of Nonabar (for the first day)
294. ... of Nonabar (for the second day)
295. ... of Nonabar (for the third and fourth days)
296. Khshnuman of the Afrinagan recited on the erection of a new building
297. Khshnuman of the Afrinagan recited on a now well being dug.
298. Afrinagan Dahman, with Afrinami (with the Persian translation of Afrinami
299. Afrinagan of Gahambar
300. Afrinagan of Gathabyo
301. Afrinagan of Srosh
302. Afrinagan of Srosh recited for the first three days in the Aiwisruthrem gah in a house where death occurs and also on the second day of Nonabar
303. Afrinagan of Siruza (abbreviated)
304. Afrin-i Shash Gahambar (in Persian characters)
305. Afrin-i Gahambar Chashni (in Persian characters)
306. Afrin-i Myazd (in Avesta characters)
307. Afrin-i Zartosht (in Avesta with Persian translation)
308. Afrin-i Ardafravash (in Persian characters)
309. Afrin-i Buzorgan (in Persian characters)
310. Afrin-i Dahman (in Persian characters)
311. Doa-i Behram Varjavand, i.e., Chithrem Buyad, (Pazend in Avesta characters)
312. Doa-i Hoshedar and Behram Varjavand, to be recited after prayers, especially the Niyayesh -- recited in Iran (in Persian characters)
313. Doa Nam-Setayashna (Pazand in Av. characters)
314. Nemaz-i Ohrmazd (Pazand in Av. characters)
315. Doa Nam-Setayashna (Pazand with Persian translation)
316. Marriage ceremony as performed in Iran (Paz. in Av. characters)
317. Doa-i Nekah, i.e., Tandarosti, as recited in Iran after the marriage ceremony (in Persian)
318. Paiman-i Pahlavi, or, Marriage ceremony, as performed India (in Persian characters)
319. Doa-i Nekah, i.e., Tandarosti
320. About Gahambars and the use of Sudab (rue), and Noshirvan Marzban's account of the Gahambars
321. Story of the Gahambar of Noshirvan, the just and Marzban Karsani
322. The Zand or Commentary on Afrinagan Gahambar (Paz. with Persian rendering)
323. The Yasna service as recited in the Gahambars, with the Khshnuman
324. The Yasna service of the five Fravardigan days the five Gatha days

325. Number of Barsom rods to be used in different Yasnas and the Khshnuman of Vendidad
326. The Paragna Ceremony, or, the Ceremony preparatory to the Yasna
327. Number of Yatha to be recited in different Yasnas
328. Barsom rods used in Yasna services
329. Barsom twigs of the gaz (i.e., of the tamarisk tree) only to be used in the service and not of any metal
330. 33 alats or apparatus, round about the Hawan
331. 15 hunar or capabilities of a herbad and the 5 virtues to be acquired by the faithful
332. Nirang is the life of Religion; -- who is a Dastur? -- the five nirangs to be learnt by herbads and the question asked of Adarbad by Husht
333. About acknowledging a Dastur and providing him with one-tenth of one's income
334. Rozgar of the departed relatives
335. Performance of the Darun ceremony
336. The souls of the departed visiting this earth
337. On Farvardegan days
338. Ceremonies of the dead and the Staomi (Y26)
339. The ritual of the Farvardegan days
340. Baj of 1200 Ashem and of 1200 Yatha
341. Darun to be consecrated in the Gatha days, with the Afrinagan of Panji
342. Darun-i Fravashi in the Panji
343. Khshnuman of the Darun of Mino Marespend
344. Rasmaha-i Behdinan (about Farvardigan days)
345. Khshnuman of the Darun of Ohrmazd roz
346. ... Vanant Yazad
347. Ritual of the Farvardegan days
348. Where to recite avanghao and staomi in the Darun consecration
349. Khshnuman of the Darun of day Hordad of the month Farvardin
350. The greatness of the day Hordad of the month Farvardin
351. Darun of Haft Amshaspand and its Khshnuman
352. Nirang of the 5th day of the 12th month (in Pahlavi) and the description of this day
353. The Hordad sal gah and its Khshnuman (6th day of the 12th month)
354. Khshnuman of the Darun ceremony of day Teshtar of month Teshtar
355. [An account of the Tiragan Jashan]
356. Khshnuman of the Darun of day Mihr, month Mihr
357. ... Aban, month Aban
358. ... Adar, month Adar
359. ... Vohuman, month Vohuman
360. ... of Srosh
361. Four Daruns consecrated for the dead on the dawn of the fourth day
362. Zinda-ravan ceremony with the four Darun ceremonies consecrated on the dawn of the fourth day
363. Khshnuman of the Darun-i Safar
364. One going on a journey of 12 farsangs must have darun consecrated in the manner of Warharan Yazad
365. Khshnuman of the Darun of Warharan Yazad
366. Khshnuman of the Darun consecrated with the head of a gospand
367. Khshnuman of the Darun consecrated with the head of fowl or bird
368. Khshnuman of the Darun of Rapithwin
369. Khshnuman of the Darun of Nonabar
370. Khshnuman of the Darun of Siruze
371. Khshnuman of the Darun of Shahin baj
372. How each day of the month is styled and mentioned in the Khshnumans
373. Khshnumans -- greater and smaller -- for each of the 30 days
374. How the days and months and the five Gatha days are mentioned in the Darun consecration
375. The manner of reciting the Yasna, etc.
376. [Ink prepared by darvands should not be used]
377. Ohrmazd and the Amahraspands

378. Loin-cloth should not be worn
379. Parts of the body to be covered while reciting Niyayesh
380. Priests should not eat the food cooked by Behdins (i.e., laymen), nor should they come in contact with them while eating
381. Pronunciation of the compound ao and of s in Spitama
382. Secrets should be written in Avesta or Pahlavi characters
383. Nirang av-padyav yashtan, i.e., consecration of Nirangdin (in Pazand)
384. The same -- twice (in Pazand)
385. How should one act in the nine nights' retreat, after undergoing the Barashnom purification
386. Administration of Barashnom to one who is not riman (polluted)
387. The Indian Parsis asked by their Persian confreres to go to Persia and learn there the technicalities of the ritual
388. Bagh-i Barashnom (i.e., the place where Barashnom is administered); -- how should it be prepared -- with a plan; the qualifications of a Yaozdathragar
389. The consecration of ab and padyab (i.e., water and gomez;) laying out the Barashnom gah, with a plan; administration of the Barashnom to an ordinary person, as well as a riman, etc.
390. Administration of the Barashnom to a riman with a plan of the Barashnom gah
391. Barashnom purification with the retreat of 9 nights; when is this retreat vitiated and when not; the order in which the different members of the body are washed and the manner of drinking gomez
392. About the purification of various things which are defiled
393. Zand or Commentary of Vendidad 9 (abbreviated): and about the Barashnomgar and Barashnom
394. The qualification of a Yaozdathragar
395. On the qualifications of a Yaozathragar and the merit of undergoing the Barashnom purification (composed in verse by Noshirvan Marzban)
396. Qualifications and reservations under which Herbadship, i.e., proper priestly duty should be preformed
397. sudre and Kusti should be in proper order, especially at the time of any consecration
398. Precautions to be observed when there is any bodily refuse within three steps of the ceremonial apparatus
399. Consecrations offered with or without zur
400. About the consecration of Fravashin
401. About the consecration of Vendidad
402. About the performance of Yasna
403. Merit of the performance of various ceremonials as well as of the Gahambars
404. Merit of performance of Vendidad, Yasna, Visperad, and Darun, with or without zur
405. Correct preparation of Darun and Farsast: Symbolism of the Darun
406. The erection of a Dar-i Mihr
407. Reward or retribution for the priest, for proper or improper consecration
408. About the garments worn by priests
409. Punishment of an unqualified Yaozdathragar
410. Four kinds of Yasnas offered to the Yazads
411. About the merit of Yasna and Myazd
412. Manner of reciting and consecrating Vendidad
413. A Yasna service which is virasta and gumani and drayan
414. The proper occasions when the formula avanghao and staomi are recited in the consecration of Vendidad: When is the Khub valid and when vitiated
415. The proper manner of consecrating Darun
416. About the varas (hair) of the sacred bull
417. Barsom twigs to be gathered from the pomegranate or the tamarisk only
418. About the hom sent to India from Iran and about the urvaram
419. The Navazud or Navar initiation
420. Can a Herbad who has gone into a Dakhma be again fit for Herbadship? (see II, p.9)
421. About the division of the dioceses (husht) by the Herbads and their emolument (nirmad)
422. The ceremony of Geti-Kharid or Navazud

Šāyast-nē-šāyast

A Pahlavi Text on Religious Customs

edited, transliterated and translated
with Introduction and Notes

by

Jehangir C. Tavadia
Lecturer in Hamburg University

HAMBURG
FRIEDERICHSEN, DE GRUYTER & CO m. b. H.
1930

Foreword.

Iranistic holds rather a strange position as compared with the allied branches of studies. As a rule it is not treated as a complete and independent whole, but is divided into subordinate parts attached either to Comparative Philology or to Indology or to Semitic and Islamic studies, — very probably for historical reasons. We admit that this arrangement has borne good results, but it cannot be denied that the fate of Iranistic as such is like that of a man between two stools, especially in the case of Pahlavī. "Im Pehlewī stümpern wir Alle" said Nöldeke in his Persische Studien 1888; and, in spite of the great strides we have taken in the meantime, our difficulties in the matter are not yet at an end. We have not only to solve new problems but we have also to revise what has already been achieved, e. g. in the correct interpretation of Pahlavī texts. The new translation in the following pages will show what an amount of work has yet to be done in this respect. It is really a pity that nobody has tried to re-do in a scientific manner what West, who declared himself to be "no regular philologist", attempted in the last decades of the preceding century. The present writer, although his official duties are restricted to Modern Indian languages, hopes to continue what he has here begun, provided he is given the same facilities as in the present case.

Of the nature and plan of this work I have spoken at length in the Introduction, but it is necessary to add a word of explanation regarding the order of the notes. Owing to the absence of a principle in numbering them, a principle which would not have broken their consecutive order in the text and translation, I did not take any trouble about it when I changed my plans as mentioned in the Introduction (see § 4, 6[e]), and when I revised my work, making additions thereto. This is indeed regrettable, but I hope that the reader will not be disturbed thereby, since, whenever he wants to find more information from the notes he will be able to do so without any difficulty. It is only when he wants to turn from the notes to the text and translation (which is not the usual course) that he may not be able to find the particular number at once. This more or less aesthetic defect, if it may be so called, has been removed from the later part. It may also be noted that the occasional subdivision of the sections by means of 'b' etc. in the text and translation is not carried on in the notes; — these refer to the main number including the subdivisions. Of the principles of transliteration and translation enough has been said in the Introduction.

It may be noted that I have not dealt with the other small texts given by West as the continuous chapters of the Šāyast-nē-šayast, because they do not belong to it, not even according to Mss. or other tradition; — of course West too has grouped them under Part II. — A Supplementary Treatise and Part III. — Appendix. For the sake of uniformity they could have been treated here, but

661328

that work can be done quite as well on another occasion. Then it was designed to give a complete glossary, but owing to the want of funds that idea had to be dropped and only an index of selected terms has been added. For the sake of convenience their meanings are als o given, but for other details their respective places (and notes, even when not mentioned) should be referred to. Other indexes too are neither complete nor detailed, but they will serve their purpose. The appendix contains some additional matter and, when omitted in the notes, the text and translation of important passages referred to therein.

And now I shall perform the pleasant duty of expressing my thanks to all those to whom I am indebted in connection with this work. First and foremost my thanks are due to my esteemed teacher Prof. Dr. Hans Reichelt who suggested this thesis to me and who helped me in various respects with his advice and otherwise. Then I have to thank the institutions which allowed me the use of the Mss. in their possession. The authorities of the University Library at Copenhagen sent me a rotograph copy of the necessary part of the Ms. K 20, since the latter itself could not be sent out owing to its fragile condition. This they did at their own expense and on their own initiative, for which my thanks are due not only to them but also to Prof. Dr. Arthur Christensen and Dr. J. Eyser. The State Library at Munich sent any Ms. I asked for to the local Library, and so did the National Library at Paris, on the recommendation of Prof. Dr. Wilh. Geiger and Prof. Dr. A. Meillet respectively. And through the kind offices of Shams-ul-Ulama Dr. J. J. Modi I received from the Mulla Firoz Library at Bombay a Ms. containing a parallel text. I am grateful to all of these, and also to the State and University Library at Hamburg for making the necessary arrangements about the Mss. and for procuring various books I needed. For the cost of publication the greater part was generously subscribed by the following Parsi institutions and gentlemen on the kind recommendation of Dr. Modi: Parsi Punchayet, N. M. Wadia Trust, Sir Ratan Tata Charities, Mr. Merwanji M. Cama, and Sir Hormusji Adenwalla; and the smaller part by the Philosophical Faculty of Hamburg University; to all of these I am highly indebted. It is not out of place here to repeat my thanks to Mr. J. K. Dubash of Bombay for his munificent loan (its fate was that of the German currency of the time) when I came to Hamburg, a good part of which he has now kindly asked me to consider as a gift. Last but not least I am grateful to Prof. Dr. W. Schubring for undertaking the publication of this work in the series under his charge.

Hamburg, 30th April 1930. Jehangir C. Tavadia.

Introduction.

1. Our text like many other Pahlavī works bears no title. In M a later hand remarks, where the text begins, *rivāyat dar pahlavī hast az avastā u zand*, '[this] is the *rivāyat* in Pahlavī from the *Avastā* and *Zand*', and before the second chapter (as can be better judged from M[+]) *īn ǰā rivāyat ast az zand vastā*, 'here is the *rivāyat* from the *Zand-vastā*', evidently because of the similarity of its contents with those of the NP. compilations known as the *rivāyat* or 'traditions'. This is just like calling the AZ. the *Pahlavī Šāhnāmak*, Haug Essays[2] 109. (This fact is nowhere mentioned in the PT. which, however, contains colophons calling the text *šahnāma-yi guštāsp* 170, Intr. 9, cf. GIrPh. **2**. 117.) Still some scholars have followed this hint and named our work the *Pahlavī Rivāyat*. On the other hand Indian Dasturs of the last century call it *Shāyist-lā-shāyist*, AVn. iv; P. Sanjana, Pahl. Gr. Preface 17; and West, SBE. **5**. lix n., suggests that this title is at least earlier than the Sd. (not SdBd. as he says) which begins with *īn kitāb-ī-st dar šāyist u nā-šāyist, ki az dīn i bih i māzdēsnān bīrūn āvarda ast*, 'this is a book about valid and not valid, which is extracted from the good religion of the Mazdāh-worshippers'. He believes, though not with certainty, that this refers to our text. But as this is not the only work with which some of the contents of the Persian one bears comparison, his is not a sound view; and as regards the borrowing of the title, the fact is just the opposite according to my belief. It is these words and the similar ones at the beginning of the SdBd., *īn daftar šāyist u nā-šāyist*, that have led the Dasturs to give this name in its 'Pahlavī form' to the Pahlavī text of a similar character. I do not believe, as some do, that the title has arisen from the fact that the words *šāyēt* 'is valid' and *nē šāyēt* 'is not valid' occur very often in the work. It is, however, natural that we adhere to the familiar name in its proper pronunciation *Šāyast-nē-šāyast*, although the term *Rivāyat* is more suitable.

2. The name of the author or rather the compiler of our work is nowhere met with. Once in the course of it he refers to his own authority as *dipīr* 'the writer', **2**. 44, but even here another interpretation is not out of the question. Still he must have been a learned priest who knew how to make use of his sources, the Pahlavī commentaries on the Avesta *nask*-s. A comparison of the parallel texts compiled by others from the same sources shows, that on the whole ours is a superior work in point of arrangement and clearness. As to its age there is no purely external nor purely internal evidence, but the internal-external evidence shows that it must have been compiled under the later Sasanians, for it refers to the Pahlavī version of some Avesta *nask*-s and to a number of commentators, whereas there is nothing that directly or indirectly points to the Muḥam-

madan authority and religion. The instructions, quite unpleasant in the eyes of the latter, are given without any reserve or concealment, and without any references to the non-Zoroastrian population, which are not wanting in another work of the same character, MF. The latter mentions *yut-dēnān* 'those of the different religion' more than once, which is not without significance, inasmuch as the work is compiled in post-Sasanian days, as the quotation from *Ātur-Farnbay Farraxᵛzātān* (9th cent.) shows, MF. **190.** 7. As to the place we can say still less. The language is the usual Pahlavī of Books; it does not show any dialectical marks. Two details, however, may be noted: *patrēt* is always written p yt⁰, *pet*⁰, which points to the northern dialect; and *drust* is not written dn n yyyt, *durist*, as commonly in the Mx. and DdA. **39.** 2, which is one of the characteristics of the southern dialect. But no special weight can be attached to these points; moreover note that the former occurs also in one of the PV. MSS. (**5.** 33 n.).

3. There exist only two independent MSS. which contain our text; they are K 20 in the University Library at Kopenhagen and M 51 (formerly known as M 6 and also as (M)H 6) in the State Library at Munich. Both are described by Haug, AVn. iii—vii, and M far more thoroughly by Bartholomae, ZHss. 38—72. In the former there is the important omission of the number of the folio where a text begins or ends; and the same is the case in the notice by West, SBE. **5.** xxvii—xxx. Both MSS. are accessible to me, M directly whereas K through a rotograph copy. There exists a number of other MSS. that contain our text, but they are derived either from K or more often from M, and not from an independent source, — at least none of them is declared to be so. Hence it is natural that I have not used them.

3 b. The following can be said by way of general remarks about these MSS. with respect to our text. Just as M is better preserved, so it is also more carefully written; it is very seldom that a word or a part of it is left out, or that it is not or wrongly separated. But K being very carelessly written, it has a larger number of errors, of omission as well as of commission, as can be seen from the notes. Again K is not so particular as M in separating words, but this fact is not noted down except in important or interesting cases. But for the instructions received, I could have similarly omitted to refer to its worn out and worm-eaten or torn words, inasmuch as they are found in its copy, supplément persan 33, in the National Library at Paris. (I quote this MS. when it differs only about these words, not in other cases.) After all K is not to be dispensed with; it corrects and supplements M, especially in the later part where this is not to be preferred as is generally done by West. M contains a great number of NP. glosses in different hand-writing; those to which any possible interest is attached are given in the notes. (It may be added here that Bartholomae's remarks, ZHss. 106, about its copy, M 54, that it contains useful marginal notes, led me to examine this MS.; and its information, which is not much, has been similarly inserted.) M generally marks the end of the sentence; K not so regularly. I give this sign, whenever found in M, without noting the omission or addition by K, except in special cases.

3 c. The general peculiarities in the orthography of the two MSS. may better be given here so as to avoid their repetition in the notes.

apurnāyak is written in M ^{0}*yīk* which occurs elsewhere also, and in both sometimes without *u*.

āpustan is written in both almost always without *u*.

gōgušnasp is written in both without *n*, as often elsewhere.

i-š is written in both always with zaa, a misleading combination of zy ya.

mark-aržān is written in M almost always (not so Davar) with plene *a* after *k*, i. e. it is rightly treated as a compound.

nasāk is written in K with n n^{0} very often.

nān is written in M r am ā (ideogram).

niyōš is written in both with k before *š*, as in the PY. **45** (**44**). 1, 6; **49** (**48**) 9, whereas in the PY. **29**. 8; **30**. 2; **31**. 18 f.; **49** (**48**) 7, with a, i. e. *x*; *xš* seems to have been pronounced for *š* in this word, cf. its Paz. and s. GIrPh. **1** b. 1.

pātaxšāy is written in both without *y*, as often elsewhere.

pātiyāp is written in M with plene *i* before *y*. This word is generally transcribed *pātyāp*. It is true that NP. is *pādyāb*, but this can be a mistake, because we find there *vādiyāb* (= MP. *apātiyāp*) also. Both of them are not supported by examples, and so it cannot be said whether they are commonly used or only by the Parsis. However, one of the meanings of *vādiyāb*, namely *nā-čīz šuda* 'annihilated, effaced', points to its other use, and therefore it can be said to be better handed down. Even if this be not the case, I, following the orthography in M, write *pātiyāp* which is also required, if we strictly follow the rules about *pat* from **pati* and *pah* from **paϑi*, although *pat* is predominant and is used for *pah* also, s. ZWb. 63 n. 1, 179 ff.

zamīk is written in M with z (mostly), in K with y.

zaratušt is written in K often without the usual a (i. e. *x*?) before *š*.

žamān is written in M with z, in K with y.

Both write *č* sometimes with the tail drawn upwards instead of downwards.

3 d. It remains to be added that whenever a different reading from a MS. is quoted, the adopted one is to be considered as belonging to the other. But when K omits shorter or longer parts of the text, the readings of M, if not adopted, are given under MS., not under M, to avoid any misunderstanding.

4. Davar has edited the text according to the chapters and sections by West, but he has not yet published it, although, with the exception of an introduction, it is ready in print since 1912, s. NM. Preface. He was kind enough to give me its advance-sheets in 1922. It is based on M and two other MSS. derived from it. (K could not be used, because it was not sent out of the Library owing to its fragile condition.) Whenever Davar has made new suggestions, I have referred to them. Originally it was not my intention to mention everywhere the difference in the edition as regards the readings of M, but I have done so, as he too wished it. It may be added that the text

is printed in so-called Indian type, and not in Iranian type which is available only in Bombay.

5. West has translated our text from the same MSS. K and M in SBE. 5, but nobody will consider the fresh attempt unnecessary, when he takes into account the numerous differences therein. These again are not to be characterised and at the same time minimised by the oft quoted dictum, that two Pahlavī scholars generally differ in their translations. I have quoted the differences in many cases, especially when they affect the subject-matter. This is meant not as a polemic against the great translator of Pahlavī works, but as an eye-opener for those who complacently depend upon him. West himself has declared about our text: "Owing to the technical character of the treatise, it is hazardous for any one but a Parsi priest to attempt to translate it . . . .", SBE. 5. lxvii. But even Bharucha, a Parsi priest and a well-known scholar, has not done better than West, except in a few cases, in his Rīstistān where he quotes a great deal from the second chapter. (He has used a MS. in the possession of P. Sanjana; this seems to be a copy of M as I conclude from the occurrence of 10. 40 and other points peculiar to it. Bharucha does not give West's sections nor does he say anything about his translation, from which he differs, sometimes wrongly also. I have referred to him only occasionally.) As to the technical knowledge it should not be forgotten that a large mass of details does not form a living code (in theory as well as in practice) today nor in the near past, and that points of difference are not wanting between the old and the new. Yet West no less than Bharucha can be said to have attempted to force modern views upon the text.

6. Thus where the knowledge of the extant usages fails to be useful, it is the parallel texts that come to our help for emending the original when its wording is corrupt, and for understanding it when its sense is not clear. Fortunately there are a number of such texts for the different subjects dealt with in our work. Some points have their germs already in the V.; and the Pahlavī commentary attached to it is one of the parallel texts, especially for the first two great subjects. When quoting from this work, PV., I have not followed any of the editions, but have settled the text myself by silently adopting the readings from the old MSS. given in them, and by changing and adding punctuation. Only when an emendation is not supported by a MS. have I noted the fact. Spiegel's numbering is given in brackets; I regret that I did not give instead of it the page and line which would have rendered the reference to the text easy as regards long commentaries.

6 b. Besides this commentary we know of another, a separate one to be found in an Iranian MS. in the library of B. T. Anklesaria. An indirect copy thereof in the Mulla Firoz Library at Bombay, hence MF., has been gone over by me in search of useful details. (Unfortunately I had to return the MS. early, as it was "urgently wanted"; otherwise I could have derived more help from it.) Not only the *zand i frakart i yutdēvdāt*, as this commentary is called, deals with these subjects, but also the first part, the so-called Rivāyat (the actual word is *saxᵛanīhā*) of Ēmēt i Aš(a)-vahištān, is not without them. This author, styled

hufravart 'of good *fravaši*', which means something like Saint, was the *mōbaδ* or spiritual leader of the faithful in Western Persia in the latter part of the 10th cent. according to al-Mas'ūdī's Kitāb at-tanbīh, s. de Goeje, Bibliotheca Geographorum Arabicorum 8. 104 where the names Anmaδ (Anmīδ) and Ast(a)vahišt should be corrected into Ēmēδ and Aš(a)vahišt.

6 c. The class of New Persian writings known as the Rivāyat-s, or more strictly New or Great Rivāyat-s, offers another parallel text, often directly taken from our work. As only one collection, that of Dārāb Hōrmaz-yār, is published, I have quoted from and referred to it (Riv.). Modi has given a list of its contents in his Introduction (59 ff.) to the work; there is also a Persian Index to each of the volumes by M. N. Kutar; and again a list of contents of the second volume by Rosenberg, Notices de Littérature Parsie (39 ff.). In special cases I have referred to the Guj. Riv. which can be called an abridged paraphrase of the work, and not its translation as it is regarded by the editor and others. The Old Rivāyat-s are referred to as Sd. and SdBd., whereby West's translation of the former is not consulted.

6 d. Also the Nīrangastān, or rather the Ēhrpatastān and Nīrangastān (N.), and the Rivāyat accompanying the Dātastān i Dēnīk (PRivDd.) offer parallels. Bulsara's translation of the former is always consulted, though seldom followed. His numbering is not given, as it can be easily found out through the corresponding folio numbers added by him.

6 e. As to these parallel texts my first plan was to quote them fully with translation etc., when necessary, just as they came under the sub-headings in which I have divided the chapters in the summary below. Then it was restricted to giving the points of difference and additional matters directly connected with those in the text; but even this was found impracticable. Hence, only those points are quoted, which help or justify the interpretation of our text, and that too in their respective places. In some doubtful cases, different opinions are as well given. It may be said that besides fulfilling the primary object, the quotations will form a contribution to our knowledge of the sources. A complete treatment of these texts as originally planned must be left for some other occasion; for the present mere references to them are given in the summary below.

7. As regards the transliteration my instructions were to preserve the historical writing on the one hand, even when changed, e. g. *vi-* into *gu-*, in the original, and on the other hand not to adopt certain niceties taught by Bartholomae, especially with regard to the vowel heard between the two component parts. He writes *i* and *o* when found in the original, otherwise *ə* — all below the line; I write them in the line, and *a* instead of *ə*. He makes an exception in the case of *pātifrās* which I too adopt for *pātafrās*. Then I stick to *bav-* and *šav-* instead of *bov-* and *šov-*, and write *awi-š* and *-īhā*, not *ov-ə̄š* and *-īhāh*. I have transcribed *šāyēt* and *apāyēt*, although the original has simply ^{0}yt, and not ^{0}yyt; and similarly the 3. pl. Pres. as *-ēnd*, even in the case of ideograms where the ending consists of only -d. The proper name Gō-gušnasp is not read in its 'historical' form, because its first part is not certain, s. ZHss. 48 n.; and *t* is

transcribed as *ṯ*, when it is used for the original *δ* in proper names and transcriptions. Some other differences will be clear from the original orthography. For the rest, when not otherwise mentioned, I have generally followed Bartholomae, even in uncertain cases like *aδāp*, *γyāk*, *γyān*, *yōrtāk* (s. MirM 2. 28 n. 1; — is then the Paz. *zōrdāē* a mistake for *ǰōr*⁰?); and in writing *kē*, *čē* etc. where the long vowel is not justified, so also perhaps in *patīt* (and *čīš* which I have preferred to his **čīč*). These and other details, I believe, will not defeat the main object, viz. that of making the ambiguous Pahlavī intelligible, for which purpose I have also made a rather lavish use of European punctuation. Here I may mention that the numbering of chapters and sections is kept the same as by West for the sake of uniformity. When he is so incorrect that the meaning is seriously affected, I have drawn attention to the fact; in unimportant cases the mere change of punctuation would suffice. — In transcribing the original letters I have followed the system of Bartholomae with one notable exception: I write y, and not d, — this and g are used only when so marked in the original. (I regret that I did not adopt the recent method of transcribing the orthography of ideograms by capital letters.) In short, one will be able to retranscribe the text in Pahlavī letters, when necessary. It is true that the ideograms have not been marked, nor is the ambiguous ending for *-ēt*, *-ēnd* etc. notified, but that would not matter, as in the other case also one has to take into consideration both the forms and other vagaries of the Pahlavī writing, when deciding doubtful words. I have not given the text in the original script, especially because of the edition above referred to. Again a printed work, at least that in type available here, is no proper substitute for what we see in old MSS.; and hence only a facsimile edition can be justified in the present case.

8. As regards the translation my aim has been to closely adhere to the wording of the text, and to put it into literal, not into choice and elegant, and sometimes not even idiomatic English. Hence it will appear uncouth, but I hope, not to the extent of being obscure. The object is to make the original as intelligible and clear as possible with the help of the translation; hence also the copious use of punctuation as in the transcription. It is true that the repetition of 'and', and the rendering 'that which is' instead of simply 'the' are unnecessary; but these and similar points are suffered to survive in consequence of the rule. Similarly the literal translation of certain terms and phrases may appear strange; I have, therefore, placed it in single inverted commas. Some technical terms are given as in the original; I have done the same with *nasāk*, whenever 'corpse' or 'carcass' did not suit. In some cases my translation will be considered not literal, as I have not always followed the Passive construction believed to be predominant in MP.; but as regards *-š* (*-aš*) I am inclined to the view of Horn, GIrPh. 1 b. 118, and so I have taken it in different cases. Moreover I believe that *-š* can be also redundant, *ka-š*, *ku-š*, etc. being used for *ka*, *ku*, etc.; in other words, *-š* is not always felt as an enclitic pronoun, just as in *pati-š* which is used with the 1st Pers. also. The contrary phenomenon is represented by the phrases *i i-š* and *u u-š* (the examples of the latter can be increased by taking the redundant final n of the prec. words as *u*), where *i-š* and *u-š* seem

to stand for *aš* without the force of *i-* and *u-*. However, I have marked the first *i* and *u* as omitted. It is possible that only copyists are responsible for these two points; I leave them undecided and open. Then I have not attempted the translation of the verbal particles *apar* and *bē* in some cases (as West has done by means of "thoroughly" etc.) and *ō* in almost all cases. Salemann's remarks on the latter in MSt. 48 are not quite clear. The verbal forms with *-išn* are translated by 'it is to be . . .'; but I think, 'one has to . . .' would not be wrong. It may be added that no emendation and no addition is made in the text without sufficient reasons offered by context, parallel passages, etc.; and that I have refrained from attributing mistakes to the original not in the nature of things.

9. Some words that occur often and are not clear in one respect or the other are treated here for the sake of convenience; other rare or obscure words are dealt with in their respective places.

drānāk, (*pahnāk* etc.) or ^{0}*āδ* ? — Because of Av. *drāǰah-*, NP. *dirāzā* etc. Horn, NpEty. 121, corrects *n* into *ž*, and so also Salemann, GIrPh **1**. 278. Bartholomae, Wb. 774, reads the word *drahnāk* (cf. also Riv. **261**. 3: *dirahnā*), believing it to be influenced by *pahnāk* 'breadth'. I take this hint, but read simply *drānāk* as the tradition does, because *ah* in this word is never written plene, i. e. aa as is often done in *pahnāk*, and because in the GBd. **189**. 7, 8, **199**. 8, and in the PV. **2**. 21(45) com. the spelling is even defective, d rn^0, which can happen only when the letter *a* stands for *ā* and not for *h*. Then according to Salemann, GIrPh. **1**. 278, the suf. is to be read *ād* i. e. *āδ*, and he is now generally followed; but from what he says there only Bal. *-ād* can support him, otherwise we expect *-āt* in the script, cf. also the examples on the same point given by Horn, GIrPh. **1** b. 168. The remarks in MSt. 155 are not convincing; MPT. *vasnāδ* 'for the sake of' („wegen") is to be derived from the Abl. of Av. *vasna-*. Hence I prefer to read *drānāk*, *pahnāk* etc.

10. *ē* or *hat* when an mn t occurs in the sense of 'lo! note! namely' and the like after *gōwēt* or *guft*? — an mn t is explained by n t *ut*, FrP. **31**. 6, which is not clear, but also by aat n, FrP.* **31**. 21, i. e. *hat* — taking aa for a — and this is correct; but as it occurs along with *hēt*, *hom* or *hēm*, etc. it can be said that Junker, FrP. p. 91, is wrong in taking it in the sense of "that is, namely". Again though the Paz. *hat*, Šv. **9**. 5, occurs in this sense, but as its Str. is *syāt* — and not *kila*, PY. **1**. 13 (40); **9**. 1 (4), 23 (74), or *aho*, PY **9**. 1 (3), 5 (18), or *yat* PY. **9**. 2 (5), 4 (14) — it becomes doubtful whether the writer took the original as 'namely' or not, and consequently his transliteration or Paz. *hat* cannot be taken as a decisive proof in our enquiry.

10 b. In the Str. of the Mx. and the Šv. *aho* and *nanu* stand for *ē*. It cannot be said how *ē* is written in the latter text, the original form being not extant; in the former text it is written an a, but in all the three cases the word in question means 'this', 'that', not 'lo' etc.: *az hom ē i tō humat* (*dušmat*) . . . 'I am that which is thy good thought (bad thought) . . .', Mx **2**. 136, 178; *ku ē i-t . . . pursīt*': this which thou hast asked', Mx. **2**. 196. The normal orthography of *ē*, introducing a gl., or after *gōwēt* or *guft* a direct speech, is ab or ā.

Now an mn t has the same function; can we therefore say that it is the *corresponding* ideogram of *ē*? I have noted one case where an mn t (*hat*) is given by one MS., and *ē* by another, PY. **9**. 2 (5) according to Davar and Unvala. To this must be added those cases where *ē* 'this' is expressed by (*hēt*) an mn yt : *pa⁺ē dārom* . . . 'I consider as this . . .', AZ. 76, and *rātīh⁺ē* . . . 'charity is this . . .', PT. **88**. 7 (cf. 5, 9 f. where an a, *ē* occurs). Here of course the use is wrong, but it shows at least the close connection between *ē* and an mn t, when they mean 'lo'. It cannot be said with certainty whether the occurrence of both together supports this view or refutes it; the cases are: (*gōwēt*) *ē hat*, N. **60**. 2; **62**. 10; **84**. 25; **85**. 10; **86**. 7; **87**. 21; **164**. 24; **165**. 26; (*guft*) *ē hat*, N. **127**. 6, 7; **167**. 6; (*guft*) *hat ē*, N. **164**. 14; **166**. 11; **168**. 24; and many more can be added from the same work. There is nothing to show that in such cases the meaning is different from those where only one of them, *ē* or *hat*, occurs; nor can we apply their other uses here or there. If we can explain this ideogram in the sense of 'lo' from Aramaic — which is beyond me — we can come to the final result. In its usual sense, the reading is *hat* 'it may be' from which, it can be eventually said, 'lo' is developed; hence I have kept it (and *hāt*) for the present; cf. NP. *hai* 'is, exists' besides 'lo', but it may be a different word in each case.

10 c. In this connection it should be noted that West is wrong when he records the Paz. *haē* (i. e. *hē*) "that is, namely". In both cases, Mx. **2**. 156; **22**. 5, the Paz. is wrong but the Str. *šīghram* 'soon, quickly' is correct, the ideogram being that of *has* or *his*, FrP. **25**. 9, and the meaning suitable (the former place is disturbed: remove *ān i m⁰ r⁰* in the place of the first *has* — (as in 152) — which is rightly omitted in the Paz.). Similarly in the Šv. **13**. 91 *haē* is wrong, as the Str. *tatkālam* 'at that time' shows, which, not West, is correct; for this mistake cf. FrP.* **31**. 10.

10 d. As Jackson, ZorSt. 229, has recently declared that the word in question "is certainly to be read *hast* or *ast*", it becomes necessary to consider his arguments. He is wrong in asserting that it is "traditionally" read *hast*; he might be following Bharucha, PPEngGl. 80, in this respect, but what the latter says is his personal opinion and not a record of an actual use. Then Jackson refers to inscriptional Pahlavī where two forms of *ast* occur. But a glance at Herzfeld, Paik. **1**. 133, 184 f., shows that the matter is totally different and it cannot be applied here: a y t y, that is, the same as MPB. a yt *ast*, has emphatic sense, whereas the other, which would be MPB. an mn (but never used there as a verbal form, though given by Salemann, GIrPh. **1**. 313, 330, and repeated by Herzfeld, Paik. **1**. 56), is used in the ordinary sense, or rather in the "conditional" sense 'may be', and as auxiliary in the place of *ēstēt*. It is not possible that the usage was exchanged in MPB., and that *t* was added to the second form. Again from what we have said about the use and the grammatical form of the word, it is clear that the emphatic use of *hast* in the beginning of the sentence in the NP. quotation has no bearing on the present case.

11. *ēv-kartak*. — This is generally translated by 'united' or the like, evidently from *ēv* 'one', and *kartak* 'made'. But we should not disregard the

orthography; — it is k rt k, and not k n t k, which we require for the meaning 'made'. Exceptions are nowhere met with; the forms with r, even in the Present Tense, occurring in the *Draxt u Būz*, otherwise known as *Draxt i Asurīk* (PT. **109**. 9 ff. etc.), are due to the dialectical nature of the text and have no bearing on the present case. Hence I take k rt k in the sense of 'piece' as usual; the whole term then would mean 'in one piece', and its opposite, *yut-kartak*, 'in different piece'. (The latter term will show that the explanation given by Hoshang, PV. Gl. 7, *ēvak* 'one' and *ratak* = NP. *rada* 'line, row' is wrong.) It is true that 'united' suits better in the PY. **9**. 26 (81 f.) — Str. *aikīkṛta-*, but in the Šv. *ekahelā-*, wrongly according to West — and in the N. **29**. 19; **95**. 20, 27, and also in our text, but that does not necessarily show the etymology. I may be wrong, but I have preferred to follow the orthography and to translate accordingly.

12. *ham-karžakīh* or *⁰karpakīh*? — The meaning of this word is certain, 'contact, connection', but not so the etymology and hence the reading. The word is never written ⁰r p⁰, not even in the PV., though Hoshang gives this in the text, but leaves rp in the Gl.; similarly in its summary, DkM. **779**. 12; **781**. 16. As to the reading *ham-karžakīh* cf. *ham-karza* or *ham-garza*, Riv. **129**. 4; **130**. 5; **255**. 1, etc. (Modi, Intr. 46, reads "*hamgurzeh* from *gur(a)zīdan* to help" which cannot be accepted.) In spite of the orthography one may think of reading the word *ham-karpakīh*, connecting it with k r p *karp* 'body', because it occurs as a gl. for *ham-martīh* (rightly for Av. *ham-nāirī-* ?), PV. **5**. 27 (84) Bartholomae, Wb. 1810, must have read so for the same reason. And perhaps the same meaning is implied in the PV. **5**. 55 (157) gl.; cf. also *ku-š vas bār apāk ham-karpak bavēt* 'i. e. one becomes 'of the same body' (or rather 'with the body') with her many times' as a gl. for *vas bār pa kāmak kunišn tan vimēžēt*, 'one mixes the body many times for fulfilling his desire', PV. **16**. 14 (33). But here too, the term can mean 'connected' as elsewhere. In other passages it means 'contact' with polluting persons or things. Now it is possible that 'contact' is not the literal meaning of the term. In the Šnš. **2**. 55 our term forms a pair together with *gazišn* (yp⁰), lit. 'biting, bite' but used with reference to pollution; and hence the other too might have quite a different literal sense, say, as S. *karj-* 'to pain, to torment'. In any case I have considered it advisable to adopt the traditional reading. As to *gazišn* it may be added that it does not mean "curse" as West says, because then it must be *gazavišn* i. e. *viz⁰*, s. AVn. **17**. 26 where *vizavēnd* 'they curse' is right, but the other word is *dēr-yazišnīh*, not *dēr-gazišnīh*.

13. *pixak*, always written p aak as if *pēšak*, — in the phrases *pa pixak šōδ-* and *pixak šnās*. — The former is very common, the latter rather rare, but both are used in connection with washing after pollution. In the AVn. **38**. 7 the Str. (or gl.?) given in the n. is *yat barasnūma*; and this is correct, not Haug and West. There are cases where *barašnūm* is used in the place of *pixak* which can be explained as follows. We read in the PV. **9**. 14 (41) *grav* . . — *naδ ē-tāk* — *kē 9 pixak* . . — *9 grah* for Av. *graom* . . *nava pixəm* 'the stick of nine knots' to which is fastened the vessel of cattle's urine in the *barašnūm* ceremony. Here too *pixak* is written as usual. Hence *pa pixak šōδ* means 'to wash through

[the bath with the stick of nine] knots'; here an instrument requisite in the ceremony is used for the ceremony itself; and this view is supported by the Parsi Guj. idioms *nav gareh-thī nhāvū* 'to bathe through [the bath with the stick of] nine knots', and *nav gareh-nū nhān* 'the bath of (i. e. through) [the stick of] nine knots'. Similarly *pivak šnās* means 'one acquainted with [the bath with the stick of nine] knots'. West reads *pīšak* and translates in one case by "ceremony" (*barašnūm*) and in the other by "duties"; but the former meaning is unknown and for the latter cf. the parallel quotation. — I now find that Dhabhar has already explained the phrase correctly, s. NMtr. p. 23.

14. *satuš* or ? — The word is very common; it is generally written yyt n ya or roughly speaking s t u š, also in the N. where, however, twice s t u t š **121**. 10, **122**. 19; cf. the var. in the PV. **7**. 52 (136) com. where s p u š also. If s t u t š be genuine and if the term be a transcription, we may think of Av. *stuitiš*. But the Paz. is : 1. *sadis* in the Mx. with the Str. 'three nights' or 'relating to three nights'; and 2. *sadiš* in the PazT. **124**. 20, — so TD 3. fol. 128, cf. also SX^{v}Ap **43**. 11 with the explanation 'the *yazišn* ceremony dedicated to Srōš during the three days for the sake of the dead'; and 3. *sadaš* in Tīrandāz 387 (s. PazT. **135**. 11) with the comment (388, here s d^{u} š) 'at the time of s^{0}, that is, at the dawn of the fourth day'.

14 b. We may ascertain all these meanings from some typical passages: *satuš har tan -ē rāδ yašt -1 u drōn -ē; . . . andar ān 3 rōč yazišn hamāk ān i srōš kunišn; . . . ka γyāk -1 bē mīrēt, ka-šān ān γyāk yašt -1* [*i*] *srōš kart⟨an⟩, ā ētar yazišn* [*i*] *hamāk artāk fravart* (or *fravahr?*); *ka nē, satuš hač bunīh . . .* 'the *satuš* [ceremony] for every single person is one *yašt* and one *drōn*; . . . . in those three days the *yazišn* is to be performed all [as] that of Srōš; . . . when one dies at a place, when they have performed one *yašt* of Srōš [at] that place, then here [is to be performed] the *yazišn* of all *artāk fravart*-s; when not, the *satuš* [ceremony] from the beginning . . .', PV. **8**. 22 (64) com. (Note that *satuš* occurs as a gl. on *yašt* in the PV. **19**. 40 (133) which seems to refer to the ceremony after death, though the same cannot be said of the original Avesta.) This is said for all in general.

14 c. In the V. **9**. 56 a ceremony in honour of Sraoša is said to be performed for three days and nights after (thus, taking *vā* in the sense of 'and', not 'or') an *ašəmaoγa* is put to death. Also the PV. **7**. 52 (136) com. and the PRivDd. **41**. 1 ff. like the Šnš. **8**. 6 refer to this ceremony in connection with a *mark-aržān* sinner who has confessed his sin and is put to death. What they add shows that the punishment, resulting in absolution from sin, must have been inflicted before the performance of the ceremony takes place. We read: *ka pa (h)uš* [*u*] *γyān* [*i*] *x^{v}ēš bē mīrēt, pa uskārišn, ku pas hač 3 šapak āmārīh, satuš pas hač 3 šapak yazišn; ćē nē dānom, ku pātifrās pa 3 šapak bē kunēt, aδāp pa 3 šapak sar . . .* 'when he (the *mark-aržān* sinner) dies with his own consciousness and vital spirit (i. e. dies a natural death), [then] with the consideration, that the reckoning is after three nights, the *satuš* is to be celebrated after three nights; because I do not know, that (= whether) one inflicts the punishment during three nights, or at the end of three nights . . .', PV. **7**. 52 (136)

com.; and . . . *u-š ǵētīkīhā sar nē šāyēt brītan* (Ed. *brīnēnd*), *ā-š* (Ed. *u-š*) *mēnōkīhā šap i sitīkar pa bun i puhl sar bē brīnēnd, u* [*-š bām*] *i 4-om satuš apāyēt dāštan* (for *yaštan ?*), [*u*] *ahrav*, ' . . . and it is not possible to cut off his head materially, then they cut off his head spiritually [on] the third night at the beginning of the Bridge, and (then, if *ā-č*) [on] the fourth dawn the *satuš* must be kept (for celebrated ?), [and] he is 'righteous', PRivDd. **41**. 4 ff. From this it seems that the *satuš* is the ceremony performed on the fourth morning.

14 d. Now when the term is used in a phrase with *pātifrās* 'punishment', as in the Mx. **21**. 10; DdA. **13**. 5; **40**. 5, it may refer to the three days after death or to the dawn of the fourth day; but when with *āmār* 'reckoning', as in the Mx. **63**. 7; PnZ. 17; DdA. **7**. 4; **13**. 3; **27**. 6, then it must be strictly speaking the latter, cf. above. Of course in both cases the term can simply mean 'during (or at) the time of the *satuš* ceremony'; and 'the three nights' and 'the fourth dawn' can be free renderings suggested by the context.

14 e. In the later accounts of the ceremonies after death another term t r s a s t u d a n (also with *yaštan*) is used instead of the one in question, SdBd. **40**. 1, 7, 12 (= Riv. **148**. 7, 13; — the Guj. Riv. 347 does not use even the former but only *saroś ijavā*, i. e. *sarōš yaštan*) **94**. 9. Bharucha, Rist. 391, writes the term *tarīs astudān*, in the quotations — they are from other Rivāyat-s — always *tars stodān*, and would derive it from Av. *ϑriš āstuitinąm* which nowhere occurs. In NP. dictionaries it is recorded as *tars astūdān* or *tars i astūdān* with the lit. meaning *xauf i ḳabr*, and as the term for the prayers recited by the Parsis at the *daxma* for the three days after death in order to free the soul from fear, (Vullers). Are we to take this as genuine and old, or as influenced by the Muḥammadan belief of '*aδāb i ḳabr* or *gōr* 'divine punishment said to be inflicted on a dead body in the grave for the first three days after interment' (Fallon)? Nyberg on the contrary considers (in a letter to me) the latter as a continuation of the Parsi belief; and that too without knowing the term *tars i astūdān*. The reason of my doubt is that the said ceremony is not performed at the *daxma*; and what is done there, and that again only in Persia, is quite different. We read: "Generally, for the first, and sometimes for the 1st, 2nd and 3rd nights, Mobeds are sent there to recite 'Yashte Gāhān' throughout the night on behalf of the dead", Madr. Mem. Vol. 310. It is also strange that the same account, SdBd. **40**. 4 ff. = Riv. **148**. 2 ff., describes in exaggerated terms how the soul is afraid of evil spirits and how Sarōš protects it. He also intercedes for it before Ormazd so that they inflict punishment at the *Činvad* Bridge [only], and he withholds it from hell. It is true that the distress of the soul during the three days is commonly referred to in MP. writings, — also in the case of a righteous person, s. DdA. **23**. 1, 2, — but it is not directly given as the reason of the ceremony in honour of Srōš. Only the Šnš. **17**. 3 says that this is to be performed, because he is able to free the soul from the hands of the *dēv*-s. Believing, however, that the explanation of *tars i astūdān* is correct, and that the term in question must also have a similar meaning, we may follow Freimann, PnZ. 17 (wherein he wrongly combines two sentences in spite of the PT. **44**. 3 ff.). He reads the word *stawīh* "Bedrängnis", and says in a long note that it is only an

orthographical var. of the usual *stawīh*, the difference being n for n b, which occurs in other cases. But the two forms are regularly distinguished, and we cannot say as he does, that the copyists or the authors have done so, because it was used in a fixed context like *āmār i pa s⁰* and because the real meaning of *s⁰* was forgotten. As to the other readings he deals with, note that the Paz. is nowhere *sědōš* 'three nights', as given by modern scholars; at the most it can be deducted by combining several later var. (It is not quite clear whether *se dōš* refers to our term in the Riv. **173.** 17: *farzand-ī ki bi-mīrad, ki duvāzdah sāla, ba-gāhān bastan, se (3) dōš sarōš se (3) tā . . . kardan;* Bharucha, Rist. 462 n., where he quotes from other Rivāyat-s, translates as if there were *yaʿnī* 'that is' before *sarōš*; as it is, it can simply mean 'for three nights threefold *sarōš* [ceremonies]'.) This is to my mind a great objection against the theory; otherwise in MP. *t* can stand for *d* in proper names, transcriptions and the like, and its use with *yaštan* is not strange, as it is in the case of *stawīh* and *tars i astūdān*. If we take the Paz. *sadiš, sadaš, saduš* as genuine and consider the orthography, *satuš* must be the reading. It is also probable that it contains 'three': *sa-* can be *se-* or *si-*, cf. the Paz. *sadīgar* for *sitīkar*. The rest can be read: *tuš*, cf. *tušt, tōšīt* (?) 'calm', AirWb. 657 f., — NP. *tuš* means just the contrary 'grief, agitation'; or *tōš*, cf. NP. *tōš* 'power, strength, vigour', Av. *təvīšī-* (Nyberg would derive the whole term from Av. **us-təvīšī-*; but *us-* remains in MP.), *tōš* like *tōša* also means 'provisions for the journey'. (Pavry, Fut. Life 73 n., has thought of the latter term along with S. *toṣa-*, but the NP. word means only 'provisions for the journey' as also in MP., s. Aog. 41 ff. and Arm. lw. *tʿošak*.) After all the ety., and hence the reading, remains uncertain; for the present I have read *satuš*.

15. The following discussion on some points is given here, because for one reason or another it was not inserted in the notes where I have dealt with the rest when necessary.

The length of a *hāsr*, a measurement of time.

We read in the Šnš. **9.** 1 that twelve long *hāsr*-s or eighteen short ones make a day and night. The latter measure must have been in use even in Avesta days, since we read *dvadasanhāϑrəm asti ayrim ayarə*, 'the longest day has twelve *hāϑra*-s', FrO. **36.** 10, the source of which may be the Nikātom Nask, s. DkM. **715.** 10 ff.; SBE. **37.** 67. That the short *hāsr* and not the longest one is meant here can be seen from *rōč i hāmīnīk 12 hāsr, šap 6 hāsr*, 'the summer day is twelve *hāsr*-s, the night six *hāsr*-s', BdK. **60.** 2, thus the total being eighteen *hāsr*-s. (It is another matter if this statement cannot be verified from the existing conditions.) There was also the shortest *hāsr*, twenty-four of which made one day and night. West, SBE. **5.** 308; **37.** 51, and Bartholomae, Wb. 1803, have misunderstood the FrO. **36.** 11 f.; *ān rōč šapān, kē rōč ayryak* ⟨₀⟩ *andar*, 'that day and night, in which the day is the longest' is the gl. of *ān i ayryak rōč*, 'the longest day'; then follows *12 hāsr i ayryak u 18* (thus K; even M not *20* which is expressed quite differently) [*i*] *miyānak u 20 u 4 i nitom*, 'twelve longest *hāsr*-s and eighteen middle and twenty-four shortest [make one day and night]'. West is wrong there also about *hāsr i miyānak pa zamīk, kē* (MSS.

hač i. e. mn instead of mn n) *frasang-ač xᵛānēnd, 1000 gām i 2 pāδ, kē rawišn apāk sačišn i žamān, i hāsr* [*i*] *miyānak* [*i*] *rōč šapān handāxtak*, 'a middle *hāsr* on land, which they call also a *frasang*, is a thousand steps of two feet [each], the traversing of which is with the passing away of the time, estimated as the middle *hāsr* relating to the day and night', FrO. **35**. 12 ff. This supports my interpretation, as three-fourths of an hour, i. e. the middle *hāsr*, is just necessary to go a *frasang*, if we take it as equal to about three miles. In any case 'a thousand steps of two feet [each]' is very little for a *frasang*, though the same estimate is given in the BdK. **63**. 2 f.

16. The history and significance of the names of the degress of sin and of their 'prices'.

The Šnš. **1**. 1 quotes the authority of the V. for these names, but the reference looks like an interpolation. If it is not so, then the V. **4**. 17, 30, 34, 37, 40 is meant. The first of the terms is not mentioned here, the next four are quite identical, but the last differ; yet these too can be identified with each other by referring to the FrO. **32**. 4 which contains the same terms as the Šnš., but applies them to bodily injury as the V. We also learn from the former, cf. 7, that *bāzāk* is an abbreviation of *bāzāk-žanišnīh*, Av. *bāzu-ǰata-*, N. **71**. 7 (42) where also other terms occur as they do in our text. Hence the V. need not be the source for them.

16 b. West retains the number seven of the MSS., and tries to explain the anomaly between it and the eight names of the degrees by saying that the second and the third are considered as one, their value being the same, or that *framān* is an addition, it not being mentioned in the V. **4**. But it is better to consider seven as a clerical mistake for eight, because elsewhere the eight degress of sin are spoken of, Riv. **301**. 9; **304**. 2, and they are mentioned there by name just as in our text which, it should be noted, is in many cases the source of the Riv., and such it may be for this item also. Again these eight form a group in the PazT. **139**. 12; Tīrandāz 401. The latter, 402, adds about *framān* that it is also called *andarz farmān* under which name it is mentioned in the PazT. **120**. 2, though not immediately before the other seven. This means that *framān* is an abbreviation of *handarz framān*, and very probably also of *framān spōxtan*, PV. **6**. 9 (15) com. According to definitions *framān* is the sin of not carrying out a promise given to a person dying or going to another country, SXᵛAp. **36**. 7 ff.; whereas the other seven are various grades of assault or bodily injury, ib. 15 ff.; FrO. **32**. 1 ff.; Šnš. **16**. 2—4. Hence one may say that *framān* does not belong to this group. But as we shall presently see, the application of the terms is not restricted to the subject mentioned in their definitions.

16 c. It is true that the literal meanings of the terms and of their epithets — V. **4**. 17, 30, 34, 37, 40 — leave no doubt that their primary object is to denote the different kinds of assault, but it is important and interesting to learn that they are applied to all sorts of offences and that too already in the Avesta: *yō avaδa nōiṯ aiwyāsti ⁺ašaya ⁺arəduš havayaṇhəm ⁺axtīm*, 'he who does not study there out of disinclination, his suffering is equal to an *arəduš*', N. **23**. 24 ff. (15).

(Bartholomae, Wb. 1787, does not translate the last part; for *arəduš* instead of *°ša*, cf. the var. and its use elsewhere; for the doubtful *havayaṇhəm*, var. *hāv°*, I follow the Ptr. *havand.*) And *yō gāϑanąm ōyəm vāčim apayāiti, aēvąm vā vačastaštīm, ⁺ϑrī ⁺vā āzāiti, ayarə·drāǰō vā vāstryāṯ; . . . yaϑa čaϑrušum ⁺yārə gāϑā asrāvayō, hyaṯ ⁺arəduš hē šyaoϑanəm; ϑrišūm tarō, xᵛaraya; naēməm tarō, ⁺bāzu·ǰataya; vīspəm tarō ⁺yārə·drāǰehīm, yātəm āstryeiti; yaṯčiṯ ⁺pasčaēta aēvąm ratufritīm avaraoδayeiti, tanūm ⁺piryeiti,* 'who omits a single word, or a single verse of the Gāϑā, one should dictate him three [blows], or for the length of a day field-work; . . . when he does not chant the Gāϑā for the quarter of a year, then *arəduš* is his sin; he trespasses *xᵛara,* beyond the third, *bāzu-ǰata,* beyond the half, and *yāta,* beyond the whole of a year's length; thereafter when he neglects a single prayer, he forfeits the body', N. **70.** 18 ff. (42, — s. Wb. 149, 158, 194, 1867, 1494). There is no doubt that the smallest sin of *3 srōšočarnām,* PazT. **119.** 13, which is identified with our *framān,* Šnš. **11.** 1, takes its name from the smallest punishment mentioned here, viz. three blows. This too shows that *framān* is not an interpolation. — Bartholomae has not observed that the terms are thus used for offences other than different grades of assault. I believe, he, IF. **10.** 5 ff., is wrong also in taking the clause *taṯ paiti ⁺ainim dahməm ǰainti* after *yō gaϑā asrāvayō naēməm yārə,* N. **74.** 5 (45), literally. The passages already quoted show that the said clause is nothing more than a simile, and so it is expressed by the Ptr. *hač ān* 'thereby'.

16 d. We may safely take it for granted that the bad deeds in other spheres of life were also designated by these very terms, as we are told *ka hač (h)an* (aan, yet not *axᵛ*) *dar ān and bav[ē]t, hamgōnak āgrift . . . xᵛānīhēt,* 'when from another matter (or subject) that much happens, in the same way it is called *āgrift . . . .*', FrO. **32.** 6 f. They are used even for good deeds: *kirpak-ač pa ham handāčakīhā kunīhēt* (or *gīrīhēt,*) [*u*] *nām i sang* (yyn y, not *sart* which is written yy rt) *u patmān hamgōnak xᵛānīh[ē]t,* 'good deeds also are performed (or considered) according to the same measures, and the names of the value and degree are called in the same manner', FrO. **32.** 7 f. Hence it is that we are told about them elsewhere that they are the names of the degrees of both good deed and sin, Riv. **304.** 6, 11; SdBd. **13.** 1 (where *xᵛad* is to be read instead of *xurd* or *xᵛard*). And some of these terms are actually used with reference to good deeds, s. Šnš. **2.** 93; **4.** 14; **6.** 3, 4; **7.** 4; **8.** 20; **10.** 24 with respective parallels.

16 e. After the enumeration of the different degrees of sin their 'prices' are given, Šnš. **1.** 2, as can be concluded from the occurrence of *arž* with reference to two of them, and not their 'weights' as West says, although the terms *stēr* and *dra(x)m* can be applied to weights also. His interpretation is based upon a wrong assumption, inasmuch as he connects the matter with the account about the weighing of good and bad deeds on a balance in the next world. Also Bharucha, Rist. Ap. 5 ff., takes the terms as weights, very probably because the later authorities use the word *vazn* 'weight' about them, s. below. But the idea is about taking 'fines', to say in political parlance, or about demanding 'atonements' to use an ecclesiastical phrase, for sins committed. This is not uncommon. In Avesta times cattle were used as the means of fine or atonement as can be

seen from *arəduš vā ayryō-staorəm vā bistaorəm vā yaṯ mazanhəm vā xᵛarəm*, 'an *arəduš* or a first class large animal wound or a two [first class] large animals one or a still greater one', N. **74.** 10 ff. (45). Bartholomae, Wb. 1867, and Bulsara (in his tr.) see in the passage the enumeration of four offences. They are, to use the MP. forms, *arduš*, *xᵛar*, *bāzāk* and *yāt* equivalent to thirty, sixty, ninety, and hundred and eighty *stēr*-s respectively. The ratio shows that one first class large animal and two first class large animals — (and these alone can be meant by the author in the second case also, although Bartholomae in IF. **10.** 7 and Bulsara in his note take them middle class ones, which is unwarrantable) — do not correspond with *xᵛar* and *bāzāk*, i. e. with sixty and ninety *stēr*-s, but they do with *arduš* and *xᵛar*, i. e. with thirty and sixty *stēr*-s. Hence I take the first two items *arəduš vā ayryō-staorəm vā* as referring to one class only. Their identification can be also otherwise proved, viz. from the money value of the animals, which is given as follows: *pah* 'small animal, sheep' = three *stēr*-s, and *stōr* 'large animal' = twelve *stēr*-s, PV. **4.** 2. (8 f.) gl. Large animals can be of lowest *nitəma*, middle *maδəma*, and first *ayrya* class, and their money value is twelve, fourteen and thirty *stēr*-s (i. e. the same as of *arduš*) respectively, PV. **7.** 41 (106—108) gl. in some MSS., and Rabāḍī **1.** 415. An earlier authority I have not yet met with, but there is nothing to doubt about the data. In any case when an animal is replaced by a number of *stēr*-s, the latter refer to value, not to weight; and so also *dra(x)m*-s.

16 f. As to the worth of a *dra(x)m* in modern currency, the statement "about two pence", PPGl. 243, seems to be borrowed from a NP. dictionary, and therefore must be corroborated. In the absence of positive data we must settle it from the Sasanian coins that have been discovered. West, SBE. **24.** 326 n. 6, took on the authority of Mordtmann, ZDMG. **12.** 45, sixty three grains as the standard or average weight of a silver *dra(x)m* and calculated its value about seven d.; Nöldeke, Sasan. Tabarī 355 n. 1, gives seventy Pf. on the authority of Pertsch, but himself adds that it does not agree with the other facts, viz. according to al-Balāδurī 465 the Sasanian *dra(x)m* was of the full *miϑḳāl* weight, whereas the later one was of the seven-tenths, and the latter had the worth of forty Pf. Now if we calculate from these data, the Sasanian *dra(x)m* should be estimated at about sixty Pf. which agrees with the result arrived at by West.

16 g. Other authorities, Šnš. **11.** 2; **16.** 4 f.; Riv. **301.** 12 ff.; **304.** 3, 8, (13 and SdBd. **13.** 6. are defective), agree as to the valuation of *arduš* and the following degrees, but they differ about the rest. The first of these has been totally misinterpreted by West through unwarranted conjecture, careless decipherment and wrong assumption. It runs: *framān -ē 3 dra(x)m sang u dāng 4, u srōšaćarnām dra(x)m -1* [*u*] *dāng 3,* [*u*] *3 srōšaćarnām 4 dra(x)m sang u dāng 3,* [*u*] *āgrift 33 stēr, u ⁺ōvrišt 33 dra(x)m sang* . . . West changes *u dāng 4* into *i dāng 4*, though he retains the other similar phrases, where he deciphers *2* instead of *3*, but he is wrong as can be seen from the FrP. **30.** 1 where *dāng* is expressed by m also, instead of m d. Further he assumes that the *dāng* is a quarter of a *dra(x)m* as in NP., but even here an alternative scale six to

one is given. In all such cases we must appeal to the MP. sources. That small, charming, aphoristic piece *Dārūk i Xᵛarsandīh*, PT. **154**, clearly indicates that six *dāng*-s make one *dra(x)m*; and cf. *dāng 3*: *nēm dēnār*, FrP. **30.** 1. Again in Syriac, Lagarde Ges. Abh. 32, and in Arm., Hübschmann ArmGr. 134, this loan-word is used for the obol which is one-sixth of a drachma. And the Sasanian numismatics knows of an obol, but not of a quarter drachma, ZDMG. **8.** 146; Paruck, Sasanian Coins 38. The very passage indicates that the *dāng* is to be so understood, otherwise three times the price of a *srōšačarnām* would not correspond to that of *3 srōšačarnām*. Since *framān* is identified with the latter, its price must be exchanged thus *4 dra(x)m u dāng 3*. There must be some mistake in the remaining part also. — Šnš. **16.** 1—3, 5 is neither clear nor consistent; *frāman* is said to be *3* n n m ab (*ē*) *i 5* an k (anna?) in 1, cf. *srōšočarnām -1* 3 n n m b (*1*) in 5; *āgrift 53 u dra(x)m 2* in 2 but *15 stēr* in 5; and *ōvrišt 73 dra(x)m 3* in 3 but *25 stēr* in 5.

16 h. The NP. authorities, SdBd. **13.** 3—5, Riv. **304.** 2, 7, 12, give seven, twelve and fifteen *astēr*-s for the first three degrees; (cf. the prices of a low class and a middle class large animal); also eight for the first, Riv. **301.** 11; **304.** 16, 18. While doing so they use the word *vazn* 'weight', Riv. **301.** 10; **304.** 18; and the details about it, — viz. one *astēr* = fourteen *miϑkāl*-s = four *diram*-s, and four hundred *diram*-s = one *man*, SdBd. **13.** 3, Riv. **301.** 15; **304.** 12 — correspond with modern scales, especially with those used in Kirman and Yazd, the centres of Zoroastrians in Persia, s. Phillott, Higher Persian Grammar 215. The cause of this change cannot be ascertained with certainty. Was it due to ignorance or to some definite motive? The latter is not out of the question. In post-Sasanian days the clergy were not able to exact fines for religious offences committed by the laity. Hence the value of the offences was changed into weight, which was to be counter-balanced by the weight of good deeds, i. e. ceremonies performed by the priests. This enabled them to preserve their source of income.

17. The origin of the practice of the *sag-dīd* (lit. 'seen by a dog', and not 'dog's gaze' as commonly given, because the opposite phrase of its MP. is *sak nē dīt* 'not seen by a dog').

The germs of this practice are traced in several places. Firstly in the V. **8.** 14—22 where it is enjoined that a particular kind of dog, or a priest reciting some formulas must go along the way where a corpse is carried, before it can be taken into general use again. Secondly in the V. **7.** 29 f., 33 f.; **8.** 36 ff., 98 ff., where milder and stricter processes of purification are given, according as the putrefying body is gnawed (*aiwi-ynixta-*, Ptr. *apar žat*) or not gnawed by corpse-eating dogs and birds; and this expression is said to mean whether the *sag-dīd* is performed or not. — The words 'gnawed' and 'not gnawed' in the first two cases must have changed places, or we must give a different interpretation to the account there; but in these very cases MF. **369.** 8; **374.** 13 uses *sak* (*nē*) *dīt* for the other phrase. And lastly in the passage occurring after the V. **7.** 2 in the *sāda* MSS., which tells us that the *nasu*'s attack upon a corpse remains 'till a dog sees it or eats it up or a corpse-eating bird flies above it.' (There must have existed a Ptr. with gl. of this passage, it is quoted in MF. **352.** 11 ff.)

17 b. In the last case the first clause and the last (for which cf. Šnš. **2.** 5; PV. **7.** 2 (4) com.) point to the *sag-dīd*, whereas the second to the disposal of a corpse through dogs. Also the account about the 'gnawed' and the 'not gnawed' corpse shows that the practice of the *sag-dīd* is to be connected with that of entrusting a dead body to dogs and vultures. (The reason of this usage lies according to Hertel, IIQF. **9.** 23 f., in what he calls the Avestic Doctrine of Fire. A dead body is possessed by the 'evil fire'; its destruction in this manner is favourable to the good creation, whereas burial and cremation are unfavourable, because the former would strengthen worms and insects, and the latter would endanger fire.) Again it is said of the very birds, which drive the *nasuš* off (Šnš. **2.** 5), that they are created for devouring dead matter: . . . *dālman* (or *kark*[*ā*]*s*) *nasāk* x^v*arišnīh* (or x^v*artan*) *rāδ dāt* [*ēstēt*], *ētōn-ač varāk i* [*siyā*] *u sār i gar*, GBd. **155.** 10 f. (BdK. **47.** 12 f.). In practice also they are not used for the purposes of the *sag-dīd*. Thus the two facts are often mixed up. On the other hand dogs are no longer used for disposing of corpses. We do not know when and why this was stopped; but it can be safely said that the dog was felt to be too domestic to be allowed to devour dead bodies; and hence it may with some probability be suggested, that the practice of the *sag-dīd* was introduced as a mere show for that older and more savage custom. This is a working hypothesis which can be rejected when a better and more authoritative one is put forward. But it must be said that the absence of a direct reference to the practice in the V. is inexplicable, and that the indirect references lead us to this explanation.

17 c. It is true that it does not hold good in the first account, V. **8.** 14—22, which in its turn is something different from the common *sag-dīd*. Still it undoubtedly shows that the particular type of the dog (and in its absence a common one also, as the PV. **8.** 16 (41) gl. declares: *ē! pa sakīh ēn apērtar, tāk apārīk-ač šāyēt*, 'lo! among dogs this is the most supreme, while others also are allowed') is believed to possess the power of destroying the *nasuš* or Putrefaction; and thus far and no further can the account be said to bear comparison with the practice in question.

17 d. The latest explanation of this belief comes from Hertel, IIQF. **9.** 40 ff.; it also is based upon the Avestic Doctrine of Fire. The act of seeing, says he, was considered by the Indo-Iranians as the act of radiating light, which was in one's body, through the eyes, and not as the effect of light on the retina (for details s. IIQF. **6.** 32 f.). Again an opposing power was destroyed by radiating light, i. e. by looking or staring at it. In other words just as 'the evil eye' could harm, so also 'the good eye'. Now among the domestic animals the eyes of the dog only (the cat was not yet known to the Aryans) glittered during the night, and it was in the darkness that the evil powers were most feared. Owing to these facts the dog's sight was considered especially fit for driving them off; and hence its use in the case of a corpse, one of the abodes of evil. The dog is similarly required while purifying a defiled person (V. **8.** 37 f.), a custom still observed in the *barašnūm* ceremony. There is no denying that this belief about the dog's sight can be at the root of the

sag-dīd; and if it must be so, those indirect references need some other interpretation.

18. In the following I give the analysis or summary of the text, not only under different sub-heads but also with hints as to important or interesting points which can then be easily looked up in the original. As said above I do not go into details as regards the parallel texts, but simply give the respective places. It may be noted that the order of the details is not always the same, and the details themselves can be less and more and even different. Again I give only those places which bear comparison with the contents and not merely with, say, the headings. I could have similarly referred to modern customs, but Modi, Cerem., can be easily consulted for them.

1. 0—4 Introduction or general remarks.

0: Initial formula. 1: The names of the degrees of sin. 2—3: Their 'prices'. 3b—4: The authorities whom priestly judges followed.

2. 1—5b; **10.** 32 On the *sag-dīd.*

1: The time when the *nasuš* (Putrefaction) attacks. 2: The dogs that drive it off. 3: How they do it and how not. 4: How the blind dog does it. 5: The birds that drive it off and how. 5b: When is it not driven off? **10.** 32: When is the *sag-dīd* to be repeated?

Cf. V. **7.** 1—4; PV. **7.** 2 (4) com.; **3.** 40 (138) com.; MF. **356.** 6 ff.; Riv. **110.** 18 ff. (as regards **111.** 7 Modi's "oftener" is wrong; he is misled by *bēštar* 'more' for *pēštar* 'sooner'; note that the next clause enjoins the performance a 'second time', and cf. its tr. *setāb* 'soon, quickly', Guj. Riv. 322, and *zūdtar* 'sooner' in the beginning); **118.** 15 ff.

2. 6; **10.** 10 Double care if the dead be a pregnant woman.

Cf. MF. **181.** 13 ff.; Vkd. **146.** 12 ff.; Riv. **235.** 13 ff.; PazT, **220.** 8 ff.

2. 6b—11 On carrying a corpse to the *daxmak.*

6b: Its position. 7: How many at a time? 8: The persons who can carry it. 9: It should not be covered. 9b: Not to be carried in rain. 10—11: Precautions, if it rains on the way.

Cf. V. **8.** 4 ff., 23 ff.; PV. **8.** 7 (17) com., 10 (28) com.; MF. **383.** 10 ff.; Riv. **115.** 11 ff.

2. 12—29, 36—37, 62b On the passing of pollution upon different objects and from them (and from different positions) into the ground, when death occurs or *nasāk* lies on them.

12: Bedding. 13: Bedstead. 14: Plaster. 15—16: Stone united with the ground, partly not so, wholly not so. 17: Dung and ashes. 17b: Salt and plaster in pieces (not in powder). 18: Roof. 19: Wall (?). 20: Bridge (built). 21: Roof of a reservoir. 22: Reservoir. 23: Gallows. 24: Sitting position. 25: Tree with fresh bark. 26: Tree with dry bark. 27: Fresh branch. 28—29: Dry branch. 36: Brick, earth, mortar. 37: Dung, ashes, flour. — The rules in 36, 37 give the guiding principle. 62b: Ground; frame of the roof.

Cf. PV. **6.** 5 (9) com.; MF. **322.** 1 ff.; **327.** 10 ff.; Riv. **123.** 5 ff.; PazT. **230.** 20 ff.

2. 30—35 On the spread of pollution when *nasāk* lies outside or inside a jar.
30—31: When wine in the jar. 32: When clarified butter in it. 33: When a serpent in the jar of wine. 34—35: When in or on the jar of corn.
Cf. PV. **6.** 5 (9) com.; MF. (**183.** 15 ff.) **326.** 2 ff.; Riv. (**129.** 12 ff.) **131.** 5 ff.

2. 36—37 S. above 12.

2. 38—44, 47—49 How to deal with or what happens to the things in the house (of worship) where death occurs.
38—40: Fire. 41: Prepared and unprepared food. 42: Clothing. 43: Consecrated water and milk. 44: Ceremonial garment. 47—48: Prepared and unprepared food in a 'lonely apartment'. 49: Ashes of the Fire of *Vahrām*.
Cf. V. **5.** 39 f.; PV. **5.** 44 (134) com.; MF. **292.** 15 ff.; PRivDd. **2.** 7 ff.; Riv. **121.** 2 ff.; **122.** 13; **123.** 1.

2. 45—46 On the whole house being not affected when death occurs in a particular part.
45: Threshold between two houses. 46: Cupola of the fire-temple.
Cf. PV. **5.** 44 (134) com.; MF. **296.** 4 ff.; Riv. **125.** 12 ff.; (**126.** 1 ff.); **122.** 10, 17.

2. 47—49 S. above 38.

2. 50—53 On the sin of carrying fire etc. and going into the house where death has occurred, before the prescribed period.
50: Fire. 51: water. 52: Consecrated objects. 53: A person going unnecessarily, and necessarily.
Cf. V. **5.** 41 ff.; MF. **305.** 15 ff.; PRivDd. **3.** 7 ff.; Riv. **125.** 9 ff., 17 ff.

2. 54—62 On the spread and stoppage of pollution.
54: Pollution in the void. 54b—55: 'Contact' and 'non-contact' pollution. 56: Until the *sag-dīd*. 57—58: Spread stopped at certain objects (?) and animals. 59: Pollution through a hedgehog. 60: 'Direct' and 'indirect' infection. 61: Through a monkey. 62: Through different dogs.
Cf. V. **5.** 27 ff.; PV. **5.** 32 (107) com., 34 (112) com.; MF. **288.** 15 ff.; Riv. **129.** 2.

2. 62b S. above 12.

2. 63—72; **10.** 12 On the sin of touching etc. a corpse or a carcass, and the purification thereafter.
63—64: To carry alone and without the *sag-dīd* etc. 65: By many but without it. 66: Alone but with it. 67: Touching but not moving. 68: Moving with a stick when without the *sag-dīd*. 69—70: Moving with the hand of another with and without his strength. 71: The same with the *sag-dīd*. 72: Benefit of doubt in case of darkness. **10.** 12: Touching bare-footed or otherwise.
Cf. V. **3.** 14; PV. **3.** 14 (48) com.; (Riv. **133.** 13 ff.; **134.** 8 ff.).

2. 73 What, when it is not known which sheep from a flock, which tree from a forest and which piece from a fire-wood stand is polluted?
Cf. MF. **269.** 4 ff.

2. 74—75 What to do with a gate and a door on which *nasāk* impinges?
74: Village gate, city gate, outermost gate of a house. 75: Door of a principal apartment, of a *daštānastān*, of a *daxmak*.
Cf. PV. **5.** 4 (14) com.; MF. **269.** 10 ff.

2. 76—94 (**9.** 7) Carcass in water.
76: The sin of carrying it to water. 77: The measurement of pollution in running water. 78: The same in stagnant water. 79: One must bring it out. 80—82: Different opinions in case of danger. 83: Clothes to be put off when bringing it out. 84: To be brought out through the breadth; if not possible, then through the length. 85: To put it so, that the water from it cannot return. 86: Can be thrown out similarly. 87: Dragging allowed, grasping and putting back not. 87b: Can be carried from a large water to a small water, if they are not connected. 88—89: Different opinions about dragging it below or above the water. 90: While going in, the thought must be to bring out all, otherwise the touch with one of the unseen pieces pollutes. 91: When too heavy. 92—93: When too decomposed. 94: Not allowed to remove from water to rain. (**9.** 7: When one dies in a ship, his corpse is to be thrown into the water.)
Cf. V. **6.** 26 ff.; PV. **6.** 29 (64) com.; MF. **190.** 9 ff.; **332.** 16 ff.; Riv. **86.** 3 ff. — It is not without interest to note here what I have often observed in my village. Whenever a bird — it was generally a crow and sometimes a hen — fell into a well and died therein, it was not only immediately removed, but the women of the street used to gather together each with a water-pot and a rope, and group after group used to draw out water from the well for a considerable time.

2. 95—104 Corpse etc. on the articles of dress and bedding.
95: Which clothes become useless. 96: Clothing of a menstruous woman. 97: Mode of washing. 98: Leathern clothing. 99: Of cotton, wool, coarse silk, silk, hair, camel's wool. 100: Wool, — twisted, and unconnected. 101: Mattress connected with a rug, and not so. 102: Several cushions piled together. 103: Cushion with a woollen padding. 104: Several cushions tied with a band.
Cf. V. **7.** 9 ff.; PV. **7.** 10 (27) com., 12 (32) com.; MF. **359.** 11 ff.; Riv. **237.** 3 ff.

2. 105—111 On the eating of *nasāk*.
105: By a pregnant woman. 106: By 'alone'-carriers of dead bodies. 107—108: Grievousness of this sin. (108b: 'Alone'-carrier thirty steps apart.) 109—111: By animals in different conditions; their milk, dung hair and wool polluted for one year.
Cf. V. **7.** 23 f., 76 f.; PV. **7.** 24 (64) com., 77 (192) com.; MF. **364.** 9 ff.; **376.** 10 ff.; Riv. **277.** 8 ff.; Sd. **73**; PazT. **220.** 11 ff.

2. 112—117 *Nasāk* on (the articles of) metals, precious stones, etc.
112: Gold. 113: Silver. 114: Iron, steel, stone. 115: Crystal, amber, gem. 116: Pearl, amber, ruby, turquoise, jet, coral, bone. 117: Earth, horn.

Cf. V. **7.** 73 ff.; PV. **7.** 75 (188) com.; MF. **379.** 2 ff.; Riv. **239.** 8 ff.; Sd. **91**; PazT. **241.** 12 ff.

2. 118 *Nasāk* on fire-wood.

Cf. V. **7.** 28 ff.; PV. **7.** 31 (82) com.; MF. **369.** 6 ff.; Riv. **243.** 2.

2. 119—124 *Nasāk* on corn, fodder, fruits and other eatables.

119: Corn in different stages, fodder. 120: (Wal)nut. 121: Pomegranate. 122: Date in its different parts. 123: Pomegranate, citron, quince, apple, pear. 124: Meat, clarified butter, milk, cheese, preserves.

Cf. V. **7.** 32 ff.; PV. **7.** 35 (93) com.; MF. **183.** 1 ff.; **371.** 11 ff.; Riv. **129.** 12 ff.

3. 1—3 When are the articles polluted on the occurrence of menstruation?

1: The general rule. 2—3: Carpet, mattress, cushion.

Cf. MF. **427.** 13 ff.

3. 4—9 What should a woman do when it occurs?

4—5: Removal of her ornaments and dress: bracelet, ear-ring, head-gear (or head-ornament), tight under-garments. 6—9: About the prayer to be held.

Cf. PV. **16.** 2 (5) com.; MF. **429.** 4 ff.; Riv. **205.** 17 ff.; **207.** 12 ff.; Sd. **68.** 10; (SdBd. **96.** 23).

3. 10—13 When and what is polluted through a menstruous woman?

10—11: Ceremonial implements through her sight, etc. 12: Food and water through her nearness. 13: Clothing (or bedding) and garments through her touch.

Cf. V. **16.** 3 ff.; PV. **16.** 4 (10) com., 7 (17, 20) com.; MF. **438.** 5 ff.; Riv. **206.** 7 f.; Sd. **68.** 13 f.; SdBd. **96.** 11.

3. 14, (16—18) When can she bathe? Or on the period of depletion.

14: In ordinary case. (16—18: In special cases; — s. the next.)

Cf. V. **16.** 8 ff.; PV. **16.** 11 (23) com.; MF. **449.** 7 ff.; Riv. **208.** 9 ff., **218.** 5 ff.; SdBd. **96.** 15 ff.; Sd. **68.** 8 f.

3. 15—19 Special cases of menstruation.

15: After a woman has delivered or miscarried. 16: Second immediately after a long menstruation. 17—18: Second after three days. 19: Leucorrhœa.

3. 20—21b When free from menstruation.

20: *Barsum* etc. beyond three steps not polluted. 21: She can sit at the end of the fire. 21b: Bath and atonement.

Cf. V. **16.** 12; MF. **454.** 2 ff.; (Riv. **208.** 12 ff.; **218.** 9 ff.).

3. 22—24 When doubtful whether menstruation or fœtus.

Cf. MF. **181.** 4 ff.; PV. **5.** 49 (146) com.

3. 25—26 Sins through contact etc. with her.

Cf. V. **16.** 14 ff.; MF. (**452.** 9 ff.); **412.** 6 ff.

3. 27—29 Sins when she does not abstain from fire, water, sun etc., cattle, plants, 'righteous' men.

Cf. PV. **16.** 2 (8) com.; MF. **208.** 3 ff.; **416.** 6 ff.; **422.** 9 ff.; Riv. **209.** 11 ff.; **216.** 17 ff.; **217.** 16 ff.; SdBd. **15**; **41.** 1; **96.** 2 ff.; Sd. **68.** 1 ff.

3. 30—35 Precautions with respect to various things.

30: Kindling of fire. 31: Tray, cup, dish. 32: *Barsum* while consecrating the *drōn*. 33: Her seat. 34: Her food. 35: Her prayer. (S. also **10.** 39.)

Cf. V. **16.** 3 ff.; PV. **16.** 7 (17) com.; MF. **430.** 16 ff.; **440.** 5 ff.; Riv. **206.** 7 ff.; **207.** 17 ff. — It may be noted that all this is in vogue even today, unless otherwise mentioned; but at the same time even the principal rules are quietly discarded without any protest from the orthodox, who connive at and even participate in this proceeding owing to the changed conditions of life.

4. 1—3, 11 On the *kustīk*.

1: Stuffs of which it should not, and can, be made: plain silk; — wool of the goat, sheep, and camel; hair. 2: Its size (s. also **10.** 1). 3: Its exchange. 11: Its condition. (**10.** 13: Age for tying on the *kustīk*.)

Cf. N. **163.** 29 ff.; Riv. **29.** 10 (only: *kustī az ān i siyāh pašm na-šāyad*); **32.** 17 ff.

4. 4—8 On the *aiwyāhan* or (?) *šapīk*.

4: Stuffs: brocade, shot silk, plain silk, painted silk; — leather, wool, hair, cotton, hemp, silk, bark. 5: Its size. 6: Of two folds or lined not allowed. 7: Of one fold allowed. 8: Two at a time.

Cf. N. **163.** 11 ff.; **164.** 4 ff.; **165.** 20 ff.; (**169.** 16 ff.;) DdA. **39.** 2.

4. 9—10, 12 On the sins of 'running without the *kustīk* on the *šapīk*', of 'devouring chatteringly', of 'running with one pair of foot-covering'.

Cf. V. **18.** 54 ff.; PV. **18.** 55 (116) com.; PRivDd. **34.** 4 ff.; Riv. **22.** 19; Sd. **82.** 2; SdBd. **60.** 5 f.; **89.**

4. 13—14 On the merit of sleeping with the *kustīk* etc. on, and reciting an *Ašəm* before sleep, (s. also **10.** 24).

Cf. N. **164.** 29 ff.; Sd. **84.**

5. 1—5, 7 On the sin of 'devouring chatteringly'.

1: As regards a child of five, of five to seven. 2: of eight to fifteen. 3—4: When and how great. 7: As regards a deaf and dumb person.

Cf. N. **22.** 16 ff.

5. 6 When does the *gētō-xrīt* take place? (Cf. e. g. SBE. **18.** 234, 236 f.)

6. 1—6 On sin and good work.

1: As regards a deaf and dumb person. 2—4: Their reckoning and reward — hell, *hamēstakān*, heaven, 'the best existence', *garōtmān*. 5: Progress in heaven. 6: As regards an infidel.

Cf. PV. **7.** 52 (136) com.; PRivDd. **206.** 12 ff.

6. 7 Three creeds: of the best are "we"; of the mixed, the disciples belonging to Sēn; of the worst, the Manicheans (?), the Jews, the Christians and others of the same sort.

7. 1—6 On worshipping the sun.

1: During the three periods of day-time. 1b: After being ready for work. 2: If the hands cannot be washed, the sun waits. 3: Sin of not worshipping it. 4: Merit of worshipping it, moon and fire. 5: When cloudy. 6: The effect of non-worship on the share of good works done by others.

Cf. PRivDd. **121.** 15 ff.; **42.** 15 ff.

7. 7 Not washing the hands after getting up makes every good work worthless; it does not accrue without faith, which requires the presence of *yazat*-s, who do not come when the *nasuš* is not removed.

7. 8 Propitiation formulas in the worship of fire.

7. 9 Atonement for extinguishing a fire, — four items.

8. 1 Two classes of sins and their respective atonement.

8. 2, 5—7 Atonement for a *mark-aržān*.

2: Body (and wealth) must be given up. 5: After this and repentance, he secures his right over work and good deed, and saves himself from hell by undergoing the punishment after death. 6: When his head is cut off, he becomes 'righteous', and there is no further punishment. 7: When not repentant, his head will be cut off at the final existence, and there will be extra punishment.

Cf. PRivDd. **41.** 1 ff.; PV. **7.** 52 (136) com.

8. 3 Hunting not allowed to the priest and to the poor having less than 300 *stēr*-s.

8. 4 The ceremony of a *mark-aržān* sinner is *dēv*-worship, or it helps others, — unless it be for repentance.

8. 5—7 S. above 2.

8. 8—17, 23b On repentance for or confession of sin and its atonement.

8: Confession and resolve not to commit again. 9: It must be properly heard, but must also be kept confidential; different opinions about the sin of not doing so. 10: A pupil of Āturpāt was disgraced for this offence. 11—12: Only one mastering the law can hear it. 12b: Confession even before a menstruous woman, in case of danger. 13: Before anybody, only it must be sincere. 13b: For each *mark-aržān* sin individually, if many; then no hell. But even one, and no confession, then hell. 13c: Retribution to be fixed by the priest; when not remitted, pawn. 14: Sin affecting a fellow-man must be repented before him; if not, before a priest, in which case he remains a debtor, but not a sinner. 15: When the 'essence' or principal is atoned for, as regards a fellow-man, the rest is over. 16: Punishment after death, but no hell, if sins affecting the soul are confessed but not atoned for. 17: Sin ceases after repentance. 23b: Ōhrmazd gives up His creatures only in its absence.

Cf. V. **5.** 26; PV. **5.** 26 (73 ff.) gl.; PRivDd. **43.** 7 ff.; Riv. **36.** 14 f.; **37.** 2 ff.; Sd. **45.** — It is necessary to note here that although the recital of various *patīt*-prayers is very common, nothing whatsoever of the custom of making confession exists today.

8. 18 Three sayings about *xᵛētōkdat*, *barsum*, and a man.

8. 19—23 Atonements for particular sins.

19: For a sin committed against water. 19b: The same can do for one against fire and vice versa. 20: For a *tanāpuhr* sin, equal amount of good work or a *drōn* ceremony. 21: For a *mark-aržān* sin, body. 22: Its good effect. 23: To worship diligently when it is committed.

8. 23b S. above 8.

9. 1—8 Miscellaneous.

1: On the *hāsr*. 2—3: Evils, when a priest and a supreme priest die in banishment. 4: Discussion with religious heads. 5: Ceremony that reaches either *dēv*-s, or *yazat*-s, or none. 6: Merit of establishing a good custom. 7: Death in a ship. 8: Harm of eating in the dark.

9. 9—14 (also 5) On the worship or ceremony.

9—10: Of four kinds and their relative value. 11—12: The points where the invitation of *yazat*-s and *fravahr*-s is to be proclaimed. 13: Their complaint when not invited. 14: The dead remain here as long as the flapping of the wing of a fly, or of a bat. (S. also **10.** 34—37).

10. 1—39 Rules about miscellaneous subjects.

1: Breadth of the *kustīk*. 2: Ceremonies for the departed during the *fravartīkān* days. 3: The falling of a wall on a person going to steal or going to worship makes difference. 4: Fire near a pregnant woman. 5: Making water. 6: Certain *Gāϑā*-s not to be recited over the dead. 7: Not to pour wine etc. in the dark towards the north. 8: Unlawful slaughter of animals. 9: Lamb, kid, ploughing ox, war-horse, hare, hawk, cock, *Vahuman* bird (i. e. owl), magpie, thrush (or buzzard), vulture, swallow are to be preserved. 10: Disposal of a pregnant woman after death. 11: Mode of forgiving a departed person. 12: Benefit of walking with boots on. 13: Age for tying on the *kustīk*. 14: Passing of wind during prayer. 15: Ten women must be in service at the time of delivery. 16: Care of a new-born child. 17: Increase of the sin of striking a person till his pain ceases. 18: Evils arising from the appointment of a false judge. 19: Sin of remaining single for a woman, — a man can have his lineage without marrying, at least in the final existence. 20: A superstition about a pregnant woman putting her foot on a toothpick with the bark unremoved. 21: Adoption of a child by a subordinate wife. 22: Begetting of children results in the increase of good works. 23: Charity to the worthy results in the share of good works done by the receiver on account of it. 24: Merit of reciting an *Ašəm vohū* while lying down and waking up. 25: In case of doubt about the nature of a work it is to be left off. 25b—26: While learning a text it is to be recited, not mumbled. 27: Same as 25. 28: Necessity of consultation (with similes). 29: The first part of 25b. 29b: Evils of inconsiderate charity. 30: Crowing of a hen. 31: Preservation of the hedgehog. 32: Repetition of the *sag-dīd*. 33: A dead body delivered from its cooks needs it, too. 34: Stinking meat and robbed articles not to be offered up. 35: Women as *zōt* [priests], with some ritual details. 36: *Drōn* of a disreputable woman not to be offered up. 37: Offering to fire. 38: Washing of hands before sleeping. 39: What is touched by a menstruous woman is to be washed with water and cattle's urine.

⟨**10.** 40 An interpolation in M about putting the *padān* on the dead.⟩

Cf. Sd. Intr. XVII for the list of some parallels or borrowings; and s. the notes for some sources. — Šnš. **12.** 11—16, 18, 20 similar to 4, 16, 20—23, 7, 31 respectively.

19. Even this summary gives a fair idea of the importance of our work from various points of view. Bartholomae, ZHss. 47, 49, who rightly considers our text as one of the best Pahlavī works, has referred to the mine of rare words that occur therein, and has quoted some of the names of precious stones, of fruits and of stuffs (to which *šapakīh* does not belong) in the original script without the reading and meaning. These — (for the part played by Persia in respect to which s. Laufer SiIr.) and others will be found here properly explained, in doing which my principal guide has been NP. Of course I have not followed it blindly; there are cases where the meanings given in it do not suit the context. Again it does not solve all problems. Besides rare words there occur strange idioms and stranger technical terms, for all of which I have searched and compared other Pahlavī passages where they occur. This has naturally borne good results as well as proved lost labour. I have also consulted Arm. lw. of Ir. origin, and as far as possible some Ir. dialects. The notes will give some idea of this. There also occur some new forms in our text; attention has been drawn to them in their respective places.

19b. The said names of various articles and objects give us by themselves an insight into the conditions of life at that time. This is more especially done by the numerous commands about different matters. As I have already said, many of these are no longer in force, not even in theory, which must be the outcome of the march of time and of the change of circumstances. But for those days we can say, when we take into account the religious conceptions of the people and the physical conditions of the country, that they must have formed a living code. As regards the numerous corollaries, — and especially those that are given as decisions of this or that priestly authority, — it cannot be said whether they have arisen from the actual cases that came before them for decision or from the imaginary ones that they considered as likely to occur. It can, however, be said that here and there we see their desire to develop and to schematise simple rules. In any case they are not without interest and even importance. I have not thought it advisable to add explanatory notes, except where absolutely necessary; in other cases the idea will be apparent from the translation itself, and, if need be, from the summary. Similarly I have omitted to refer to the corresponding customs of other peoples, though those of the Hindus and of the Muhammadans would show a common origin in the one case and a continuance in the other, at least in some points.

1.

K 51 r M 73 v **0.** pa nām i yazatān u[1] dahišn[2] i[3] nēwak! bavāt ān i[4] vēh, tan drustīh u dēr-žīvišnīh u āpāt[5]-hērīh[6] i[8] har vēhān u frārōn kunišnān, nāmčišt[7] ōy, kē rāδ nipēsēm[9]!

0. [I begin] through[10] the name of God and [through][11] happy dispensation[12]! May there be that which is good, health of body and long life and abundant wealth unto all the 'good' and upright dealing ones, especially [unto] him, for whom I am copying[13] [this book]!

---

0. [1] M *-u*. [2] K with plene *i*; s. n. 12. [3] K *u*. [4] K om. [5] K ^{0}*tīh*, but Vyt. **1.** 0 agrees with M. [6] Or *xīr*^{0} as Paz. and MPT., but this can be a later pronunciation; *īh* in both and also in Vyt. **1.** 0, not necessarily owing to the neighbouring *drustīh* and *žīvišnīh*, but the word forms a compound with the prec., just as *pas-xratīh* 'after-wisdom' in Šv. [7] K ^{0}*tīk* which is preferable, but AZ. 0 agrees with M. [8] Both; Davar wrong about M. [9] Both ^{0}ya yym, i. e. ^{0}*īhēm* but s. n. 13. [10] West's (and others') "in" is wrong, because then the phrase would mean 'for the sake of God', whereas the idea is 'through the instrumentality of God', as can be seen from those initial formulas which run: *pa nām u nērōk u ayārīh* . . ., 'through the name and power and help . . . ', Mx. **1.** 0; Kn. **1.** 0; PazT. **214.** 5, and from the gl.: *ku hač nām i yazatān patisār* (p yt y^0) *kunom*, 'that is, I make the beginning through the name of God', NyD. **1.** 0 (PX^{v}Ap. 14) and from the Guj. tr. *nām thī* or *nāme karī* 'through the name', ib. and **2.** 0 etc. [11] Cf. e. g. Mx. **1.** 0 where *pa* is repeated; otherwise om. it and remove 'may there be' in its place. — The initial formula *šnāyišn* [*i*] *dātār* . . . *tan drustīh* . . ., Vyt. **1.** 0 — without *pa* and without any verb — shows that our formula is not a single sentence as West and others take it, but it is to be divided into two. [12] West's (and others') "creation" is wrong; the word is to be taken in its developed sense of 'destiny, dispensation, lot, luck' and not in the primary one of 'creation', because it is used in close connection with *murvāk* 'omen' in some initial formulas: *pa nēwak dahišn u hūp* (thus, s. Hübschmann, PSt. 57) *murvāk*, 'through happy dispensation and good omen', Mx. **1.** 0; GBd. **1.** 4 (where *u* is omitted, but no *i* is found as given by Pagliaro, AZ. p. 11, n. a) and PazT. **214.** 8 where the phrase is corrupted into *pinyāk dəhəšni xūb murvā̊*. Similarly in AZ. 0 with which agrees MF. **264.** 3: *hūp murvāk -u dahišn i nēwak*. There are also other cases where only *dahišn* occurs as in the present one: Šnš. **14.** 0 and FrO. **6.** 1 where *u dahišn* (with plene *i* as often in this word) is to be read instead of *nyāyišn* (correctly, as we now know through MPT., *niyāyišn* 'singing, song, praise'; note that *kurāšak* for ^{0}*sak* of later MSS. is not Arab. *xulāṣa* 'explanation', — so also Bartholomae, ZHss. 374 — but 'a book or volume', borrowed from NP.-Arab., or if old, from Syriac).

1. čiγōn hač apastāk paδtāk ⟨pa yutdēvdāt[1] guft[2] ēstēt, ku⟩ ēn hašt[3] pāδak i vinās pa dēn guft ēstēt, ast i framān u āgrift u[4] ōvrišt u[4] arduš[5] u x^{v}ar u bāzāk u yāt u[6] tanāpuhr.[0 0 0 0] [7]

1. As evident from the Apastāk ⟨it is said in the Vidēvdāt, that⟩ these eight[3] degrees of sin are mentioned in the religion, which[8] are *framān* and *āgrift* and *ōvrišt* and *arduš* and *x^{v}ar* and *bāzāk* and *yāt* and *tanāpuhr*[9].

In some other cases *daťak*, thus always for *dātak*, is used in the place of *dahišn*, PT. 18, 55, 85 and n. 1 on 51, 58, 83, 102, 121, 134. The developed sense has been ascertained from *u dahišn* (not [*hač*] *sāsān* as ed.) *apāyēt būtan rāδ andar žamān ān kanīčak āpustan būt*, 'and for [the fact that] the destiny must take place that young woman became pregnant at the [same] time', KnS. **1.** 20, (cf. **12.** 23 where '*brihēnišn*' is used in the place of *dahišn*); and from *pa nēwak dahišn* [*u*] *yazatān ayārīh ō hindūkān frastāt*, 'he sent [him] to India through happy dispensation and God's help', PT. **119.** 19. (The ideogram for *frastāt* is written with t (as if *mat*) instead of d which is correct, though t is not rare. It may be noted that the correct reading and meaning of the ideogram is *frastātan* 'to send' and not *parastātan* 'to worship' as given by Junker, FrP. p. 82; note the context 'to write, to seal, to send, to arrive, to read, to hear, to know' **23.**) [13] West's "whose writing I am" i. e. "I am written" SBE. **5.** 191, n. 1, is wrong. Of course the original has misled him and others. The last group of letters in the word, yym, is a simple though rare mistake for ym, s. ZHss. **55.** 10; the last but one is read *īh*, but it must be considered redundant, though it occurs similarly in Vyt. **1.** 0. Even Salemann, GIrPh. **1.** 315, quotes the word from it as the only instance of Pres. Pass. 1. Sg. and translates *ōy rāδ kē nipēsīhēm* by "für den (d. h. zum Wohle dessen), von welchem ich (das Buch) geschrieben werde". This is impossible. In the facsimile ed. of Vyt. *ōy* is removed and is replaced by *x^{v}ēš*, by which the clause would mean 'for self who am copying', if we remove only *īh*. (This agrees with the fact that the copy was taken for the scribe himself as can be seen from his colophon attached to GBd. in the same codex, GBd. X.) Similarly the letters ya i. e. *īh* must be removed also in the present case. They are redundant again in the initial formula of N. p. 13 where we must read *ōy* (or *ān*) *rāδ kē nipēsēt*, 'for him who is copying'. The mistake has naturally arisen from blindly adopting *nipēsīhēt* from its correct places like AZ. 0. Another possibility is that ya may represent the phonetic complement *š* but as such *s* only is met with in the word, s. FrP. **23.** 1.

1. [1] M yy more for *dēv*, (but Davar silent). [2] K *guf* worm-eaten. [3] Both *haft* 'seven' which West and Davar retain, but s. Intr. 16 b. [4] K om. [5] K *a-* worn out. [6] K worm-eaten, or om. as P. [7] M ad. $^{0\,0}_{0}$ $^{0\,0}_{0}$ probably to fill up the last line of the page. [8] For this meaning of *ast i* cf. *karkās i z. m. ast i dālman*, GBd. **155.** 9 f. (BdK. **47.** 11 f.), and *salm dēh ast i hrōm . . . sēn dēh ast i čēnastān*, GBd. **106.** 15; (BdK. **38.** 4 where once *ān i* is used for *ast i*), and *pasušhaurv ast i šapān* etc., GBd. **96.** 5. [9] ^{0}*puhl* is the regular MP. form, but cf. NP. ^{0}*fūr*. — For the meaning and history of the terms s. Intr. 16 b—d.

M 73 r **2.** framān -1 čahār stēr, u har stēr -1[1a] čahār[2] dra(x)m-sang; āgrift u[1] ōvrišt ān i[1] kēhist[3] tāvān[4], u-š arž i pa nāmčišt, būt kē 'vēšist[4a] dra(x)m -1' guft;₀ arduš stēr[5] 30;₀ x^v^ar[6] stēr 60;₀ bāzāk stēr 90;₀ u yāt stēr 100 u 80;₀ u[1] tanāpuhr stēr[1] 300[7].

3. pa dātīh[1] [i] pōryōtkēšīh[2], ast kē pati-š yut-dātastān būt hēnd. —

3 b. čē, [gō]gušnasp hač čāštak i ātur ōhrmazd, u[4] sōšyans hač čāštak i ātur farnbaγ[3] narsēh[10], u[4] mēṭōkmāh hač čāštak i gōgušnasp[5], u aparak hač čāštak i[6] sōšyans[6a] bē guft;

2. [Their 'prices'[8]:] one *framān* is four *stēr*-s, and every single *stēr* is four *dra(x)m*-s worth[9]; *āgrift* and *ōvrišt* are[10] those of the smallest recompensation[11], and [about] their express[12] price[13], there have been some who have said 'at the most one *dra(x)m*'; *arduš* thirty *stēr*-s; *x^v^ar* sixty *stēr*-s; *bāzāk* ninety *stēr*-s; and *yāt* hundred and eighty *stēr*-s; and *tanāpuhr* three hundred *stēr*-s.[14]

3. [But] in[7] the laws[7a] of the supreme[9] lawgivers, there are some who have been of different opinions about it. —

3 b. Further[8], Gōgušnasp has declared from the commentary of Ātur Ōhrmazd, and Sōšyans from the commentary of Ātur Farnbaγ Narsēh[10], and Mēṭōkmāh from the commentary of Gōgušnasp, and Aparak from the commentary of Sōšyans;

---

2. [1] K om. [1a] K om., (Davar misprint along with the prec.). [2] K ad. *u*. [3] Both k ya yyt; and M ad. *-u*, K. *u-*. [4] M ad. *-u*, K *u-*, and both t ap an as in PX^v^Ap. **60.** 21 (where the text is a retranscription from the Paz. and hence not trustworthy) instead of t an an as elsewhere, s. WZKM. **27.** 357, and PRivDd. **44.** 3, and hence doubtful; perhaps *tāčān* 'punishment', but the meaning is doubtful, s. n. 10—11. [4a] M n. *20.* [5] M d dy, K y yy. [6] K ad. *1.* [7] K *3* worn out. [8] West 'weight' but he is wrong, s. Intr. 16 e. [9] NP. *sang* 'value, worth'. [10-11] Or 'that which is the least is flogging', but the last is not a certain meaning of *tāčān*, lit. 'causing to run';— *tāčānak* ‚whip' has its origin in 'an instrument that causes an animal to run' and not in 'an instrument by which one is flogged'. [12-13] Lit. 'price which is as express', but cf. Mx. **13.** 13 where *pa* is not translated in S. [14] For the amount in modern currency, etc. s. Intr. 16 f—h.

3. [1] Both; perhaps for *dāt i*. [2] K °*šān*. [3] As usual °b ā; K om. *n*. [4] K om. [5] M om. *gō*. [6] M om. (but Davar silent). [6a] Davar wrong about M. [7] West begins here a new paragraph, which means that he does not see any close connection with 2; but then *pati-š* becomes meaningless, hence I prefer to connect them. And it is a matter of fact that the 'prices' of sins are given differently, s. Intr. 16 g—h. [7a] Or 'justice' in the sense of 'justice giving'? [8] I believe we have to begin a new sentence from this point, and hence *čē* is not to be taken in its usual sense, but as if in the function of introducing a new subject or a new turn of thought, something like 'further, moreover, well' as in **2.** 1.; **10.** 10; GBd. **3.** 7; **44.** 4; BdK. **1.** 16; **10.** 16: PnZ. 22, 26, 39; and probably MYFr. **2.** 4 and in all the replies, at least in **3.** 82. Eventually

4. u hamāk pōryōtkēšān pa[1] ēn 3[2] čāštak ēstēnd; u hač-aš[3] ast i sust-tar, u ast i saxt-tar ēstēnd.

4. and all [other] supreme lawgivers abide by these three[2] commentaries; and out[4] of them there are some who [abide] very lenient, and there are some who abide very strict[5].

---

we can take *čē* as 'since' and consider the sentence as a subsidiary one to the next, from which the first *u* then must be omitted. If no new sentence begins from *čē*, then it would mean 'because', or 'viz.' as in Mx. **16.** 38; but then like West we must say 'against' instead of 'from', (s. **2.** 2 n. 13), which would contradict what we know about the relative position of the authorities. According to my tr. they can be divided into two groups thus:

(1) Mēṯōkmāh borrowed from	(1) Aparak borrowed from
(2) Gōgušnasp and this from	(2) Sōšyans and this from
(3) Ātur Ōhrmazd	(3) Ātur Farnbaγ Narsēh.

The last two, i. e. the earliest ones are quoted only once, — which is quite natural — N. **63.** 17 ff., where their opinions differ, and Gōgušnasp's remarks are in conformity with the attitude taken by Ātur Ōhrmazd, — they, so to say, supplement his view. Again I have examined the first seven chapters, besides other occasional pieces, of PV., and I have not found that Mēṯōkmāh differs from Gōgušnasp and Aparak from Sōšyans, but that the difference lies rather between the two groups. What is more certain is that Aparak is said to have adopted the views of Sōšyans, NM. I. **6.** 1, and there are cases in which a certain opinion is attributed to one in one place and to the other in another, NM. I. **6.** 1, 4, and PV. **9.** 32 (132) com.; Šnš. **2.** 2 and PV. **7.** 2 (4) com., and MF. **355.** 9. [9] Not 'first or primitive', because the term is applied to Sasanian worthies also, DkM. **140.** 13; **406.** 6, and is used synonymously with *dastowarān*, NM. I. **10.** 6, 10. [10] Not "Nōsāī" as West reads, whom Bulsara follows, N. tr. 137 n. 1, comparing NP. *nus* 'intellect'. Narsēh is beyond doubt, s. ŠE. 10, 23. It cannot be said with certainty whether ak yb a, Vyt. **1.** 7, is corrupted from this very name.

4. [1] M rep. [2] Both, perhaps a mistake for *6*, viz. those mentioned in 3, or for *2* whom the other four follow directly or indirectly. [3] Or *u-š* inspite of *u*; both occur often together. [4-5] Or according to n. 3 'they abide partly very lenient and partly very strict.'

2.

1. čē, pa sitīkar frakart i yutdēvdāt i mēṭōkmāh[1] paδtāk, ku[2] andar ān žamān ka[-š] γyān bē šavēt, — ka-š sak -1 andar pāδ bast ēstēt, pas-ič nasuš apar ō duvārēt[3],
M 74 v u pas ka-š vēnēt[4], ā-š nasuš ō žanēt[4]. $^{0}_{0}$

2. ēn ku, sak, kē[1] nasuš žanēt, katār ?$_0$ pasuš-haurv[2] u[3] viš-hauŕv[2] u vohunazg u
K 52 r tarunak[4] -u[5] rōγnīk[6]; u pa rōγnīk[6] yut[6a]-dātastān būt hēnd: va[na]nd[7]-ōhrmazd hač čāštak i aparak[8] bē guft[9], ku nē žanēt.

1. Further, in the third[6] chapter of the Vidēvdāt [commentary] of Mēṭōkmāh[1] it is evident, that[2] at that time when one's vital spirit departs, — when a dog is tied at[7] his feet, even then the *nasuš* (Putrefaction) rushes on [to the dead body][5], and afterwards when it sees it, then it drives off the *nasuš* (Putrefaction).

2. [Then the question is] this, viz., which are the dogs that drive off the *nasuš* (Putrefaction)? [The reply is:] the sheep-dog and the house-dog and the blood-hound[10] and the sporting[11] dog[11] and the puppy[12]; and about the puppy[12] they have been of different opinions: Va[na]nd[7]-Ōhrmazd against[13] the commentary of Aparak has declared, that it does not drive off.

---

1. [1] K ^{0}*hīh* and so in P, although *h* is struck off in K; the remaining may be read *k* as in M elsewhere, 12; cf. ^{0}*hīk*, 'belonging to M.'. [2] M ad. on the margin and in a different hand (Davar does not say this but simply adopts) *ka bē zōr γyān dāt* 'when the life is given up without violence' i. e. in case of natural death. This distinction is made in V. **7.** 1 ff. West's alternative tr. "when he shall wash with holy-water" cannot be supported by any means. It is not *zōr* i. e. *zōhr* but only cattle's urine and water that are used in washing a dying person. [3] K yb n^{0} instead of yn b^{0}; Davar misprint db^{0}. [4] Both *dīt* and *žat*; (if genuine, Passive construction) but t can be for yt found in the parallel passage, PV. **7.** 2 (4) com. [5] Or *andar ān tuhīk*, 'in that void (or area)', MF. **353.** 3 ? [6] It is in the seventh chapter of PV. that this matter occurs, not in the third. But still a clerical mistake on the part of our text or MSS. need not be assumed. For Mēṭōkmāh could just as well have inserted this matter in the third chapter (after 14 or 40) which at least incidentally deals with the same subject. Another and perhaps better solution is that the division of the whole text was different in the work of Mēṭōkmāh: he did not count the first four chapters which are of quite a different nature from those that follow; but s. 12 n. 13. [7] Meaning 'near', hardly "to" as West gives, which is so very different. The custom of tying the dog in one way or the other is not known today, but it is referred to in Riv. **119.** 2, 13 as also in other parallel texts; — MF. **353.** 3 ff. has *ō* in the place of *andar*.

2. [1] K *ka*. [2] Both ^{0}an r (hence the reading ^{0}*havar*, BdK. **30.** 12; cf. Riv. **113.** 18; **114.** 5, 9.) elsewhere ^{0}an r n n, PV. (except in com.), GBd. **96.** 5. [3] K worm-eaten. [4] Both t rn k as usual; the reading after Salemann, GIrPh. **1.** 277; Bartholomae, Wb. 643, *taranak*; Reichelt, Ir. 33, *tŏrūk* with which cf. *tarōk*,

3. sak nasuš pa ān[1] žamān[2] žanēt, ka gōšt vēnēt; u ka mōδ[3] aδāp[4] nāxun vēnēt, nē žanēt.

3 The dog drives off the *nasuš* (Putrefaction) at that time, when it sees the flesh; and when it sees the hair or nails, it does not drive off.[5]

BdK. **30.** 14, cf. Riv. **113.** 18; **114.** 5, 10; also *taluk*, Rabāḍī, **1.** 354 f. [5] K om., M above the line as a correction of something like *i*. [6] Both rn k n n yk; PV. **7.** 2 (4) com. ^{0}k n yk; Rabāḍī **1.** 354 f. *rog^{a}nī*; but MF. **355.** 10 rn b an yk for which cf. Mx. **2.** 152, 156 where rn b an for the Paz. *rōγn*, the other may be *rōvn*, as *murv* beside *muryγ*. Thus the variant indirectly supports our reading, whereby we bring the term in connection with *rōγn* 'butter, etc.'; and Rabāḍī refers to the pus in the eyes, when describing it as a blind dog. I should not have dared to make this rather bold comparison, if I had not come across the same semasiological phenomenon in Lat. *lippus* 'blear-eyed, sore-eyed', compared with Gr. λίπος 'fat, greasy substance'. — Cf. n. 12. [6a] K ad. $^0_0$. [7] M$^+$ n. in **44.** [8] K ad. *u*. [9] K om. *t*. [10] AirWb. 1433; the protection of the owner's person is its work, V. **13.** 19, cf. GBd. **96.** 6 *ramīk* 'pertaining to people or mankind' (as opposed to 'herd' and 'house' above, — this meaning of *r^0* occurs in Šv. **11.** 260; **14.** 76; Čk. 70); but *sag i yarīb*, Riv. **113.** 18; **114.** 5, 9 is derived from the wrong interpretation (such as by Darmesteter) of the (P)V. **13.** 19. [11] Or 'young dog', *sag baččа*, Riv. **113.** 18; **114.** 6 (*xurd*), 10; (M n. *tarūk ya'nī kōr* 'blind', and Rabāḍī **1.** 355: 'one calls the dog, that has pus in the eyes and consequently sees little, *rog^{a}nī* and also *taluk*.') But in the V. account about the various breeds or species of dogs the term 'puppy' or 'young dog' is hardly intelligible. Again *draxtō-hunara-* 'one that has learnt dexterity', a suitable epithet for a hound, is used in the place of *tauruna-* in V. **13.** 8; and a little below, 12—15, and in the same subject *tauruna-* itself is used. Hence we can identify them; and the former is not a "Luxushund" making petty tricks for the amusement of its owner, but a dog of some greater utility and harder service, cf. V. **13.** 41—43. The dog mania, which was rather the dog necessity, did not go so far as the modern fashion in lap-dogs. If NP. *tōla* or *tūla* 'pup' but also 'hound' is really derived from *tauruna-*, it supports our meaning. [12] No Av. equivalent is known for it; cf. Rabāḍī in n. 11, but M n. *sag baččа*. [13] Lit. '[away] from'; for the exact parallel s. ZSR. **2.** 48 n. (47 f. contains the examples and explanation of the more common meaning 'from'). — West "from".

[1] K ad. *i*. [2] K *ž-* worm-eaten. [3] Or *mūδ*. [4] K ^{0}pn. [5] 'Because the *nasā* (i. e. *nasuš* here as often — Putrefaction) is concealed (*pōšīda*) below the hair and nails, Riv. **113.** 19; **114.** 11, cf. V **3.** 14; **7.** 24; **9.** 41 about nails. Or can we say with Hertel, IIQF. **9.** 26, that these are not putrefying matter (*nasāk*), and hence there is nothing in them to drive off?

4. sak-ič i kōr pa ān žamān žanēt, ka pōčak[2] apar nasāk nihēt[1]; u ka apar mōδ[3] aδāp nāxun nihēt, nē žanēt.

5. murγ[1], kē nasuš žanēt, sē(h) hēnd: sār[2] i gar[3], u varāk i siyā, u karkās[4].$_0$ murγ[1]-ič pa ān žamān žanēt, ka-š sāyak apar awganēt[5].$_0$

5 b. andar āp u āpakēnak u[6] ēvēnak ka-š[7] vēnēt, nē žanēt.$_0$ —

4. And[4] the blind dog drives it off at that time, when it[5] puts[1] its muzzle on the corpse; and when it[5] puts on the hair or nails, it does not drive off.[6]

5. The birds which drive off the *nasuš* (Putrefaction) are three: the mountain buzzard[8], and the black crow, and the vulture. And the bird drives it off at that time, when it throws its shadow upon it (the corpse).

5 b. When [a dog or a bird][11] sees it in water and glass[9] and[6] suchlike things[10], it does not drive it off. —

---

4. [1] M *žanēt* 'strikes'. [2] West "paw", thinking of **panǰak*, NP. *panǰa*; similarly Hoshang, PV. Gl. 182 but he gives also "*pūǰeh* lip" etc. 191. The scribbled n. in M is *dahan*; and the parallel text, Riv. **113.** 19; **114.** 6, 10 has *pōza* which and its variants *pōz, pōž* (Asadī, LF. 42, *zafar*) and *pōža* mean 'muzzle, snout'; — for 'paw', which Horn, BB. **17.** 258, NpEty. 75, adopts, there are no examples. The word is written with z also, PV. **13.** 2 gl., 3 gl. and MF. **352.** 14, hence perhaps *pōžak*. [3] Or *mūδ*. [4] Or 'even'. [5] Or 'one, a person', who does not become polluted by doing so, MF. **354.** 6 ff. [6] S. 3 n. 4; — Riv. **113.** 19 etc. says the same thing immediately after mentioning the different dogs, the blind dog being the last and hence perhaps connected with it only. In any case Modi is wrong or at least misleading.

5. [1] Both mn rn k (*murvak?*) as often. [2-3] So read in the Riv. **114.** 1, 6, 11; M marks *g;* Davar wrongly as one word; s. n. 8. [4] Both k r k g yy. [5] K om. m (from the ideogram). [6] K om. and even joins the next word to the prec. *k* which is afterwards made distinct. [7] K om. (*š*). [8] Or 'sparrow-hawk', cf. NP. *mūš-xᵛār* and *mūš-gīr* which are used for them respectively; *sār* cannot mean here a starling or a similar bird; for the buzzard or the like, cf. *sār i gar kē h ə r ā i d ī* k n č k *xᵛānēnd*, GBd. **112.** 10; the latter part is to be read *kūčak* as the other MS. suggests, and the former can be well compared and identified with NP. *xarād* 'kite'. Hence a 'small kite', which can well be a buzzard or a sparrow-hawk. It may be argued that *sār i gar* here may have been connected with the prec. a r k a *ast i;* but this is not the case, the explanatory term is missing after *ast i*, as can be seen from a r k a *kē murv parōdarš*, GBd. **112.** 7, and a r k a *kē *parōdarš xᵛānēt*, GBd. **97.** 4. This a r k a is written in BdK. **31.** 11 without the explanation, where it is read *ardā* and left untranslated by West, and is corrected by Justi into *arbā*, a Semitic word meaning 'a raven', but a r k a is no other than a l k a, FrP. **8.** 2, which and the prec. ideogram are explained by *xrōs;* — Junker, FrP. p. 119, wrong. This in its turn justifies the reading *parōdarš*, Av. *parō-dərəs-*, the special term for the cock. Thus the meaning of *sār* remains intact, and it is used in NP. also; — only Phillott is wrong when he says that the term is "incorrectly used for

6. žan i āpustan, va[na]nd[1]-ōhrmazd guft, ku [ka][2] pa dō[3] mart barišn[4], har 2 pa barašnūm bē šōδišn. —

6b. u[8] nasāk ka bē barēnd, sar[5] ō daxmak[6] ōrōn[7] kunišn[9].0

7. u[1a] patvēšak[1] rāδ, 2 pa ēvak bār nē barišn;0 u 2 pa ēvak [bār,[2]] martom nē šāyēt;0 sak -1 u[3] martom -1 šāyet.0

6. [As to] a pregnant woman, Va[na]nd[1]-Ōhrmazd has said, that [when][2] she is to be carried by two persons, both are to be washed through the *barašnūm* [ceremony]. —

b. And[8] when they carry away a corpse, its head is to be set in the direction of the *daxmak*.[9]

7. And because of contamination[1], two are not to be carried at one [and the same] time; and [if] two at one [and the same time[2]], human beings are not allowed; one dog and one human being are allowed.[4]

---

the T[urkish] *sā*, some species of buzzard or eagle." [9] Or 'crystal', both being the common meanings of NP. *ābgīna* and of Arm. lw. *apaki;* cf. also *kāca-ratnākṛti-*, Str., Mx. **57.** 14 (the original MP. is quite another word); West's "mirror" is wrong, because it is not transparent, and so the matter cannot be seen through it. [10] West's "looking-glass" is wrong for the same reason, s. n. 9. [11] The sentence is quite independent and refers to the dog also, as expressly stated, PV. **3.** 40 (138) com., Riv. **114.** 3 etc., (where (**110.** 19) Modi, like the Guj. Riv. 322 *hoḍī*, gives "boat" for *ābgīna*).

6. [1] S. 2 n. 7. [2] As in **10.** 10, but s. n. 4. [3] K *2*; M n. *čahār* is wrong because of what follows. [4] M ad. *-u*, K *u* but the latter is careless on the point. If, however, *u* be genuine, *ka* is not to be added and then the meaning would get a different shade. [5] M ad. n b in a different hand, — (Davar silently adopts n b n) — making it *sruv* 'horn' (or *srup* 'lead'), an attempt (or a forgery as in Šnš. **12.** 4—s. **10.** 40 n. 7—?) to read in the passage the command about tying the corpse to a piece of iron or stone or horn (fixed in the ground) when exposed to dogs and vultures, V. **6.** 46. [6] Both a z an, as usual (but MF. a z dan); FrP. om., but for the reading cf. Av. and NP. *daxma*. [7] K joins to the prec.; P sep. only *rōn*. [8-9] West connects this sentence with the prec., and thus applies the statement to the corpse of a pregnant woman, — and not to any corpse, as I do. It is true that there is no punctuation in the Mss., but that alone does not justify West's interpretation; we should expect at least *u-š* in the place of *u*. Again there is no reason for limiting this command to the special case only; on the contrary we are not to do so, as can be seen from the parallel texts which give the two statements in quite different places, as different subjects, s. Intr. 18.

7. [1] Av. *paiti* and *vaēšah-* 'rottenness, putrefaction', cf. *rēmanīh u patv*[*ē*]*šak, ālūtakīh* . . . *patv*[*ē*]*šakīk*, DdA. **16.** 13. [1a] Both; Davar om. [2] S. n. 4. [3] K om. [4] The parallels, MF. **385.** 11 ff.; Riv. **115.** 12 f., show that the first statement refers to human beings and that the third is connected with it; and hence I have added *bār* 'time' in the second, (which statement they omit altogether,) to bring it into conformity with them, otherwise as it stands in the Mss., "and two

8. har kē pahrēž i nasāk dānēt šāyēt:$_0$ kōtak dō i hašt sālak, kē pahrēž dānēt, šāyēt;$_0$ žan 2 i daštān aδāp 2[1] i nasāk [šāyēt];$_0$ aδāp mart -1 u žan -1 u apurnāyak -1[2] i hašt[3] sālak šāyēt.$_0$

8. Whoever knows the care[4] of the corpse is allowed: two lads [at least] eight years old, who know the care, are allowed; two[5] women with[6] menstruation or two[5] with[6] miscarried [or still-born] child are allowed; or [any two of] one man and one woman and one boy [at least] eight years old are allowed.

---

by one person are not allowed," is not quite proper, inasmuch as even one corpse is not to be carried away by a single person. In any case the meaning of the third statement is as given above, and the parallel texts support it. The only difference in Riv. **115.** 12 f. is that instead of *mardum* and *sag*, *mardum i ābī* and *sag i ābī* are used and *ǰuǰa* is added, with the same epithet. Thus is concealed either consciously or unconsciously the unpleasant meaning which is simply negatived in a later (?) piece, that it is not allowed to carry two dead bodies, not even of dogs, Riv. **117.** 18. Here too we see the influence of sentiment and common sense. (The meaning ascribed to these statements by Modi is not possible: "If two persons are not available, then the following can form a pair: — (a) a man and a dog, or (b) a man and a *hajē* (?), or (c) two dogs, or (d) two *hajē*-s". He mixes up this with what follows there about the members of the pair necessary for removing a dead body. He roughly transcribes the strange word which occurs often, but there is no doubt that it is for *ǰuǰa* = *žūža* 'hedgehog'.) West explains our third statement thus: "That is, when two persons cannot be found to carry a corpse, one can do it alone, provided he holds a dog by a string"; and so also Bharucha, Rist. 93 n.; but there is no justification for it in the original. As to what West adds on the authority of Jamaspji that "This course is adopted when a person happens to die in a place where only one Parsi is available", I can say that this is not a matter of fact but of conjecture, because I know for certain that in such a case other Zoroastrians are sent for from the neighbouring village or villages.

8. [1] K om. [2] M om. [3] Ideogram, in which M om. n after t, K a worm-eaten. [4] Or 'disposal', cf. MvA. **17.** 5 ff. where *pahrēxtan* and *bē burtan* 'remove' are used as if synonymously. [5-6] West's "(a woman) free from" is wrong, because his reading *apē* instead of *2 i* is unwarrantable, the "obsolete manner" he talks of exists nowhere, — the mode of writing *x^{v}āp* with an yb (for an ap), AirWb. 1863, cannot be applied here. Bharucha, Rist. 93 n., translates just as West. Both of them are influenced by the fact that the women in question must remain secluded. But we cannot change the text in this manner, at the most we can suggest that women in the service of menstruous and lying-in women are perhaps meant. The parallel texts leave no doubt as to the correctness of our interpretation. In one of them *2* is omitted, (which in its turn does not leave room for the emendation into *apē*) and instead of *žan i nasāk* other words are used, one of them is *ēvbar*, another very probably *armēšt*, MF. **385.** 4 f. Both of these terms are applied to a woman who has miscarried: *ēvbar*, Riv. **231.** 9 ff. where the *barašnūm* of "a woman who has brought forth a dead child"

9. hamāk[1] nihuftak[2] nē barišn, čē[3] nasāk-nikānīh.$_0$
9 b. pa vārān burtan mark-aržānīk.$_0$

10. ka awr[1] āmōn[2] būt ēstēt, hač xānak bē burtan pātaxšāy; u ka pa rāh vārān gīrēt, apāč ō xānak āwurtan nē pātaxšāy[3], u[4] ka pēš dahlīč -l ast, (ān)ōδ bē ē nihēt; — ān, kē-š daḥlīč x^{v}ēš, [u] ka-š[4] bīm[5], pātaxšāy, ka andar nē hilēt; — u-š pas bē ō γyāk barišn; u ka āp ē nēzak bālāk andar ēstēt, pas-ič bē nihēt, bē āwarēt.$_0$

9. It is not to be carried all covered[4] up, because [that means] burying the corpse.
9b. To carry it in rain is a *mark-aržānīk* [sin].

10. When clouds have been around[6], one is authorised to carry it from the house; and when rain begins on the way, he is not authorised to bring it back to the house, and when in front[7] there is a portico[8], he should put it there; — he, to whom[9] the portico belongs[10], [and] when there is fear[5] for him, is authorised, when he does not let it in; — and afterwards it is to be carried to its place by him; and when water stands in it one spear's height, even then he puts it, [and] comes away.[11]

(**230.** 15) is described; and *zan i armēšt*, Riv. **225.** 11. The Riv. follows our text more closely; for *žan i nasāk* once *zan i vādiyāb* is used, **115.** 14 (NP. *vādiyāb* 'null and void; insignificant, ruined'), in other pieces the word *nasā* is left in mutilated forms n s ḥ t and n s t y, but with the correct gl. *zan (-ē ki) kōdak i murda zāda*, **116.** 12, 17. It should be added that a later (?) piece says that women as such and *zan i vādiyāb* are not allowed, Riv. **117.** 19. This is just in the spirit of West and Bharucha; a statement was not understood or was felt as likely to be misunderstood, and hence it was changed. I believe the original refers not to regular corpses but to some small putrefying matter, which can be better removed by women who are already impure. Some such notion exists even today, at least unconsciously, though not as a hard and fast rule.

9. [1] K *ka*. [2] K *h*^{0}; M has before *ni*^{0} not *tāk* as Davar says but two signs, not close to each other, one of them is n, the second seems to be a struck off n, now appearing as i or as a mark to fill up the line; and it further seems that *ni* (in the next line) is added later on, s. n. 4. [3] K ad. *vindēt* on the margin in a different hand, which P. inserts and strikes off after *čē*. [4] K, s. n. 2, does not necessarily mean "curved" (NP. *xufta*) as West says, because *huftak* without the prefix *ni* can mean the same thing as with it. The opposite view, not to carry uncovered (*ahuftak*) nor half-covered (*nēm ē huftak*), PV. **8.** 10 (28) com., refers to some special cases, as can be seen from *hamāk huftak, nē hamāk ahuftak, yut hač ān nasāk, i hač katak bē āwarēnd, aδak-aš nē šāyēt*, MF. **385.** 7 ff. Both om. the last clause and hence our text includes all cases, cf. V. **8.** 23—25.
10. [1] Both ab r. [2] M aam^0 (Davar aym^0) with n. *āsmān* 'sky'; K only a m is legible; P at mnn, the latter part is struck off and replaced by m t above it: i. e. *hakar mat* 'if came', which is worse. [3] K ^{0}*āīh*. [4] K om. [5] M ad. *i* probably for *l*, hardly for *īk*, *bīmīk* (as West takes) 'apprehensive'. [6] Cf. NP. *āmūn* (*pērāmūn*) which means also 'brimful'. [7] So, because in the rear would

11. mēṭōkmāh guft, ku hat! varr[2] -1 hačapar i[1] ān γyāk bē ē bandēt, hačaδar hušk bē ē kunēt, u nasāk hačaδar i ān varr bē ē nihēt, u varr stānēt, bē āwarēt.$_0^0$—

12. hač panǰom[1a] frakart i yutdēvdāt[1] i[2] mēṭōkmāh[3] ētōn gōwēnd, ku ān γyāk, ku-š γyān bē šavēt, ka apar vistarak -1 bē mīrēt, u mōδ -1 aδāp handām -1 ō bālēngāh u zamīk ēstēt, — hambun[4]-ač hamgōnak, — rēmanīh zamīk tāk[5] ō āp frōt barēt.$_0$

11. Mēṭōkmāh has said, that lo! one should bind a blanket[2] over that place, below he should make dry, and the corpse he should put beneath that blanket, and he may take off the blanket, [and] come away. —

12. From the fifth[13] chapter of the Vidēvdāt [commentary] of Mēṭōkmāh they say thus, that [at] that place, where one's vital spirit departs, when he dies on a bed, and a hair or a limb is[6] [direct][7] on the raised-place[8], i. e.[9] the ground, — even[10] a little is the same, — the pollution passes[12] on [into] the ground as far as water [penetrates][11].

---

not do, a backward turn or movement being prohibited. [8] Or 'outhouse'. [9] Thus (for which cf. e. g. AVn. 18. 8), and not 'whose', because *xᵛēš* does not immediately follow *kē-š*. [10] Lit. 'is a property'; and thus instead of the usual meaning of *xᵛēš* because of the reason given in n. 9; — in the cases given by Bartholomae, ZSR. 3. 7, and by Salemann, MSt. 92, *xᵛēš* can mean simply 'own', as 'thy own', 'my own'. [11] This last statement about water etc. is elsewhere given as the opinion of Aparak, MF. 384.

11. [1] K om. [2] Av. *varənā-* 'wool', 'name of a woollen garment'; not only because of this original meaning have I adopted here 'blanket', but also because of Riv. 116. 5 which gives *parda* 'curtain' or *gilīm* 'blanket', (also meaning 'a garment made of goats' hair or wool'; 'a carpet or rug') and the latter alone in the foll. account; — our word *var* (or *varr*) is given a little before, 115. 19, though it is not recorded in NP. And a blanket or any other woollen piece is very suitable to keep the rain-water off.

12. [1] K yy less for *dēv*. [1a] K om. *o*. [2] K *paδtāk*. [3] M ^{0}*hak*, s. 1 n. 1. [4] Both aam^0, s. n. 10—11. [5] K om. [6-7] S. 13 n. 3—4. [8] Used as a bedstead (cf. NP. *bālīn*) and made of earth, hence the next words. We may call it a 'platform' or an 'estrade'; for details s. w. Le Coq, Ost-Turk. p. 35; it bears some resemblance with the house-*coro* in some parts of Gujarat. In Persia it is found on the roof.. [9] Cf. n. 8 and below 23. [10-11] West, "the ground conveys the pollution, even not originating with [itself] (*ahambūnīč*), in like manner down unto the water", is wrong. The word is to be read as above, *ha* being written aa in so many words. [12] Av. *ᵛbar-*, also NP. *burdan* means 'to go, run, fly'. [13] It is in the sixth chapter of PV. that this matter occurs, but it would suit in the fifth as well; cf. 1 n. 6, — but the second explanation given there would not apply here.

13. u[1] ka apar taxt[2], -u pāδak apāk zamīk nē ēv-kartak : ka-š mōδ -l aδāp handām -l apāč ō taxt ēstēt, frōt nē barēt.$_0$

14. ka apar zamīk i gač[4] kart bē mīrēt, gač rēman; u[1] ka ān gač bē kanēnd, u dit apāč rēčēnd[2], pāk.$_0$

15. ka[1] apar sang -l bē mīrēt[2], u[3] sang apāk zamīk ēv-kartak, sang[4] pa[5] sāl drānāk[6] apāk zamīk pāk bē bavēt; u ka ān γyāk[9] bē kanēnd, sang rēman, u[3] andar žamān ō šōδišn.$_0$

13. And when [one dies] on a bed-stead, and its legs are not 'in one piece' (i. e. fixed) with the ground: [even] when a hair or a limb of his is[3] direct[4] on the bed-stead, [the pollution] does not pass[5] on.

14. When one dies on a plastered ground, the plaster is polluted; and when they dig up that plaster, and lay[2] on[2] again another one, [the ground] is pure[3].

15. When one dies on a stone, and the stone is 'in one pieee' (i. e. fixed) with the ground, the stone becomes pure in a year's length[10] along with the ground; and when they dig up [at][7] that place[8], the stone [alone] is polluted, and it is to be washed at the [same] time [for its purification].

---

13. [1] K om. [2] Very probably *bē mīrēt* is omitted here by the Mss. [3-4] West "remains behind"; but it contradicts the view that the pollution begins immediately after death. The omission of *apāč* in 12 and 22 suggests that we are to take *apāč ō* almost in the sense of *ō* (or of *pa* in other cases). As to 'direct' cf. NP. *bāz* 'open', 'openly' and hence 'direct'; it is used exactly in this sense in Sd. **41.** 3. Again my interpretation is supported by Riv. **123.** 5 f. etc. which talks of *barābar i pāya* 'breast to breast with the legs', and of the coming of the naked or uncovered (*barahna*) part on the object, which both point to our 'direct'. [5] S. 12 n. 12.

14. [1] K om. [2] Cf. NP. *rang-rēz* 'dyer', and *rēxta* 'mortar, plaster'. [2-3] West, "spread [it] again afterwards, it is clean", is wrong. Riv. **123.** 7 f. etc. gives the usual time-limit for the purification, viz. after nine days in winter and one month in summer, which is usually about the ground, (and so it is said in Guj. Riv. 272); and it repeats once more: 'but the plaster must be removed' (*lēkin gač bar bāyad kašīd*, — Guj. Riv. 272 *par^{a}hej kare*, 'one should dispose it of'). Still if the plaster is meant, the tr. would be 'melt it again a second time, it is pure'. [4] *g* is not *v* (Av. *vīčiča-*), s. Hübschmann, PSt. 90.

15. [1] K ad.-*š* (on the next page). [2] K om. *ēt*. [3] K om. [4] K above the line (and hence by mistake after *pa* in P.); perhaps the words occurring below in 16 at the same point are missing; but they are unnecessary, if the stone here is just large enough to hold a body and not larger, and this seems to be the case, because *hamāk* does not occur in the later part. [5] K ad. *andar*. [6] K om. *k*. [7-8] Thus, as in 12; not "the place" (West), which is ambiguous; — it is the stone that is to be dug up. [9] Both; but Davar *dānāk*, i. e. a misprint yan^0 for yyn^0. [10] I retain this lit. tr. instead of 'time' throughout the book.

16. ka⟨-š⟩ sang apāk zamīk ast i ēv-kartak, u ast i yut-kartak, u apar bē mīrēt, sang[1], ān and γyāk čand nasāk apar mat, rēman; ka-š bē hilēnd[2], pa sāl drānāk apāk zamīk pāk bē bavēt; u ka bē kanēnd, sang hamāk rēman[3], andar žamān ō šōδišn; ka sang apāk zamīk nē grift[3] ēstēt, u[3a] hačapar[7] zamīk, sang hamāk rēman, andar žamān ō[9] šōδišn.$_0$

17. sarg[ō]n[1] u āturastar: ka-š [nasāk u][2] žan i daštān handām apar rasēt, har 2 rēman.

17 b. u-[4] namak[5] u- gač -i pa kartak[6] ⟨i⟩[8], šōδ[7] ētōn, čiγōn sang.$_0$

18. hakar apar bān -1 bē mīrēt: ka-š handām -1 aδāp mōδ -1 apāč ō kanār i bān[13] ēstēt,
M 76 v bān[13] tan masāk tāk ō [tuhīk, u zamīk tāk ō][1] āp rēman; — u hamāk[2] barsum

16. When a stone is partly 'in one piece' with the ground, and partly 'in separate piece', and one dies thereon, the stone is polluted, [in] so much space as the corpse has come [upon][6]; when they just leave it, it (the space) becomes pure in a year's length along with the ground; and when they dig it up, [only] the stone is all polluted, it is to be washed at the [same] time [for its purification]; when the stone is not fixed[4] with the ground, i. e. is upon[7] the ground, [only] the stone[5] is all polluted, it is to be washed at the [same] time [for its purification].

17. [As to] dung and ashes: when [a *nasāk* or][2] a limb of a menstruous woman comes on to them, both are polluted [wholly, but not the ground][3].

17 b. And [as to] salt[5] and plaster which are as[6] pieces, [not as powder,] the wash[7] is so, as [that of] stone.

18. If one dies on a roof: when a limb or a hair of his is[8] direct[9] on the border of the roof, the roof is polluted [in] the size of the body as far as [the layer,

---

16. [1] K ad. but marks om. *hamāk rēman andar žamān pāk bē bavēt ka bē kanēnd sang hamāk rēman andar.* [2] M (but Davar silent) yak^0 for yayk^0 (ideogram), n. *bar dārand.* [3] So read in M n., Riv. **123.** 9 etc. [3a] M *-u.* [4-5] West, "made [even] with the ground, above the ground the stone", wrong. [6] Thus, — *apar* is not a sep. postp. as elsewhere, — s. the same clause in 23 f. [7] M n. *bar,* and cf. e. g. AVn. **31.** 3; otherwise the usual meaning 'above, over' would mean here 'higher than'. [8] M does not add *i* as Davar says; it is a mark to fill up the line. [9] M n. *īn.*

17. [1] Cf. PV. **8.** 8 (20) gl., BdK. **45.** 16, 18; otherwise *sarg*[*ī*]*n* which alone is met with in NP. [2] As in Riv. **130.** 16 f. [3] Cf. 37. [4] K om. [5] M n. *namak,* if this be wrong, let us follow K and read *u- mayγ* (which however is written m γ, not m k) and, for *kartak, girtak,* and keep *i*: 'The *barašnūm*-stones and the plaster which are in the circumference of the washing [place] [become] just as stone'. [6-7] M as one word, with n. (*bi-*) *kunišn;* cf. n. 5; West "*kartak-šūī* washing [her] shift," — NP. *kurta*(*k*) but MP. *kirrēnītak* for Av. *kərətay-*, N. **168.** 30. [8] M above the line, but Davar om. We can take it for *1,* which makes the sense more clear: 'one piece or lump as opposed to powder'.

18. [1] Cf. for this addition PV. **6.** 5 (9) com. where *aškōp* 'frame of the roof' is used in the place of *tuhīk,* i. e. the excluding limit instead of the including limit, and on this is based the meaning of *tuhīk* which generally means 'void' — or 'open

i andar ān xānak, [ka][3] hač ān γyāk, ku rēmanīh frōt barēt, tāk ō barsum 30 gām i sē(h) pāδ ast, ā[4] barsum nē rēman; — u ka-š mōδ aδāp handām ō parrakān[5] nē mat ēstēt, bān[6] tāk ō tuhīk[7] rēman.$^{0}_{0}$^{0}

19. u ka apar dēvār[3](?) -1 bē mīrēt, tan masāk tāk ō[1] āp rēman; [pa] sāl drānāk[2] apāk zamīk pāk bē bavēt.$_{0}$

and the ground as far as][1] water [penetrates]; — and[10] [as to] all the *barsum* which is in that house, [when] from that place, where the pollution passes[12] on, up to the *barsum* there are thirty steps of three feet [each], then the *barsum* is not polluted[11]; — and when a hair or a limb of his has not come to the stair[5], [only] the roof is polluted as far as the layer[7].

19. And when one dies on a wall[3] (?), it is polluted [in] the size of the body as far as water [penetrates]; it becomes pure in a year's length along with the ground.

---

space', cf. *γyāk ān γyāk ku bē ōftēt, tuhīk ān γyāk ku paδtāk bavēt,* 'the 'place' is that place where it falls, the 'void' is that place where it becomes evident (i. e. where it is visible, viz. in the whole enclosed area.)', PV. **5.** 49 (146) com. [2] K corr. from *ka* and writes once more below. [3] Both *-u*. [4] Both yb. [5] Both p r k an, PV. **6.** 5 (9) com. p r yk an, — Sanjana writes l for r —, for which Rabāḍī **1.** 305 gives *śeheḍī, dādar* 'stair'; Riv. **124.** 12 uses *dīvār* 'wall', but the passage is a free paraphrase; Riv. **124.** 16 ff. *sar i pay* (unrecorded, lit. 'end or beginning of the steps', hence probably 'stair') as opposed to *pušt i bān* 'back (or exterior) of the roof'; cf. NP. *pallakān, pillakān* (Wollaston) besides *palla, pilla.* But in PV. **2.** 20 (41) com., p^{0}-*īh apāč x^{v}ast* 'he crushed back . . . (for enlarging the earth)', this meaning does not suit. — As the term is used in the place of *kanār,* it may have its usual sense 'sides, borders', but why the pl.? Wests' "eaves" is a mere conjecture. [6] K om. [7] M too ^{0}ayk (not ^{0}aak as Davar gives), n. *tanhā* 'alone'; for the meaning s. n. 1. [8-9] S. 13 n. 3—4. [10-11] West, "and they should carry down all the [sacred] twigs (*baresōm*) in the house, from the place where the pollution is, until there are thirty steps of three feet to the [sacred] twigs so that the [sacred] twigs may not be polluted," wrong. [12] S. 12 n. 12. [13] M has not here (nor elsewhere) *bām* as Davar says.

19. [1] K om [2] K ^{0}*nā*. [3] Both r yt a, appearing as an ideogram, but I have failed to identify it and also to find it elsewhere in MP. If it be Ir., then r yt *-ē* (of course with the foll. *-1*), which reminds one of Hin., Guj. etc. *ret, retī* 'sand, gravel'; but *rēk* alone is met with in Ir. dialects, s. Horn NpEty. 142. Still if right, it would suit the description, cf. 36 (n. 6). But along with 'roof, bridge etc.' we expect something different. After the account about 'roof' we read: *u ān-či bar dīvār bāšad, dīvār bar sar i zamīn rusta ast, tā ba-āb . . . . firōd mī-šavad,* 'and whatever might be on the wall, [since] the wall is raised on the surface of the ground, [the pollution] goes down as far as water [penetrates] . . . . ', Riv. **124.** 12 f. The other parallels are silent, and even this may be a different matter; but the meaning suits in every way.

20. puhl i bastak ētōn bavēt, čiγōn bān[1].$_0$

21. ka apar bān[5] i varm[4] -l bē[2] mīrēt, ān-ač[3] ētōn bavēt, čiγōn bān.$^0_0{}^{01}$

22. ka andar varm[3] -l bē mīrēt: ka-š handām -l aδāp mōδ -l ō parrakān nē ēstēt, rēmanīh frōt nē barēt; u ka[1] apāč ēstēt, frōt barēt; — pātaxšāy, ka bē kanēt[2], u dit-ač apāč rēčēt[9], u pāk.

M 76 r nēst, frōt nē barēt; u[4] ka-š bē ōpastan[5] bīm, ka⟨-š⟩ ān bīm hač kust -l[6], pa ān kust frōt barēt; u ka bē ōpast[7], ān and [γyāk][8] frōt barēt, čand[9] ōpast.$_0$

20. A built bridge becomes so, as a roof.

21. When one dies on the roof of a reservoir[4], that too becomes so, as an [ordinary] roof.

22. When one dies in a reservoir[3]: when a limb or a hair of his is not on the steps[4], the pollution does not pass[5] on; and when it is[6] direct[7] [on them], it passes on; — one is authorised, when he digs it up, and lays on again even another [plaster][8], and [considers the place] pure.

23. When one dies through hanging[10], — i. e. [through] a string round the neck[2]: when there does not exist a fear of his falling down, [the[11] pollution] does not pass on [into the ground][12]; and when there is a fear of his falling down, when that fear is from one side, through that side it[11] passes on[12]; and when he has fallen down, [in] so much space it passes on, as he has fallen [upon].

---

20. [1] M ad. *-u*, as often in this word, K sep. it, and om. $_0$.

21. [1] K om. [2] K b a. [3] K *-čiγōn* with the sign '$_0$' [4] NP. *barm;* West's "trellised [apartment]" — NP. *baram* — does not suit what follows; in another account the word is used along with *čāh* 'a well', MF. **197**, which gives *vārastān* (written ^{0}*īs*^{0}, ^{0}*ās*^{0}) in the parallel passage **325.** 7 ff., with which cf. NP. *bārgān*, ^{0}*gīn* 'ditch, cistern'. [5] Davar an, b omitted by misprint.

22. [1] M ad. *š*. [2] M *kanēnd*, i. e. d instead of yt; K corr. d into dt for yt. [3] S. 21 n. 4. [4] S. 18 n. 5. [5] S. 12 n. 12. [6-7] S. 13 n. 3—4. [8] Cf. *hakar vārastān hač ān i čārūk, — u-š āturastar apāk vimēxt ēstēt, — bē kanišn,* 'if the reservoir be of mortar, — and ashes are mixed with this, — it is to be dug up', MF. **325.** 16 ff. [9] S. 14 n. 2.

23. [1] M n. on the margin in Av. let. *hawa*, very probably for it; s. n. 10. [2] M n. on the margin *gurōh* 'crowd', which West follows. [3] M ^{0}t n, K an n^0. [4] K. om. [5] M ^{0}t n, K ^{0}t. [6] Both *i*. [7] K ^{0}t n, and ad. and strikes off *bīm*. [8] Cf. 24. [9] K *čiγōn* d, for the latter P *tāk*. [10] Or 'gallows, gibbet'; the term is used as a gl. for *tangīh*, Av. *ązah-* 'strangulation' PV. 7. 3 (5), — *xafakīh*, AirWb. 362, is wrong —, NP. *xaba(k)*, *xapa(k)*, *xafa(k)* all mean 'strangulation', the other meaning is nowhere given except as a gl. in one MS. of PV. 7. 3. [11-12] West, "they should (not) carry [him] down", and adds "The object of these rules is evidently to avoid disturbing the corpse more than is absolutely necessary, provided there be no fear of its polluting more of the ground by falling upon it",

24. ka rāst nišast ⟨ēstēt⟩[1] bē mīrēt: ka-š hač kust -1 ōpastan bīm, [pa] ān kust -1, u ka hač har[10] čahār kust bīm, pa[2] har čahār kust[3] frōt barēt; u ka bē ōpast, ān[4] and γyāk čand ōpast, frōt barēt[5].$_0$

25. u[1] ka apar draxt -1 bē mīrēt: ka-š pōst tarun, u hač bē ōpastan[2] bīm nēst, frōt nē barēt; u ka-š bīm[1], tan masāk frōt barēt.$_0$

26. u ka draxt pōst hušk: ka-š bīm u ka-š nē bīm, frōt barēt.$_0$

27. ka apar tāk -1 [i] draxt bē mīrēt, i tarun: ka-š[1] hač bē ōpast[an][4] bīm nēst, frōt nē barēt.$_0$

24. When one dies[6] sitting erectly[7]: when there is a fear of his falling from one side, through that single side, and when the fear is from all four sides, through all four sides, [the[8] pollution] passes on [into the ground][9]; and when he has fallen down, [in] so much space as he has fallen [upon], it[8] passes on[9].

25. And when one (or something) dies on a tree: when its bark is fresh, and there does not exist a fear of [his] falling off, [the[3] pollution] does not pass on [in the ground][4]; and when there is a fear of it, it[3] passes on[4] [in the space of] the size of the body.

26. And when the bark of the tree is dry: when there is a fear of it and there is no fear of it, [in both cases, the[1] pollution] passes on [in the ground][2].

27. When one (or something) dies on a branch of a tree which is fresh: when there does not exist a fear of his falling off, [the[2] pollution] does not pass on [in the ground][3].

---

but this tr. becomes meaningless, at least in some cases. Hence I take the phrase in the same sense as in 12, 18, 22 and 36 where *rēmanīh* is the subject, which is here understood as in 13 and once in 22. Any doubts about it are removed by the parallel accounts, from one of which we learn that here as above the general question is whether the ground becomes polluted or not, and in the reply *nē rēman* 'not polluted' are the words used instead of *nē barišn* 'there is no passing [of the pollution in the ground]' in other replies and *nē barēt* (which, it may be noted, can also be read ^{0}*rēnd*) in our text, MF. **322.** 1 ff. The other text which follows ours is quite explicit: *rīmanī bar zamīn firōd na-šavad*, 'the pollution does not go on the ground', Riv. **125.** 2. Similarly PV. **6.** 5(9) com. speaks of the ground as polluted (*rēman*) or pure (*pāk*) when death occurs on a tree.

24 [1] If not a mistake, we must add *u*, s. n. 6—7; — M ^{0}yyt. [2-3] K om. [4] K ad. *i*. [5] M ^{0}yyt. [6-7] Or 'has sat erectly [and] dies', s. n. 1. [8-9] S. 23 n. 11—12. [10] Davar ad. *kust -1* which M has not got.

25 [1] K om. [3] K ^{0}*t*. [3-4] S. 23 n. 11—12.

26 [1-2] S. 23 n. 11—12.

27 [1] K om. [2-3] S. 23 n. 11—12. [4] M too om., but Davar gives it.

28. And when there is a fear of it, or it is a branch of a dry tree: when even a little hair or a limb of his is[2] direct[3] on the principal[4] tree, [the[5] pollution] passes on[6] [in the space of] the size of the body.

29. And when it is[8] not direct[9] on the principal[4] tree: except[5] when there is a fear of his falling off, till then [the[6] pollution] does not pass on [in the ground][7]. —

30. When *nasāk* is[4] direct[5] on a jar[6] from outside, in which there is wine, then the jar is polluted, the wine is pure.

31. And when something dies inside, — in the jar[7], in the wine, — if even a little hair or a particle[2] of it is[4] not direct[5] on the jar, the wine is polluted and the jar is not polluted.

32. When it is a jar[2] in which there is clarified butter, and *nasāk* is[11] direct[12] on it from outside, — this too [is so, as] when it is inside it, for this [reason]: be-

---

28. [1] K om. [2-3] S. 13 n. 3 — 4. [4] West's "particular" is here wrong. Evidently the trunk of the tree is meant, cf. *mātakwar* as opposed to *ān* (some MSS. *azg* i. e. a z k instead of z k) . . . *i-š hač-aš rust* 'that (or 'a branch') which has grown from it', PV. **6.** 5 (9) com.; other parallels use *stūnak i miyān* 'middle trunk', MF. **323.** 10 ff., and *sitūn i diraxt* (unrecorded), *tan* (for *tana*) *i diraxt*, both 'trunk of a tree', Riv. **127.** 17, **128.** 9 (where also *bārvar* 'fruitful', a misapplied rendering of *mātakwar*). [5-6] S. 23 n. 11 — 12.

29. [1] K 30 up to *ā xu-*, but the first and the last words are marked as om. [2] K ad. *i*. [3] K ad. *ka-š*. [4] S. 28 n. 4. [5] West's "but" is wrong, as can be seen from the foll. *tāk* 'till then' which he simply does not translate. [6-7] S. 23 n. 11 — 12. [8-9] S. 13 n. 3 — 4.

30. [1] Davar's explanation, *ā* = *ē*, is wrong; both are distinct in origin and meaning, s. GIrPh. **1.** 275, 322 f. [2] K om. *ē*. [3] Both *i*. [4-5] S. 13 n. 3—4. [6] Or 'vessel', — large and earthen in both cases.

31. [1] K ad. *u* which may be adopted. [2] NP. *karač* — also *kurč* —; West gives "curl" — perhaps just to make a pair with 'hair' — without any reading. [3] K om. [4-5] S. 13 n. 3—4. [6] M ad. *ka* with marks of omission. [7] S. 30 n. 6.

32. [1] K *hač-aš*, but wrongly as so often in BdK. [2] S. 30 n. 6. [3] Both *i*; (perhaps *i* above stands also for *u*.) [4] Second of the two ideograms, FrP. **7.** 5;

har 2 rēman, xumb u[3] rōγn[4]; u xumb[9]-ač pa huškkar[13] čīš andar kartan[10] nē šāyēt.$_0$

33. ka garčak[1] -1 andar xumb -1[2], kē mad andar, har dō[3] akār u rēman, čē[5] patvēšak kunēt;

34. u ka[-š] yōrtāk andar, ā[1] xumb rēman u yōrtāk pāk; u ka[2] andarōn i xumb, [ka][3] hambun-ač apāč ō xumb nē ēstēt[4], yōrtāk ān and γyāk čand garčak mat[5], -u[6] mālišn i garčak apar šut ēstēt, — ē! mālišn i garčak šusr ast ān [i] mīrišn, — bē stanišn u[6] bē awganišn.

cause clarified butter comes outside and goes back to the inside, — both are polluted, the jar and the clarified butter; and moreover[9] the jar[9] is not suitable for[7] putting [even] dried[13] things in[8].

33. When a serpent[1] is in a jar[4], in which there is wine, both are useless and polluted, because it effects contamination;

34. and when corn is in it, then the jar[7] is polluted and the corn pure, [when the serpent is on the outside of the jar][8]; and when inside the jar, [when][3] even[11] a little [thereof][12] is[9] not direct[10] on the jar, [the jar is pure, but][4] the corn [in] so much space as the serpent has come[5] [upon], i. e. the touch of the serpent has passed on, — lo! the touch of the serpent's fluid is that which is death, — is to be taken out and thrown off;

Davar prefers the first without giving any reason. [5-6] M on the margin. There are some four thin lines on a part of the word *andarōn*, which have misled Davar (and the copyists of M) to omit it. [7-8] West's "on making . . dry" (for *pa huškkar*) is not to be preferred, and his alternative tr. "for bran flour" is less so, although Horn, ZDMG. **43.** 44, gives this alone. [9] Both an m b n n (elsewhere ^{0}bn); but Davar *hambun-*. If the latter is meant, the tr. would be 'even a little' instead of 'moreover the jar'. [10] Both ^{0}t n. [11-12] S. 13 n. 3—4. [13] Always ^{0}k r; but in MF. ^{0}k n r very often, **327.** 5; **341.** 16 etc. — as if *hušk-war* 'bearer of dry [things]', but n after k can be redundant as often, and the meaning would not suit the present context which is conclusive also for other cases where it is abbreviated; even our meaning is not quite certain, since strictly speaking *hušk-kar* means 'drier'; but what else can the word be? s. n. 7—8.

[1] 'g' distinguished here and below, esp. in M; NP. *garza*; — apparently a dead serpent is meant. [2] M not *i* as Davar gives. [3] K 2. [4] S. 30 n. 6. [5] M does not rep. as Davar says.

34 [1] S. 30. n. 1. [2] K ad. *andar* (ideogram) but blots it out; P keeps it and om. an d from the next word. [3] Or [*u*] 'and'. [4] M ad. *-u* which, if genuine, suggests that the clause added by me in the tr. is omitted before *u*. [5] Both *āwarēt* (ideogram) 'brings' (West's "includes" cannot be justified); besides yt for t I assume the exchange of the ideograms, which is not rare. Another possibility is that the original word was *āwarīt* 'has come', which was read as

35. u ka mōδ aδāp nasāk[1], hambun[7]-ač, apāč ō xumb[2] ēstēt, xumb rēman, bē pa huškkar[9] šāyēt.$_0$ —

36. (x)išt[1] -u xāk u čārūk[6] pa čīš i x^{v}ēš yut-kartak, u apāk zamīk ēv-kartak[2]; pa čīš i x^{v}ēš yut-kartak būtan ē, ku ān and γyāk čand[3] nasāk apar rasēt[4] rēman; [u] apāk zamīk ēv-kartak būtan ē, ku rēmanīh tāk ō āp frōt barēt.$_0$

37. sarg[ō]n[1] u āturastar u ārt u apārīk čīš i ārtak pa čīš i x^{v}ēš ēv-kartak, u[2] apāk[3] zamīk yut-kartak; pa čīš i[2] x^{v}ēš ēv-kartak būtan ē, ku-š[4], ka-š nasāk apar rasēt, hamāk rēman; u apāk[5] zamīk yut-kartak būtan ē, ku ka-š nasāk apar rasēt, zamīk rēman nē gīrēt[6].$_0$ —

35. and when its 'hair' or carcass, even[3] a little[4], is direct to the jar[8], the jar is polluted, but it is allowed for[5] dried[9] [things][6]. —

36. Brick and earth and mortar[6] are 'in separate piece' as regards their own matter, and 'in one piece' with the ground; to be 'in separate piece' as regards one's own matter [means] this, that so much space as the *nasāk* comes[4] [upon][5] is polluted, and to be 'in one piece' with the ground [means] this, that the pollution passes[7] on [in the ground] as far as water [penetrates].

37. Dung and ashes and flour and other powdered things are 'in one piece' as regards their own matter, and 'in one piece' with the ground; to be 'in one piece' as regards one's own matter [means] this, that it, when the *nasāk* comes on to it, is all polluted, and to be 'in separate piece' with the ground [means] this, that when the *nasāk* comes on to it, the ground does not become polluted. —

---

the more common *āwarēt* 'brings' and was replaced by the ideogram of the latter. [6] K om. [7] S. 30. n. 6. [8] The addition will be apparent from what follows. [9-10] S. 13 n. 3—4. [11-12] West, "nothing originating with [the serpent]", wrong, s. 12 n. 10—11.

35. [1] Perhaps we are to add *i*. [2] K ad. *i*. [3-4] Or remove it before 'carcass', s. n. 1; West's "even not originating with [the serpent]" is wrong, s. 12 n. 10—11. [5-6] S. 32 n. 7—8, 13. [7] M too aam^0, not am^0 as Davar says. [8] S. 30 n. 6. [9] S. 32 n. 13.

36. [1] Both a yat. [2] K ad. *u*. [3] K *čiyōn*. [4] K *ēstēt* 'stands, is'. [5] S. 16 n. 6. [6] In Riv. **130.** 15, 19 this term is corrupted; it is not *čādar* 'sheet' as Guj. Riv. (compiler's own work) 275 takes. In PV. **6.** 5 (9) com. *rēk* 'sand, gravel' is used in its place. [7] S. 12 n. 12.

37. [1] Here K can be said to omit the foll. *u*, not -*ō*- in the word, but s. 17 n. 1. [2] K om. [3] K om. mn (from the ideogram). [4] K -yy for -ya as often when final. [5] K ad. *yut* but blots it out, still P copies it. [6] It can be read *kunēt*, but *gīrēt* is in accordance with a n. in M and with its substitute *bavēt*, s. 55 n. 1; 60 n. 7; hence also the meaning which is otherwise not known.

38. u[1] [andar[2]] xānak -1 ka[4] yazišn sāxt[5] ēstēt, u-š sak aδāp martom andar bē vitīrēt, naxust kār ēn kunišn, ku ātaš hač anākīh[6] bē bōxtišn[7]; hakar-ač ātaš ētōn bē tuvān burtan[8], ku pa[8] 3 gām i nasāk bē barēt, pas-ič bē barišn; u[8] dēvār nē burrišn;

39. rōšn guft, ē[1]! gilēn ō burrišn[2], u gačēn nē burrišn[2]; u hačaδar u hačapar[3] pa boṭōžētīh[5] i dēvār nē āmār.

38 And when [in][2] a house[3] the *yazišn* [ceremony] is prepared[5], and a dog or a human being passes away in it, [as] the first work this is to be done, namely, the fire is to be saved from harm; moreover, if one is able to carry away the fire thus, that he carries it away at[9] three steps of the corpse, even then it is to be carried away; and the wall is not to be cut [for the purpose][10];

39 Rōšn has said, lo! an earthen [one] is to be cut off, and a plastered [one] is not to be cut; and below and above about the destruction[5] of the wall there is no account[4].

---

38 [1] M om.; it is unnecessary but not wrong. [2] Met with in the parallel texts. [3] A house of one door or entrance, PV. **5.** 44 (134) com., PRivDd. **2.** 8, 10. [4] Both *kē*. [5] This means, its preparatory ceremony, *paragnũ* or *paragrũ* (and hence *paragna* or *paragra*), is being performed or finished; otherwise 'performed' (in which sense Av. *aiwi-sač-* (*yasnəm*) Yt. **8.** 56 is taken by some, though not by Bartholomae, Wb. **1553**), but cf. *yazišn sar* '[it means] the end of the *yazišn*' after *vitīrēt* 'passes away', PV. **5.** 44 (134) com., and V. **5.** 39 speaks of mere bringing together of ceremonial things. [6] K ad. yy at the beginning, but blots it out; P turns it into p; M n. *saxtī* 'calamity', etc. (lit. 'hardness'). [7] For the form s. Bartholomae, IF. **38.** 3 ff.; M n. *čīdan*, the technical term to designate the process of purifying fires described in V. **8.** 75 ff., cf. *u-š dār i xᵛart pāk bē čīnišn*, PV. **9.** 32 (132) com. [8] K om. [9] West, "within", wrong; the rule 'thirty steps from the fire', V. **8.** 7, he quotes is for a different case; for the present one s. 40 and cf. MF. **293.** 14 and Riv. **121.** 3 etc. which prohibit to carry fire within three steps of the corpse. [10] But, as PV. **5.** 44 (134) com. adds, *ka pa rist bē dahēnd, ā-č bē dahišn*, where *pa* means 'over'. — Note that the general injunction about making a breach in [the wall of] the house, V. **8.** 10, is limited — it is to be made only in the case of the master and the mistress of the house, PV. **8.** 10 (28) com., because by removing them through the door the *xᵛarrah* (or °*ēh*, s. Bartholomae, MirM. **5.** 20 n. 1) of the house goes away with them, PRivDd. **76.** 1 ff.

39 [1] Written close to *guft*; but we have to stick to its common meaning, s. Intr. **10.** [2] We might read *brīnišn* but because of *burrišn* in 38. [3] M n. *bar bālā*. [4] If above and below refer to heaven and earth as West believes, we may rather say 'reckoning'; but it is more probable that the reference is to the question whether the hole is to be made in the lower or higher part of the wall. [5] A technical term for a kind of sin, FrO. **30.** 4 ff.; it consists of unnecessary or wilful injury to animals and things, (which suits the lit. meaning 'consciously striking'), cf. SXᵛAp. **36.** 10 ff.

K 55 r **40.** ātaš andar 3 gām i nasāk burtan[1] tanāpuhr -1 vinās[2], u ka tapišn[3] ō nasāk rasēt, mark-aržān.$_0$

41. x^{v}arišn i sāxtak andar ān xānak hamāk akār; u ān i nē sāxtak, 9 šap [u[1]] māh drānāk andar apāyēt. $^0_0{}^0$

42. vastrak-ač, hamgōnak, bē ān i pa tan dārēt; ān-ač ⟨i⟩ andar ān žamān nē pāk, čē andar kār ēstēt.$_0$

43. u zōhr-ič, i stat[2] ēstēt u ān γyāk ēstēt, žamānīk bē ō āp barišn; jīv-ač ⟨jum⟩[1] hamgōnak.

40. To carry fire within three steps of the corpse is a *tanāpuhr* sin, and when its flame reaches to the corpse, it is a *mark-aržān.*

41. The prepared food in that house is all useless; and [as to] that which is not prepared, nine nights' [or] a month's length is requisite [before it can be used].

42. [As to] clothing also, [it is] the same, except that which one keeps on the body; and that does not [become] pure in that time, because it remains in use[1].

43. And even the consecrated water, which is taken[2] out [from the water-pot] and stands [in] that place, is to be carried away in time to the water [of well or tank]; also the consecrated milk in the same manner.

---

40. [1] M ^{0}t n. [2] K ad. the sign 'o', and om. the foll. up to *tanāpuhr -1 vinās* in 53. [3] Ms. yp for p (as often elsewhere): the n. too runs *tēzišn,* but as *tapišn* 'heat' (of fever), PV. **7.** 57, 70 (cf. *hamtaftišnīh* 'boiling', PV. **4.** 46) is met with, I have adopted it; for the meaning cf. NP. *tap, taf.* According to Davar MU gives *tapišn* with the gl. *tapišn ya^{c}nī garmī-yi ātaš* '. . heat of fire'. West's "exudation" of the corpse is a mere conjecture not to be thought of. MF. **295.** (1), 6 clearly *tapišn.*

41. [1] This, and not *aδāp,* is commonly used elsewhere, 50; PV. **5.** 44 (134) com.

42, [1] Is then MF. **294.** 3 different or wrong ?: *yāmak u pērāyak, i martom pa tan dārēnd, pāk.*

43. [1] In Av. let.; West compares NP. *čūm* 'fat' and takes it to be the lump of clarified butter placed on the *drōn,* the sacred cake. Bharucha, Rist. 164, gives '"gotra" (clarified butter or meat to be consecrated)'. This is a wrong conjecture; the object is known in MP. as *gāuš[u]dāk* (a transcription of Av. *gāuš hudā̊*) N. **41.** 1 etc.; PRivDd. **190.** 2, in NP. as *g(ā)ōšudā(ō),* Riv. **222.** 10 ff., and today as *gośudo.* In PazT. **232.** 9 *jum* occurs along with *varas, hōm, parāhōm* and *zōr* as essentials for the *yazišn* ceremony, which shows that *jum* (correctly *jūm*) must be *jīvām,* Av. *gąm jīvyąm,* and hence in the present case it is a mere gl. for *jīv* wrongly embodied in the text. In the parallel passages of Riv., **121.** 14 and **122.** 6, *jūm* and *jām* are used respectively, (the latter is very common there); they occur in MP. also: *jūm* in N. **156.** 14 (for Av. *gava,* [5]*gav-,* with the gl. *gōšt* which is the rendering elsewhere, s. AirWb. 509 where *jūm* is not given), and *jām* in PV. **3.** 1 (4), *jām dast* (not *yām dast,* AirWb 485, nor as ed.). Other such words are *juma* for *jāma* 'robe', PazT. **215.** 4 ff., **218.** 15 etc., and *varahrūm*

44. yašt[5] yāmak[6], va[na]nd[1]-ōhrmazd guft, ku nōh šapak [u[7]] māh drānāk andar apāyēt; dīpīr[2] guft, ku hat! ka dast[3] šōδ kunēnd[4] u bē šōδēnd, andar žamān pāk bē bavēt.$_0$ —

45. hakar andar xānak -1 ast ē[1] ganjēnak[2] -1, u andar dargāh[3] bē mīrēt: hakar ētōn, ku dar[4] frāč kunēt, u nasāk ō ēn kustak āyēt, tuhīk i ēn kustak rēman; u hakar nasāk ō ān kustak āyēt, tuhīk[8] i ān kustak rēman; ka ō har 2 kustak āyēt, ēvāč tuhīk i dargāh tanīhā rēman, xānak har 2 pāk.$_0$

44. [As to] the ceremonial[5] garment[6], Va[na]nd[1]-Ōhrmazd has said, that nine nights [or] a month's length is requisite; the author[2] has said, that lo ! when they[3] apply cattle's urine[4] and wash it, it does become pure at the [same] time. —

If in a house there is[9] one single[10] barn[2] (or any sort of treasure-house), and one (or something) dies in the doorway[3]: if so, that one opens[5] the door[4] and the corpse (or the carcass) comes[11] to this side, the void of this side is polluted; and if the corpse (or the carcass) comes[11] to that side, the void of that side is polluted; when it comes[6] to both sides[7], only the void of the doorway alone is polluted, both houses are pure.

---

for ^{0}*rām*, **216.** 16 f. and *xuna* for *xāna*, **230.** 21. For this change in modern dialects s. GIrPh. **1** b. 32, 384 f. (Gabarī). [2] This means 'prepared', cf. *zōr giriftan* which means 'to prepare (lit. 'take, seize') *zōr*', Riv. **471.** 17, and also *jor kāh^{a}ḍ^{a}vī* (*kāḍh^{a}vū* — lit. 'to take out'), YbN. **7.** 13 f.

44. [1] MS. joins to the prec.; M[+] n. *vanand*. [2] Or *Dipīr*, as in *čiyōn hač dipīr bē gōwēnd*, 'as they say from Dipīr', MhDA. **28.** 6 where the word cannot refer to the writer but to some one else known as Dipīr, cf. ZSR. **4.** 31 n. 4. [3-4] Such is the technical sense of the phrase, cf. *čūn bi-x^{v}āhand šustan, dō bār dast-šō ba sar bāyad kardan*, SdBd. **96.** 21, and note its tr. *dast-šo kar^{a}vū*, Guj. Riv. 312.; *dast šōδ* lit. 'hand washer' is used for *gōmēz* 'cattle's urine' also elsewhere. The phrase can hardly mean "they perform the washing of hands" (West), which is not the idea here in any case. [5-6] Cf. *yāmaki i yazišn* (*ĭuma yazišni*) and *y^0 i yašt* (*ĭamah yašt*) PazT. **218.** 15, 18. It is possible that only 'robe' is meant, and not, say, undergear. Bharucha, Rist. 164, gives 'consecrated or about to be consecrated (*ijelā, ij^{a}vānā*) clothes', but they are special things, and with another designation, s. **10.** ⟨40⟩ n. 6. [7] S. 41 n. 1.

45 [1] West, "three" (*3*), wrong; cf. the foll. *-1*; s. n. 9—10. [2] Arm. lw. *ganjanak*, NP. *ganjīna*; MF. **296.** 4 (like Riv., s. n. 3) does not use this, but *dargāh* [i] *miyān i 2 xānak*. 'a doorway between two houses' which is meant here too. [3] Riv. **125.** 13; **126.** 1 *rah-guδar i īn dō xāna*, 'the passage of (i. e. between) these two houses' but later on *dargāh*, — and hence the meaning. [4] It must be *2-kānak*, 'double', MF. **296.** 5. [5] Or 'shuts' (s. Vullers); both may suit here. [6-7] I. e. 'is in the middle' *pa miyānak rāst bē ēstēt*, PV. **5.** 44 (134) com. [8] M n. *tanhā*; here and above (where M n. *tahnā* !) Davar adopts *tanhāk*, a wrong form. [9-10] As there is no necessity for emphasising 'one single', we might think of *ast-ē* 'be, might be', s. GIrPh. **1** b. 153, or take it for *ast i* 'partly', which last I consider the best. [11] I. e. 'is', cf. n. 6—7.

46. u gumbat i ātašān[3] i vahrām, tuhīk[1] rēman nē bavēt.$_0$ —

47. hakar pa viškar[1] bē mīrēt, x^{v}arišn i sāxtak, i andar 3 gām, hamāk akār, u bē hač čahār gām nē rēman.

46. And [when one dies on][2] the cupola of the Fire[3] of *Vahrām*, the void[1] does not become polluted. —

47. If one dies in a 'lonely apartment'[1], the prepared food, which is within three steps, is all useless, and [which is] beyond four steps is not polluted.

---

46. [1] *ya'nī bālā* 'i. e. the height', Riv. **122.** 10, 17. [2] So in Riv. **122.** 10, 17. [3] Is it simply 'fires' referring to the collection of different fires which constitute the Fire of V. or are we to take *-ān* as showing place (cf. GIrPh. **1.** 279, **1** b. 176)? In the latter case the term would mean 'fire-temple' which suits here as well as in PV. **5.** 44 (134) com. and MF. **298.** 6; and we might compare Arm. lw. *atrušan* (ety. ?). But elsewhere the fire-temple is called *ātaš-gāh* MvA. **7.** 3, or *mān i ātašān* Šnš. **9.** 5; **20.** 1; PT. **121.** 9; **152.** 9 f., or *dar i ātašān* Šnš. **20.** 8, 9, cf. also *dar i ātur farnbay* KnS. **4.** 10; AVn. **1.** 21, 28 and *dar i āturān š[ā]h* (or *gāh*) KnS. **10.** 18 and *dar i mihir*, one of the terms signifying a fire-temple today. Against the former supposition we have to note that the *Fire of V.* is always called *ātaš i v.*, never *ātašān i v.*, s. below 49; AVn. **55.** 5; PV. **5.** 4 (14) com.; **8.** 96 (270) gl.; N. **1.** 5; **116.** 13; **128.** 6; **130.** 24; KnS. **4.** 8. 19; **8.** 17; **10.** 18. In the above mentioned two cases where *ātašān* is used, the phrase *i v.* is omitted; similarly in 118 below, where a parallel text has *ātaš i v.*, thus giving the impression as if *ātašān* be equal to *ātaš i v.* Does this mean that the former is a pl. maj. which serves to signify the force of *i v.*? cf. *šmāk bayān* 'Your Majesty', AZ. 10 f. etc., for which s. Bartholomae, MirM. **3.** 11.

47. [1] M n. *xāna* 'house', also in 202 r 12 (BdK. **35.** 2) where the context could not have failed to suggest 'meadow, or even forest', hence the n. must have some justification: in MF. **268.** 6 ff. and PV. **5.** 44 (134) com. *viškar* is put in the same category as *gumbat i ātašān*, which must be a separate apartment, and so also the other; MF. **293.** 9 actually uses it along with *yut xānak* 'separate house, outhouse', (and PV. **15.** 10 (35) com., **16.** 13 (32) com. seems to use our word for *daštānastān*); similarly in N. **144.** 29 *pa viškar* is explained by, or is used along with, *pa yut katak* (k n t k here and in the foll., just as in PV. **2.** 26 (69), etc.) **144.** 30, which alone is used in the next clause **145.** 1. — We can safely read the same form in PV. **5.** 44 (134) com. *yut katak* with respect to *kandak* 'subterraneous fold for cattle' and with respect to the disturbed *viškar* (n y š^0 and some MSS. omit r which means it is *vēšak* 'forest, etc.'). — Bulsara translates *katak* by a "passage" (paragraph), reading it probably *kartak* for which we require k rt k instead of k n t k. A little below *katak* is distinguished from *gumbat:* we read *ka gumbat -1 vēnēt, ... ; ka katak vēnēt, ...* **145.** 8, 11. Here Bulsara gives "pancake" comparing NP. *karda*, wrongly for *girda*, which too requires y rt k. Further we must note N. **146.** 5: *ka-š dar 4, ast kē 'ētōn, čiyōn viškar' [gōwēt] . . ,* 'when there are four doors to it (the house), there is some one who [says] 'it is such, as a 'lonely apartment' . . '. Bulsara construes

48. xᵛarišn i sāxtak ēn, čiγōn nān, u gōšt i puxtak u brištak, u xᵛartīk[3] i kartak[2].

49. u varr[1] i ātaš i vahrām pa patmānak rēman ō bavēt. —

48. The prepared food is this, as[1] bread, and boiled and roast meat, and eatables[3] in pieces[2].

49. And the 'clothing'[1] (i. e. ashes[1]) of the Fire of *Vahrām* becomes polluted according to the rule[2]. —

---

differently and I believe wrongly. — He has at least seen the connection of our term with fire or the place pertaining to it, and hence suggests the reading *vadākar*, NP. *vadāγ* 'fire' (but then d must be t) or *nazākar*, NP. *nazā* 'encloser'. All this is unnecesary, because in the cases referred to the original meaning of *viškar* is developed, and nothing more: from a 'lonely place' to a 'lonely or secret or private apartment' for different purposes. M⁺ n. *biyābān* 'desert' which of course is wrong in the present case.

48. [1] Or 'namely' as in AVn. **1.** 7, cf. PV. **5.** 44 (134) com. where *ku* occurs in the place of *čiγōn*. [2] MS. k rt k and hence 'pieces', but PV. **5.** 44 (134) com., where the phrase is corrupted, k n t k which means 'made, prepared'; PRivDd. **2.** 11 om. it with *i*. [3] West's "broth" is wrong because that would not have required *i kartak* in one sense or the other. It is doubtful whether even NP. *xᵛardī* means 'broth' and 'juicy meats', because Vullers' sources give only 'eatables'; and its parallel form *xᵛālī* also means 'food' in general only. These and Arm. lw. *xortik-kʿ* and Av. *xᵛarətay-* do not help us in determining the exact meaning here. But cf. AVn. **3.** 19: *u xᵛarišn i hu-puxtak u hu-bōδ u xᵛartīk u sart āp u maδ āwurt* where, we might say, *xᵛartīk* is something which is not cooked. (Other version, PazT. **361.** 9, differs: *xᵛartīk* is connected with *hu-puxtak* and *hu-bōδ*, or with the latter only, and it is rendered by *vyañjana-* 'sauce, condiment' with Guj. gl. *śāku* 'vegetables', SAVn. **3.** 6.) In KH. 37 ff. *rōn xᵛartīk* 'side dish' is referred to as a preparation of fruits. All this shows that the term refers to some raw eatables which, when cut into pieces in a polluted house, become useless. Note that Riv. **121.** 5 etc. does not use this phrase but *ārd i siríšta* 'dough, pastry'.

49 [1] M a scribbled n. *xākistar*. The lit. meaning is 'clothing' or the like, s. Av. *xarənā-*, and not "fruit" as West says; — *bar* 'fruit' in the same phrase, PV. **5.** 51 (150) com., is due to the common mistake of mixing up n and b; the ideogram rn b ya ya, or rb n ya ya (common for 'dress') occurring there and in PRivDd. **116.** 13 and Šnš. **3.** 27 decides for *varr*. This term occurs also in Riv. **226.** 2, 6, 18, and *ādur āstar* (MP. *āturastar*) in **230.** 17, — both unrecorded in NP. [2] Viz. 'if the ashes (within three steps) be warm, they are pure, and those which are cold are polluted', Riv. **122.** 13; **123.** 1. But if *patmānak* is used in the sense of measurement, we must think of 'within three steps' etc. only.

M 79 v **50.** ātaš, i pa ān xānak andar barēt, kē nōh šapak u māh drānāk pa pāk būtan andar apāyēt: pa andar burtan, tanāpuhr -1 vinās; u pa awrōxtan, tanāpuhr -1 [vinās]; u [pa] har x^{v}ar[1], i bē mīrēt bē mānēt, tanāpuhr -1 vinās.$_0$

51. āp-ač: pa andar burtan framān -1[1] vinās; u pa ān γyāk, ku-š γyān bē šut[2], āp rēxtan tanāpuhr -1 vinās; u pa yut γyāk rēxtan yāt -ē vinās.$^0_0{}^0$

52. u pātiyāpīh[1] pa andar burtan hamāk apātiyāp.$_0$

53. u kē ax^{v}ēškārīhā andar[3] awi-š šavēt,[4] har bār -1, u[5] tan vastrak, bē šōδišn[7], u-š tanāpuhr -1 vinās;$_0$ u[1] ka x^{v}ēškārīhā[2] andar šavēt, nē kirpak u nē vinās.[6] —

54. u ēn rēmanīh [ī] hamāk andar ān tih[ī]k[1] āmār, i: ka γyān bē[2] šavēt, tuhīkī[h][3] rēman.$_0$

50. [As to] the fire, which one carries in into that house, for which nine nights' or a month's length is requisite for becoming pure: for carrying it in, one *tanāpuhr* sin; and for kindling it, one *tanāpuhr* [sin]; and [for] every spark[1], that extinguishes [or] survives[2], one *tanāpuhr* sin.$_0$

51. And [as to] water: for carrying it in, one *framān* sin; and to pour water on that place, where one's vital spirit has departed, is one *tanāpuhr* sin; and to pour it on a different place is one *yāt* sin.

52. And consecrated[1] objects[1] [become] all desecrated through carrying them in[2].

53. And he who goes[3] in into it[4] without business, every single time, and [both,] the body and the clothing, are to be washed, and it is one *tanāpuhr* sin for him; and when he goes in for business, it is neither good work nor sin[6].—

54. And this pollution [of][4] all [things][5] is in that void[1]- account, which is: when the vital spirit departs, the[6] void is polluted.

---

50. [1] Cf. PV. **16.** 2 (8) com. where it is used along with *brih* 'light'; West, "trifling [creature]", wrong; this meaning is not known, perhaps he thinks of 'despicable' etc., one of the meanings of NP. *x^{v}ar*. [2] For this meaning s. Wollaston, besides the context.

51. [1] MS. *i*. [2] MS. *šavēt* i. e. yt for t.

52. [1] Cf. *barsam u dīgar pādiyāb-hā* (^{0}*bī*, ^{0}*bīhā*) '*b.* and other consecrated objects', Riv. **83.**15 ff.; the same meaning also in Sd. **41.** 5. [1-2] West, "to undergo ablution inside [the unclean house] is all non-ablution", wrong.

53. [1] K om.; it resumes the text here, s. 40 n. 2. [2] K ^{0}*īh*. [3-4] *andar* goes with *šavēt* as in the next clause, in spite of *awi-š* occurring between them, which it does also in Mx. **57.** 20, 21: *vēš* (and *kam*) *awi-š matārīh i xrat rāδ*, where *vēš* and *kam* (k ym) go with *matārīh*. For the unusual meaning of *awi-š* cf. the parallel passage: *ā-š awi-š nē apāyēt šutan*, PRivDd. **3.** 12 f. [5] Davar om. [6] But PRivDd. **3.** 13 f. differs: *har kē pa kām vičār andar šavēt* (Ed. *šut*), *aš framān -ē vinās* 'whoever goes in for the fulfilment of wish, for him it is one *framān* sin'. It is, however, more probable that the difference lies between *kām vičār* and *x^{v}ēškārīh* which latter has a better or higher sense, expressed by its Str. *satkāryatā-* and the like. [7] M ad. *-u*, not *u* as Davar.

54. [1] Both t ya k as in MF. **321.** 12, in the reply, whereas in the question *tahīk* (the same as *tih*^{0} *tuh*^{0}), and as once in PV. **16.** 11 (23) com.; otherwise *tēxak* 'sharp,

54b. hamkaržakīh ⟨i⟩[8] pa gōšt u pa-č mōδ u nāxun ō bavēt.$_0$

55. hamkaržakīh, i pa apastāk paδtāk, hač kust -1 āmār[3], u hamē ō bavēt[1]; gazišn, i pa apastāk paδtāk, hač har 4 kust[4] ō bavēt.

56. sōšyans guft, hat! tāk-aš sak bē nimāyišn[īh][1], ētōn, čiγōn andar ān žamān bavēt, ka-š γyān bē[2] šavēt.$_0$ — āsravan u artēštār u[2] vāstryōš kār nēst, čē ēvāč sak paδtākī[h].

57. kay-ātur-bōžēt guft, hat[1]! andar ān žamān āmār, ka-š γyān bē šavēt; u mātakwar ān, i kay-ātur-bōžēt guft: u ka-š čīš -1 andar⟨ak⟩[4], rēmanīh tāk ō ān γyāk, ku ān čīš ēstēt.$_0$

58. u[1] ka[3] sak -1 aδāp gōspand -1 aδāp hūk -1 dārnāk[2] bavēt, šāyēt, čē (ān)ōδ frāč nē patkōpēt; u apurnāyak i andar aškomb, rēmanīh apāk māt[3].$_0$

54 b. The 'contact' [pollution] happens[7] through flesh and also through hair and nails.

55. [As to] the 'contact' [pollution], which[5] is evident in the Apastāk, the calculation is from one side[6] and it always happens; the 'non-contact'[2] (?) [pollution], which[5] is evident in the Apastāk, happens from all four sides.

56. Sōšyans has said, lo! till the[3] showing of[4] a dog unto him, it is so, as it happens at that time, when his vital spirit departs. — [Whether he be] a priest or a warrior or a husbandman is not the matter, because there is only a declaration about [the showing of] a dog.

57. Kay-ātur-bōžēt has said, lo! at that time is the calculation, when one's vital spirit departs; and essential[2] is that, which Kay-ātur-bōžēt has [further] said[3]: and when a thing is within it (the room), the pollution is up to that place, where that thing stands.

58. And when a dog or a sheep or a pig becomes its holder[2], it is allowed, because there [the pollution] does not attack further; and [as to] the young one in the womb, [its] pollution is along with the mother.

---

strict'. [2] K *u* which is a part of *bē* written n n a (instead of b n a) from and on which the next word is written. [3] Cf. 62 b. [4-5] Or 'always' *+hamē*. [6-7] West, "the only thing which amounts to polluting is contact", wrong. [8] Or [*ān*] *i*.

55. [1] K *gīrēt* in the same sense. [2] West "curse" wrong, s. Intr. 12. [3] M does not add *i* as Davar says. [4] Also M, though Davar ^{0}*tak*. [5] Or 'as', cf. 92. [6] Viz. that of contact.

56. [1] K om. *y; īh* is always met with in such cases, the word forming a compound with *bē;* or ^{0}*yēt* 'one shows'. [2] K om. [3-4] Or as in n. 1.

57. [1] K om. [2-3] Or 'the essential of K.'s saying is'. [4] Thus, as it (also read *andark*, AirWb. 132, cf. GIrPh. 1. 278) does not occur for *andar* in our text as it does elsewhere. It is correct if it means 'what is within'.

58. [1] M om. [2] Perhaps not certain but better than West's "*dārvāī* requisite". [3] K om.

59. žūžak hamrēt ō kunēt, u patrēt[1] nē; —

60. hamrēt ān bavēt, kē[1] tan apāk nasāk hamkaržak bavēt; u[2] patrēt[4] ān, kē apāk ān, kē pa nasāk patkōft, hamkaržak bavēt[3]; u hač hamkaržakīh i apāk ōy, ⟨i⟩[6] yāždahom hamgōnak patrēt[5] ō gīrēt[7].$_0$

61. kapīk[1] ⟨u⟩ daštān patrēt[4] ham[2] nē[3] kunēt[5], ēstēt.$_0$

K 56 v M 80 v **62.** sak i pasušhaurv[1] u ān-ač i višhaurv[2] u apārīk-ač hamgōnak .hamkaržakīh [ō] hašt ō barēt. —

62b. u ka pa zamīk[3] frōt barēt, andar ham žamān pāk; u[4] ān-ač, i pa aškōp mīrēt, tāk ō tuhīkīh frōt barēt, sāl drānāk[7] rēman.$_0$ —

59. The hedgehog makes[2] one 'directly infected', but not 'indirectly infected'[3]; —

60. 'directly infected' becomes he, whose body becomes 'connected' with a corpse (or a carcass); and[2] 'indirectly infected' he, who becomes 'connected' with him, who has impinged on a corpse (or a carcass); and from the 'contact' with him, the eleventh becomes likewise 'indirectly infected'.

61. Monkey's[6] menstruation[7] similarly does not make one 'indirectly infected', it remains [still].

62. The sheep-protecting dog and also that which is the house-protecting [dog] and others too likewise carry the 'contact' [pollution] to eight. —

62 b. And when it[8] carries[5] it on in[9] the ground[6], [the ground] is pure in[10] the same time; and moreover that, which dies on the frame of the roof, carries[8] it on up to the layer[11] (or void)[9], [the frame] is polluted a year's length. —

---

59. [1] Both p yt. [2-3] Or 'produces direct infection etc.' but s. below 60, and cf. the NP. definitions in ZHss. 106.

60. [1] Both *ka*, but s. the next clause. [2] M ad. *hač* but marks as om.; cf. n. 2—3. [2-3] K om. [4] Ms. p yt^0. [5] Both p yt^0. [6] A phonetic complement. [7] K *bavēt*, and hence the other is not *kunēt*.

61. [1] K parts of p y k worm-eaten, P om. the whole word. [2-3] Both join. [4] Both p yt^0. [5] K ^{0}*ēm*, a misreading of the strange ligature (*ą* which M has) of *ēt*, *ēnd* etc. [6-7] Thus, omitting *u*; cf. *kapīk čiyōn? u-š daštān rēman aδāp nē? pa čāštak i mēṯōkmāhīk aš daštān ⟨aš daštān⟩ rēman*, MF. **290.** 6 ff.; and *kapīk, har čīš -1 ētōn bavēt, čiyōn martom*, PV. **5. 32** (107) com. The difference of opinion must be here overlooked. If there be some serious mistake in MF., *u daštān* 'and forest animals' may be adopted in preference to 'and a menstruous woman'!

62. [1-2] S. 2 n. 2. [3] Perhaps we have to add *mīrēt, tāk ō āp*. [4] K om. [5-6] Or "dies on the ground, it carries it as far as water [penetrates]", s. n. 3. [7] K worm-eaten and torn. [8-9] West's tr. "they shall carry [the carcase] down on" and "until they shall carry [it] down to the bottom" is possible, but cf. above 12 ff., esp. 18. [10] Or 'at', i. e. the phrase means 'instantly' *andar žamān*. [11] S. 18 n. 1.

63. kē nasāk pa tan -1 barēt, mark-aržān[2].$_0$ u[1] ē[2]! mark-aržān pa ān žamān bavēt, ka nasāk [i] sak nē[2] dīt, u pa čār u tuvān u[3] ax^{v}ēškārīh jumbēnēt, u ēv-kartakīhā jumbēnēt, u[4] dānēt ku vinās i mark-aržān; u nasāk i sak dīt u sak nē dīt, — ētōn vēš[5] āmār[4] dānišn, u[4] mart i nizār[6] [u] tuvān, u[3] markīh[7] u[4] raxtakīh[18].

64. aparak guft, hat! čār u tuvān āmār nēst, čē vinās i mark-aržān pa markīh u raxtakīh[1] nē pātaxšāy kartan.$_0$

65. u[1] nasāk i[2] sak nē dīt, ka pa 1000 mart jumbēn[ē]nd, pas-ič hamokēn[3] tan rēman, u-šān pa pixak ō šōδišn.$_0$

63. [He,] who carries[8] a corpse alone[9], is a *mark-aržān*. And lo[10]! he becomes a *mark-aržān* at that time, when it is a corpse which a dog has not seen, and he moves it in[11] [spite of] 'means and power' and needlessness[12], and he moves it by being 'in one piece' [with it], (i. e. directly or in close contact), and he knows that it is a *mark-aržān* sin; and [whether] it is a corpse which a dog has seen or a dog has not seen, — so[13] much[5] account is to be known[14], and [also whether][15] he is a[16] weak or a strong[17] man, and [whether][15] there is death or sickness[18].

64. Aparak has said, lo! 'means and power' is not the consideration, because one is not authorised to commit a *mark-aržān* sin [even] in death and sickness[1].

65. And [as to] a corpse (or a carcass) which a dog has not seen, when they[4] move it through[5] a thousand men, even then all persons are polluted, and they are to be washed through [the bath with the stick of nine] knots.

---

63. [1] M *-u* before$_0$, K worm-eaten or torn but P *u* after$_0$. [2] K worm-eaten or torn. [3] M *-u*. [4] K om. [5] Both *vēh*, i. e. n ya instead of n y ya; if genuine, 'good' will do; cf. also n. 13—14. [6] Perhaps for *čār*. [7] K only *m* joined to *rax*^{0}. [8-9] West, "brings dead matter on any person", wrong; *pa tan -1* lit. 'by (or with) one body (or person)' occurs as a gl. of *ēv-tāk* 'alone' in PV. 3. 14 (44); the same meaning in 91 below. [10] West, "thrice", wrong, — he reads *3* instead of *ē*. [11-12] West, "[if] through negligence of appliances and means", wrong. [13-14] West, who has not seen the proper connection of the prec. clauses, renders, "the accountability is to be understood [to be] as much". He too has changed *vēh* into *vēš;* if we have to retain the former, the clause would read 'such is to be known [as] good consideration'. [15] Or '[as to]', and connect these clauses with 64. [16-17] Or 'a man of means and power', if *nizār* is a mistake for *čār*. [18] Both r aat^0, — also PV. 5. 4 (14) com., 56 (159) com. but printed r y yat^0, as if *rēštakīh*, (perhaps because of *rēš*, *rešītan* '(to) wound'); NP. *raxta* 'wounded, sick, diseased' suggests that aa is for a, as often.

64 [1] S. 63 n. 18.

65 [1] M om., and even in K it may be a mistake, as it occurs before *nasāk* very often unnecessarily. [2] K om. [3] M aym^0, K aam^0 corr. into adm^0. [4-5] That is, 'it is moved by'.

M 80 r **66.** u ān i[1] sak dīt, bē — ān[2] ēvtom[3] — ka mart ēv-kartakīhā hamāk bē ǰumbēnēt, ēnyā[4] pa pixak nē šōδišn.$_0$

66. And [as to] that which a dog has seen, except — that[2] is unique[3] — when a man moves it all by being 'in one piece' [with it], (i. e. directly or in close contact), otherwise he is not to be washed through [the bath with the stick of nine] knots.

---

66. [1] K om. [2] K om. [2-3] This strange phrase occurs in 68 and 71, but the context is the same as here, and in PV. **5.** 49 (146) com., **16.** 4 (10) com., 11 (23) com. (here *ētom*), but the context is obscure in the first case (for the latter two s. below); the words by themselves are clear; besides *ēvtom* and *ētom* there occurs also *ēvaktom*, N. **21.** 12. West, "except that one only", is not clear; my construction is based upon the following: *ka hamāk apāč ō zōhrak kunišn, bē — ān ⟨i⟩ ētom — ka* (MSS. *kē*) *āp apāxtar rōn āyēt, tāk hamāk* (MSS. ^{0}*mē*) *patīrak apāč rēčišn* 'when all is to be put back to the *zōhrak*, except — that is unique — when the water comes to the northern side, till then all is to be poured back against it', N. **139.** 5 ff. (Bulsara wrong: "one should again hold with the Twig of the Hallowed Portion the liquid food as a whole; and excepting that particular water which may happen to be (otherwise ' . . . . which may come [to] the water . . . . ') in the direction of the north, towards every other should one pour it.") One more case: *ka andar xānak -ē drōn -ē yazēt, u-š dar* (MSS. b yn a — *māh* 'month' — for b b a which occurs a little later *ka-š dar 4 . . .*, **146.** 5) *ēvak, bē — [ān] ētom — ka-š ō apāxtar rōn, tāk-aš barsum sar ō dar rōn kunišn* 'when one offers a *drōn* in a house, and there is one door to it, except — that is unique — when it (the door) in on the northern direction, till then the *barsum* end is to be set towards the door side', N. **145.** 28 ff. (B. is again wrong: " . . . . house, then in the case of one's arranging it in the direction of the north, one [must be] in [spiritual] darkness for one month.") Thus it seems that the phrase is used to emphasise the exception or *bē*, at least in those cases where a clause with *tāk* or *aδak* or *ēnyā* follows; instead of 'unique' we may say 'essential' or the like, but the former is more literal. In those cases where a clause with *tāk* etc. does not follow, we can simply translate 'except that alone: when'. Thus in PV. **16.** 4 (10) com.: *hamē* (MSS. ^{0}*mā*) *ka pa patmānak rāst, šāyēt; bē ān ētom: ka apātiyāpīh hačapar* [*u*] *pātiyāpīh hačaδar rāst; čē ān, ka-č apēr vas, ā-č nē šāyēt,* 'whenever it is in measurement exact, it is allowed; except that alone: (or '— that is unique —') when uncleanliness is above and consecrated objects exactly below; because [as to] that, even when it is highly enough, even then it is not allowed'. (Cf. below **3.** 11.) Similarly in PV. **16.** 11 (23) com.: *čē hamē* (MSS. ^{0}*mā*) *ka pāk bē bavēt, pa γyāk bē pātaxšāy šustan; bē ān ētom: ka 3 šapak* (MSS. n for p) *pa pākīh nišast, -u aδak-aš* (MSS. *aδāp-aš* i. e. p instead of k) *daštān māh apāč ō bun āmat; čē-š ān daštān hač bunīh* 'because whenever she becomes pure, she is authorised to bathe on the spot; except that alone: (or '— that is unique —') when she has sat three nights in purity, and then menstruation has come back to the beginning (i. e. has begun again); because that menstruation is [to be reckoned] from the beginning for her'. (Cf. **3.** 17.) — Bartholomae, WZKM **25.** 255, renders *ētom*

67. u ka[1] hamkaržak bavēt, nē ǰumbēnēt, ā-š pa gōmēz āp šōδišn.$_0$

70. u ka-š nērōk i ōy, kē-š dast x^{v}ēš, hambun-ač andar nēst, ētōn bavēt, čiγōn ka-š pa dār -1 ǰumbēnēt hē; u[1] ōy, kē-š pa dast dāšt, pa rāh i hamkaržakīh, pa

67. And when one becomes [mere] 'connected' [with it], does not move it, then he is to be washed with cattle's urine and water.

68. And when one moves a corpse (or a carcass), which a dog has not seen, with [a piece of] wood, except — that[3] is unique[4] — when he moves it all, till then he is not to be washed through [the bath with the stick of nine] knots.

69. And when a man moves a corpse (or a carcass), which a dog has not[1] seen, with the hand of another man: when the strength [used] in it is from the hand of the man, who moves it, and also [from] that one, to whom the hand belongs[15], both persons are polluted; and[8] through him[8] [there accrues] to[12] the stock[13] one *tanāpuhr* [sin] for himself and one *tanāpuhr* for him, the second one, for this [reason]: because he made his own body and also that of him, both, polluted out of sinfulness;

70. and when the[2] strength of him, to whom the hand belongs, is not even a little [used] in it[3], it happens so, as when he would move it with [a piece of] wood;

---

by 'some one, any one' but that would not suit everywhere, whereas our meaning would. [4] This reading (cf. the Paz. *anyā, ainā* etc.), and not *ēnīh*, is now ascertained, s. Paik. 1. 132.

67. [1] K ad. *nasāk -1* but marks as om.

68. [1] M also, — not *i* as Davar gives. [2] K rep. [3-4] S. above 66 n. 2—3.

69. [1] M om. [2] M ad. the sign to fill up the line; but Davar *i*. [3] K *kē*. [4] K om. [5] M *hać:* mn for mn n. [6] M does not add *i*, as Davar. [7] Thus also M, not dn (*dō*) as Davar; K writes *ān* nearer to *tan* than to *2*; but cf. NP. *duvān*, pl. of *dō*, used as here in Šn., s. GIrPh. 1b. 113. [8-8] Or *hač-aš* thereby'. [9] K worm-eaten or torn. [10] K corr. from *bē*. [11] K -*k*^{0} worm-eaten or torn. [12-13] Such is the meaning of *ō bun* as can be seen from . . . *vinās pa bun i ōy bavēt* ' . . . the sin accrues to his stock', Mx. 1. 26. West's explanation, "A sin is figuratively said to take root in the body, when it has to be eradicated, or figuratively dug up" cannot be justified. The idiom comes from the belief about the collection of good deeds and sins in the court above. [14] Davar silently gives it. [15] S. 10 n. 10. [16] *kē* alone is perhaps not wrong, cf. PnZ. 3, 5: *kē x^{v}ēš* . . *ōhrmazd x^{v}ēš* . . , where, however, *x^{v}ēš* can mean simply 'own'.

70 [1] K om.; Davar also, though M has. [2-3] West, "there is not in him, nor even originating with [him] (*ahambūnīč*), the strength of him whose own hand [it is]",

M 81v pixak šōδišn; u[10]-š[10] tanāpuhr -1 ōy rāδ, kē[-š][9] dast xᵛēš, u xᵛar -1 xᵛēš rāδ ō bun.

71. ka pa dast i mart -1 nasāk bē čandēnēt, u nasāk hač ān i[1] sak dīt, bē — ān[4] ēvtom[5] — ka-š hamāk bē čandēnēt[3], tāk-aš pa pixak nē šōδišn[2].$_0$

72. ka šap γyāk -1 hamē[6] šavēt, u fratāk (ān)ōδ apāč āyēt, u nasāk -1 (ān)ōδ nisāyēt[1], u[5] nē dānēt, ku 'dōš ka man bē mat hom, (ān)ōδ būt aδāp ṇē', ā-š pa ē dārišn[2], ku nē (ān)ōδ būt.$_0$ —

and he, who held it (the corpse etc.) with the hand, owing[6] to the 'contact' [pollution][7], is to be washed through [the bath with the stick of nine] knots; and[10] through him[10] [there accrues] to[4] the stock[5] one *tanāpuhr* [sin] for him, to whom the hand belongs, and one *xᵛar* [sin] for himself.[8]

71. When one moves a corpse (or a carcass) with the hand of a man, and the corpse is [one] out of those which a dog has seen, except — that[4] is unique[5] — when he moves it all, till then he is not to be washed through [the bath with the stick of nine] knots.

72. When one is passing a place at night, and comes back there the next day, and a carcass lies there, and he does not know, namely, 'last[3] night[4] when I came, it was there or not', then it is to be considered by him as this, that it was not there. —

---

wrong; — for his *aha*^{0} s. 12 n. 10—11. [4-5] S. 69 n. 12—13. [6-7] If this phrase is to be connected with *dāšt* 'held' as a parenthetical one, then 'by contact'. [8] This is rather strange. The other has not moved the body, but has come only into contact (*hamkaržakīh*) with it; but as the *sag-dīd* is not performed (M differs, but its omission of *nē* in 69 is more likely than K's addition, s. also 71), 'it is not different even for the contact' *pa-č hamkaržakīh yuttar nēst*, PV. 3. 14 (48) com.; that is, the body is to be washed through the *barašnūm* ceremony, as enjoined here also. And we read: *ka tan ētōn rēman kunēt, i-š pa barašnūm apāyēt šustan, ā-š tanāpuhr -1 ō bun*, 'when one makes the body so polluted, that it is necessary to wash it through the *barašnūm*, then [there accrues] to the stock one *tanāpuhr* for him'; and a little below: *ka rēman ētōn kunēt, i-š pa gōmēz apāyēt šustan, ā-š xᵛar ō bun*, 'when he makes it so polluted, that it is necessary to wash it by means of cattle's urine, then [there accrues] to the stock one *xᵛar* [sin]', PV. 3. 14 (48) com. Also in the present case the *barašnūm* is not demanded for the active party, and so far there is agreement, but why it is so is not clear. [9] S. 69 n. 16. [10-10] Or *hač-aš* 'thereby'; in M *-u* before it.

71. [1] K om. [2] M ad. *-u*, K *u* after $_0$, i. e. in 72, perhaps rightly. [3] Both č n dyn^0. [4-5] S. 66 n. 2—3.

72. [1] S. FrP. p. 84; *vindēt* 'finds' (FrP. *19. 22) suits also. [2] K *dārēt*: yt for yan, [3-4] West, "the evil (*dūš*)", wrong; Davar rightly gives NP. *dōš*. [5] K om. [6] Re. GIrPh. 1. 311 (b) note that here *hamē* certainly forms the Pres. Cont., also in 78, 94; 10. 3, 5, 35.

73. ramak -1, kē gōspand -1 andar, kē-š nasāk xᵛart ēstēt; u vēšak -1, kē draxt -1[1] andar, kē nasāk andar vimēxt ēstēt; -u[1] ēsm-dān -1, kē ēsm 1[2]- tāk andar, kē čarpišn andar vimēxt ēstēt: aparak guft, ku[4] ramak u vēšak varōmand[3] kartan nē šāyēt, u ēsm akār.$_0$ —

74. dar -1 kē nasāk -1 pati-š patkōpēt: pa dar i dēh u šahrastān ham-dātastān[2] būt hēnd, ku pa ham -kār bē hilišn; pa dar i[1] bētom[3] yut-dātastān būt hēnd, u gōgušnasp guft, ē! pa ham -kār bē hilišn, čē šāyēt, u sōšyans guft, ē! nē šāyēt; u[1] pa apārīk dar ham-dātastān būt hēnd, ku nē šāyēt;$_0$

75. dar i xᵛēš[1] š[ā]h gāh[2] pa ān i[3] daštānastān šāyēt, u ān i[3] daštānastān pa ān i[4]

73. [As to] a flock, in which there is a sheep, by which a carcass is eaten, and [as to] a forest, in which there is a tree, in which a carcass is mixed, and [as to] a fire-wood stand, in which there is a single [piece of] fire-wood, in which its fat is mixed: Aparak has said, that[4] it is not allowed to make the flock and the forest doubtful[3], and the firewood is useless. —

74. [As to] a gate on which *nasāk* impinges: about the gate of a village and a city they have been of the same opinion, that it is to be left[4] for the same use[5]; about the outermost[2] gate they have been of different opinions, and Gōgušnasp has said, lo! it is to be left[4] for the same use[5], because it is allowed, and Sōšyans has said, lo! it is not allowed; and about other doors they have been of the same opinion that they are not allowed [for the same use][6];

75. The door of one's[1] own grand apartment[2] is allowed as that of the apartment for menstruous women, and that of the apartment for menstruous women is allowed

---

73. [1] K om. [2] Both write *1* close to *ēsm* and not to *tāk*, which might lead one to think of the latter as 'a branch, a stick' which West adopts; but this is wrong, because in that case *1* must stand before *ēsm* or after *tāk*. [3] Both, also MF. **269.** 7, 9 (where *nē dānēt ku katām* 'one does not know which' is added for the sheep etc.); otherwise taking n for b, *barōmand* 'productive'. [4] K *1* i. e. *ē* 'lo'.

74. [1] K om. [2] K *-tān* partly worm-eaten. [3] K *t* partly worm-eaten; West's "mostly closed (*badtūm*)" which "stands for *bandtūm*" is wrong and so are his other conjectures, cf. MPT. about the reading and meaning, which is to be adopted also in DdA. **15.** 4. The same word is meant in Šv. where *bē-* is expressed with its ideogram, probably by mistake. It is the outermost gate or door of a house that is meant here, as the following refers to the inner ones of the same. [4-5] West's "discarded by his comrades (*hamkār*) or the community" is wrong. Any doubts about our tr. are now removed by MF. **269.** 12; **270.** 8 where *šāyēt* 'it is allowed' and *dārēnd* 'they can keep it' are used in the place of *hilišn* 'it is to be left'. [6] The ad. is justified by what follows.

75. [1 2] The first word is to be read and translated perhaps differently; in any case it seems to be a part of the term, s. the parallel term below. The orthography of *šāh* — with defective a — is not uncommon; and g in the next word is so marked in M. As to the meaning cf. the numerous compounds in NP. with

daxmak šāyēt, u ān i[3] daxmak pa čiš-ič kār nē šāyēt; — ān i[3] x^{v}ārtar pa ān i[6] girāntar[5] šāyēt.$_0$ —

76. kas, kē pa vināskārīh nasāk -1 ō āp awganēt, pa γyāk mark-aržān; ka ēvak -1[1] awganēt, mark-aržān ēvak; u[1] ka 10 pa ē bār awganēt, aδak mark-aržān ēvak; u ka yut yut awganēt, har ēvak[1] rāδ mark-aržān -1.$_0$

77. āp, kē nasāk awi-š awganēt, handāčak i rēmanīh: 3 gām i[1] 3 pāδ pēš[12] i[1] āp,
K 57 r u 9 gām i 3 pāδ hačapar i āp[2], u šaš gām i 3 pāδ hač kustak i āp, u 6 gām i[3]
M 82 v sē(h) pāδ pa žufrāk[4] [i] āp, u 3[6] gām i 3 pāδ pa āp [i] apar ⟨u⟩[7] nasāk[8] —
zahāk[5] žufrāk[9] — rēman.

as that of the *daxmak*, and that of the *daxmak* is not allowed for the use of even anything[7]; — that of the more comfortable [apartment] is allowed as that of the more disagreeable [one]. —

76. A person, who out of sinfulness throws a carcass into water, is a *mark-aržān* [sinner] on the spot; when he throws one single [piece], it is one *mark-aržān* [sin]; and when he throws ten at one [and the same] time, then [too] it is one *mark-aržān* [sin]; and when he throws them separately, there is one *mark-aržān* [sin] for every one [of them].

77. [As to] the water, into which one throws a carcass, the extent of pollution is [as follows]: three steps of three feet [each] downstream[13], and nine steps of three feet [each] upstream[13], and six steps of three feet [each] from the [two] sides of the water, and six steps of three feet [each] in the depth of the water, and three steps of three feet [each] in the water above[10] the carcass — the last depth [traversed by it] — are polluted[11].

šāh- and *-gāh;* esp. *šāh-nišīn* 'alcove' etc., — though here *dīvān-xāna* is probably meant. PV. **5.** 4 (14) com. and MF. **269.** 14 etc. have *x^{v}ēš-š[ā]hakān* (^{0}yan), cf. NP. *šāh(a)gān, šay(a)gān* 'anything great and noble', and PT. **85.** 10: *ganǰ i š[ā]-hakān* (thus in MK, the extant, original MS.; not *šāyakān* as commonly given, which may be due to NP. influence, and hence it cannot be taken as a proof of Arm. *šayekān* being a lw., and of the ety. of NP. *šāyagān,* as done by Horn, GIrPh. **1b.** 46, 178). [3] K om. [4] K *šāyēt.* [5] M ^{0}n. [6] K k and a blot. [7] MF. **269.** 12 says that it is valid for the *daxmak*, naturally.

76. [1] K om.

77. [1] K om. [2] K ad. *āp*, originally perhaps *i āp* as P, there being enough room for *i* in the beginning of the line. [3] K *u.* [4-5] K om. [4] MS. *žufāk* as in Šv., but s. below where the correct form is used. [5] This word translates in FrO. **19.** 6 Av. *yazav-* 'the youngest', also meaning 'the last' in Y. **31.** 8 where the Ptr. is *pa zahakīh* (or *zākīh*), in gl. *zahak* (or *zāk*) — (also in J 2. 388 it is written z a k, but Bartholomae, Wb. 1280, reads *zāyak*, though *zāk* in the case of *zaϑa-*, Wb. 1693; for *zāk* cf. NP. *zāḳ, zāg,* and Sog. *z'k*, and for *zahak* s. MPT. *zhg* and Šv., also NP. *zihīdan*). — The glosser takes them in the sense of 'son' (or 'emanation' if one prefers): *ku-t pa zahakīh* (or *zākīh*) *ēstēt vahuman fratom, — ka-m vahuman dīt, am ētōn mēnīt, ku zahak* (or *zāk*)

78. ka miyan[1] i[2] āp -l i vazurk i ēstātak awgand[3] estēt, ā-š patmānak hamgōnak: čand[4] hamē[5] āyēt -u[2] šavēt, patmānak apāk hamē[5] barēt.

79. u ka mart -l frāč rasēt, u nasāk -l andar āp nisāyēt[1]: ka-š[2] bē tuvān āwurtan[3], u-š[4] ziyān -l nēst, nē pātaxšāy bē hištan, bē ka bē āwarēt.

78. When it is thrown into[9] a large and stagnant water, then[6] the measurement is the same[8] for it: as much as it is coming and going, it is carrying the measurement with.[7]

79. And when a man comes forth, and a carcass lies in water: when he is able to bring it out, and there is no injury to him, he is not authorised to leave it, except when he brings it out.

---

i tō. This interpretation, however, does not debar us from taking *zahāk*, which is another form of *zahak*, s. Šv., in the correct sense of 'the last'. The meaning of the phrase here is: not all the depth passed through is polluted but only the last one in the given dimension. By taking *zahāk* in the sense of 'size, greatness', we get: 'and the depth in the size of the carcass'. The third sense 'dropping' etc. (s. n. 10—11) from NP. *zahīdan* does not suit here; nor in AVn. **70.** 3 where 'size' is meant. [6] Perhaps a mistake for *6*. [7] Davar om.; it is perhaps for *i*; but correct as regards the alternative tr. in n. 5. [8] Ms., i. e. M, ad. the mark to fill up the line; Davar gives *i*. An *i* is not wrong here, if met with. [9] Both sep. zn p and *rāδ*. [10-11] West, "pouring over the dead matter are polluted as regards the depth", wrong, s. n. 5. [11] The last two dimensions are theoretical additions to (P)V. **6.** 40. [12] K partly worm-eaten, so also the foll. *i*, if not omitted. [13] Lit. 'before (above) the water', cf. PV. **6.** 40 (80).

78. [1] K *-ān* worm-eaten. [2] K om. [3] K *⁰nēt*. [4] K *čiyōn* which too is adoptable, but it stands wrongly for *čand* elsewhere, 23 n. 9., 36 n. 3. [5] K *⁰māk*. [6-7] West, "in like manner, the proportion it comes is ever as much as it goes, [and is] the proportion of it they should always carry [away] with [the dead matter]", wrong. He admits the obscurity of the sentence which does not enjoin, as he says: "quantity of water ought to be drawn off, in order to purify the tank." The idea is that stagnant water becomes polluted in the fixed dimension wherever the carcass has moved, and not only where it is found, as in the case of running water, s. n. 8. [8] This refers to 77, hardly to 'the same dimension on all sides' viz. six feet, as enjoined in (P)V. **6.** 30—32 along with the removal of water which is further discussed in PV. **6.** 32 (71) com. But this fact is not mentioned here nor in Riv. **86.** 11, **87.** 9, though the custom is observed even today in the case of well-water. [9] Or, as lit., '[in] the middle of'?

79 [1] K b a partly worm-eaten; s. 72 n. 1. [2] K om. [3] Both ⁰t n. [4] K ad. *u-š* which gives sense, when read *hač-aš* 'therefrom', but it does not occur in parallel clauses.

80. sōšyans guft, ku ka ziyān ast, pātaxšāy[1], ka[2] bē nē āwarēt; u ka ziyān nēst, u[3] nē āwarēt, ā-š tanāpuhr -1 vinās.

81. kay-ātur-bōžēt guft, ku pa-č[1] ziyān nē pātaxšāy bē hištan, bē ka bē āwarēt[2]; ka nē āwarēt, mark-aržān.

82. u gōgušnasp guft, ku hat! pa-č ziyān nē pātaxšāy[2] [bē hištan][1], bē ka bē āwarēt;
M 82 v u ka pa ziyān bē[3] nē āwarēt, ā-š tanāpuhr -1 vinās; u ka-š ziyān nēst, u nē āwarēt, mark-aržān.

83. u ka bē kāmēt āwurtan, ā-š vastrak bē nihišn, čē vastrak rēman gīrēt. u[3] har čē pēš[1] tuvān[2] u vēh tuvān [āwurtan], aš bē āwarišn.

K 58 v tuvān[4], pa drānāk[5] i āp bē āwarišn. u sak nimūtan[6] u[7] 2 martīh rāδ nē[8] pāyišn.

80. Sōšyans has said, that when there is injury, he is authorised, when he does not bring it out; and when there is no injury, and he does not bring it out, then it is one *tanāpuhr* sin for him.

81. Kay-ātur-bōžēt has said, that even [in case of] injury he is not authorised to leave it, except when he brings it out; when he does not bring it, it is a *mark-aržān* [sin].

82. And Gōgušnasp has said, that lo! even in [case of] injury he is not authorised to leave it, except when he brings it out; and when he does not bring it out in [case of] injury, then it is a *tanāpuhr* sin for him; and when there is no injury to him, and he does not bring it, it is a *mark-aržān* [sin].

83. And when he wishes to bring it out, then the clothing is to be put off by him, because the clothing becomes polluted. And whatever he is able to bring first and able [to bring] well, that is to be brought out.

84. And when he is able to bring it out through the breadth of the water, then indeed it is to be brought out [so]: and when not able, it is to be brought out through the length of the water. And it is not[8] to be waited for showing a dog and for two men.

---

80. [1] K om. *-āt-*. [2] Both *kē*. [3] K om.

81. [1] K below the line. [2] Davar misprint: [0]t t yn[0] (ideogram).

82. [1] Not necessary, but s. 81. [2] K om. *-āt-*. [3] K om.

83. [1] K ad. *u* for *-u*. [2] K t b[0]. [3] Also M, at least *-u*.

84. [1] Both č ya i. e. *čē(h)*, its ideogram being often written for *-č*, *-ač*, hence no *-aš*, but s. Mx. 32. 8; PRivDd. 124. 2; 192. 15. [2] K t b n an. [3] M om. yn from the ideogram; Davar silent about M. [4] K partly worm-eaten. [5] M [0]*ā 1*, and n. *ka'r*; K ad. *ē*. [6] K om. n (*ni-*) and divides the rest into *hač* (or *kē ?*) *tan*, as distinctly in P. [7] M om., K is judged after P. [8] Is it inserted by mistake owing to the prec. *rāδ* ? cf. 85; or does the statement emphasise that the work is to be done without them?

85. u-š hač nazdīk i āp ētōn bē barišn, ku ka bē nihēt, āp, i ⟨i-š⟩ hač nasāk bē āyēt, apāč ō āp nē rasēt; čē ka āp, i hač nasāk bē āyēt, ēv-kartakīhā[2] apāč ō āp rasēt[3], mark-aržān. ⟨u⟩ u-š hač ān frāč sak nimāyišn, u pa dō mart bē barišn.

86. u ka hač āp bē awgandan kāmēt: mart-būt guft, hat! ētōn[1] bē awgandan pātaxšāy, ku āp, i ⟨i-š⟩[2] [hač] nasāk, ēv-kartakīhā apāč ō āp nē[3] rasēt; rōšn guft, hāt! dūr bē awgandan pātaxšāy.$_0$

87. kašītan[1] i[2] apar āp pātaxšāy, statan u[2] nihātan nē pātaxšāy.

87b. u ka ētōn tuvān kartan, ku hač[3] āp -l i mas ō āp -l[4] [i][5] kas barēt: ka āp ēv-kartak, pātaxšāy, u ka yut-kartak, nē pātaxšāy.$_0$

88. aparak guft, hat[1]! pa āp frōt kašītan pātaxšāy, u apar kašītan nē pātaxšāy, čē ⟨ēn⟩[2] ān āp bīm mat ēstēt, -u[3] ān bīm apar nē mat ēstēt.$_0$

85. And it is to be carried away by him from near the water so, that when he puts it down, the water, which comes out from the carcass, does not reach back to the water; because when the water, which comes out from the carcass reaches back to the water by being 'in one piece', (i. e. directly or uninterruptedly), it is a *mark-aržān* [sin]. And from that [time][4] onward a dog is to be shown to it, and it is to be carried away by two men.

86. And when he wishes to throw it out from the water: Mart-būt has said, lo! he is authorised to throw it out so, that the water, which is from the carcass, does not reach back to the water by being 'in one piece', [i. e. directly or uninterruptedly]; Rōšn has said, lo! he is authorised to throw it out far.

87. Dragging on [the surface of] the water is authorised, grasping and putting [again and again] is not authorised.

87b. And when he is able to do so, that he carries it from a large water to a small water: when the water is 'in one piece', he is authorised, and when 'in separate piece', not authorised.

88. Aparak has said, lo! he is authorised to drag it below through the water, and not authorised to drag it on it, because danger has come to that water [which is below], and that danger has not come above.

---

85 [1] Both zaa as often, also with *i* before, one of which is redundant; it is not necessary to read it *zahā*[*k*] 'dropping' and then add *i*. Also the parallel text, MF. 338. 11 ff., uses only *i*. [2] K upon a word — probably *apāč* — carelessly blotted out, r being still legible; and there is n before it. P has both these letters. [3] K partly worm-eaten. [4] Or 'place'?

86 [1] K om. [2] S. 85 n. 1; Davar gives *čāh* 'a well', but in M the first letter is z, although it may appear like č. [3] K upon blotted out *apāč*, which, and not *nē*, is given by P.

87 [1] K k n^0. [2] K om. [3] M *-m*. [4] M does not omit, as Davar says. [5] M too om., but Davar gives.

88 [1] K *hēnd*. [2] Thus both, instead of *ō* or the like with which it cannot be mixed up; it is perhaps due to *ān*. [3] K om.

89. mēṭōkmāh[1] guft, hat! ul kašītan pātaxšāy, frōt kašītan nē pātaxšāy, čē ān āp
K 58 r tar bīm bē šut ēstēt, u-š nūn bīm apar nē barišn; u ān i hačaδar, ku[2] ān bīm nē mat ēstēt, apatom ān bīm apar bē rasēt.[3]

M 83 r **90.** u[1] ka andar āp šavēt, ā-š pa ēn mēnišn andar šavišn, ku ka hačaδar[7] vas[6] ast[2], pas-ič hamāk bē āwarom; čē ka[3] nē pa ēn[4] mēnišn andar šavēt, u ēvak -1 i dit (ān)ōδ nisāyēt, -u[5] bē ǰumbēnēt, ā rēman bē bavēt[5].0

91. u hakar nasāk girān, u pa tan -ē bē āwurtan nē tuvān, -u[1] pa ēn mēnišn bē šavēt, ku 'šavom, u awzār sāčom, u[1] ēn nasāk hač āp bē āwarom', u ka pa vināskārīh apāč nē šavēt, ā-š tan rēman, -u mark-aržān; u ka pa apāč šutan atuvānīk[2], nē rēman.0

89. Mēṭōkmāh has said, lo! he is authorised to drag it aloft, not authorised to drag it below[5], because danger has gone out across that water, and now danger is not to be carried on to it; and on[4] that which is below, where that danger has not come, that danger reaches at last [by dragging the carcass there].

90. And when he goes into the water, then he has to go into it with this thought, viz. 'when there are many[6] below[7], even then I bring out all'; because when he goes into it not with this thought, and one other lies there, and he moves it, then he becomes polluted.

91. And if the carcass be heavy, and he is not able to bring it out alone[3], and[5] he goes[6] away with this thought, viz. 'I go, and prepare implements[4], and bring out this carcass from the water', and when out of sinfulness he does not go back, then his body is polluted, and he is a *mark-aržān* [sinner]; and when he is unable[2] to go back, he is not polluted.

---

89. [1] M not 0t yn0, as Davar gives. [2] Both *kē;* is *apar* to be taken with it? [3] M not 0m yt0, as Davar says. [4] For the foll. *apar;* if not, we need not translate the redundant *ān i*. [5] West's explanation on the difference of opinions is wrong. I believe that Aparak is lenient or that the matter refers to two different cases: in the first the carcass is below the surface of the water and hence the decision of Aparak, and not because he considered "the water merely as the representative of a spirit who might be endangered or frightened by the source of impurity becoming more visible when above the water."

90. [1] M also, at least *-u*. [2] K *ēč* i. e. a yp, not a yt. [3] Both *kē*, but s. the parallel, PV. 6. 29 (64) com., and cf. *ā* below. [4] K worm-eaten. [5] K om. [6] M n. *murda* 'corpse', of course not as a meaning of *vas*, but as what is understood after it. [7] Or *apēr* 'very'.

91. [1] K om. [2] K *nē tuvān* 'not able'. [3] S. 63 n. 8—9; here we may take the lit. meaning, with the emphasis on 'body or person', because 'implements' are said to be necessary, s. n. 4. [4] This is the usual meaning; M[+] n. *ṣalāh* 'advice'; West "means", perhaps to include 'persons', — but also Riv. 87. 11 uses *barg* 'instrument, arms', Guj. Riv. 253 *sāmān* 'implements, tools'. [5-6] Or 'he may go'.

92. ka nasāk ētōn pūtak, u[1] ka-š ētōn bē tuvān āwurtan, i ka kartak kartak bē brīnēt hē[6], pas-ič bē brīnišn[2] u[3] bē āwarišn; u-š har kartak rāδ dast u kārt pa gōmēz šōδišn, pa xāk ⟨u⟩ namb pāk[4]

94. u ka vārān hamē[1] vārēt, u nasāk andar āp[2] nisāyēt, hač ān āp statan, [u] ō vārān nihātan[3] nē[4] pātaxšāy.$_{0}$ —

95. vastrak i akār ēn: ān kē nasāk pati-š barēnd; — u[2] ān, ka-č hačaδar vas[3],

92. When the carcass is so decomposed, and when he is able to bring it out [only] so, as when he would cut it piece by piece, even then it is to be cut off and brought out; and for every piece hands and knife are to be washed by him with cattle's urine, and with earth the moisture is to be removed[5] clean there-

93. from; and for every single piece, which he brings out, there is a *tanāpuhr* good work for him.

94. And when the rain is raining, and a carcass lies in water, one is not[4] authorised to take it away from that water, and to put it in the rain. —

95. The clothing[8] which [becomes] useless[9] is this: that upon which they bear corpses; — and that, even when below[6] it is much, is all useless; — and that

---

92. [1] Both *i*, can it stand for *u* as it does between epithets in NP. commonly and in 78 above? [2] Both ^{0}*nēt* i. e. yt for yan as sometimes in similar cases; cf. also *burrišn* in the parallel, PV. 6. 29 (64) com. [3] K om. [4] K ad. $^{0}_{0}$; West ends the sentence here and Davar follows him, but the next three words are certainly to be taken here, s. the parallel text: *dast u kārt hač namb pāk bē vēčišn*, PV. 6. 29 (64) com., and cf. e. g. *ku namb pāk bē ē vēčišn*, PV. 7. 14 f. (35 f.) gl., (for 'cover with earth'); and *ku nam*[*b*] *pāk bē ē vēčēnd*, PV. 9. 30 (123) gl. [5] Av. *vaēk-* 'to select', S. *vic-* 'to sift, separate', so also NP. *bēxtan*, and hence 'to remove'; we cannot and need not connect our word with NP. "*kīxtan*" (?) "to bruise or break", as West does, cf. n. 4. [6] Both *ā* 'then', which meaning is more forcibly expressed by the foll. *pas-ič*, and hence it is redundant, unless 'then even afterwards'. The correction suits the context, similarly in 3. 5, though it may not be absolutely necessary.

94. [1] K ^{0}*māk*; — s. 72 n. 6. [2] K om. [3] K like P. must have omitted *-tan*. [4] M om.; and the parallel texts are not quite clear: PV. 6. 29 (64) com. can be eventually thus represented: *hač āp nē* (IM, one of the old MSS., om.) $^{+}$*pātaxšāy burtan ō* (MSS. *u*) *vārān* [*i*] *ham āp*, but it is more probable that this part is fragmentary. The reply in MF. 340. 8 .-. *ku vārān ham nē* $^{+}$*kart* (or *grift*) *ēstēt; ku* $^{+}$*ham āp aδāp yut āp; u hakar ham āp, pātaxšāy; u hakar yut āp, nē pātaxšāy*, — here too it is not certain that the latter part refers to the question about the rain.

95. [1] K *-k* worm-eaten. [2] K om. [3] M n. *murda* as in 90 n. 6, but that does not seem to be the sense here, cf. (P)V. 7. 10 and com. (which decides also for the prec. *hačaδar*, otherwise *apēr vas* 'very much'). [4] M^{+} n. *ya'nī paranda az minkār rēza bi-kunad* 'i. e. birds make [dead bodies] into pieces with their

K59r hamāk[1] akār; — u ān kē apar bē višōpēnd[4]; u ān kē hixr i murtakān apar rasēt, ān and γyāk bē brīnišn, u apārīk [pa][5] 'xšvaš-mąŋhō'[11] bē šōδišn.$_0$

96. ān, kē žan i daštān pa mahmānīh dārēt, pa ham -kār bē hilišn.

97. vastrak, i pa 'xšvaš-mąŋhō'[1] šōδišn[2], ētōn, čiγōn hač apastāk paδtāk[2]:

98. hakar yāmak pōstēn[10] bavēt, sē(h) bār pa gōmēz bē šōδišn, -u[1] har bār -1 pa xāk hušk bē kunišn, u 3 bār pa āp bē[1] šōδišn[2], u sē(h) māh. pa γyāk i x^{v}aršēt nikīrišn bē nihišn; — u pas pa armēšt[3] -1 šāyēt, kē yašt nē kart ēstēt, aδāp pa žan i[4] daštān šāyēt.$_0$

on which they fall off; and that on which the excretion of the dead reaches, so much space is to be cut off, and the rest is to be washed according to the '*xšvaš-mąŋhō*' (for six months) [statement][10].

96. That, which a menstruous woman keeps as her 'entertainment' (i. e. in her use) is[1] to be left for the same use[2].

97. The clothing, which is to be washed according to the '*xšvaš-mąŋhō*' (for six months) [statement], is such, as is evident from the Apastāk:

98. If the garment be leathern, it is to be washed three times with cattle's urine, and to be made dry every single time with earth, and to be washed three times with water, and to be laid out three months in a place which is beheld[6] by the sun[7]; — and afterwards it is allowed to an invalid[3] [person], who has not performed the [initiative][8] *yašt*[9], or it is allowed to a menstruous woman.

---

beaks'; M n. *nihupīd* or ^{0}*īnad*? — if from *nihuftan* 'to cover' (cf. PV. 7. 10 gl.), we require *nihumbēnd*. [5] Cf. 97. [6-7] West, "very much [or] altogether", wrong. [8-9] It is simply 'useless clothing', which is rather abrupt, it being taken at random from a commentary. [10] S. V. 7. 15. [11] Both (plene a and) m an gn k; M n. a- *šōyišn*, s. 97 n. 1.

96. [1-2] West's "is to be discarded in like fashion" is wrong.

97. [1] Both (plene a and) m an yan k; M n. on margin a- *šōyiš* which is struck off and is replaced by *šaš māh*. [2] K ad. $_0^0{}_0^0$

98. [1] K om. [2] K ad. $_0^0$ [3] M n. *zan i bača i murda zāyad* 'a woman who gives birth to a dead child', in which sense *zan i armēšt* is used in Riv. 225. 11, (where the colloquy is not about "women in accouchement" as Modi says, but about those only who have miscarried or brought forth a dead child). This meaning suits well along with a menstruous woman, but we cannot properly account for the qualifying clause, and so we must drop it. Another meaning of *armēšt* is an 'invalid' person or the like, s. 6. 1, and this is meant here. The proof is that almost the same clause occurs as a gl. in PV. 5. 59 (165), 7. 19 (46) (note that esp. the latter along with the prec. account is connected with our one): *armēšt ē ka yašt nē kart ēstēt* for 'an injured person confined to a fixed place'. This gl. may or may not be fully justified, but it serves our present purpose. It is also clear that an 'invalid' person — at least one as described here — does not take part in religious concerns, and hence he can safely use the clothing in question just as a menstruous woman does. [4] K *1*. [5] So also in PV., and hence not a mistake for ^{0}*nīh*, — and therefore it does not

99. apārīk vastrak, ka[-š][1] mōδ apar, ētōn bavēt, čiγōn tatak[2]; pašm u kač[7] u aparēšum u mōδ u uštr pašm, hamāk šōδ ētōn bavēt, čiγōn tatak; — u[3] vastrak i tatak[2] 6 bār ō šōδišn.

100. pašm, i[1] ēv-kartak, — ka ēvak apar ditīkar pēčīt ēstēt, — u-š nasāk apar patkōpēt[3], ēv-kartak[īh] rāδ hamāk rēman;$_0$ u ka mēš[2] mēš[2] bē ēstēt[4], aδak ān and γyāk čand nasāk apar patkōpēt rēman.$_0$

101. [1] ka apar bōp[4] -1 bē[2] mīrēt: ka bōp apar namat ēv-kartak kart ēstēt, namat u[3] bōp har 2 rēman; u ka yut-kartak, namat pāk.$_0$

99 Other[4] clothing, when fur[6] is on it, becomes so, as the woven[2] one[5]; [that of] wool and coarse-silk[7] and silk and hair and camel's wool, the washing of [these] all is so, as [that of] the woven one; — and the woven clothing is to be washed six times.

100. [As to] the wool, which is 'in one piece', — when [the strands] are twisted one upon the other, — and *nasāk* impinges upon it, all is polluted on account of being 'in one piece'; and when it stands fleece[2] by fleece[2], then so much space as the *nasāk* impinges upon is polluted.

101. When one dies on a mattress[4]: when the mattress is made 'in one piece' upon the rug, the rug and the mattress both are polluted; and when 'in separate piece', the rug is pure.

---

form a compound with the prec.; Bharucha, PPEngGl. 95, gives ^{0}*nīh* but from which text? [6-7] Lit 'sun's beholding', the meaning is 'exposed to the sun'. [8-9] Fortunately in one out of many parallel accounts in Riv., we find *yašt i nōzōd*, 237. 12, which supports us; — this meaning is proved to be very common, s. 3. 35 n. 6. [10] M n. *čarmī*.

100. [1] As in PV. 7. 14 (35) gl.; or *kē*. [2] M n. *panba* 'cotton', but 'woven' (or rather 'spun') is the lit. sense of the term which occurs for Av. *ubdaēna-* 'of woven [stuff]' in the paralell V. 7. 15; also NP. *tada* 'spun, a web' (Pres. stem **tan* from which *tanīdan*, and cf. *tana* 'a web'). This use without the suf. *ēn* shows that it was not considered as some stuff, and so also it is very doubtful whether it means 'cotton' (for which we have MP. *pambak*, s. 4. 4 below, PV. 7. 10 (27) com., and N. 164. 2, 13), though it suits here along with other materials. Is it meant in *pas pa viškar ašān sarmak bē tat*, [*u*] *ān i tatak yāmak kart*, GBd. 104. 4? The prec. stages are *vastrak i giyāh* 103. 1 and *vastrak* [*i*] *pōstēn* 104. 3; for *sarmak* (var. ^{0}*māk* is wrong) cf. NP. *sarmaǰ*, ^{0}*aḳ*, ^{0}*ak*, ^{0}*a* 'orach'. [3] K om. [4-5] The similar gl. in PV. 7. 14 (35) refers only to the leathern clothing, which, when with fur, is to be considered as a woven one. Our author seems to apply this gl. to the stuffs mentioned below. [6] Lit. 'hair'. [7] Cf. NP. *kaǰ*, *kaz*, *kaž*; West's "floss silk" is just the contrary.

[1] K om. [2-2] The reading and meaning are conjectures but very probable ones; lit. 'sheep by sheep'. [3] M n. *paivasta*. [4] K ad. something like *i* to fill up the line; P copies it.

[1] K ad. *ka apar u bōp har rēman u ka yut-kartak namat*, and marks as om.; but P copies it. [2] K worm-eaten. [3] K om. [4] S. 3. 2 n. 2.

102. u[1] ka bālišn 1[3]-čand ēvak apar ditīkar ničīt[5] ēstēt, -u[2] ēv-kartak nē kart ēstēt[6], u-š nasāk apar rasēt, ham-dātastān būt hēnd, ku ān ē[4]-tāk rēman, kē-š nasāk apar mat.$_0$

103. u[1] bālišn apāk pašm[3] ētōn bavēt, čiγōn[2] bōp apāk namat.

104. -u[1] bālišn 1[4]- čand, kē pa[5] ham[5] frōt[6] bast ēstēt: ka nasāk ō band rasēt, har[7] 2
M 85 v rēman, rasan bālišn[8];$_0$ u ka nasāk[2] ō bālišn rasēt, u ō band ńē[1] rasēt, bālišn ēv-kartakīh[3] rāδ[1] hamāk rēman, u band pāk.$_0$ —

105. žan i āpustan, kē nasāk pa vināskārīh-ač žōyēt[2], rēman -u[8] mark-aržān[9], u-š šōδ nēst; u apurnāyak[3], ka pixak[4]- šnās bē bavēt[5], ā-š varr[7] u gōmēz ō x^{v}arišn[1], u-š[6] ō šōδišn.$_0$

102. And when several cushions are piled[5] one upon the other, and are not made 'in one piece', and a corpse reaches upon them, they have been of the same opinion, that that single one is polluted, upon which the corpse has come.

103. And a cushion with a wool[len padding][3] becomes so, as a mattress with a rug.

104. And [as to] several cushions, which are bound up[6] together[5]: when a corpse reaches to the band, both[7] are polluted, the cord and the cushions[8]; and when the corpse reaches to the cushions, and does not reach to the band, the cushions on account of being 'in one piece' are all polluted, and the band pure. —

105. A pregnant woman, who devours[2] *nasāk* out of even sinfulness, is polluted and is a *mark-aržān* [sinner], and washing does not exist for her; and [as to] the child[3], when it becomes acquainted with [the bath with the stick of nine] knots[4], then the 'clothing' (i. e. ashes) [of the Fire of *Vahrām*][7] and [consecrated] bull's urine are to be drunk by it, and[6] it is to be washed.

---

102. [1] M om. [2] K om. [3] Both to the prec., as in NP., s. *čand* in Vullers, but cf. *ē-čand*, sometimes written as one word. [4] K to the prec.; but not so M though Davar gives thus. [5] MPT. n č y d finds here an exact parallel; the word in Dk. 8. 21. 1 is not clear. [6] M ad. *-u*, K *u*.

103. [1] M om. [2] K *čand*. [3] Cf. *pašmākand* (or *pašmak*) PV. 7. 10 (27) com.

104. [1] K om. [2] K ad. *u ka* and marks as om. [3] M ^{0}*tīh*. [4] S. 102 n. 3. [5-5] The phrase occurs for Av. *hąm*; here it may be 'as one, in one', as the parallel PV. 7. 10 (27) com. has *pa ēv-kartak*. [6] *frōt* is not here 'down, below', but a mere emphatic particle as often. [7-8] This seems strange; PV. 7. 10 (27) com. says in the same case *bālišn pāk* 'the cushions are pure'.

105. [1] Both ad. *-u*. [2] Not *yavēt*, *yūtan* as Salemann, GIrPh. 1. 301, accepted in AirWb. 517; Davar repeats NP. *ǰalīdan* (?) given in AVn.Gl. with *čalīdan*; for *žōy* cf. the ety. by Hübschmann, PSt. 49, and NP. *žāvīdan* besides *ǰāvīdan* 'chew'. *žūtan* is used for Av. *gah-* 'eat' used of evil beings, 'devour'; but in PX^{v}Ap. 70. 18 *nasāk pa tan ālūtak kartan* 'to smear *nasāk* on the body' is used in the place of *nasāk žūtan*, 57. 12. The piece, however, is a mere retranscription from a NP. version. Also SX^{v}Ap. 39. 3 explains *nasāk žōyišnīh* by *nasā-lepanam* 'smearing with *nasā*'. But this meaning is not to be taken seriously, since it is merely an

106. apurnāyak, i hač ēvak-barān zāyēt: ka-š pit u māt, har 2, nasāk pa vināskārīh žūt[1] ēstēt, ān i zāyēt pa γyāk pāk, čē [hač[5]] zāyišn rēman nē bavēt.$_0$

107. rōšn guft, ē ! har kē pa vināskārīh[1] nasāk rāδ rēman būt ēstēt mark-aržān, u-š tan [i] rēman hakirč pāk nē bavēt[2]; čē x^{v}ārtar ēn, ku rōpās[5] i žī[va]ndak andar āp awganēt, u[6] andar āp bē mīrēt.

106. [As to] a child, which is born of 'alone'-carriers[2] [of dead bodies etc.]: when the father and the mother, both, have devoured *nasāk*[4] out of sinfulness [before the conception][3], that which is born is pure on the spot, because [from[5] such] birth it does not become polluted.

107. Rōšn has said, lo! every one who has out of sinfulness become polluted on account of *nasāk* is a *mark-aržān* [sinner], and his polluted body does never become pure; because[3] more agreeable is[4] this, that one throws a living fox into water, and it dies in water.

---

attempt to distinguish the two terms having the same sense, (note that in the parallel text only one of them is referred to, Tīrandāz 413), cf. below 4. 6 n. 4; 5. 1 n. 3—4, for the same phenomenon; in the latter case *žōyišnīh* is given still another signification, *maunatā-* 'silence'. [3] For which it is said that it is to be considered as having eaten the dead matter, *pa x^{v}art dārišn*, MF. 365. 13; cf. also 109 below. [4] Hardly *pēšak* 'profession', or "duties" as West gives; s. Intr. 13 and cf. *apurnāyīk . . . pa gōmēz u āp šōδišn, [ka] pixak-šnās bavēt, aδāp ō 7 sālakīh rasēt, ā-š pa pixak šōδišn*, MF. 366. 3 ff. [5] Both *būt*. [6] K *hač-aš* 'therefrom' which suits here, but K is often wrong on this point. [7] M n. *xākistar* 'ashes', but ordinary ashes do not serve the purpose, and the term *carr* may have the limited sense as compared with *āturastar*; — s. 49 n. 1. [8] K om. [9] M ad. *-u*, not *u*.

106. [1] S. 105 n. 2. [2] This is the literal and original meaning, cf. (P)V. 3. 14 where, however, the term is not used, not even in the com., but in 15 (50) as a gl. for Av. *iristō-kaša-* and 20 (67 where misprint) gl.; and hence applied to a woman who has miscarried: she carried a dead body alone i. e. within herself, or was at least in touch with it alone. The term seems to have a general sense of one who busied himself with dead matter against the prescribed law, cf. AVn. 38. 5—7. [3] This is necessary, cf. 105 and PV. 7. 77 (192) com.; MF. 366. 11 ff. is clear where *mart vušn kunēt* 'the man impregnates' is used after the statement about eating. [4] Here it can be a 'carcass', which is eaten by its removers in some places. [5] The similarity with the prec., mn with mn n, explains the omission of this word, though *pa* 'by' is more suitable; — otherwise we may change *bavēt* 'becomes' into *kunēt* 'makes', believing that the ideogram was read *gīrēt* 'becomes' (s. 37 n. 6), and was replaced by its synonym.

107 [1] K ad. *u*, but being before *nasāk*, it is doubtful. [2] K ad. $_0$. [3-4] Or (taking *x^{v}ārtar* in the opposite sense) 'which is more contemptible than' (?). [5] Both ^{0}aa, not ^{0}a s. [6] M also.

M 86 r rasēt; u ān i[3] andar gupān[4] parvastak[5] aδāp x^{v}ast[6], u ān i ō (h)anē[7] γyāk awšīt[8]

118. Fire-wood, when fresh, is to be cut off a span's length, one by one, as many [pieces] as there are, — and when dry, one span and two fingers, — and is to be put aside [in] a place a year's length, and water is not[9] to be let fall upon it, and one waters[10] it [after] a year's length, [and it is pure]. Sōšyans has said, that it is allowed as fire-wood for the Fire (of *Varhrām*)[11]; and Kay-ātur-bōžēt has said, that [when] it is washed[7] just as is evident from the Apastak, even then it is allowed [only] for[14] [preparing from it] a vessel for dried [things][15]. —

119. About corn they have been of the same opinion, that so much space is polluted, as the *nasāk* reaches upon; and [about] that which is encompassed[5] or threshed

---

118. [1] M n. *hēzum.* [2] K č yyn d, i. e. neither *čiγōn* nor *čand.* [3] M ^{0}*nēt.* [4] K om. [5] M om. [6] M ^{0}b č^0, K k n^0. [7] Or *šōδēt* 'one washes'; M *dānast* 'is known', but the diacritical mark is by a later hand. [8] M n. *pīlasta* ('fore-arm' or 'fingers' *bēlasta*) for *pilist* = *bilist* which is the dialect form of *bidast* (*l* for *d*, *δ*), and not a mere clerical mistake as Horn, GIrPh. 1 b. 57, says, since we have from it Hin. *bilast*, and Guj. *billas.* [9] Both; but we are told in V. 7. 29 f. that water is to be poured once, cf. also *u-š pa har kustak āp be rasēt*, MF. 369. 15, hence we may omit *nē* 'not', but the idea is to water it *after* one year as the gl. in PV. 7. 29 f., *pa sāl sar*, declares; cf. also MF. 183. 12 f. (= V. 7. 34, a parallel subject, with the same gl.): *u pa sar i sāl āp apar rēxtan.* [10] If *hanǰēt*, 'draws' (West), but s. n. 9; *hixtan* (or *hēx*^{0}), *hinǰ* means 'to draw' (water), KnS. 12. 2, 4 etc., but also 'to water, to irrigate', FrP. 18. 11 (note the context: to dig, to inter, to water, to sow or cultivate), and PV. 6. 6 (10) for Av. *hixtayaēča*, where the prec. p can best be explained as that of the ideogram, (AirWb. 1813 does not give this, but the gl. *namb kartan*), and MF. 372. 1, 4 (written aa^0 as in KnS. 12. 7, 13) = V. 7. 34, a similar subject. And 'to water' etc. is the original meaning, Av. *haēk-*. Av. ^{2}*haēk-*, with *us*, 'to dry' would suit here, but there is nothing to show that our word has that sense, and s. n. 9. [11] MF. 371. 4 *ātaš* [*i*] *varhrām*, cf. above 46 n. 3. [12] M ^{0}ab. [13] M n. *guδārand.* [14-15] West, "in dried clothing", wrong. PV. 6. 32 (71) com. has nothing to do with the present subject; and there too *yāmak* is 'a vessel or pot', rather more decidedly; — cf. 32 n. 13.

119. [1] M n. *γalla.* [2] M n. *čandān ki.* [3] K om. (Davar om.). [4] S. Bartholomae, MirM. 2. 28; West "pits", but we are concerned with unthreshed corn which is not kept in pits. [5] Cf. Šv. 16. 72; West's "*farōstak* lowered" is wrong; Bartholomae, MirM. 2. 29, "*franastak* herzu-hinzugebracht"; though *aδāp* is ignored there, this can be accepted. [6] Cf. PV. 7. 35, for Av. *x^{v}asta-* of doubtful origin but of certain meaning owing to the context there; West's "is

ēstēt, yut-dātastānīh: sōšyans guft, hat! ān ⟨i⟩ and[9] γyāk rēman, čand-aš nasāk apar mat;₀ u[3] gogušnasp[10] guft, hat! hamāk rēman.

119 b. kāh[11] hamāk[12] rēman.₀

120. gōz[1] pa[2] rāh[4] i ēv-kartakīh[3] hamāk rēman;₀ u-š pōst u mazg har 2 šōδ ētōn, čiγōn dār.₀

121. anār-ač ōγōn[3] čiγōn[1] gōz[2].₀

122. (x)armāv: ka-š [apāk] kurāčak nē ēv-kartak, (x)armāv rēman, u[1] kurāčak ⟨astak⟩[5] pāk.₀ (x)armāv šōδ ētōn, čiγōn yōrtāk.₀ u ka pa kurāčak[2] patkōft: ka kurāčak

in threshing-floors[4], and that which is winnowed[8] in another[7] place, there is difference of opinion: Sōšyans has said, lo! so much space is polluted, as the *nasāk* has come upon; and Gōgušnasp has said, lo! all is polluted.

119b. Straw is all[12] polluted.

120. The (wal)nut by way[4] of its being 'in one piece' is all polluted; and the wash of its shell and kernel both is so, as [that of] wood.

121. The pomegranate also is such as the (wal)nut.

122. [As to] the date: when it is not 'in one piece' with the stalk, the date is polluted, and the stalk ⟨and the stone⟩[5] pure. The wash of the date is so, as [that of]

---

wanted [to be so]" is wrong, he, as elsewhere, being misled by a clerical mistake in FrP. **18.** 4, where the context points to the other sense of the term, s. **10.** 25 n. 12. MF. **372.** 9 once this ideogram and once the *correct* Iranian form. [7] Both so, as to be read *and*, but cf. n. 9. [8] For *awšat(an)* as in FrP. ***18.** 18; PV. **7.** 35 (93) com. uses *awšīt* (for *awšīt*) in the same phrase as *parvastak* above, hence perhaps NP. *afšādan* 'to press', if it be not a mistake for *afšārdan;* MF **372.** 10 uses *awšānd* in the place of *ba(x)ta* 'winnowed' (which is more suitable between 'threshed' and 'ground') or 'bruised', V. **7.** 35, (which latter can be taken also in FrP. **18.** 15, the context being 'to sow or cultivate, to grow, to reap, to gather, to sift, to grind or bruise';) whereas the same word means 'sown' (from 'scatter' etc.) in AVn. **96.** 7. In our case 'winnowed' will better suit after 'threshed'; it is not only related to 'scatter' etc., but Wollaston gives *afšāndan* for it, cf. also *afšūn* 'a kind of winnowing machine'. [9] M so, as to be read *(h)anē*, cf. n. 7. [10] M n. *gōšasp.* [11] K sep. t *bē.* [12] Not necessarily wrong for *ham* 'similarly', as Bartholomae takes it to be, MirM. **2.** 28.

120. [1] Both yn č, but cf. for the reading Arm. and dialect words, ArmGr. 393. As the term occurs similarly, without the initial *a-*, also in KH. 39 etc., (where Unvala reads *gūč* (*gūž*), disregarding *ō* in NP. *gōz,*) the Chinese lw. must have been borrowed from some dialect having the initial *an-*, and not as Laufer, SiIr. 248, 254, supposes. [2] K p, but P *pa.* [3] M n. *paivast.* [4] West's "mode" is wrong; *'pa rāh i* is the same as *pa* 'owing to'.

121. [1] Both č yan n; (Davar silent). [2] S. 120 n. 1. [3] K ⁰yn; for the reading (instead of *āngōn*) s. the unequivocal orthography, a v⁰, in MPT. and MPI., and cf. also the Paz. *awą.*

122. [1] K om. [2] K partly worm-eaten and worn out. [3] After MF. **374.** 13, and so the clause suggests this meaning (cf. Bal. *karž*), and not 'marrow', NP. *kalāǰa,*

K 61 v u[1] astak u (x)armāv ēv-kartak, hamāk rēman[2]. (x)armāv ka apāk kurāčak nē ēv-kartak: [ka] ō kurāčak patkōft, (x)armāv pāk.$_0$ [kurāčak][3] u astak šōδ, ētōn čiγōn[4] dār.$_0$

123. anār u vātrang[1] u bēh[2] u[3] sēp u anbarōt[4] u apārīk mēvak, ka[5] pa bar ⟨u⟩ u-š pažāwišn[6] ⟨u⟩ apar paδtāk, ka-š nasāk apar rasēt, ā-š šōδ[7] -1[10] nēst; u ka-š pažāmišn[6] apar nē paδtāk, ā-š šōδ ētōn bavēt, čiγōn yōrtāk; — vātrang[9] hamē[8] pažāwišn[6] apāk.$^0_0$

M 87 v **124.** gōšt u rōγn u[2] pēm[1] u[5] panīr u rēčār[3] šōδ[4] nēst.$_0$

corn. And when it has impinged on the stalk: when the stalk and the stone and the date are 'in one piece', all are polluted. When the date is not 'in one piece' with the stalk: when it has impinged on the stalk, the date is pure. The wash of [the stalk[3]] and the stone is so, as [that of] wood.

123. [As to] the pomegranate and citron[1] and quince[2] and apple and pear[4] and other fruits, when they are in harvest and the ripening[6] is perceptible thereon, when *nasāk* comes on to them, then there is no wash[7] for them; and when the ripening is not perceptible thereon, then their wash is so, as [that of] corn; — and [as to] the citron the ripening is always with it.

124. [As to] meat and clarified butter and milk and cheese and preserves[3] there is no wash.

---

^{0}*āča* (noted also by Davar), cf. PV. **3.** 32 (108) where *kurāčak* occurs as a gl. for *gundak* 'dough', cf. NP. *kaluǰ, kuluǰ, kulīǰ, kulīča* 'cake, a kind of bread'. Believing that MF. is here wrong, we may adopt 'marrow', (the fact that in the case of similar fruits *mazg* is used for it, MF. **375.** 3, 11, does not necessarily go against this meaning) but what are we to understand, by 'date' beside 'marrow' and 'stone'? [4] K om. n. [5] Thus, unless the prec. is 'marrow', but s. n. 3. — We have retained it in the last clause, because there we are not obliged to take it as connected with the other.

123. [1] K om. *n;* NP. *bādrang* (=*turunǰ*) means also an orange. [2] As usual b ya, but NP. *bih.* [3] K om. [4] NP. ^{0}*rūd;* FrP. **4.** 5 *urmōt,* ***4.** 12 *amrōt* for which NP. *armūd* and *amrūd* respectively. [5] K *hamāk.* [6] Both z, but cf. for *ž* the Paz. of Mx. **49.** 25; **57.** 11 where the Str. is (*parī*)*pāka-* 'ripeness' (fig.); quite decisive for the meaning is *bar i draxtān pažāmēnēt,* 'it causes the fruits of trees to ripen', BdK. **61.** 16, and M[+] n. *puxta* 'ripe'. West's "rind" is not supported, not even by PV. **7.** 35 (90) com. (cf. *ān* [*i*] *nē pa pažāw ēstēt, ka-š apar rasēt, ā čānč* (s. MirM. **4.** 11 n.) *nēst* '[as to] that which is not in harvest (s. the ety. below), when it (*nasāk*) comes on it, then it is nothing'), and is wrong, s. n. 7. Out of the two forms that with *m* is original, it being connected with Av. *gam-,* s. ZAirWb. 161 f., 183; this ety. explains in its turn the other form with *w:* it is due to two synonyms, *gam-* and *rab-,* being mixed up, s. ZAirWb. 64 n. [7] Both *rēmanīh* 'pollution', which is certainly a mistake, cf. the foll.; this has led West to render *paž*^{0} by "rind", s. n. 6. [8] K ^{0}*māk.* [9] M n. *mēva.* [10] M also, but Davar om.

124. [1] M n. *šīr.* [2] M also. [3] NP. *rīčār,* ^{0}*āl(a), lēčār,* ^{0}*āl.* [4] M n. *šustan.* [5] M om.

3.

1. žan i daštān vastrak[1], ⟨i⟩ i-š[3] nōk ō dārišn gīrēt, rēman; u ān i[4] andar dārišn nē rēman.$_0$

2. ka šāturvān[1] -1 vistart ēstēt[8], u-š[3] bōp[2] -1 u bālišn [-1 har] dō apar nihāt ēstēt[4], [u] žan -1 apar[5] nišīnēt, u daštān bē bavēt: ka hač bālišn pāδ apar ō bōp, u[6] hač bōp bē[6] ō šāturvān[1] nihēt, bōp u[6] šāturvān[1] har 2 rēman, čē-š nōk ō dārišn grift; bālišn, ē rāδ: čē andar dārišn, rēmanīh -1 nēst.

3. u[2] ka ō bālišn ētōn nišīnēt, ⟨i⟩ i-š bōp u[1] bālišn har 2 andar dārišn, ā šāturvān pa tan -1 rēman; u ka har sē(h) andar dārišn, ā ēč rēman nē bavēt.$_0$ —

1. The clothing[1] of a menstruous woman, which she takes into her keeping anew, is polluted; and that which is in her keeping is not polluted.[2]

2. When a carpet[1] is spread, and a mattress[2] and a cushion both are laid upon it, and a woman sits upon [the cushion], and menstruation occurs: when she puts her foot from the cushion on to the mattress, and from the mattress on to the carpet, the mattress and the carpet both are polluted, because they are taken into her keeping anew; [as to] the cushion, for this [reason]: because it is in keeping, there is no pollution.[7]

3. And when she sits on the cushion so, that the mattress and the cushion both are in her keeping, then the carpet alone is polluted; and when all three are in her keeping, then none whatever is polluted. —

---

1. [1] Or *vistarak* 'bedding' to which this statement is applied in 2 below, but the other term can be taken as a more general one including both. [2] Cf. MF. **428.** 2: *har čē-š hač dārišn bē hišt, pāk; u har čē pa daštān andar bē nišīnēt, ān daštānīk*, s. below 2 n. 7. [3] Both zaa, M n. *siyāh* 'black'. [4] K om.

2. [1] Both ^{0}t an r^0, hence sometimes sep. *ur*^{0}, MF. **428.** 9 ff. ^{0}t n r^0, and sep. *r*^{0}; West's "bed-chamber" is wrong, s. Arm. lw. *šatrvan*, NP. *šādurbān*, ^{0}*rvān*; M$^+$ n. *čādar* 'sheet'. [2] M n. *panba* 'cotton', but s. Arm. lw. *bob*, Bal. *bauf* (!), and cf. AVn. **15.** 9, PV. **7.** 10 (35) com.; **14** 14 (63) gl. where *bōp* and *bālišn* form a pair, just as Guj. *gādī takiyo* with the same meanings; however, NP. *būb* means 'rich carpet' which West adopts. [3-4] K om. [5] K ad.$_0$. [6] K om. [7] Cf. MF. **428.** 7 ff. after the same illustration (*āyēt* instead of *pāδ nihēt*): *aδak-aš hamāk hač dārišn bē hišt, hamāk pāk; u ka-š pa šāturvān daštān bē bavēt, ul ō bōp šavēt, bōp rēman, šāturvān pāk*, and a little further: *har 2 pāk, čē-š ān hamāk andar dārišn.* [8] Both ad. *-u*.

3. [1] K om. [2] M also, at least *-u*.

4. ham[1]-čiγōn dānēt, ku daštān, ā-š pa γyāk andar[2] ō kār: fratom gartan-band[3] u pas gōšwār u pas čambar[6] u[2] pas[4] yāmak bē nihišn.$_0$

K 61 r M 87 r 5. ka pa γyāk andar ō kār ēstēt, ka-č[1] apēr dēr žamān andar ān kār ēstēt hē[8], pas-ič yāmak pāk; — mēxak[2] u[3] šarmgāh kār nēst.$_0$

6. ka ēvar dānēt, ku daštān, tāk yāmak hamāk bē gōharītan[1] u pa γyāk i daštān bē nišast[an], ā vāč dārišn.$_0$

7. ka yašt kart ēstēt, vāč dārišn[1]; u[2] [ka] daštān bē bavēt, ā-š vāč bē gōwišn.

4. Just as she knows, that there is menstruation, then on[7] the spot she [must go][5] to work[8]: first the necklace and then the ear-rings and then the head-gear[6] and then the garment is to be put off.

5. When on[4] the spot[5] she goes[9] to the [said] work, even when she would remain a very long time at that work, even then the garment is pure; a[6] tight[2] covering[2] and[3] [that about] the private parts are not the matter[7].

6. When she certainly knows, that it is menstruation, then the prayer is to be held, till the changing[1] of all her garments and sitting in the place for menstruous women.

7. When[3] she has performed the [initiative] *yašt*, the prayer is to be held; and [when] menstruation occurs, then the prayer is to be recited by her[4].

---

4. [1] K *ka*. [2] K worn out. [3] K om. (*band*). [4] K aa worn out; P *ō*, a wrong conjecture. [5] So, or '[must engage] in', esp. because MF. **429.** 6 ad. *ēstišn* to *kār*; s. 5. [6] Cf. Arm. lw. *čambar* 'a jewel (studded with precious stones) for men', and NP. *čanbar* 'a frontlet, a head-gear or fillet' (Zenker), also 'a necklace'; hence it may be an article of jewelry. We read about it in a contemporaneous Chinese account of Persia that the hair is "adorned with gold and silver flowers, and over and above this, a string of variegated pearls hangs down on their shoulders", K. Hori in Sp. Mem. Vol. 248. [7-8] West, "in the place [she is] in for the purpose", wrong; so also his other tr. "on the spot [she is] in on the occasion"; s. n. 5. and cf. 5 where there is no reference to *daštānastān* as he says.

5. [1] K *čē*. [2-2] Cf. NP. *mēx* 'caps, fillets or mitres which adhere closely to the head', and *mēxī* (noted also by Davar) 'a kind of breastplate; a dervish's habit closely stitched'. [3] Both; if for *i* 'for', the matter will be simpler, the addition being then not required. [4-5] Thus, as in **2.** 76, 106, etc.; West, "in the place", wrong, s. **3.** 4 n. 7—8. [6-7] West, "[and there] is no need of leather covering and leather shoes", reading "*mašk u šalmīhā*", wrong; s. n. 2, 3. [8] Both *ā*, s. **2.** 92 n. 6. [9] Or 'engages herself in', lit. 'stands'.

6. [1] Cf. NP. *gōharīdan* 'to exchange, to barter'.

7. [1] K ^{0}*rēt*, s. n. 3—4. [2] K om. [3-4] This means that not all are required to recite the particular prayer mentioned in 6, cf. 35. PV. **16.** 2 (5) com., *ka vāč dārēt, ā-š vāč bē gōwišn*, resembles K, but is not enough for decision; Riv. **205.** 17 ff.; **207.** 12 ff. does not refer to any such prayer, nor does the present day

8. u[2] ka andar vāč guftan, ē[1]! daštān bē bavēt, pas-ič, ka ān žamān apēvimān būt, nūn-ač apēvimān.$_0$

9. ka vāč dārēt, [u] pēšēnkār[1] bē āyēt, ā-š vāč guftan kār nēst, čē-š nask[4] i[2] pa čamišn[5] gōwišn.$_0$ —

10. dast i pa pātiyāpī[h][1] havāsītak[2], ka žan i[3] daštān vēnēt, pa vēnišn apātiyāp bē bavēt; u ka-č zōt[4] vēnēt, u barsum nē vēnēt, hamgōnak[5].$_0$

8. And when during the recitation of the prayer, lo[1]! menstruation occurs, even[3] then, when [at] that time [when the prayer (or the *yašt?*)[5] was begun] it was doubtless (i. e. not null and void), also now it is doubtless[4].

9. When[6] she holds a prayer[7], and the 'call of nature'[3] comes, then there is no need for her to recite the prayer, because the formula[4] for making water[5] is to be recited by her. —

10. [As to] the hand which is cleansed[2] with ablution, when a menstruous woman sees it, it becomes desecrated by the sight; and even when she sees the *zōt* (sacrificer[4]), and does not see the *barsum*, it is the same.

---

practice know of it. According to K the tr. would be: 'when she has performed the *yašt*, [and] holds a prayer, and there occurs menstruation, . .' . Then it can be directly connected with 8, which, however, is not necessary; again 'holds a prayer' can be taken as an explanatory clause to 'has performed the initiative *yašt*' as we require in 9 (s. n. 6—7).

8. [1] It may be for *-īh;* if so, omit 'lo'. [2] M om. [3-4] West, "both afterwards, when the time was certain, and now [she] is certain", wrong; for my interpretation cf. PV. **16.** 2 (5) com.: *ka vāč dārēt, u-š daštān bē āyēt, ā-š vāč bē gōwišn, u-š vimānīk nēst.* [5] S. 7 n. 3—4.

9. [1] K k for p, but some space is left, which shows that originally it was the first part of p. [2] K om. [3] Lit. 'the foremost work', an euphemism for urine; in PV. **16.** 2 (5) com.; MYFr. **3.** 66 f.; **4.** 7 f. it is *pēš-kār*, NP. *pēšyār*, ^{0}*šār;* and in Mx **2.** 39 *pēšārvār* (Paz. *pēšyār*). [4] Cf. *apastāk* in the same phrase in **10.** 5 below, and PX^{v}Ap. **57.** 13, hence the text or formula or even prayer. [5] PV. **16.** 2 (5) com. has *čamiš;* cf. Arm. lw. *čemiš* 'closet, privy', NP. *čāmīdan* 'to make water' and *čāmīr*, (^{0}*īz*), ^{0}*īn*, *čamīz*, ^{0}*īn* 'urine, excrement'; *čamišn* occurs also in PX^{v}Ap. **57.** 13, —PazT. **121.** 5 wrongly (*pa*) *či manišnī*, but TD 3. **121r** 4(*pa*) *čamešni.* [6-7] I. e., when she is in a position to do so, when she has performed the initiative *yašt*, s. 7 n. 3—4. Or connect it with 8 and the alternative tr. of 7.

10. [1] Thus in PV. **16.** 4 (10) com., where the rest is different and not clear; otherwise ^{0}*p -1* or ^{0}*p* ⟨*i*⟩. [2] Perhaps doubtful. — Both an b a^0; the parallel in MF. **438.** 8 *havāsēnīt*, here too and in *havāsēnd, havāsišn* in **10.** 5 below we have the same orthography. Therefore *hanbās*^{0} is a possible reading, but even in that case it is not the same word as *hambāstak* 'bringing forth', *hanbast* 'built' explained from Av. [1]*pad-*, [1]*paϑ-* by Bartholomae, ZSR. **5.** 50 f., esp. because their Pres. stem is *hanbāδ*, s. MirM. **1.** 15 n. c, **4.** 13 n. 5, — unless we take *hanbāsītan* as a new formation. As it is, the word looks like an Inchoative, s. GIrPh. **1.**

303, 1b. 129, and so one can read *hanbaxsītan* and compare Oss. *ämbäxsun* 'to hide, conceal' or NP. *baxsānīdan*, ^{0}*sūdan*, ^{0}*sīdan* 'to melt'. Or one can read *hanbāsītan* and compare NP. *pāsīdan* (*bās*^{0}) 'to guard, protect'. I refer to all this, because it comes within the sphere of possibility for our word, but only here and not in **10.** 5 below, which fact demands another explanation. The orthography n b is simply for *v* (or strictly speaking *w*, but ety. ?), because the word is written three (and more s. below) times only with n̥ in N. **41.** 21 (= PRivDd. **173.** 9), **128.** 1, and once with n p in N. **127.** 28. These passages may be fully quoted, as they help us in settling its meaning. N. **41.** 18 ff. (= PRivDd. **173.** 7 ff.): *drōn sāčak* (*u*) *patašx*^{v}*ar ētōn pa pātiyāp bē kunišn, ku* (or, *i*) *ka-š barsum apar* (also in N., MS. T) *rasēt* (^{0}*ēh* thus (?) often in this text), *ā* (*ā-č*) *šāyēt* (^{0}*ēh*); (*u*) *bē* ⟨*pa*⟩ (om.) *havāsēnīšn*; (*ka*) *havāsēnītan nē šāyēt, ā nē šōδišn, ċē hušk* (*i*) [*pa*] *apātiyāp vēh ku x*^{v}*īt* (*i*) *pa pātiyāp*. 'The *drōn* apparatus, i. e. the plate is to be made so through ceremonial washing, that when the *barsum* reaches on it, even then it is allowed; and it is to be wiped off; when it is not possible to wipe it, then it is not to be washed, because dry through the lack of ceremonial washing is better than wet through ceremonial washing'. Instead of 'ceremonial washing' we can say 'ceremonial water'. Bulsara is wrong from *ā šāyēt* which he often misunderstands: " . . , that be not allowed, but [everything] be assembled in a well arranged set. [Indeed] it must not be allowed if it does not shine dry (*a-raxsēšn*), because . .". N. **127.** 25 ff. runs: *ka bē brīnišn, ā-š bun* ⟨*i*⟩ *bē brīnišn, u-š pātiyāp andak -ē apar frōt hilišn, u-š bē havāsišn*⟨*īh*⟩. . . . . *bē hilišn*⟨*īh*⟩, *hūp bē havāsišn*⟨*īh*⟩ . . . 'when it (the *barsum*) is to be cut off, then its root-end is to be cut off, and a little ceremonial water is to be let fall down on it, and it is to be wiped off. . . . . [water] is to be let fall [on it], it is to be wiped off well . . . '. Bulsara is again wrong: ". . . and [then] one should tie them up. . . . one should leave them on the left hand side." (Thus *bē hil*^{0} is wrongly connected with what precedes.) "One should arrange them well . . . ". We shall leave aside other details, but as to the word in question the context is clearly in my favour, esp. in the former passage. Bulsara compares NP. *havāsīdan* 'to assemble', but Vullers does not give this meaning nor 'to convene', but only 'to have chapped or pale lips from heat or fear'. This latter meaning can be connected with 'to dry'. If this be so, we can consider our reading as true. As to the meaning we have further proof besides the context; in PV. **5.** 12 f., **8.** 9 MSS. including ML, IM, BU sometimes write an a yy(=s)yn, *havāsēn-*, for Av. [2]*haēk-* 'to dry up (the wet earth)'; the other reading is an yy(=s)yn, though Bartholomae gives *hōšēn*, Wb. 1728. This can be read *hōsēnītan* and compared with NP. *xōsīdan* 'to dry up, to shrivel, to be withered': here too the same development of sense as in NP. *havāsīdan*. Thus, even if the reading and ety. of our word may not be certain, there is no doubt that it means 'to dry up a wet thing, to wipe off moisture', and hence 'to cleanse after applying water' as required here and in **10.** 5, in both of which cases the prec. action is not directly mentioned. — West's "sprinkled" is a suitable conjecture; if based upon NP. *anbāštan*, note that its meanings 'to sprinkle, to dilute' are not given by Vullers. [3] K om. [4] Or *zūt* 'hastily'. [5] K om. n.

11. u xānak [i] 1- dar[1], ka[2] daštān hačapar, u barsum[3] hačaδar rāst ēstēt, hakar-ač 15 gām apēr[4] bavandak, aδak-ač barsum apātiyāp; u ka nē rāst, 15 gām vas.

12. xᵛarišn i sāxtak, ⟨i⟩[6] i-š andar 3 gām i žan i daštān, rēman; u xᵛarišn, i-š hač čāšt bē parēčēt[1], pa šām, u ān, ⟨i⟩ i-š hač šām bē parēčēt, pa čāšt nē šāyēt; — u pa-č ham žan nē šāyēt; u āp ⟨i⟩ i-š andar[2] 3 gām, ka andar ō duwr[3] aδ-āp pātiyāp-dān kunēnd, u ā[7] dast[2] kunēnd[2], dast pa pātiyāp ō bavēt.

11. And [as to] the one-entrance house, when a menstruous woman is above, and the *barsum*[3] stands right below, even if fifteen steps are fully[4] complete, even then the *barsum* is desecrated; and when not right [below], fifteen steps are enough.

12. Prepared food, which is within three steps of a menstruous woman, is polluted; and the food, which she leaves[1] over from the morning meal, [is not allowed] for the evening meal, and that, which she leaves over from the evening meal, is not allowed for the morning meal; — and it is not allowed even for the same woman; and [as to] the water which is within three steps of her, when they put it into a tank[3] or a vessel of ceremonial water, and then[4] they put the hand [in it] (or: apply it [to] the hand), the hand becomes as purified[5].

---

11. [1] M *bē*, i. e. b n a for b b a, and joins *1* to the prec. [2] M ad. *-š*. [3] PV. **16.** 4 (10) com. has *pātiyāpīh* 'consecrated objects'; which shows that *barsum* implies all of them. [4] Or *hačaδar* 'below'.

12. [1] West, „delivers (*pardažēt*)", wrong; one may read *frēčēt*, s. Freimann, PnZ. p. 244 n. 4; but cf. Sog. *p'r'yč* besides *pr'yč*. [2] K partly worn out. [3] For the reading (and ety.) s. Bartholomae, ZSR. **2.** 44 n. 3, and below; in MF. **341.** 5, 8 the word means 'a pond, tank, cistern' as it is used along with *var* 'a lake' and *čāh* 'a well' in the account about polluted water; in PV. **2.** 19 (44) com. the same or the original meaning, a pit: *čakātīh ō duwr hanbārīt* for enlarging the earth, cf. below 27 n. 4. As the word is generally written with g, one may compare NP. *ǵav* 'a ditch or any low or hollow place' and *gōr* 'a grave', but they are Semitic according to Nöldeke, PSt. **2.** 41. Our reading is supported by NP. *daurak̲* (not given by Vullers; and declared as Arab. by Steingass, but it may be a lw. there, as shown by cognate terms) 'a water-pot with handles, a kind of wine-measure, a cistern or tank full of water', and *daura, dūra, daula, davala* 'a wine-measure, a cup, a goblet'. West's "pail (*dūbal*)" is a conjecture. [4-5] West, "shall do [it] without handling (*ayadman, adast*, s. n. 7), is [fit] for the hands in [ceremonial] ablution," wrong. The idea in the text as it is, is to 'save' the water (which is brought into 'danger' through the menstruous woman) by removing it to a 'proper place', just as is done in the case of fire, s. V. **8.** 81 ff.; and then that water is fit for ablution. Hence, I have adopted 'tank' in preference to 'pail', cf. **2.** 43. [6] Or better retain it and omit *i-š* throughout, as in **2.** 85 f. [7] M does not join it with the next, as Davar gives, and as West has taken (s. n. 4—5), — nor does K.

13. kas, ka ō vastrak[1] u yāmak patkōpēt[2], sōšyans guft, ē! ān and γyāk pa gōmēz u āp šōδišn; [ka] vastrak i ān-aš[3] ō vastrak i kas patkōpēt, rēman nē[4] gīrēt[5].$_0$ —

14. žan i[1] daštān[3], kē andar 3 šapak pāk bavēt, tāk rōč [i] panǰom nē šōδišn; u hač rōč i[2] panǰom frāč[2] tāk rōč i[2] nahom, hamē ka pāk bavēt, ā-š ē rōč tuhīk[4] rāδ pa pākīh bē nišīnišn, -u pas ō šōδišn; u pas hač nōh šapak tuhīk[4] kār nēst.$_0$

15. žan i zātak aδāp nasāk, tāk 40 rōč, hamē[1] ka rēman vēnēt, bē ka ēvar dānēt,
M 88 r ku hač daštān, tāk-aš pa ān ham dārišn; u[2] hač 40 rōč frāč, bē ka ēvar dānēt, ku hač ān, tāk-aš pa daštān dārišn.$_0$

16. žan i[1] daštān[2] ka ē māh pa daštān nišast, u rōč i 30-om rāδ pāk bavēt: ka-č pa ham žamān pāk bē būt, u pas-ič daštān bavēt, ā-š tuhīk[5] hač bun[3], u tāk[4] rōč i[1] panǰom šustan nē pātaxšāy.

13. [As to] a person, when she impinges upon his clothing[1] and garment, Sōšyans has said, lo! so much space [as was touched] is[6] to be washed with cattle's urine and water[7]; [when] her clothing impinges upon the clothing of a person, it[4] (or he) does not become[5] polluted. —

14. A menstruous woman, who becomes pure within three nights, has not to bathe till the fifth day; and from the fifth day onwards till the ninth day, whenever she becomes pure, then she has to sit one day for depletion in purity, and afterwards she has to bathe; and after nine nights there is no need of depletion.

15. A woman with (i. e. who has brought forth) a child or a dead child, till[3] forty days, whenever she sees herself polluted, except when she knows certainly, that it is from menstruation, till then it is to be equally[5] considered as that [delivery]; and from forty days onwards, except when she knows certainly, that it is from that [delivery], till then it is to be considered as menstruation[4].

16. When a menstruous woman has sat one month in menstruation, and on the thirtieth day becomes pure: even when at[6] the same time[7] she has become pure, and just afterwards occurs menstruation, then her depletion is [to be reckoned] from the beginning, and till the fifth day she is not authorised to bathe.

---

13. [1] West would read *vistarak* 'bedding', but that is probable only in the first case. [2] M n. *paivast.* [3] For *-aš* cf. NP. *x^{v}aδ-aš, xud-aš.* [4-5] If *nē kunēt,* 'she does not make it (or him)'; — s. n. 6—7 [6-7] As the subject refers to the person, this may refer to his body also, cf. PV. **16.** 7 (20) com.

14. [1] K *1.* [2] K om. [3] M ad. *-u,* K *u.* [4] Both om. *-u-.*

15. [1] K ^{0}*māk.* [2] M om. (or *-u*). [3-4] West, "during forty days sees whenever [she] is polluted; but when . . . that [she] is [free] from menstruation [she] is, thereupon, to be associated with meanwhile, from the forty days onward; but when . . . that [there is something] of it, she is to be considered meanwhile as menstruous", wrong. [5] Or, taking *ham* with *ān,* 'that same'.

16. [1] K om. [2] K ad. *u.* [3-4] K as one word. [5] Both t y^0, cf. NP. *tihī.* [6-7] I. e. on the thirtieth day; otherwise we must take the phrase in the next clause. The present case is distinguished from the general rule in 17; — note that SdBd. **96.** 20 (= Riv. **218.** 8) is explicit: *tā se rōz nigīrīdan kār-ē nīst.*

17. u ka hač daštān šustan[1] 3[2] rōč pa pākīh nišast, u dit daštān bavēt, čiγōn hač bunīh 4 rōč bē pāyišn, u rōč i panǰom ō šōδišn.$_0$

18. ka hač dit daštān būtīh[1] nōh rōč šapān nēst, pa pākīh ē rōč šapān ō pāyišn[4], -u[6] pas[2] šōδišn[2]; u ka nōh rōč[3] šapān bavandak[5] būt, pa ham rōč šustan hūp[2].$_0$

19. čihrak, — ka gōn bē vašt, ān i pēš ān-ač i pas hač daštān bē āyēt, — rēmanīh ētōn bavēt[1], čiγōn daštān.$_0$ —

20. ka hač daštān ētōn pāk bē būt[1], ku-š šustan[2] dastowarīhā[3], barsum apārīk-ač čīš bē hač 3 gām rēman nē gīrēt.$_0$

21. sarmāk i saxt rāδ frāč[1] ō bun i ātaš nišastan pātaxšāy.

17. And when she has sat in purity three days from the washing of the menstruation, and another menstruation occurs, she has to wait four days as from the beginning, and has to bathe on the fifth day.

18. When from the occurrence of the second menstruation nine days and nights are not [over], she has to wait one day and night in purity, and then has to bathe; and when nine days and nights have been complete, to bathe on the same day is good.

19. [As to] leucorrhœa, — when[2] the colour [of menstruation] is changed, [and] that which comes on before and that which after menstruation[3], — the pollution becomes so, as [that of] menstruation. —

20. When she has become so pure from menstruation, that her bathing is according to rule, the *barsum* and other things beyond three steps do not become polluted.

21. In[2] severe cold she is authorised to sit further[1] at the end of the fire.

---

17. [1] K ^0t; M ad. *1* (?). [2] K ad. *-u*.

18. [1] K n a for *īh*. [2] K om. [3] K ad. *u* which may be inserted. [4] M n. *guδarad*. [5] M n. *sar*. [6] M om.

19. [1] M om. [2-3] This portion describes the slimy substance accompanying menstruation, to which *čiθra-* in V. 16 refers, and the latter is, according to Hertel, IIQF. **6.** 48, semen, a form of fire. It is replaced by *zartīh* lit. 'yellowness, yellow substance' as distinguished from the red substance, *daštān*, in PV. **16.** 14 (34) gl. — which gl., it may be added, does not explain the original.

20. [1] K *bavēt* which too can be adopted. [2] K ^0t. [3] West sep. ^0k *hē* which is wrong.

21. [1] K om. [2] Cf. NP. *šab rā* 'at night'; otherwise 'owing to'. The permission depends upon the condition given in the prec. [3] Thus, because the matter refers to her final bath. Riv. **208.** 12 ff. describes the process of bathing and then gives the prayer to be held; and Riv. **215.** 2, 8 mentions its two parts to be recited at different stages. (If this be not meant, we may refer to the command of performing the *kustīk* ceremony seven times a day, Riv. **208.** 9; **216.** 15.) [4] This part seems to be taken as a general rule as in PV. **16.** 7 (17) com., Riv.

21 b. u tāk šōδēt, ā-š vāč ō gīrišn; — u-š dast šustan, bē pa[1] gōmēz, tāk nē šāyēt;[4] — u ka-š šust[5], ā-š xrafstar 200 vinās vičārišn rāδ bē ōžanišn. —

22. žan -1[1] ka[8] daštān hač gāh ul[6] šavēt[7], u pas rēman vēnēt[2]: ⟨u⟩ ka-š āpustanīh ēvar[10], bē ka-š nasāk[3] būtan paδtāk, aδak-aš pa[4] gōmēz u āp[5] šōδišn; -u ka-š āpustanīh nē ēvar, pa daštān dārišn.

23. ast kē ētōn gōwēt, ē! bē ka nasāk būtan ēvar paδtāk, tāk-aš pa daštān dārišn.$_0$

24. ast kē ētōn gōwēt, ē! ka pa nasāk būtan vimānīk, ā-š pa pixak[1] šōδišn.$_0$ —

25. u[1] kas[2] kē pa žan i daštān, aδāp ō ōy kas patkōpēt[4], kē-š[5] pa āp u[1] gōmēz apāyēt šustan, aš vinās[3] [i] 60 stēr ō bun.$_0$

21 b. And while she bathes[3], then the prayer 'is to be held' by her; — and [as to] the washing of her hands, except with cattle's urine, till then it is not allowed;[4] — and when she has[5] bathed[5], two hundred noxious creatures are to be killed by her for expiating the sin. —

22. [As to] a woman when[9] her menstruation is[6] delayed[7] from its time[9], and then she sees herself polluted: when her pregnancy is certain, except when the occurrence of her miscarriage is evident, till then she is to be washed with cattle's urine and water; and when her pregnancy is not certain, she is to be considered as menstruous.

23. There are some who say thus, lo! except when the occurrence of miscarriage is certainly evident, till then she is to be considered as menstruous.

24. There are some who say thus, lo! when one is doubtful about the occurrence of miscarriage, then she is to be washed with [the bath through the stick of nine] knots. —

25. And [as to] a person who impinges against a menstruous woman, or on that person, whom it is necessary to wash with water and cattle's urine, for him [there accrues] a sin of sixty *stēr*-s to the stock.

---

206. 9; **208.** 1; it does not seem to be connected with the final bath, cf. however PV. **16.** 11 (23) com.: *ā-š dast ō šōδišn, u-š vāč ō gīrišn*, which is to be done when something happens and it is not possible to bathe: *čīš ān rasēt, i-š bē šustan nē tuvān* (*ān* for *ō* or *hač ān*, cf. below **7.** 2). [5] One may read *šōδēt* 'washes [the hands]' and connect the atonement with the prec., but s. n. 4 and above all V. **16.** 12 where it is enjoined as a general practice for all the sins that may occur during menstruation.

22. [1] K *-i*, M om. [2] K *dīt*. [3] K obscure. [4] K om. [5] K ad. $_0$. [6-7] Lit. 'goes up, ascends'; the same idiom is used in Guj. by the Parsis. [8] Both *kē* 'whose', but note *u pas* in the next clause. [9-9] West, "who goes beyond the period (or 'up from the place') of menstruation", wrong, s. n. 6—7. [10] M n. *zan i bača i murda zāyad*, mistaking *ēvar* for *ēvbar*.

24. [1] K om. k.

25. [1] K om. [2] Both *aδak-aš* 'then . . ', which cannot occur in this place. [3] K rep. [4] M n. *āmīxta* 'mixed'. [5] M n. *ū rā* 'him'.

26. u kē pa dānišn žan i daštān marzēt, 15 tanāpuhr u[1] 60 stēr vināš ō[2] bun.$_0$ —

27. daštān ka[1] ātaš vēnēt, framān -1 vināš; u ka andar 3 gām šavēt, tanāpuhr -1 [vināš]; u ka dast apar tan[2] i ātaš[3] nihēt, 15 tanāpuhr vināš, — u varr[5] u duwrak[4], hamgōnak.$_0$

28. ka ō āp nikīrēt[1], framān -1 vināš; u[2] ka[3] andar āp nišīnēt, 15 tanāpuhr vināš; u ka pa tar-mēnišnīh andar vārān bē rawēt, ā-š har srišk[4] -1 15 tanāpuhr vināš.

29. u-š ō x^{v}aršēt u[1] apārīk rōšnīh nē nikīrišn; u-š ō gōspand u urvar nē nikīrišn; u-š apāk mart i[1] ahrav hampursakīh[2] nē kunišn: čē družī[1] ētōn stahmak ān družī[1] daštān, ku apārīk družī[1] pa[1] aš[3] čīš nē žanēt, ōy pa aš[5] žanēt[4]. —

26. And he, who knowingly[3] embraces a menstruous woman, [adds] a sin of fifteen *tanāpuhr*-s and sixty *stēr*-s to the stock. —

27. When a menstruous woman sees fire, it is one *framān* sin; and when she goes within three steps [of it], it is one *tanāpuhr* sin; and when she puts her hand upon the[2] body of the fire[3], it is fifteen *tanāpuhr*-s sin, — and [whether it be] the 'clothing' (i. e. ashes)[5] or the oven[4], it is the same.

28. When she looks at water, it is one *framān* sin; and when she sits in water, it is fifteen *tanāpuhr*-s sin; and when she out of perversity walks in rain, then [for] every single drop it is fifteen *tanāpuhr*-s sin.

29. And she has not to look at the sun and other luminaries; and she has not to look at cattle and plants; and she has not to make conversation with a 'righteous'[6] man: because a *družī* of such violence is that *družī* of menstruation, that [whereas] other *družī*-s do not destroy a thing with the eyes, she destroys with the eyes. —

---

26. [1] K om. [2] K *ōy*, — n rmn for n o (or γ n which M has). [3] Lit. 'with (or in spite of) knowledge'.

27. [1] Both *kē*, but note what follows. [2-3] Or *tūn i ā*^{0} 'the furnace with fire', NP. *tŭn* 'furnace or stove of a bath', — but then the next clause must run: '[when upon] the ashes and the seat', s. n. 4. I believe the phrase in question refers to any place or object upon which fire is kept; it is not certain whether it means 'the fire itself', although the parallel texts, SdBd. **15**. 1 (= Riv. **216**. 17); 96. 8 (= **218**. 1); Sd. **68**. 1. have simply *ātaš*. [4] Thus, from the original meaning 'a pit' or the like, (s. MF. **183**. 11 for storing corn in, and cf. 12 n. 3,) because SdBd. **96**. 8 = Riv. **218**. 1 has *tanūr* 'fire-place sunk in the floor' (Wollaston); otherwise 'seat or receptacle', because SdBd. **15**. 1 = Riv. **216**. 17, which resembles our text more than the other does, has *gāhāna*, written with k, also in SdBd. where k and g are distinguished in other cases, but it can hardly be connected with *kāh* 'straw, hay', — cf. rather *gāhān* 'bier', Riv. **173**. 17, from *gāh* 'seat, place' in compounds. West, "[water] goblet", wrong; and so also his note. [5] Both ideogram; — s. **2**. 49 n. 1.

28 [1] M n. *bīnad*. [2] K om. [3] M does not add -*š* as Davar. [4] M n. *ḳaṭra*.

29 [1] K om. [2] Both ^{0}*sīh*; Davar silent about M. [3] Not *axš*, s. Av. *aš-*. [4] K *čašm* below *ž*^{0} as a gl. for *aš*. [5] M n. *xāna*, very probably for *xānak* in 30,

30. xānak -1, kē[1] žan i daštān andar, [andar][2] ān xānak ātaš nē awrōčišn.

30 b. x^{v}arišn, i hač pēš i žan i[3] daštān bē parēčēt, pa[-č] ham žan nē šāyēt.

M 90 v **31.** x^{v}ān[1] -u yāmak[2], i pēš[3] ēstēt[4], ka-š apāk hamkaržak[11] nē bavēt, nē rēman.$_0$ pa-tašx^{v}ar[5], ka yut[8] hač rān[9], -u hamkaržak[6] nē bavēt, šāyēt.$_0$ —

32. ka drōn kāmēt yaštan: ka barsum[1] hač[2] barsum-dān apar dārēt, u daštān bavēt, ham-čiγōn ō dānišn mat, barsum[3] bē nihēt, bē šavēt, barsum nē rēman.$_0$

30. [As to] a house, in which[4] is a menstruous woman, [in][2] that house fire is not to be kindled.

30 b. Food, which remains over from before a menstruous woman, is not allowed even to the same woman.

31. [As to] a tray[1] and a cup[2] which stand before, when they do not become connected with her, they are not polluted. [As to] her[7] dish[5], when it is[8] separate from the thighs[9], and does not become [otherwise] connected [with her], it is allowed [for her further use without being washed][10]. —

32. When she wishes to offer up the *drōn*: when she holds up the *barsum* from the *barsum*-stand, and there occurs menstruation, [if] just as it came to knowledge, she puts down the *barsum* [and] goes out, the *barsum* is not polluted.

---

which is just below *aš*; M^{+} copies it, but adds also *čašm*. [6] Here we may apply the original meaning, 'possessor of the light of bliss', since the term is used along with other creations of light and in opposition to *druž*, the highest form of 'dark fire', s. 8. 4. n. 6.

30. [1] K ad. *ātaš andar*, which can be inserted with [*u*] after it so as not to change the meaning; if *u* is not added, *žan i daštān* becomes the subject and then the sense is modified in a way which could not have been meant. [2] If this was not omitted by mistake, the tr. would be 'the fire of that house'. [3] K om. [4] K ad. 'there is fire [and]', s. n. 1.

31. [1-2] Cf. *x^{v}ān -1 u yāmak -1*, MF. **446.** 3; and for 'cup' as the meaning of the latter cf. **2.** 118 n. 14—15; West "tray-cloth". [3-4] K as one word. [5] K om. t; — West "table-napkin" wrong; so also Horn, NpEty. 79, (NP. *pēšx^{v}ar* is 'early breakfast, foretaste' etc. and has nothing to do with our word which always means 'a dish to eat from', cf. esp. *tašt i patašx^{v}ar* (or ^{0}*x^{v}ār*) for Av. *tašta ā̊nu-harəna*). [6] K n for the final k; M n. *paivast*. [7] Cf. *p^{0} i žan i daštān*, MF. **444.** 9. [8-9] This point is especially mentioned in addition to the foll. general rule, because the dish would be commonly supported on the thighs while eating. The dish is to be held in one of the hands which are covered with something like gloves — *kīsa* 'purse, sack' Riv. **206.** 10, **208.** 1, *āstīn* 'sleeve' Sd. **41.** 3. If the phrase means 'except through the thighs', the passage allows to support the dish on them. [10] Thus MF. **444.** 11 ff.; cf. Riv. **208.** 2 ff. which says that if the food touches the gloves, the food and the dish become impure; the former is to be given to the dogs and the latter to be washed. [11] M n. *ham-paivast*.

32. [1] K n for b. [2-3] K om.

33. u-š andar daštān ētōn nišīnišn, ku hač tan i ōy, 15[1] gām [i] 3 pāδ ō āp, u[2] 15 gām[3] ō ātaš, u 15 gām ō barsum, u[4] sē(h) gām ō mart[5] i[2] ahrav bavēt.

34. u-š[1] xᵛarišn pa āsēnēn aδāp srupēn[2], frāč barišn; ōy, kē xᵛarišn frāč barēt, aš andar[3] 3 gām apāč ēstēt.

35. ka yašt kart ēstēt, har bār -1 drōn yašt pa šnūman[3] i[1] [srōš][2] ul gōwišn; ast kē 'i ϑ ā a š ə m v o h ū' gōwēt. ₀₀

33. And during her menstruation she has to sit so, that from her body, there are fifteen steps of three feet [each] to water, and fifteen steps to fire, and fifteen steps to *barsum*, and three steps to a 'religious'[6] man.

34. And her food is to be carried forth in iron or leaden [vessels]; he, who carries forth the food, stands apart at three steps from her.

35. When she[4] has performed the [initiative] *yašt*[6], [at] every single time [of meal] the *drōn yašt*[7] is to be recited aloud for (or with) the propitiation of [Srōš][5]; there are some who say 'the *iϑā* and *ašəm vohū* [formulas]'.

---

33. [1] M ad. *i*. [2] K om. [3] K ad. *u 3 gām*. [4] K the sign ₀. [5] K yn b a. [6] S. 29 n. 6.

34. [1] M *-šān*. [2] M n. *šīša* 'glass' which is used at present; it is hardly possible that it stands for *sīsa* from Guj. *sīsū* 'lead'. [3] K om.; it is not necessary, s. PV. **16.** 6 (12); for the meaning s. above **2.** 1.

35. [1] K *-u*. [2] Thus PV. **16.** 7 (17) com., but why so is not clear; the reference to *sarōš* in Sd. **21.** 10 does not prove much; note, however, that *sarōš darūn* is technically applied to (some parts of) Y. 3—8 which forms the highest type of the prayer before meals, s. Modi, Cerem. 349, 371, and this is meant here, s. n. 7. [3] M n. *xašnūman* (Av. *xšnūmaine*) which is commonly used. [4-5] West, "worship is celebrated, every time at the dedication (*šnūmanē*) of the consecration of sacred cakes (*drōn yašt*) [it] is to be uttered aloud [by her]", wrong, s. n. 6, 7. [6] The term *yašt* is used for what is commonly known as the *yasna* or *yazišn* ceremony, Riv. **464.** 19; **481.** 4, 14, 15, 17; **482.** 1, 5; II. **35.** 2; PazT. **218.** 15, 18; (and also for this latter text, Riv. **482.** 10, 11). If we apply the term to the first *yazišn* ceremony which a priest performs, viz. at his initiation, we come to the meaning 'initiative *yašt*'; and this is meant without any doubt in PRivDd. **24.** 7 ff. . . . *mart ka 15 sālak, u-š yašt nē kart ēstēt, ā-š nān u āp hač ēvēnak* [*i*] *sakān -u vayān dahišn;* and in AVn. **2.** 3: *u-šān dēn narm, u yašt kart ēstāt* (correct PazT. **359.** 8 accordingly); note that in SAVn. **2.** 1 *yašt* is correctly rendered or rather replaced by *nāvarām*. (Bharucha's note on it is wrong, it being based upon the present day usage.) The same meaning is clear in PV. **18.** 1 (2) gl. *yašt nē kart ēstēt* for *anaiwyāst pa dēn* and in Sd. **5.** 1 . . . . *tā yašt bi-kunand u nōzōd šavand.* — Here *nōzōd* does not or at least need not mean the *naojot* ceremony, by which a Parsi child is taken into the Zoroastrian fold, but the *nāvar* ceremony, which forms the initiation of a Parsi priest, as in Riv. II. **33.** 19; **34.** 2 ff., 10 and as its lit. meaning, 'a new sacrificer', requires; — MP. *nōkzōt* is similarly used in Vkd. 169 f. This fact is very important as regards the

history of the *naojot* ceremony which is not in vogue among the Persian Zoroastrians, s. Jackson, Persia Past and Present 380 f. — Riv. 29. 10 points to the same fact: the account of the ceremony does not come from Persia. [7] The lit. meaning of *drōn yašt* is 'the sacrifice or offering of the *drōn* (a kind of bread)' — consecration is the term generally used, but it is not proper. Then it means the prayer recited on the occasion, and that is Y. 3—8, s. Modi, Cerem. 324, 359. Now as the same portion forms the highest type of the prayer before meals, the term *drōn yašt* is used for this prayer. It is true that this is recited only by the priests and that too with the *barsam*, s. Modi, Cerem. 371, and so it becomes doubtful in the case of a menstruous woman; but perhaps for that very reason we have the different command or rather an explanatory clause, viz. about the simple prayer. Cf. Sd. 21. 7; 55; SdBd. 59. 4; Riv. 348. 4 where *darūn yaštan* means to perform the highest type of this prayer; the second type is called *vāǰ i hōrmazd* (or °*dī*, °*d-hā*) *ya'nī amšāsfandī*; then the last one we know. Note further that *darūn yašt* is simply another expression for *bāǰ* 'prayer'; here then it means *bāǰ i nān xᵛardan*, the common prayer before meals.

4.

1. kustīk, ka[1] [hač][2] parand[3] kart ēstēt, nē šāyēt; būz-pašmēn, u[4] pašmēn, [u] uštr-pašm[ēn] šāyēt; u hač mōδ⟨ēn⟩[6] pa naxēžīk[5] šāyēt.

2. kamist pahnāk sē(h) angust[3] drust ō apāyēt; ka hač kust -1 sar ā sar 3 angust[3] drust, apārīk ka brīt[1] ēstēt, šāyēt[2].

3. ka vāč dārēt, u-š kustīk bast ēstēt, u ēvak[1] -1 dit apāč bandēt, -u ān i[2] bast ēstēt bē višāyēt, nē šāyēt.$_0$ —

1. A *kustīk*, when it is made of plain-silk[3], is not allowed; of[7] the wool of the goat, and of wool, and of the wool of the camel is allowed; and of hair[8] is allowed for the low[5].

2. The least breadth[4] must be three fingers exact; when it is three fingers exact from one border throughout, [then] when the rest is cut off, it is allowed.

3. When one 'holds a prayer', and he has tied on the *kustīk*, and he ties another one again, and that which he has tied on unties, it is not allowed.[3] —

---

1. [1] M *ast* 'is'. [2] Or the next word must be ^0d[*ēn*], cf. n. 6. [3] Both p r n n d, but s. 4 below, and cf. NP. *parand*. [4] M om. [5] K om. *na-*; but cf. NP. *naxēz* 'common, low'. [6] If *ēn* be genuine, the prec. *hač* may be omitted or corrected into *kē* for *ka*. [7-8] West, "the hair (*pašm*) of a hairy goat and a hairy camel is proper, and from [other] hairy [creatures] it", wrong; cf. N. **163**. 29 ff. where the same articles are declared lawful: *pašm* [*i*] *būz*, *pašm* [*i*] *uštr*, *pašm u mōδ*; — also *pambak*, said Sōšyans; *kač* and *aparēšum* uncertain.

2. [1] Both *brīnēt*. [2] M om. [3] N. **164**. 12 ad. *i*. [4] West, "fulness", i. e. "[extra] width, or slackness round the waist", wrong. He has attempted this interpretation, because the natural one does not suit the modern *kustīk*; but note that the same measure is given in **10**. 1 where *pa targōn* 'crosswise, from side to side' is used in the place of *pahnāk* 'breadth'. It is, however, strange that almost the same measure, four fingers, is given for the *šapīk*, s. 5 n. 6—7, and therefore one may suspect some mistake. Again it is not quite certain for me whether any of the N. passages, giving four fingers, can be applied to the *kustīk*, s. 5 n. 6—7.

3. [1] K om. k. [2] K om. [3] This is the lit. tr. (similar one by Davar also), the sense of which is that while reciting a prayer the *kustīk* is not to be exchanged. West is wrong in taking *ēvak -1 dit apāč bandēt* as "ties [it] anew once again"; in his n. also he takes it to be the same *kustīk*. Again *vāč* is not always a "muttered prayer" as he believes, nor *vāč dāštan* "to retain the prayer [inwardly]", cf. *ān kas, ki darūn na-dānad yaštan, bāyad ki vāj i ōrmazd-hā gīrad, u agar īn nīz na-dānad, 'iθā ād yazmaide' bar x^{v}āna⟨n⟩d . .* , SdBd. **59**. 4 f.

4. vastrak i dēpāk[1] u stawrak[2] u parand u parnīkān[3] pa aiwyāhanīh[4] nē hūp; u[9] pōstēn, — ka mōδ hač-aš rūt[5] ēstēt, — u pašmēn [u] mōδēn u[6] pambakēn u šanēn[7] [u] aparēšumēn[8] u[9] dārēn pa šapīkīh šāyēt.$_0$

5. čahār angust i šapīk[1] handāč[2] i pahnāk, hač kust u[3] kust, hač gartan[4] tāk parīk[5]; u[3] drānāk, hač pēš u pas, and čand apar bastan šāyēt, hūp.$_0$

4. The clothing of brocade[1] and shot-silk[2] and plain-silk and painted-silk[3] is not good as *aiwyāhan*-s; and [that made] of leather, — when the fur therefrom is stripped[5] off, — and of wool and of hair and of cotton and of hemp[7] and of silk and of bark is allowed as *šapīk*-s.

5. Four[6] fingers[7] of the *šapīk* is the measure of the breadth, from border to border, [besides that which is] from the neck to the hips[5]; and the length, from the front to the back, as much as is possible to fasten up, is good.

---

4. [1] NP. *dībā*. [2] K ad. r before p i. e. *w*; West changes the prec. *u* into *i* and takes *st*^{0} as "thick" (Davar gives *-u* and quotes Av. *stawra-*, NP. *istabr*); cf. NP. *istabrak* for our meaning. [3] NP. *parniyān*. [4] M aa more before *h*, K om. *h*^{0}. [5] NP. *rūdan* met with in Jewish texts, NpEty. 258, cf. *rūd(a)* 'a plucked bird, a sheep stripped of its wool', *rūda kardan* 'to take feathers off birds'. [6] M om. [7] NP. *šan*, S. *śaṇa-*; West, "dyed silk" which Davar supports with NP. *vašan* 'stained, painted', but this is not satisfactory. It is true that K joins the prec. *u* to our word, but not M. [8] Both without *-u-*, therefore perhaps ^{0}*rēšmēn*, s. ArmGr. 107. [9] K om.

5. [1] M n. *kustī*; M$^+$ n. *ṣudra i* (?) *kustī*, cf. *pērāhan i k*. Riv. **32**. 17 ff.; **33**. 4 f. — in the place of *pērāhan* we find *šēb* and *zēr*, Riv. **33**. 10 ff., also *šēv*, Riv. **208**. 9, all meaning 'below, under'; another term is *nīmak*, Riv. **32**. 18 ff.; II. 11. **3** ff., cf. NP. *nīma* 'a short under-garment'; — *šapīk* (lit. 'belonging to night', cf. NP. *šabī* 'a night shirt') is used for the sacred shirt, *sad*^{a}*ro* of the Indian Parsis, also in N. **163**. 5; **164**. 30; **165**. 20; PV. **18**. 9 (23) gl.; another term is *taškūk*, N. **164**. 15; **170**. 25 (t y^0); PV. **18**. 1 (4) com.; *pērāhan* is used in DdA. **39**. 1; PRivDd. **34**. 4; *sad*^{a}*ro* is very probably derived from Arab. *sudra* 'vest' (for a similar phenomenon s. **10**. 40 n. 6), there is no MP. *sutarak* given by Bartholomae, Wb. 1291, wrongly for *šapīk*, and used in PX^{v}Ap. **74**. 18, 20, a later fabrication. [2] K ^{0}*čišn*. [3] K om. [4] K d r^0. [5] Conjectural, cf. *pārak* in n. 6—7. [6-7] The same measure is given in N. **163**. 23; **164**. 4, 12; **165**. 24; **166**. 12; **168**. 23; — but it is not always clear whether it refers to the *šapīk*. To judge from the context it does so in N. **164**. 12 and **165**. 24, but *pahnāk* or the like does not occur there; instead of it *pa* an rn p occurs in the former, and what precedes the latter refers to its position: *hačaδar* [*i*] *tan* 'below the body' i. e. 'on the lower part of the body'. Similarly it appears from N. **163**. 11 ff. that the measure in N. **163**. 23 can also indicate the certain position instead of the whole size. We can take *čvaṯ* in the sense of 'qualis', although the Ptr. is *čand*, and not *čē ēvēnak* or *čiyōn*, but the former can be wrong as the latter are wrong in their respective cases, s. AirWb 601; then cf. the gl. *pa pēštakīh* 'as regards (or in) projection' — for *tak* cf. NP. *tah* 'fold' —, and the reply: . . . *nē bē rānak*

6. and čand drānāk u pahnāk, [u] ka 2-tōk aδāp āstarīt[1] ēstēt, nē šāyēt; ka hač kust -1 pa garmānak[2] i 2-tōk patmōxt ēstēt, ka-č[3] kustīk dārēt, — u ka kustīk nē dārēt, — aδak-ač višātakīh ⟨nē⟩[4] bavēt.$_0$

6. So[5] much is its length and breadth[6], [but] when it is of two folds or is lined[1], it is not allowed; when[7] one is clothed from one side with a warm-clothing[2] of two folds[8], even when he keeps the *kustīk*, — and when he does not keep the *kustīk*, — even then [the sin of] 'being uncovered' does ⟨not⟩[4] take place.

---

bavāt hačaδar har 2 pārak ' . . . it may not reach (or slip down) below both hips (?)', N. **163**. 19. (For the original Av. s. Bartholomae, Wb. 1526; — it is not certain that the *kustīk* is meant here, as he takes it, and Av. *harəϑra-* cannot well mean 'a skirt, hem' as he, Wb. 1790, renders; lit. it would be 'an instrument for going or moving' (S. *sṛ-*, *sárati*), i. e. the legs, and hence the parts where they begin. The pl. may be for the dual as often, as *har 2* — though T has *har-ač* — shows. As to *pārak*, Av. ^{3}*pāra-*, S. *pāra-* 'end, limit' may be taken into account, when applied to the middle of the body which is generally divided into upper and lower halves in the texts dealing with the symbolism of the *kustīk*, (hence lit. 'belonging to, i. e. showing the limit or side) and where the microcosm is compared with the macrocosm; — or better Av. ^{4}*par-* 'to pass, to cross', NP. *pārīdan* 'to fly'. Bulsara, who gives the same meaning to *pārak*, compares NP. *pārgī* ('a prostitute', also 'a sink, dirty water' but s. Vullers). N. **164**. 4 runs: p r g *vēh pa kamistīh* (or *kēm*^{0}) *4-ak angust*; as to p r g Bulsara reads it *farg* and renders it by "looseness" comparing p n g (i. e. *nēm* 'half', 'side') and Arab. *farḳ* 'separation, distinction, division'; but it is to be read rather *parrak*, NP. *parra* = *dāman* 'skirt, hem, border'. What follows refers to the *šapīk*, and hence this also; but the term *parrak* shows that the said measure does not give the whole breadth. In N. **166**. 12; **168**. 23 the matter refers to the *aiwyāhan* of the *barsum*, which subject occurs partially here owing to some mistake in the arrangement of the folios in the original MS. — Believing that my interpretation of the N. passages is correct, I take the measure similarly in the present case also; we have then to make the addition before 'from the neck to the hips' which even otherwise cannot be taken literally, but as giving the directions of the breadth. — West seems to understand again "slackness": "[away] from each side, from the neck to the skirt". Along with *gartan*, *parīk* in this phrase may well signify some limb of the body, and not 'skirt', unless *gartan* means 'collar'.

6. [1] Both a y t b r y t; I read *āstarīt* (cf. NP. *ăstar* 'lining, pad' — also MP., s. N. **169**. 6, 16) because of the parallel phrase *2-tōk*. If we are wrong, we may place the first word *ast* before *aδāp*, and read the second one *brīt* 'torn'. [2] Both yn r^0, hence perhaps *dūr-mānak* which does not give a suitable meaning; it is therefore more likely to connect it with *garm* 'warm'. Of course there is no parallel except NP. *garm-sūt* 'cloth of silk and cotton and waved' (Phillott). This word is said to be corrupted from Indian *karb sūt* (Vullers), but the first part said to mean NP. *miyān* is unknown to me, though *sūt* is Hin., S. *sūtra-* 'thread, yarn'. This cloth (or clothing?) must be warm as can be seen from the examples in Vullers. — The context shows that our term is the name of

7. ka šapīk -l i ēv-tōk patmōxt, parīk[2] har 2 kust nihuft ēstēt, u[1]-š kustīk apar bast ēstēt, šāyēt.$_0$

7. When a *šapīk* of one fold is put on, [whereby] the hips[2] are covered on[3] both sides, and[1] the *kustīk* is tied on it, it is allowed.

---

an article of dress, and the passage bears some resemblance with N. **169.** 16 ff. before and after which (**168.** 28 ff., **169.** 22 ff.) many words referring to these articles occur, but none of them helps us in explaining the one here. — It may be read *dōl-m[iy]ānak* also, s. n. 7—8. [3] K ad. *i*. [4] This is a mistake, as the prec. clause about *2-tōk* being not allowed shows; it may be *rāδ* [*vinās*] as in 8 below; otherwise s. n. 7—8. — N. **170.** 9 ff. which allows the putting on of the garment on one side is not absolutely certain (the original Av. is corrected by Bulsara according to the Ptr.). It is very strange that also in DdA. **39.** 3 the negation occurs wrongly: *ka višātak aδāp brahnak aδāp pa yāmak* [*i*] *2-tōp rawēt, aδak-aš višāt-duvārišnīh andar bun* ⟨*nēst*⟩. For our case it may be argued that the negation is genuine: it implies the other sin, viz. *brahnak-duvārišnīh* which is 'moving without the *šapīk* and the *kustīk*', whereas *višāt-d.* is 'moving without the *kustīk* on the *šapīk*', s. SX^{v}Ap. **41.** 21 ff., PX^{v} **74.** 18 ff. But no great value can be attached to this late source; the distinction is made to explain away the occurrence of the two terms referring to the same sin, as in other cases, s. above **2.** 105 n. 2 and below **5.** 1 n. 3—4. Moreover, this is the only place (the original is PazT. **123.** 9) where both terms are used; in all other cases only *višāt-d.* occurs, s. below 8—10; N. **164.** 28, **169.** 18 ff.; Mx. **2.** 35; AVn. **25.** 6; DdA. **39.** 3; also in PazT. **140.** 21, **150.** 4, the parallel *Patīt*-texts. The definition of this term, 'moving without the *kustīk* on the *šapīk*' may be correct, s. PRivDd. **34.** 4 f., but the sin refers to the absence of both pieces also, s. N. **164.** 28 ff. We may go a step further and say that *brahnak* has no technical sense, because we read in the same connection: *mart brahnak raftan nē vinās, žan vinās*, N. **164.** 26 f. (**172.** 20 f.). [5-6] This may not belong to what follows. In any case West, who takes this part as the subject, is wrong; it is the doubleness that is objected to here, as in N. **164.** 15; **165.** 27; (DdA. **39.** 2; PRivDd. **34.** 5). [7-8] West, "when on the separation (*dūrmānak*) of the two folds [one] remains clothed on one side", retaining the negation. — If we read the obscure word *dōl-m[iy]ānak* 'a belt', relying upon NP. *dōlmiyān* 'a purse or letter-bag carried round the waist, zona' (without examples), we need not omit the negation. Note that the *kustīk* unlike the *šapīk* must be *2-tāk* and *2-tōp*, double and of two folds (NP. *tōb*), DdA. **39.** 2 (where it is called *parvandīh* (?); cf. DdA. **38.** 14 — and PY. **9.** 26 (81) — where *parvand* (?) refers to some luminary compared with the *kustīk* or *aiwyāhan*. The same incident as here is described in DdA. **36.** 35 where also *dōl* 'Aquarius' (MSS. differ) occurs. This may be chance and have nothing to do with our word.) — It would then mean that a substitute for the *kustīk* is allowed, which is rather strange.

7. [1] Both *ā* 'then'; if genuine, we must add 'if or when' after it or 'and' before it. [2] S. 5 n. 5, 6—7. [2-3] West, "skirt has concealed", but s. n. 2.

8. ka šapīk 2 patmōxt ēstēt, u kustīk apar ān i hačapar bandēt, aδak-aš višāt-duvārišnīh rāδ[1] vinās ō bun.$_0$ —

9. mart u žan, tāk 15 sālak, aδak-aš višāt-duvārišnīh nē gīrišn; vinās i drāyān-žōyišnīh pas hač 15 sālak ō bavēt.$_0$

10. vinās i višāt-duvārišnīh, tāk 3[1] gām, har gām -1 framān[2] -1[2]; pa čahārom gām tanāpuhr -1[3].

11. kustīk, kē-š rēšak[1] nēst, šāyēt[2]; u ka žan grah[3] bandēt, nē šāyēt.

8. When one has put on two *šapīk*-s, and he ties the *kustīk* on that which is above, then [there accrues] a sin to his stock for running 'uncovered' (without the *kustīk* on the *šapīk*). —

9. A man or a woman, till they are fifteen years old, till then [the sin of] 'running uncovered'[1] is not to be considered for them; [also] the sin of 'devouring chatteringly'[2] takes place after they are fifteen years old.

10. The sin of 'running uncovered', up to three steps, is a *framān* each step; at the fourth step a *tanāpuhr*.

11. A *kustīk*, in which there is no rent[1], is allowed; and when a woman ties knots[4] [while preparing it][5], it is not allowed.

8. [1] K *nē*.

9. [1] S. 6. n. 4. [2] S. 5. 1 n. 3—4.

10. [1] K om. [2] Also M; but Davar om. [3] Also M; but Davar *-īh*.

11. [1] Av. [2]*raēša-* (s. n. in AirWb. 1487); — s. n. 4 and cf. Riv. 32. 17 ff. where it is said that in the *kustī* of one who performs the *yazišn* torn threads (*dar*, *dir* 'a tear, a rent' unrecorded, but it can be from NP. *dar(r)īdan*, *dirīdan* 'to tear, to rend') should not be neglected (*firō na-guδāšta bāšad*), — at the time of weaving it, as one of the accounts adds, Riv. 33. 12. In the absence of this we would have thought of the meaning 'hair' (NP.), since care is taken against a flown up hair while preparing a *kustī*, and it is carefully removed, if woven in it. — If the general wear and tear is meant, we may adopt 'fibre, filament' loosened from a texture. West gives "fringe"; but a *kustī* must have fringes which are slowly worn out, and then a new one is put on. If this meaning is meant, we must follow K, which omits *šāyēt*, and apply *nē šāyēt* 'not allowed' of the next clause to this one also. [2] K om. [3] If the final yy (s) be for ya (š), then *grēh*, but s. N. 164. 16, 23; — s. n. 4, 5. [4] This is with reference to rents or torn threads (s. n. 1) which must be nicely twisted; otherwise as in n. 5. [5] Thus, cf. n. 1; it accounts for the reference to women, who must have prepared the *kustīk*, as is the case today. Otherwise '[with it]', reading (as West does) *gars* = *vars* 'hair' instead of *grah* 'knots', which is, however, not probable; less so the meaning 'purse' which occurs only in a special phrase in NP.

12. ēv[1]-mōk[2]-duvārišnīh tāk čahār gām tanāpuhr -1; ka pa ē rawišn, u pas hač čahārom gām, and čand bē rawēt, tanāpuhr -1; u ka bē nišīnēt -u[3] frāč rawēt, vināš ān ham, ⟨i⟩ i-š hač bunīh; u būt kē 'har frasang -1 rāδ tanāpuhr -1' guft.$_0$

K 64 r ān x^{v}amr[3] vitarān bavēt, ā-š patītīkīh[8] kart bavēt.

12. Running with[1] one foot-covering[2] as far as four steps is a *tanāpuhr* [sin];[4] when in one motion, and after the fourth step, as much as he goes, it is [also] a *tanāpuhr*; and when he sits down and [then] goes further, the sin is [anew][5] that same, which is for him from the beginning; and there have been some who have said 'one *tanāpuhr* for every single parasang'.

13. At night when they lie down, the *šapīk* and *kustīk* are to be kept, because they are very protective for the body and good for the soul.

14. When one lies down with the *šapīk* and *kustīk*, and recites one *a š ə m v o h ū* before sleep, [then] at every single coming and going[6] of the breath it is a three *srōšočarnām* good work; and if in that sleep he passes away, then the repentance [of sin] becomes [as] accomplished for him.

---

12. [1-2] We are not to change it into *apē-mōk* 'without boots (or shoes)', as some modern *dastur*-s would do, nor are we to understand it as Nēryōsang, SX^{v}Ap. 41. 25, does: one foot bare; but as 'only with the inner pair', s. the n. by West. [3] K om. [4] The next clause cannot go with this syntactically; — before the fourth step the sin is 'three *srōšočarnām*' or 'one *framān*', s. PV. 18. 55 (116) com., PRivDd. 34. 4 ff. [5] Cf. the texts in n. 4.

14. [1] M om. [2] Both ^{0}*ēnd*: d for yt, the exchange may have been influenced through the same word in 13; West leaves it and the foll. as it is, and translates "[one] shall utter . . . ". But I think that the first two clauses form the condition of the good effects that follow. [3] M yn mn (*ēn* 'this'), K yb mn, both instead of an mn; for the reading s. MPT. which showed that the word was not an ideogram; cf. *wərm* in the dialect of Awroman (Christensen), and for the form s. Bartholomae, ZWb. 64 n. [4] M ad. *u*, though Davar silent; West adopts it, but s. n. 2. [5] K om., M n. *dam*. West reads *vayō*, so also in MYFr. 2. 68 whence Bartholomae, Wb. 1358, gave it as *vayū*[*k*] for Av. [1]*vaya*(*v*)-, although its Ptr. is *vāy* as that of [2]*vaya*(*v*)-; — (the two words are one and the same; only their application is different, as the wind can produce both good and evil effects). In Wb. 358, 860 he reads *vēn*, and so in the other case he might not have looked up the context which is everywhere the same, viz. about breathing. Thus *vayū*[*k*] becomes doubtful; for *vēn* cf. Bal. *gīn* 'breath', and the rest in Horn, NpEty. 60. [6] FrO. 11. 8 has in the same phrase *šavišn*; therefore our word from Av. [2]*bar*-, NP. *burdan* 'to go' etc. (and not 'to carry'); otherwise the prec. *āyišn* must be changed into *āwarišn* 'bringing' which occurs in the same phrase elsewhere, MYFr. 2. 68. But the former gives better sense in the present case, cf. also the parallel, Sd. 84. 2 . . . *bar āyad u firō barad*, and M$^+$ n. *ravad*. [7] M om., K *u*. [8] K ^{0}*k*.

5.

1. drāyān[3]-žōyišnīh[4] [i] ān i apurnāyakān i panǰ sālak ō bun nēst; u hač panǰ sālak tāk haft sālak, ka[1]-š[1] pit pa āmōxtārīh avinās[2], ā-š ō bun nēst; u ka vināskār, ō bun i pitar.[0]

2. u hač hašt sālak tāk 15 sālak, mart u žan, hakar-ač pa yašt kartan[1] avinās, bē-š iϑā u ašəm vohū tuvān guftan, u nē[2] gōwēt, ā-š drāyān-žōyišnīh ō

1. [The[3] sin of] 'devouring chatteringly'[4] by the children of five years is not for the stock; and from five years to seven years, when the[5] father is not guilty about the instruction[6], then it (the sin) is not for the stock; and when guilty, it is for the stock of the father.

2. And from eight years to fifteen years, a man or a woman, even if they are innocent as regards the performance of the [initiative] *yašt*, but they are able to recite the *iϑā* and *ašəm vohū* [formulas], and do not recite them, then

---

1. [1] M also; but Davar om. [2] M n. *na-gunāh*. [3-4] S. **2.** 105. n. 2 for the reading etc. of *žōyišnīh*. The idea underlying the sin is 'eating without reciting the prayer', cf. below esp. 7. The term is totally distinguished from *drāyān-xᵛarišnīh* in SXᵛAp **41.** 27, but the distinction may not be fundamental as the *bāǰ* can refer to only that of taking meal, as can be seen from PXᵛAp **74.** 22. It may be moreover a conjecture to explain away the occurrence of two terms of the same meaning, as above **2.** 105 n. 2; **4.** 6 n. 4. It is significant that in the parallel text, only one term is used, Tīrandāz 407 (PazT. **140.** 21 f. gives both, but that may be due to Indian MSS.). In any case the distinction does not suit here, s. below 3. Again there are cases where both terms are used interchangeably: cf. PT. **122.** 3 with Riv. **350.** 11. Also Mx. **2.** 33—34 decides in our favour. [5-6] West. "[one] is under the tuition of his father [and] innocent", wrong.

2. [1] K om. [2-3] K om. [4] Both *bavēt*. [5] Both y joined to the next, s. n. 7. [6] K *čē*. [7] Both yyyt n p r yt; (West, "offering (*yastōfrīt*)" but this term nowhere occurs, s. below) — but in 6 we have yyt[0] and once a for p. The first y can be easily a clerical mistake, it may be even for the prec. *u;* but the mixing up of p and a is not known to me, though it is not impossible. — Although p occurs once in 6 also, in all other cases we have a, s. below. The only other exception is PazT. **124.** 20 *gaētufrīṭ* (so also in TD 3. 128 r), but PXᵛAp. **61.** 11 shows that some MS. had *gētīk xrīt* for it, which is *gētī xarīd* of the later writings. It is this term upon which our reading chiefly depends. Is then *gētō-* — there occurs also *gētōk-* — a clerical mistake for *gētīk-* or is a transcription of Av. *gaēϑō-* ? If the latter, the whole term must be considered Av., **gaēϑō-xrīta-*. Its lit. meaning 'that which is purchased on earth or by earthly means' may or may not appeal to our mind; but cf. . . . . *bē ān martom, kē pa yašt kartan avinās; u čīš bē dahēt u gōwēt, ku 'man rāδ yašt bē kunēt', ān 'yašt i gētīk ō xrīt' xᵛānēnd* ' . . . except that person, who is innocent as regards the performance of the [initiative] *yašt;* and he gives something and says, viz. 'you perform

bun; u ka-š yašt narm tuvān kartan, u[3] i ϑ ā a š ə m v o h ū gōwēt, būt[4] kē guft, ku[1] ētōn bavēt, čiγōn ka-š yašt nē kart ēstēt, [u][5] gētō-xrīt[7] nē bavēt, u[1]
M 92 v būt[1] kē[6] guft, ku drāyān-žōyišnīh nē bavēt.

[the sin of] 'devouring chatteringly' [accrues] to the stock for them; and when they are able to commit the [initiative] *yašt* by heart, and [do not perform it, but][8] recite the *iϑā* and *ašəm vohū*, there have been some who have said, that[9] it becomes so, as when one's [initiative] *yašt* is not performed, i. e. the *gētō-xrīt*[7] does not take place[10], and there have been some who have said, that [the sin of] 'devouring chatteringly' does not take place.

---

the [initiative] *yašt* for me', they call that 'the *yašt* which earthly means have bought', PRivDd. **50.** 12 ff. In any case the use of the term is very precise, cf. e. g. . . . *mart ē ka-š yašt kart ēstēt, u-š žan nē kart ēstēt, apēr frēžpānīh* (MSS. °*īk*) [*i*] *ziyānak yašt kartan aδāp gētōk-xrīt framūtan, ku čiγōn pa gētīk, ētōn* ⟨*čiγōn*⟩ *pa mēnōk, nazdīk-mānišntar* (M. om. *mānišn*) *bavēnd* ' . . . when a man has performed his [initiative] *yašt*, and his wife has not performed it, the supreme fulfilment of duty for the beloved is to perform the [initiative] *yašt* or to order the *gētōk-xrīt*, so that they become living very near [each other], so in the spiritual [existence], as in the material [one]', Šnš. **12.** 30; and *ka yašt nē kart u gētōk-xrīt* (*gē-* made distinct with diacritical marks) *nē framūt ēstēt*, GBd. **226.** 15 f. = BdK. **76.** 2 f. (where *gētīk xrīt*); and *ka* (MSS. *ku*) *gētīk xrīt nē bavēt, tāk-aš drāyān-žōyišnīh nē gīrišn* 'when the *gētīk xrīt* does not take place, till then [the sin of] 'devouring chatteringly' is not to be considered for him', N. **23.** 17 f. Here the term is used in the place of the initiative *yašt*. Note further that the statement is taken from the part connected with the subject of this chapter. That the term *yašt* has also here this meaning, as shown above **3.** 35 n. 6, can be supported by Dd., s. SBE. **18.** 234 where *gētō-xrīt* is compared with the *nābar* or *nāwar* ceremony, s. also 237 (where the term must be *yašt*, to judge from West's "ritual") and 362; and by the oft recurring statement 'to perform the *nōzōd* or to order the *gētī xarīd*', (without which one cannot go to heaven) Sd. **5.** 3, 6, 8, 10; SdBd. **42.** 2, 5, 8. Again the description of the *gētī xarīd* ceremony, Riv. II. **37.** 1 ff. (tr. by West, SBE. **5.** 127 n.) is the same as that of *nōzōdī* or *nābar* (the only difference is in the duration, but not even that in Modi, Cerem. 433) **34.** 2 ff., 10 ff. where it is distinctly said so. Thus the two terms are used as if in the same sense, or the idea is that one who does not perform the initiative *yašt* (i. e. become *nābar* or *nōzōd*) should order the same ceremony and get it performed by priests for him or her during lifetime, later on also after death, s. the explanation of '*gaetu-frīda*', viz. the performance of the '*nāvara*' for the dead, SX^{v}Ap. **43.** 12 which in its turn shows that the term is *gētō-xrīd*. It is not, as Bharucha, Rist. 449, says, a misreading of *sato-farīd*, a 'corrupted' form of *osto-farīd*, Av. *usəfriti-*. (I may note that this term occurs only in V. **18.** 12 where the Ptr. *ul franāft myazd* follows the var. *usəfritanąm vā myazdanąm* '(pounded *haoma*) or offered up *myazda*', and this seems preferable.) But *usofrīt* is the exact form for Av. *usəfriti-*, and *ustofrīt* can be explained as its graphic var.: yt (*st*) for yyn (*so*) as in *stōt-yast* for *stōt-yasn*.

3. drāyān-žōyišnīh har pihan[1] -l ō bavēt; u ōy, kē yašt kart ēstēt[2], tanāpuhr -l; ōy, kē yašt nē kart ēstēt, kam, — būt[3] kē 'sē(h) srōšočarnām' guft.[4]

3. [The sin of] 'devouring chatteringly' can take place at every single meal[1]; and [unto] him, who has performed the [initiative] *yašt*, it is one *tanāpuhr;* [unto] him, who has not performed the [initiative] *yašt*, it is less, — there have been some who have said 'three *srōšočarnām*'[4].

But we cannot account for *stofrīt* (*spurrīk* besides *ōspurrīk* cannot be compared in this relation as done by Bharucha, Rist. 420, because they have distinct origins, s. **8.** 1 n. 7), nor does it occur elsewhere. In spite of this, we may take our word as corrupted from *ustofrīt*, but then its meaning will not suit along with the *yašt*, (unless it can be shown that the *yašt* means here something else, say, the highest type of the prayer before meals, which is certainly not the case in 6, and hence, I believe, not also here). The lit. meaning is 'that which pleases' something like 'offering, praise', s. AirWb. 408, 1016, 1025; and everywhere the context supports it: *usofrīt u šnāyēnišn i yazatān*, AVn. **13.** 7; *andar yazatān ustofrīt*, Šnš. **12.** 10; *usofrīt i yazatān*, Vyt. **2.** 45; in Ny. **1.** 4, PY, **21.** 2 (3), **62 (61).** 1 it occurs as a gl. for *niyāyišn* 'praise'. PazT. **123.** 1 *huš frīṯ* [*i*] *yazdān* refers to this term (which shows that *gaētufrīṯ* in the same piece cannot be *ustofrīt*); the parallel piece has *astprīṯ* i. e. *ustafrīt*, cf. Tīrandāz 410 f., esp. his comment that it is *gētī xarīd* according to some and *yazišn i paδīrafta* 'undertaken (or promised) *y.*' according to others. There is no doubt that the former does not suit the context; still it is significant that the two terms are mixed up. It is possible that this belief may be responsible for the mistake in our text. — I now find from PRivDd. **49.** 9 ff. that also *ustofrīt* suits the context. [8] S. n. 9—10. [9-10] This opinion, unlike the next one, does not refer to the sin in question, but to the non-performance of the initiative *yašt* in spite of the ability to do so, as in 6 below.

3. [1] Both p yan n; very common — so or without the final n, — also used for Av. *piθwa-* regularly, and hence it is not a mere graphical var. of *pit* (p yt which occurs for Av. *pitav-*), i. e. yan for yt as sometimes in verbal endings. Bartholomae, Wb. 642, 731, 904 (here with ?) reads *pihn*, but it must be *pihan*, if we read like that. — To judge from the Str. *bhojana-* 'food, meal' *pōhan* in Aog. 42, 43 (PazT. **351.** 18.) represents the word in question: 'when the road is of one meal, they desire provision for two meals', etc. The meal or rather the meal-time means a pause in the journey, just as the night used in 44 does, and consequently it forms a stage of the journey. (Geiger is silent about *bhojana-* and is wrong otherwise.) — Again *pehan* in Av. let. occurs in BdK. **64.** 14 (in K itself it is omitted), but the context is disturbed, and so it is not correctly translated. It must run as in GBd. (**116.** 14 f.) **117.** 1 ff.: *har čē pa pihan* (y correctly marked with two dots below) *i rōčkār šāyēt, -u ka bar stānēt* (an⁰ for yn⁰ in the ideogram; the MS. DH — and BdK. — right), *bun bē hōšēt*, ⟨*apārīk*⟩ (DH — and BdK. — rightly om.) *ētōn čiyōn gandom u yav* [*u*] *vrinj* (MSS. br⁰) . . . [*u*] *naxᵛat* (or *naxūt* as NP. *nuxūd* is more common) *-u apārīk hač* (thus in DH — and BdK.) *ēn gān* (or *šun*, s. **6.** 7 n. 9), *yōrtāk xᵛānēnd* 'whatever is allowed (or suitable) as daily food, and when one takes off the produce, the root

4. drāyān-žōyišnīh patmānak tanāpuhr -1; ēn, ku har pihan[1] -1, aδāp har pārak -1, aδāp har mičak[2] -1, am[3] nē grift ēstēt.

5. drāyān-žōyišnīh[1] [i] ān, kē yašt nē kart ēstēt, aparak 'ē[7] pāδak x^{v}ārtar' guft, mēṭōkmāh 'har 2 ēvak' guft; ⟨u⟩ u-š hač ē bē guft, čē ān, kē yašt nē kart ēstēt, u[2]-š[2] iϑāk u ašemvohūk[3] nē varravēt guftan[4], girāntar-ač ast, čiγōn ān, kē yašt kart[5] ēstēt[6], u-š drōn nē varravēt yaštan.

4. The measure of [the sin of] 'devouring chatteringly' is one *tanāpuhr;* this, viz.[4] [whether at] every single meal[1], or every single morsel, or every single tasting[2], I[3] have not grasped[5].

5. [As to the sin of] 'devouring chatteringly' by him, who has not performed the [initiative] *yašt,* Aparak has said 'one[7] degree lighter', Mēṭōkmāh has said 'both are one [and the same]'; and he has said it[8] from this [ground][9]: because he, who has not performed the [initiative] *yašt,* and does not believe in reciting the [simple grace] *i ϑ ā* and *a š ə m v o h ū,* is also[11] very grievous[10], just as[12] he, who has performed the [initiative] *yašt,* and does not believe in[13] offering up the *drōn*[14].

(or stem) dries up, such as wheat and barley and rice . . . . . and vetch and other things of this kind, they call corn'. Compared to all this the n. in a MS. f š n *ya^{c}nī x^{v}arišn* on our word in PV. **16.** 7 (17) com. does not carry any importance as regards the reading. As to the meaning there is no doubt. — West, "ceremonial (*yazišn*)" wrong, so also his "drop" in SBE. **18.** 235 n. where he reads *pašan.* — Davar follows West inasmuch as he gives yp^{0} and not p^{0} which is distinct in M also. — Cf. 4 n. 4—5. [2] M also; but Davar *bavēt.* [3] Both *bavēt* which we can take with the prec. and add *būt.* [4] Gōgušnasp said this, if the non-performance was without guilt, N. **23.** 22 ff.; cf. 5.

4. [1] S. 3 n. 1. [2] Both m yp k, as in PY. **1.** 3 (9); **2.** 3 (15); PT. **122.** 7 besides the recorded places, but m č k in (BdK. **65.** 11) Mx. **2.** 15, 26; **57.** 12 where, however, the Paz. is *mī*^{0}, also in Šv.; hence *mēčak,* which is also supported by some dialects, s. Hübschmann, PSt. 98. But NP. *maza, mazīdan* (for *miz*^{0}) should be considered more authoritative. — West "urine", thus seeing "three principal occasions when a prayer (*vāǰ*) is taken inwardly and retained until the completion of the action", but he is wrong as he has himself seen, SBE. **18.** 237 n.; — s. n. 4—5. [3] Both a m, perhaps intentionally for the sake of the meaning; similarly in 6 n. 4. [4-5] Thus, because in the same sentence in N. **23.** 19 ff. the last clause runs *am nē rōšnak* 'is not clear to me'; otherwise 'where every . . . . tasting is not similarly completed (*ham nē kart ēstēt*)'. It may be noted that Bulsara has connected the three terms to a ceremony: "[entire] Thanks giving Service" (reading *yazišn* like West, also because p is written like yp as sometimes), "part service", and "[particular] sacred recital" comparing NP. *mīžak* 'muttering'.

5. [1] K om. *y.* [2] K om. [3] K ^{0}m, and with ā for a. [4] Both ad. *-aš* or *-īh.* [5-6] K rep. [7] Both an a, hence naturally 'this', but the ideogram could have been wrongly replaced as in e. g. AVn. **54.** 10, and s. the same phrase in N. **61.** 4;

6. mēṭōkmāh guft, ē! gētō-xrīt nē bavēt; aparak guft[1], ē! gētō-xrīt[2] pa har kas ō bavēt, bē pa ān kas, kē yašt narm, u pa vināskārīh bē nē kunēt; — u pa ān žamān bavēt, ka andar žīvandakīh[3] i ōy, pa framān i ōy, pa ēn mēnišn, ku 'kāmom kartan, am[4] āstuvānīh i pa dēn', guft bavēt.$_0$

7. karr u[1] gung, ka-š[1] ašem -1 nē[2] tuvān guftan, ā-š drāyān-žōyišnīh nē kunēt; u ka-š ašəm -1[3] tuvān guft[an], ā-š[4] ašəm ašəm ašəm 3 bār bē gōwēt;$_0$ u[1] hakar-aš iϑā u ašemvohūk tuvān guftan, hūp; u ka-š iϑā tanīhā tuvān guftan, ā-š kār nēst.

6. Mēṭōkmāh has said, lo! the *gētō-xrīt* does not take place [in such a case][7]; Aparak has said, lo! the *gētō-xrīt*[2] does take place through[5] every person, except through[5] that person, who has the [initiative] *yašt* by heart, and out of sinfulness does not perform it; — and it takes place at that time, when it is[8] recited, during his life, at his order, with this intention, viz., 'I wish to do it, it is my steadfastness in the religion'.[6]

7. [As to] a deaf and dumb [person], when he is not able to recite the [word][5] *ašəm*, then he does not commit [the sin of] 'devouring chatteringly'; and when he is able to recite the [word] *ašəm*, then he [should] recite '*ašəm ašəm ašəm*' three times; and if he is able to recite *iϑā* and *ašəm vohū*, it is good; and when he is able to recite *iϑā* alone, then it is not the matter.

---

67. 9 where it is not used. Again we have to take the statement as referring to 'one *tanāpuhr*' in 4 and as in direct opposition to the opinion of Mēṭōkmāh. Only when this is not necessary, we can adopt 'this': 'this degree is very light', but then it refers to 'three *srōšoćarnām*' in 3; and Mēṭōkmāh does not refute Aparak, but joins him rather more strongly against this statement. [8-9] Or 'against this'; West, "further of this", misses the point; s. **2.** 2 n. 13 for our meaning. [10] If this must be applied to 'sin', then '[to or for] him who' instead of 'he who' above and below. [11-12] This suits his above quoted view better than the alternative tr., 'even more grievous than', does. Again *čiγōn* has this sense chiefly in the Ptr. where the system of tr., *yaϑa* by *čiγōn*, must have demanded it; in independent works *hač* or *ku* is common, but also *čiγōn* occurs, **6.** 2; AVn. **4.** 16. [13-14] I. e., in performing the highest type of grace, s. **3.** 35 n. 7.

6. [1] M om. [2] Both p for a i. e. *frīt* for *xrīt*, s. 2 n. 7. [3] M *žīn*^{0}. [4] M a m; K m, a is added afterwards. [5] Or 'for'. [6] All this refers to one who is not able to perform the initiative *yašt* himself; and not to him who "can obtain the benefit of any past ceremony, forfeited by wilful negligence, by repentance" etc. as West explains, cf. 2 n. 7. [7] Thus, believing that the subject is connected at least with the performance of the initiative *yašt;* its relation to the said sin is unknown, s. 2 n. 7. [8] Lit. 'becomes [as]', which I give in **2.** 109; **4.** 14; **7.** 2 etc. Is this formation connected with the NP. Fut. Exactum *karda bāšad*, or is *bavēt* here just like *ēstēt* (cf. the use of *būt*)? All other recorded cases belong to glosses beginning with 'i. e.', which fact supports the lit. meaning.

7. [1] K om. [2-3] K om. [4] Both *u-š*. [5] Thus, because of a *š ə m a š ə m a š ə m* below.

6.

1. karr u gung u[1] armēšt, ka apēčak dāt u frārōn mēnišn, -u pa kirpak kartan a-tuvānīk, ⟨u⟩ hač ān ka bē zāyēt tāk[1] ān[2] ka[3] bē mīrēt, har[1] ān kār u[1] kirpak, i andar gēhān kunēnd, ōy[1] ētōn[1] x^{v}ēš bavēt, čiγōn[4] ōy[5]-č kē-š kart; ast kē ētōn gōwēt, ē! and čand zaratušt ō bavēt.$_0$

2. ka-š kirpak hambun[1]-ač nē kunēt, u vinās hambun-ač nē kunēt, vēh čiγōn ka-š kirpak hambun-ač tuvān kartan, [u] nē kunēt, u vinās hambun-ač kunēt[2]. u ka
M93v pas bē vitīrēt[3], pas-ič pa vinās u[2] kirpak āmār[5] ō bavēt; u ka-š kirpak hambun[4]-ač[4] vēš, pa vahišt; u ka vinās hambun-ač vēš, pa dōšax^{v}[6]; u ka har 2 rāst, pa hamēstakān.

3. ka 3 srōšočarnām kirpak vēš, pa vahišt; ka tanāpuhr -1 kirpak vēš ku vinās,
K65r ō[1] pahlom ax^{v}ān rasēt, — u ka-š yašt kart ēstēt.$_0$

1. [As to] a deaf and dumb and invalid [person], when of unsullied law and of right mind, but unable to do good works, from that [time] when he is born till that [time] when he dies, all that work and good work, which they perform in the world, belongs[6] to him so, as even to him who has performed it; there are some who say, lo! it[7] accrues [to him] as much as [to] Zaratušt.[7]

2. When one does not perform good work even a little[1], and does not commit sin even a little, it is better than when he is able to perform good work even a little, and does not perform it, and commits sin even a little. And when afterwards he passes away, then as to sin and good work the reckoning takes place; and when his good work is even a little more, he is in heaven; and when sin is even a little more, in hell; and when both are equal, in *hamēstakān*.

3. When there is three *srōšočarnām* good work more, he is in heaven; when there is one *tanāpuhr* good work more than sin, he comes to the 'best existence', — and when he has performed the [initiative] *yašt*[2].

---

1. [1] K om. [2] K *hač*. [3] M *kē*. [4] K om. n. [5] K *ō*. [6] Thus, or 'becomes appropriate', and not 'is property', because *ētōn* occurs between *ōy* and *x^{v}ēš*. [7-7] Hardly, 'he becomes as much as Z.'! West's n. on this opinion that the "writer was translating from an Avesta text . . . . so as to suit the context; perhaps Av. *zarazdāiti* . . . " is unsatisfactory; there must be some dogma underlying it.

2. [1] Both aam^{0} throughout, and hence West's "not . . originating", which is wrong, s. n. 4—4, **2.** 12 n. 10—11. [2] K om. [3] M ad. *-u*. [4-4] M n. *andak* 'little', (which Davar inserts in the text) and *svalpam api* 'even a little'. [5] M n. *šumār*. [6] S. **8.** 5 n. 8.

3. [1] K γ n. [2] We may add 'or ordered *gētōk-xrīt*', Šnš. **12.** 30 etc. as in **5.** 2 n. 7, but it does not occur also in PV. **7.** 52 (136) com. which cf. for other details.

4. sōšyans[1] guft, ē! pa ān i pahlom axᵛān matan, yašt kartan nē apāyēt, čē ka-š kirpak ē[2]- tanāpuhr vēš ku vinās, ō pahlom axᵛān rasēt; ⟨u⟩ u-š yašt kartan nē āmār, čē pa garōtmānīkīh yašt kartan nē apāyēt, čē [pa] vēš kirpakīh ō garōtmān šāyēt matan.

5. čiγōn[1] sōšyans guft, pa vahišt ān i hačaδar ō ān i hačapar burzēt. gōwēt ku: 'nēwak-ač tō, mart! kē čikām-ič[2]-ē[3] nazd hē(h)[4] ō ān i asēž[5] ⟨i⟩ axᵛ'.₀

6. kay-ātur-bōžēt guft, ku aγ-dēn, ka tanāpuhr -1 kirpak vēš ku vinās, hač dōšaxᵛ[3] bōxtēt.₀ —

7. apēčak[1] dāt u vēh-dēn amāk hēm[2], u pōryōtkēš] hēm[3]; u vimēžak[4] dāt[5] sēnīk[6] ašākartīh[7] hēnd;₀ u vat-tar dāt zandīk[8] u tarsāk u yahūṯ u apārīk i hač ēn gān[9] (=šun)[9] hēnd.₀

4. Sōšyans has said, lo! to come into that which is the 'best existence', it is not necessary to perform the [initiative] *yašt*, because when his good work is one *tanāpuhr* more than sin, he comes to the 'best existence'; and there is no reckoning of his performing the [initiative] *yašt*, because for those belonging to the *garōtmān* it is not necessary to perform the [initiative] *yašt*, because through more good works it is possible to come to the *garōtmān*.

5. As Sōšyans has said, in heaven he who is below ascends to him[6] who[7] is above. [A passage] says that: 'Happy indeed art thou, O man! who art in any way near to that which is the imperishable existence'.

6. Kay-ātur-bōžēt has said, that an infidel, when there is one *tanāpuhr* good work more than sin, saves[1] himself[2] from hell. —

7. Of the pure[1] law and of the good religion are we, and of the supreme teaching are we; and of the mixed law are the disciples[7] belonging to Sēn[6]; and of the worst law are the Manicheans[8] and the Christians and the Jews and the others who are of this sort[9].

---

4. [1] K ⁰*šāns* as often elsewhere. [2] K joins to the prec., M in the new line.

5. [1] K ad. ⁰₀ and more like that. [2] M also; but Davar *-ač*. [3] Both yb. [4] M ⁰yb; K ⁰ā. [5] M n. *asəǰi* in Av. let. [6-7] Or, simply 'that which'?

6. [1-2] Or 'escapes', s. AirWb. 917. [3] S. 8. 5 n. 8.

7. [1] Lit. 'without (*apa*) anything [foreign]', s. Salemann, MSt. 44. [2] M y added afterwards. [3] Both *hom*; yet Davar *hēm*. [4] Not ⁰*čak*, s. Bartholomae, ZWb. 229 n. [5] K ad. n which is surely to be connected with the prec. *dāt* as in the case of the first *dāt* where both have it. West takes it with the next word and says that K has changed *sēnīk* into "*nisīnīk* or *vīdīnīk*", but such is not the case. [6] West gives the suggestion of Darmesteter who applies the term to the Manicheans in eastern Turkistan and western China, in other words *sēnīk* means 'Chinese'. Now it is true that *sēn* is identified with *čēnastān* in GBd. 106. 15 (= BdK. 38. 4), but (leaving aside its justification) it should be noted

that *sēn* occurs there as a mere transcription of Av. *sāinu-*; and that everywhere else China is *čēn* or *čēnastān*, never *sēn*, s. GBd. **77**. 3; **79**. 9; **198**. 11 (BdK. **22**. 1; **23**. 19; **70**. 9 — also **23**. 6 is supposed to contain *čēn*, but it is not so, s. GBd. **78**. 12); NM. II. **8**. 5; Jn. **76**. 4, 16; — cf. also Arm. lw. and Sog. Still if *sēn* can and does here mean 'China', we may understand thereby Turkistan, as West does — also in the *Šāhnāma čīn* is used for this country — and refer like him to DkM. **25**. 16 f.: *kēš . . . i mānī hač turkastān*. But as we have to take *zandīk* as some religious community, which can be only the Manichean, s. n. 8, one may say that not these, but the Buddhists of that part are referred to by *sēnīk*. Only we do not find any trace of Buddhism in the extant Zoroastrian literature. Hence I consider it more probable that the reference is to the heretic teacher Sēn of whom we read in DkM. **567**. 16 ff. He is contrasted there with Ātur-pāt, the renovator of the religion, and hence he must not have been an insignificant heretic (*ahramōγ*). He perverted what the ancients taught and so he represented the first type of heretics, *frēftār* 'deceiving'. Note also that those of the second type, *frēftak* 'deceived', are compared with his disciples (*hāvištān*). — Those of the third type, *x*ᵛat-dōšak* 'self-willed, wilful', considered him better than Ātur-pāt. [7] M n ya k n t ya which can be read *vēh-kartīh* lit. 'those made good or doing good' hence 'converts, or benefactors' respectively; West reads "*vaškartīh* congregation"; but there is very little to support all this. For the adopted reading take the first n with the prec., cf. K; or for a; and s. the var. in FrP. *13. 7, and cf. the synonym *hāvištān* in n. 6. (Dhabhar, NM. tr. 46. n. reads similarly, but otherwise he follows West.) K ya k n p t ya, *škōftīh* 'blossoms' or *škaftīh* 'wonders, prodigies'; if genuine, the terms must have been used ironically! [8] The original is vaguely used in Mx. **36**. 16 along with *yātūkīh* (as in Av., s. AirWb. 1662), *ahramōγīh* etc.; in MvA. **1**. 3 it means 'an apostate' or even 'a religious instructor', lit. 'one knowing the *zand*'. But as Arm. lw. it means 'Manichean', and we require here a specific religious sect and not a general term 'heretics' or the like. Again the Manicheans as dangerous rivals should be classed along with the Jews and the Christians. [9] Both yan n; in GBd. **117**. 3, 9; **118**. 1, 3, 7; **119**. 4; **144**. 1, 3, 5, 10, 12 sometimes with šn n and sometimes with gan n, in the same phrase *apārīk* (or *hamāk*) *hač ēn* . . . In PV. **4**. 43 (115) gl.; **6**. 5 (9) com.; **16**. 4 (10) com. it can be *dān* 'know': *pa ē dān* 'know as this'; but this meaning cannot be applied in the other phrase. The parallel passages have *ēvēnak* in the place of '*gān*', BdK. **64**. 16; **65**. 3, 10, 12, 18 (s. also GBd. **116**. 10, 14). This and even the mere context settles the meaning 'sort, kind, type, manner', but it cannot be said whether the word is a synonym or an ideogram. Taking it as a synonym and the diacritical mark as correct we read *gān* for the present. It cannot be *-kān*, because, though its ety. *-k-ān*, GIrPh. **1**. 280; **1** b. 178, may not be quite certain in some cases (note that Arm. lw. is *dehkan*, and not *dehakan* like *vacarakan*, and so perhaps also in other MP. words we have to distinguish *-kān* and *-ak-ān*), its use in the given sense remains to be proved, both as an independent word and as a suf. to *ēn*. Other words with the required sense are *zan*, Arm. lw., or *-zanak*, Parth. parallel to *-gōn*, and NP. *-sān*. But it is not possible that the latter is regularly corrupted

in MP.; and the fact that the specific Parth. words are not used in MPB. (which resembles the other version) does not embolden us to consider our term as an orthographical var. of *zan(ak)* — y for z and with plene a. It is very likely that *gān* is another form of *gōn*. — As regards *šun* note that it is the Paz., — in Šv. where it occurs often, to judge from three different S. equivalents for it. *-u-* can be for *-ū-*, since M⁺ n. is *šūn*. West reads *šanŏ* i. e. *šan*, whether purposely or not is not known. — Our term is used with *ē* 'this' in PV. **18. 1** ff. for Av. *uiti* 'thus', but Bartholomae, Wb. 387, is silent about it and PV. Gl. 22 gives *anāšnŏ!*

7.

1. x^{v}aršēt [i] bāmdāt apāyēt yaštan tāk nēmrōč, u ān i nēmrōč 'apāyēt yaštan tāk aδapārak[1] gāh, u ān i aδapārak[1] gāh apāyēt yaštan tāk šap.$_0$[2]

1. The morning sun must be worshipped till (i. e. before) midday, and that of midday must be worshipped till the afternoon time, and that of the afternoon time must be worshipped till night.

1 b. Whenever one is prepared for work, and afterwards[4] worships it, then it is allowed.

2. And when something happens[9] from[10] that[11], so[2] that[3] it is not possible[12] to wash[13] the hands[14], he may consider as this, that when he does not worship the sun, it waits[5]; and [when][7] the period next to it sets in, tnen the sun is to be worshipped by him; and [so] afterwards when the hands are washed, it is to be worshipped twice[15]; and when he does not worship it, except when he is not guilty for not worshipping, otherwise the sun does not become [as] worshipped.

---

1. [1] Both n for p, i. e. the later pronunciation *w*. In GBd. **159**. 1; Mx. **53**. 5 a yyp^0, as if *aδi-p*^{0} which might support the ety. of Salemann, GIrPh. **1**. 272, but it may be a clerical mistake; for *aδa-p*^{0} s. Bartholomae, ZWb. 32 n. [2] M om. [3] K yp *(-ēč-)* like p; both n after it; NP. *sīγīdan, sīčīdan,* — for *sē*^{0}, s. GIrPh. **1** b. 136. [4] That is, before he begins professional work, cf. SdBd. **55**. 5.

2. [1] K om. [2-3] K rep. *i*; and both *ka*, if it be genuine, then 'which is: when'; or reading *u ka* 'and when'; but cf. PV. quoted in **3**. 21 n. 4 where only *i* in the sense of 'so that' occurs. [4] M ad. *-u* (Davar silent), K *u*. [5] K *pāγēt*, but it also means 'remains, waits', s. **2**. 84; **3**. 17; Mx. **2**. 116; AZ. 24, 84, (here everywhere the ideogram n t^0; the other is k t^0) — and not only 'protects' as West wrongly takes. His tr. "it will stop" is not clear. The idea is that the worship is postponed, which might be better expressed by 'it remains over', but that implies the introduction of an unnamed subject. [6] K *i*. [7] Note *ā-* 'then' below and cf. n. 5. [8] K ^{0}*nīh*. [9] Thus, from 'comes up', s. NP. *rasīdan* in Vullers, though the quoted examples for 'obtingo, fio' are not decisive. [10-11] This phrase need not be connected with 'work' in 1 b, cf. PV. quoted in **3**. 21 n. 4. [12] Or 'allowed'? [13-14] In NP. *dast šustan* idiomatically means 'to relinquish, abandon', but here the lit. meaning is meant, s. Sd. **74**. 3, 4. [15] Thus, from 'again'. Is *apāč* a mistake for *dō* (or *2*) *bār* almost as in 3 n. 2?

3. xᵛaršēt, ān hūptar, ka har bār pa gāh i xᵛēš yazēt[1]; ka ēbār[2] nē yazēt, 30 stēr vinās.$_0$

4. xᵛaršēt yaštan har bār -1 tanāpuhr[2] -1[2] kirpak; u māh u ātaš hamgōnak.[1]$_0$

3. [As[3] to] the sun, that is better[4], when one worships it every time at its own period; when one does not worship it once, it is a thirty *stēr*-s sin.

4. Worshipping the sun is every time a *tanāpuhr* good work; and [as to] the moon and fire same.

5. When on account of clouds the sun is not evident, and one worships it, it is allowed.

6. And while one does not worship the sun, the good work, which they[4] do[5] that day, does not become[2] his own[3]; there are some who say thus, lo! [as to] the good work, which they do within the law of the 'good religion(ists)', his share does not take place. —

7. While they do not wash the night[5] hands, any good work, which they do, does not become their[6] own[7]; because while one does not drive away the *nasuš*, til then the coming of the *yazat*-s to his body does not take place, and when the

---

In any case this meaning and the addition are necessary for getting a connected sense from the original as it is; otherwise we must consider that something like Sd. 74. 3 — about washing the hands with earth — is missing before *u pas* . . . 'and afterwards . . .' which resembles Sd. 74. 4. This would mean that the latter part differs from the former as regards the postponement; cf. also SdBd. 55. 3, 4 which declares even the double midday prayer worthless (read the last word *na-dahand*, not *bi-d*⁰), if the morning prayer is passed over. — West's tr. gives different sense, esp. "[at] the time previous [to that] in which it occurs the sun is to be . . ." for *gāh i pēš* . . . [16] S. 2. 66 n. 4.

3. [1] K *yašt* 'it is worshipped'. [2] M *apāč*. [3-4] Or 'that sun is better'?

4. [1] M n. *muzd i* [*xᵛaršēd*] *niyāyiš u ātaš niyāyiš u māh niyāyiš pānzda sēr* 'the reward . . . is fifteen *sēr*-s', cf. Intr. 16 h. [2] M also, but Davar om.

5. [1] Both ab r.

6. [1] Also M, but Davar om. [2-3] Or 'belong (or become appropriate) [to him]', s. **6.** 1 n. 6. [4-5] This refers to others, as the foll. opinion clearly shows; otherwise we must take the phrase as Pass., 'are done [by the same person]', cf. 7.

7. [1] M a rn⁰ for a r rn⁰ (ideogram). [2] M n. *ū rā*. [3] K sep. the ideogram ya⁰

nēst, ā-š āstuvānīh[8] i pa dēn nē bavēt, u ka-š āstuvānīh i[4] pa dēn nē bavēt, ā-š kirpak-ač apar nē rasēt.$_0$ —

8. ka[1] šnūman[2] i ātaš kāmēt kartan: ā ϑ r ō pa tan ē; u ka 2, m a ṯ v ī s p a ē-

K 66 r čak[1] 10 bē ōžanišn, u-š zōhr[3] ō ātaš i vahrām dahišn.$_0$

coming of the *yazat*-s to his body is not there, then the steadfastness in the religion does not take place in him, and when the steadfastness in the religion does not take place in him, then even good work does not reach him. —

8. When one wishes to perform the propitiation of fire: [when there be one fire][6], *ā ϑ r ō* [. . .][6] (unto the fire . . .) alone [is the dedicatory formula]; and when there be two [or more], [*ā ϑ r ō* . . .][6] *m a ṯ v ī s p a ē i b y ō ā t ə r ə-b y ō* (unto the fire . . . with all the fires). This [also is evident], lo[7]! one is authorised to perform the propitiation thus everywhere[8]; there are some who say thus, lo! except[9] [when] those which are different customs have been allowed, till then one is authorised to perform [as said above][10].

9. Who[2] extinguishes a fire, by[2] him are to be 'gathered' ten fires, and by him are to be borne ten punishments, and by him are to be killed ten ants[1], and by him is to be presented animal-fat[3] to the Fire of *Vahrām*.

---

into n and a^0. [4] K om. (not M, though Davar). [5] That is, after getting up in the morning. [6-7] Or as in 6 n. 2—3. [8] M ^{0}t b n^0 for ^{0}t n b^0.

8. [1] K ad. *-š*. [2] K written above yamn. [3] Thus N. **96.** 11 and usually, s. AirWb. 314; M *ātrə*^{0}, K *ātarə*^{0}. [4] K *1*. [5] K om. [6] Cf. the parallel N. **96.** 8 ff. [7] West reads *3*, takes the prec. *2* for another phrase with *āϑrō* in Ny. **5.** 5, 6 and Sr. **1.** 9, and adds 'and' to it; this is wrong. If the word is *3*, then we must connect the passage with N. **95.** 18 ff., which however, contains extra matter. [8] Note that N. **96.** 8 gives these rules for the performance in one's house. [9-10] West, "it would be proper to perform [it] while allowable, except that of the heterodox", wrong. — In the account of the *xšnūman*-s, Riv. **531.** 4 ff., the above details are not given. Again it does not seem that the matter refers to the Ātaš Ny.; the Irani prayer book does not contain the second formula, s. Tīrandāz 166 f., 175.

9. [1] M n. *mūrč* (*č* without dots, cf. NP. *mūrča*), but *č* is changed into *γ*, hence *mūrγ* for *murγ* 'fowl, bird'. The person responsible for this change wanted to connect the statement with the practice of offering hens to the fire, which was in vogue in the near past. It was supposed to be a borrowing from the Hindu neighbours. In any case this is not meant here, though N. **114.** 21, 28 does refer to the sacrifice of fowls. [2] If *kē* be not genuine, then *ka* . . . *ā-š* 'when one . . . then by . . '. [3] West, "holy-water" which does not suit here. Even Av. *zaoϑra-* is not a liquid offering in all cases, as is generally supposed. Hertel, IIQF. **9.** 276 n., rightly takes it to be also a food offering. When *zaoϑra-* is

said to be offered up to the fire, it must be something solid; — generally it is meat, s. e. g. N. **126.** 3 ff. The name of the limb allotted to the fire and the Av. gl. on it, (P)V. **18.** 70 (138), are not clear. Its so-called traditional explanation "the fat smeared on splinters of wood which are thrown into the fire", Haug Essays[2] 378 n., is unknown to me; whereas the fat of a sheep or a goat as an offering to it is commonly spoken of, s. Bharucha, Rist. 420 n., Report 1891 p. 163. (It is not in vogue today, and hence perhaps Modi does not refer to it in his Cerem.) We read about it even in Av., N. **126.** 23 ff.: *paouru gaonahe uϑaheča vīspəm ātarəm paiti·barōiṭ,* cf. the Ptr. (Here *gaona-* is not 'hair', but 'meat' or as Bulsara 'sinewy meat'; can it not be 'entrails'? cf. S. *guṇa-* 'cord, rope'?) We have then the evidence of Catullus and of Strabo about the omentum (the most fatty part) and of a more recent traveller about the fat of the sheep's tail, s. SBE. **4.**[2] 207; — cf. also the Vedic usage, Oldenberg, Rel. Veda[2] 358 f. The only dissenting point is that Šnš. **11.** 4 allots *dil* 'heart' to the fire, whereas as the next item *čarp rōtīk* 'fatty entrails' to the *artāk fravart;* similarly PRivDd. **190.** 13 where the detail about the fire is omitted.

8.

1. vinās i hamēmārān[1] andar hamēmārān vičārišn, u ān i[2] ruvānīk andar ratān vičārišn; u ka, čē[3] dēn ratān framāyēnd, kunēnd, vinās bē šavēt; u kirpak, i[2] hač ān frāč kunēnd, ōspurrīk[7] bē rasēt.$_0$

2. ōy i[1] mark-aržān, vinās andar ratān garzišn[2], -u tan bē apaspārtan; — yut hač ratān tan bē apaspārtan[3] nē bavēt.$_0$ —

1. The sin relating to accusers[4] is to be atoned for unto the accusers, and that which is relating to the soul[5] is to be atoned for unto the spiritual leaders[6]; and when, whatever[3] the spiritual leaders of the religion command, they do, the sin[10] goes away[11]; and the good work, which they thenceforth perform, reaches[8] them fully[9].

2. [For[4]] him who is a *mark-aržān* [sinner], the sin[5] is to be expiated[2] unto the spiritual leaders, and the body is to be submitted; — [the[6] expiation] does not take place except by submitting the body [to][7] the spiritual leaders. —

---

1. [1] Sometimes written with *l* instead of *r*, and oftener so in the Paz., which can be correct, if the word is derived from Av. *ham-ərəϑa-* 'opponent', but such is not the case, s. AirWb. 1776; Bartholomae, ZSR. **1.** 21 n., connects its last part with **ē-mār* (in *pēš-ēmār* 'plaintiff', *pas-ēmār* 'defendant'), *mārīk* 'word, statement' and *āmār* 'reckoning'; (I may note that the Paz. of *mārīk* also is *mālī* in an unpublished fragment) and, ZSR. **2.** 49, shows that the general sense 'opponent' is developed from the legal one 'accused', 'accuser', etc. [2] K om. [3] Both *-č*, for which *čē* often occurs, but not so vice versa; therefore, perhaps the prec. *ka* is for *kē*. The meaning remains the same: for *kē-č* s. BdK. **66.** 8 (**72.** 13), and for *čē* in the sense of *har čē* as in NP. s. MPT. **40.** 8: *čē vāxt būδ, ač man zāδ* 'whatever was spoken, was born from me'. [4] Freely speaking, 'fellow-men', cf. *vinās i andar martomān vinās i hamēmārān, ān i apārīk vinās i ruvānīk x^{v}ānīhēt*, FrO. **30.** 9 f. Some examples of the former are given in DkM. **698.** 10 ff. (SBE. **37.** 43 ff.); PX^{v}Ap. **69.** 5 ff. and elsewhere, s. 14 n. 3—4. [5] S. n. 4 and SX^{v}Ap. **37.** 25 ff. which Bharucha totally misrepresents by inserting *maithunam* before *karoti*, and then himself wonders about it in the n. which is also otherwise incorrect. The explanation in PX^{v}Ap. **69.** 1 ff. is wrong, [6] Or 'judges', cf. Mx. **44.** 35 where *rat* is distinguished from *x^{v}atāy u pātaxšāh* 'lord and king'. [7] Not *us*^{0} as Hübschmann, ArmGr. 239, since Bartholomae, Wb. 218, gives another ety., *spar-* with or without *ava* (with *a* in Av. *a-spərənah-*), not *par-* with *us* as Horn, NpEty. 156, and more recently himself in MirM. **6.** 44. [8-9] West, "will attain completion", wrong. [10-11] For this idiom cf. *har gunāh-ē . . az-īn* (or *az vai*) *bi-šavad* 'every single sin . . goes away from him', Sd. **45.** 6 (Riv. **34.** 17 f.).

2. [1] K om. [2] As usual y rp^0; lit. 'to complain, to lament' (s. Av. *garəz-*), and then 'to confess', (which perhaps shows the manner in which the confession was made), but here 'to expiate, or atone for' is meant. [3] M ^{0}t n. [4-5] Or 'That which is a *mark-aržān* sin' (cf. 1), if *ōy i* in the sense of *ān i*. [6-7] Or 'the submitting of the body does . . . except [to]'.

3. dēnwarān[1], frahang rāδ nē naxčīr kartan xᵛēškārīh; u apārīk kas, bē ka[2] xᵛāstak 300 stēr kam, naxčīrīh[7] rāδ naxčīr nē pātaxšāy kartan.$_0$ —

4. yazišn i[1] mark-aržānān, i nē pa patīt rāδ kunēnd[2], ān yazišn dēv-yazakīh[5]; u ka ēhrpat nē dānēt, kirpak[2] i[1] yazišn ō[3] ganj i yazatān[4] šavēt; u rāmišn, i hač ān kirpak, pa mēnōk ō ruvān i[1] ōy kas dahēnd, kē pa mēnišn ēvāč ahrav būt.$_0$

5. mark-aržān, ka-š tan u xᵛāstak ēvāč ō ratān apaspārēt[1], u pa vinās i yastak[2] mēnišnīk pa patīt bavēt[3], u-š[4] ratān[5] pa[5] kār u kirpak dastowarīh dahēnd, ā-š

3. [As[3] to] the bearers of the religion, for the sake of study[4] not to hunt is a duty; and other persons, except when[2] their wealth is at[5] least[6] three[8] hundred *stēr*-s[9], are not authorised to hunt for the sake of hunting. —

4. [As to] the *yazišn* [ceremony] of *mark-aržān* ones, which they perform not by way of repentance [for sin], that *yazišn* [ceremony] is *dēv*-worship; and when the priest does not know it, the good work of the *yazišn* [ceremony] goes to the store of the *yazat*-s; and the pleasure, which [arises] from that good work, they give in the spiritual existence to the soul of that person, who was 'righteous'[6] in thought only.

5. [As to] a *mark-aržān* [sinner], when he submits his body and wealth solely to the spiritual leaders, and for the sin issued he is mentally in repentance, and

---

3. [1] Both ^{0}b a r^0, but MPT. and NP. ^{0}*var*, not ^{0}*vār*. [2] Both *kē*, if genuine 'whose'. [3-4] West, "On account of the dexterity (*farhāng*) of horsemen", wrong. [5-6] West, "less [than]" and for 'hunting' "game" in the sense of 'the spoil of chase'. If this be possible, it means that the poor are allowed to get an additional means of existence; but the contrary seems to be the fact that they are debarred from this sport of the rich. [7] M ^{0}yy for ^{0}ya. [8-9] This amount is elsewhere given as the limit of richness, PRivDd. **123.** 12 ff. (s. my article, A Pahlavī Text on Communism, in the forthcoming "Dr. J. J. Modi's Commemorative Volume"); in PV. **7.** 41 (105) com. it is 3000 which may not be a clerical mistake, — it refers to the priest and hence the difference, or it is some other limit.

4. [1] K om. [2] Davar misprint. [3] K *ōy*. [4] K ad. and strikes off *ēvāč* . . . *mark-aržān*. [5] Both (but K with yy less in the ideogram for *dēv*) as if *dēv-āzakīh*, cf. the Paz. in Mx. where, however, the original is *dēv īzakīh*, **2.** 93, 131, 172, and *dēv yazakīh*, **36.** 19. — PV. **7.** 53 f. (137, 139) like K. [6] Or 'religious'; — it is doubtful whether we can adopt the meaning of its Av. equivalent *ašavan-*, 'possessor of the light of bliss', ascertained by Hertel, IIQF. **9.** 78 etc. (s. now Beit. 9 ff.), though there are cases where the Avestic Doctrine of Fire is quite evident in Pahlavī writings, s. my review in IF. **47.** 306. If we have to adopt it, then 'through' instead of 'in'.

5. [1] M ^{0}*rt* (which can be accepted, but then *bavēt* in the next clause must be *būt*); K ^{0}*rtan*. [2] M ^{0}*t*. [3] K *būtan*. [4] K *hač-aš*, but wrongly as often in BdK. [5] M om. leaving some blank space. [6] K om. [7] Both ad. *u* 'and' or rather 'but'; if genuine, the prec. *ka* must be omitted or be followed by *bē mīrēt* 'he dies'. Then this part will be in conformity with the other accounts, (s. Intr. 14 c;

kār u kirpak, i pēš kart, apāč rasēt; u[6] ka andar 3 šapak pātifrās kunēnd[7], ō dōšax[v8] nē rasēt.

6. u hakar rat sar brītan framāyēt, pa γyāk ahrav, u satuš ō yazišn[1], u-š āmār i satuš apar nē bavēt[2].

K 67 v. **7.** u hakar nē pa patīt, tāk tan i[1] pasēn pa dōšax[v]; u pa tan i pasēn hač dōšax[v] bē āwarēnd, u har mark-aržān -1 rāδ ēvak bār sar bē brīnēnd, u-š bār i[1] apatom[3] žī[va]ndak[4] apāč kunēnd, u 3 šapak pātifrās i[1] girān bē[2] nimāyēnd[5].$_0$ —

the spiritual leaders give him right[9] over work and good work, then his work and good work, which is done before, comes back; and when they inflict punishment during the three nights [after death], he does not come to hell.

6. And if the spiritual leader orders the cutting off of his head, [he is] 'righteous' (i. e. redeemed[4]) on the spot, and the *satuš* [ceremony] is to be celebrated [for him], and the reckoning[3] [at the time] of the *satuš* [ceremony] does not take place upon him.

7. And if [he be] not in repentance, [he will be] in hell till the final existence; and at the final existence they bring him out from hell, and for every single *mark-aržān* [sin] they cut off his head once, and the last time they[6] make him alive again[7], and they inflict [for] three nights severe punishment. —

---

also PRivDd. **42.** 3 ff.; Sd. **45.** 10), which say that the repentance for sin and its atonement (punishment), either when living or during the three nights after death (and hence my addition, West's explanation is wrong,) saves one's soul from hell. But in the present case the statement about punishment is given as a condition, which means that it did not follow as a matter of course. As it is, we cannot say that *ka* expresses mere precedence, and not condition, though the author might not have meant the latter. [8] I retain *š* and do not write *ž* for it, because MPT. shows that the word was pronounced with *š*. I think that there must have been a dialectical difference between *š* and *ž* as the foll. NP. pairs show: *pažmān* (*pi*^{0}, *pu*^{0}) and *pašēmān* 'penitent', *nōž* and *nōš* 'pine tree', *ažgahān* (with numerous var.) and MP. *ašgahān* (so also the Paz.) 'indolent'; — I have noted also *ašdahāk* for *aždahāk* but without the source. [9] Or 'privilege' or 'permission', s. NP. *dastūr*, ^{0}*rī*; and cf. the purely legal sense 'attorneyship, power of attorney', ZSR. **1.** 26.

6. [1] M n for b (in the ideogram). [2] K written below a struck off *rasēt*. [3] This means here 'punishment' which is already inflicted; for various details s. Intr. 14. [4] Cf. the Str. *mukta-*, *muktāman-*; — s. 4 n. 6.

7. [1] K om. [2] K b n d. [3] As usual ap yn m (*awδom*); M n. *dīgar* 'second, another'. [4] Also M, but Davar z y n n^0. [5] Both ^{0}*yand*. [6-7] PV. **7.** 52 (136) com. says 'they throw him again in hell', and the other account is silent, but cf. its 'punishment of hell' for the other phrase, PRivDd. **42.** 9.

8. mart har čiγōn hač[3] vinās[3] pa patīt bavēt, aš patītīh[9] kār hač-aš[6] āškārakīhā u mēnišnīh[ā] pa patīt bavišn; u[2] āškārak⟨īh⟩ kār[1] ē, ku vinās, i dānēt, ku-m[4] yast[5], aš[5] nāmčištīk bē gōwišn; mēnišnīk kār ē bavēt, ku[4] pa ē mēnišn pa patīt bavēt, ku 'hač nūn frāč[5] vinās[5] nē kunom'.

9. u ān, kē pēš patīt bavēt, aš hūp bē niγōšišn[1], u-š[3] nē avēnišn[2], u-š[3] rāz bē nē barišn; čē ka, pa vinās i[4] kart, bē avēnēt[2], aδāp rāz bē barēt, ā-š havand[5] bavēt; — ast kē '3 srōšočarnām' gōwēt, u[6] ast kē ētōn gōwēt, ē! ka pa 3 srōšočarnām vinās rāz bē barēt, mark-aržān, -u[4] ast kē[4] 'havandīh[7]' gōwēt.

8. Howsoever a man be in repentance for sin, for[7] him the procedure for the act[9] of repentance is to[8] be in repentance for it openly and mentally; and the open procedure is this, that the sin about which he knows, namely, 'it has issued from me', that [sin] is to be expressly confessed; the mental procedure is this, that he should be in repentance with this thought, namely, 'from now onwards I will not commit sin'.

9. And [as to] that[8] [one], before whom the repentance takes place, by[10] him it is to be well listened to[11], and by him it is not to be overlooked[2], and by him secrets are not to be conveyed[9]; because when, as regards a committed sin, he overlooks[2] it, or conveys secrets, then his [sin] becomes equally much; — there are some who say 'three *srōšočarnām*', and there are some who say thus, lo! when as regards three *srōšočarnām* sin he conveys secrets, it is a *mark-aržān* [sin], and there are some who say '[its] equivalent'.

---

8. [1] M does not add *tāk* as Davar says. [2] K *-u* and ad. ⌣⌣⌣ to fill up the line. [3-3] M joins. [4-4] M on the margin. [5-5] K joins. [6] If *u-š*, then s. n. 7—8. [7-8] Or (s. n. 6) 'for his act of repentance there is a procedure, viz. (s. **2.** 12 n. 9) he has to'. [9] Thus, to render *-īh*, cf. **1.** 3 n. 7a; but we need not take it seriously, or it is for ^{0}*īkīh*, s. 10, 13, and Mx. **51.** 3; AVn. **65.** 9; PV. **3.** 40 (140) gl. (but in **7.** 72 (182) com. ^{0}*īh*).

9. [1] S. Intr. 3c; M writes the word not quite closely, hence West seems to have read *nēwak dahišn*, to judge from his "pious alms", s. n. 10—11. [2] Both an yn^0; if it be the same word as in Mx. **2.** 87; **15.** 37 (the more common orthography of which is ab yn, or an b yn), then *ēčin*^{0} 'turn or render into nothing, to destroy' (thus always), s. Bartholomae, WZKM. **25.** 259 f. But this meaning does not suit here. I therefore take a verb **avēn-ītan* 'not to see properly, overlook' (such formations are not rare, cf. the word just referred to) from *a-vēn* 'not [properly] seeing', — thus and hence no objection to the reading as in the case of 'invisible', cf. also NP. *nā-bīn.* 'weak-sighted, not properly seeing' (but not 'blind' which belongs to *nā-bīnā*, s. Vullers), wherein simply *a-* is replaced by *nā-* as usual, and the meaning whereof, though physical, supports our addition. West's alternative suggestion "*khunīn*^{0} boast of" is not useful, — nor quite correct, since NP. *xanīdan, xun*^{0} means 'to obtain celebrity'. [3] K *hač-aš.* [4] K om. [5] Both aan^0 as usual. [6] M om. [7] Thus in Šv.; but if ^{0}*d-aš*, then '[what is] equal to it'. — M sep. *(h)an vēš*, hence West's "much otherwise or many other [things]." If genuine, then 'the other is much' or 'that

10. āturpāt i zaratuštān[1] hāvišt -1 pa ēn kār paδtākēnīt ēstāt, ku patītīkīh patīr; u-š ē bār rāz bē burt, u-š framūt, ku hač nūn frāč pa ēn kār hakirč paδtāk ma bāš; u-š pas hač ān apar ān hāvišt apaxšīh u pašēmānīh i vas dīt, u-š aδak[8]-
M 96 v ač apar dastowar[īh] nē būt.$_0$

K 67 r **11.** ēn, ku pa ēn dastowarīh kē šāyēt? ē! ān kas šāyēt, kē dāt u[1] zand narm, u-š vinās pātifrās narm, u-š[2] x^{v}ēš-tan vīrāst[4] ēstēt; — ast kē ētōn gōwēt, ē! kē-š ēhrpatastān[3] kart ēstēt,

10. Āturpāt Zaratuštān had caused[2] a disciple to appear[2] for[3] this work[4], saying 'receive[5] the repentance (i. e. confession)'; and one time he[6] conveyed secrets[7], and [therefore] he (Āturpāt) ordered, that 'from now onwards do not ever appear for[3] this work[4]'; and after that he saw much sorrow and penitence in that disciple, and even then he (the disciple) was[9] not in his privilege [again][10].

11. [The question is] this, namely, who is allowed for this privilege[8]? [The reply is:] lo! that person is allowed, who[5] has[6] the law and[7] commentary by heart, and has sins and[7] punishment by heart, and has accomplished[4] himself; — there are some who say thus, lo! he, by whom priestly duties (studies) are performed,

---

(*ān*) is much'. [8-9] Or 'that which occurs before the repentance, by him (the sinner) it is to be well examined (or investigated, s. NP.), and by him it is not to be overlooked, and by him it is not to be carried secretly', (cf. West's tr.); but for this we require *čē pēš i* instead of *kē pēš*, and note that *rāz* means usually 'a secret' (only Horn, NpEty. 134, gives 'secret, concealed'), which can be adopted in this case also, but *rāz burtan* 'to carry secrets' means 'to tell secrets', PT. **59.** 6; above all cf. 10. [10-11] West, "except pious alms, it is well for him", wrong; s. n. 1.

10. [1] K ad. *u*, M *-u*. [2-2] Thus lit. and as below; or simply 'declared, manifested'; can we say 'appointed'? cf. "specify", Šv. [3-4] Or 'on this duty'. [5] West, "conform to", but s. n. 6—7. [6-7] West, "a secret was kept by him", but s. 9 n. 8—9, and also the context shows that he is not right. [8] K ayn, for a yyn; the former is a part of *ēnyā*, with which *aδak-aš* is often mixed up. [9-10] West, "did not become the high-priest over him", but that cannot be the idea; on the other hand, *apar* cannot be explained differently; and hence our meaning, for which s. 11. If, however, *apar* is inserted by mistake, then omit 'over him'.

11. [1] K om., even M *-u*, but s. N. **4.** 1. [2] K *hač-aš*. [3] M ad. b n, the former, if genuine, can be *1;* — *-īh* is not met with in this phrase. [4] West's "controlled" cannot be supported by or derived from 'to adorn', the usual sense of the term. This as well as *vīnārtan* has the developed sense adopted by me, e. g. in KH. 1 *ērān-vīnārt* 'of Iranian accomplishment', not "born in Ērān, produced by Iranians, sprung up from the Iranian race" as Unvala gives. [5-6] Lit. '(to) whom are'. [7] In any case (s. n. 1), the compounds are to be dissolved thus, and not as West does. [8] S. 5. n. 9.

12. u-š[1] vinās pātifrās narm, u-š[5] x^{w}ēš-tan vīrāst ēstēt[3], šāyēt.[2]

12b. u ka andar bīm, pēš i[4] žan -1 i daštān pa patīt bavēt, šāyēt.

13. nēryōsang[1] guft, ē! škaft-tom[2] sahēh, ku patītīkīh ⟨i⟩[3] pa tuvānīkīh: aš kār čē hāt, ētōn[4] ham[5]-dātastān būt hēnd, ku patīt[īk]īh, hamē[6] ka kunēnd, har čiγōn kunēnd, u pēš i[7] har kē kunēnd, — hamē[6] ka-š mēnišnīk hambun-ač ast, ā-š patīt[īk]īh[8] kart bavēt.

13b. -u[7] ka-š mark-aržān apēr vas kart ēstēt, -u[7] hač har ēvak mēnišnīk yut yut pa patīt bavēt, ā-š, hač patītīkīh[9], rāh i[7] ō dōšax^{v} nēst[11]; u[12] hakar ēvak ast, i hač-aš[14] nē pa patīt, ā-š rāh i[15] ō dōšax^{v} nē bast[13] bavēt, čē nē pa sūt i[7] ōhrmazd ēstēt.

13c. ⟨u[10]⟩ u-š[16] rat[17] tōžišn apar pātaxšāy brihēnītan[18], [u] bē vičārtan[19]; u[7] ka[-š] rat[17] tōžišn apar brihēnēt[20], u[7] bē nē vičārēt[20], pa rāst[īh][21] graw[22] pātaxšāy kartan[31].

12. and[1] has sins and punishment by heart, and has accomplished himself, is allowed.[2]

12b. And when[6] in danger, [if even] before[7] a menstruous woman one be in repentance, it is allowed.

13. Nēryōsang has said, lo! deemest thou it most astonishing, that the[23] repentance is in [one's] ability: whatever may be its procedure[24], they have been so [far] of the same opinion, that the repentance, whenever they perform it, howsoever they perform it, and before whomsoever they perform it, — whenever[25] it is mental even a little, then the repentance becomes [as] performed[26].

13b. And when one has committed very many *mark-aržān* [sins], but he is mentally in repentance for every one separately, then for him, owing to the repentance, there does not exist the path to hell; and if there is one, for which he is not in repentance, then for him the path to hell does not become [as] closed, because he stands[27] not for the benefit[28] of Ōhrmazd.

13c. And the[29] spiritual leader is authorised to ordain a retribution upon him, and [the sinner] has to remit it; and when the spiritual leader ordains a retribution upon him, and he does not remit it, he is authorised to take[31] a pawn according to rectitude[30].

---

12. [1-2] This part certainly belongs to the prec., it being a part of the second opinion, which only verbally differs about the first clause and repeats the other two. [3] M om., K ad. and blots out *hač-aš*. [4] K om. [5] M does not add *u* as Davar says. [6-7] I think that the sentence must thus be construed in the light of what follows. West, "when, in danger before"; but then what is the sense?

13. [1] M n y r yyn yan y; K ^{0}ya; but as we do not know a commentator whose name can be read from them, we take them as an inexact writing — *nēriyōšang* — for *nēryōsang* who is quoted in PV. 5. 7 (22, but missing). [2] Thus the Paz., corresponding to Av. *skapta-*; otherwise *šku*^{0} or *ško*^{0} as written here, also elsewhere more commonly. In NP. *šiga*^{0}, *šigi*^{0} and *šigu*^{0}, but the second is more common (s. Vullers), with which cf. MPT. [3] M does not omit as Davar says; if genuine, then s. n. 23—24. [4] M om. leaving some blank space. [5] K *hom* (ideogram): the same mistake as in BdK. 67. 6; Mx. 2. 51. [6] K *hamāk*. [7] K

om. [8] M ad. a ya (cf. the prec, *ā-š* and -[*īk*]*īh*, but blots out a; Davar (who says nothing about M) gives ā, i. e. *ē*. But this is used only for the Pres. Opt., s. GIrPh. 1. 315. [9] M ad. *bē;* if genuine, then 'away' and to be joined with the prec. *hač*, but that is not possible, since *hač* means here 'owing to' and not '(away) from'. West takes *bē* for *pa* "on". [10] M at least -*u*. [11] K upon blotted out *bast*, or vice versa. [12-13] K om. [14] If *u-š*, then the prec. *i* must be omitted or must be taken with *ast*, — *ast-ē*, s. 2. 45 n. 9—10. [15] Davar silent about M, — it gives *i*. [16] K *hač-aš*. [17] K ad. *u* (for the redundant -n which *rat* generally has). [18] The Paz. is -*in*-. — The word occurs for Av. *ϑwarəs-* in the sense of 'to create, to fix, to ordain', (but when it is used in the sense of 'to cut', *brītan* is its tr.). For *taš-*, the parallel term of *ϑwarəs-*, we have *tāšītan*, for which there is no ideogram; it is possible that it is the term in question, cf. Nyberg, Hb. 35. Note that he distinguishes our word from b r ya (*brih* 'predestination') which he reads "*baxš (bāγ?)*". In the absence of further information from him we cannot say more than this that *baxš- baxtan* (*baxšītan*) has another ideogram, and so also *baxt*, s. FrP. 1. 3; 21. 6. [19] Both ideogram, but M writes it above the Ir. term. Davar gives both side by side. [20] Both °*ēh*, but cf. PRivDd. 173. 8 f. where -*ēt* is similarly deformed or corrupted, as can be judged from the context and from the parallel, N. 41. 20; s. also 9. 2 n. 4. If, however, -*ēh* is genuine, then s. n. 29—30. [21] K ad. *u*; M -*u* (though not so Davar); this can account for the missing -*īh* (*u* : *i* : -*īh*). [22] Both d rn b n; s. DkM. 700. 6; 708. 21; 717. 1, 4 etc.; in our case the diacritical mark on y is to be changed; for M n. *durōγ* 'false, lie' s. Mx. 37. 33. [23-24] If *i* is to be kept (s. n. 3): '[As to] the repentance which is according to [one's] ability, its procedure may be [anything] whatever: [but]', (with which may be compared PRivDd. 43. 13 ff.). West, "of the renunciation [of sin] with energy, whatever may be its efficacy", hardly preferable. [25-26] West, "whenever [a sin] is not even mentally originating with one a renunciation should be performed by him", wrong; the matter does not refer to "imputed sin" as he explains. [27-28] West, "does not rely upon the beneficence", but *sūt* means generally 'benefit, advantage'. The idea, which occurs also in 21, need not be considered strange, cf. *pa kār u sūt i yazatān ē dārēt* 'he should consider it as the work and benefit of God', PV. 4. 45 (125) gl. [29-30] West, "it is allowable to appoint a priestly retribution (*rat tōγišn*) to fully atone for it, . . . , it is allowable to inflict [it] justly and strongly (*drūbō*)", wrong. In our tr. we are forced to take different subjects for the two verbs occurring together (note that we have a more or less similar case in 10), and to change -*ēh* into -*ēt*. If, however, only one subject is meant, and -*ēh* is genuine, then the tr. would be: 'it is authorised to undertake a retribution [in favour] of the spiritual leader and to remit it; and when thou undertakest . ., but dost not remit it, . . '. But the meaning applied to *brihēn-* is not known, s. n. 18; it is true that *apar* does not occur in PV. 3. 42 (151); N. 107. 29; 108. 29, — where the term is used in the same idiom as here —, but it cannot change the meaning from 'ordain' to 'ordain upon one's self, undertake'. [31] Thus, as if *kartan* be by mistake for *griftan* (the ideograms of both being alike), but s. Vullers; cf. also *zan kardan* or *giriftan* 'to marry'.

14. ka-š[1] vinās andar hamēmārān[2] kart ēstēt, ⟨u[3] ētōn bē šāyēt kartan, ku mērak duš-mēnišn[5] bē nē bavēt, -u[1] žan hač žanīh bē nē hilēt[6], u-š[7] andar[8] bē nē dārēt[4]⟩, ā-š pēš [i] hamēmārān ⟨u⟩ pa patīt bavišn[9]; u[1] ka nē, pēš i ratān pa patīt bavišn; u apāmīhā bē bavēt, u apām mart druvand nē kunēt, ⟨u⟩ u-š kār ē bavēt, ku pa tan i pasēn ān bē[10] hilēnd, u im šarm i[11] girān bavēt, u[1] ōy rāmišn[12] kāpēnd. ⁰₀⁰

14. When a sin is committed by one against accusers[2], ⟨and[3] it is allowed to do so, that the temporary[13] master[13] does not become evil-minded, and [the husband] does not dismiss the wife from wifehood, and he does not keep[4] her in[4],⟩ then he has to be in repentance before the accusers; and when not [possible], he has to be in repentance before the spiritual leaders; and [in the latter case][14] it becomes as debt, and debt does not make man 'wicked' (i. e. damned[15]), but its effect becomes this, that at the final existence those [accusers] leave[16] it off[17], and great shame occurs to this [sinner], and they[18] spoil[19] his pleasure.

---

14. [1] K om. [2] S. 1 n. 1. [3] So also M, though Davar *-u*. [3-4] This part can hardly belong here, as translated by West and given by Davar. At the most we can take it as a parenthetical clause referring to one (or both, s. n. 13—13) of the offences, slander or theft and adultery, belonging to the class in question, s. Sd. **42.** 2; Riv. **202.** 9 f. and perhaps the main parallel text, PRivDd. **44. 3.** [4] Both ya yt m; I take yt for yyn, a common mistake, and m (*-om* 'I..') for *ą*, for which s. **2.** 61 n. 5. We can adopt *āwarēt* 'brings', as West does, by adding yn (n) after yt; and *dahēt* 'gives', by omitting m. — 'Misery' or some such noun is missing after 'in'. [5] Both as if *duš-miyān* (s. n. 13—13); I take m yyan for m yn yan. We, like West, may change it into *duš-mēnān*, taking y for n, or supposing that y is n joined to the foll. let. (on this point s. Andreas in Lommel, ZII. **6.** 152 f.); but it is doubtful whether the form is correct, since *dušmēn* itself means 'of evil mind, inimical', s. AVn. **99.** 10 and cf. the Str. *duṣṭa-* in Šv., though it is generally used in the sense of 'enemy, adversary'. [6] M ad. *u*, Davar om. it and the foll. *u-š*. [7] K *hač-aš*; s. n. 6. [8] K partly worm-eaten; — some noun is missing after it. [9] K b š (for *bāš*). [10] M om. [11] Both *-1*. [12] M ad. n- instead of -n; or the foll. is *vikāp-* besides *k⁰*. [13-13] West and Davar think of NP. *mīra* 'master of a family'. For our meaning cf. N. p. **22.** 16 ff. (continued on **6.** 11 ff.) which deals with the subject of taking the wife of another for religious work. The taker is called *mērak*, and she *ziyānak* (p. **23.** 5, 8). Among other things we read there about her seduction by him (**6.** 18 ff.). This last point shows that the remarks of Bartholomae, ZSR. **1.** 36 f., should be modified. In any case, the idea of temporary mastership is clear in what he calls "Zwischenehe", 'intermediary (or better, temporary) wedlock'. The same idea is at the root of the other meaning also, viz. 'agent, commissioned or authorised person', KnS. **11.** 6, 8 and elsewhere, s. ZSR. **4.** 50 ff., — also in PRivDd. **46.** 6 f., i. e. in the parallel text, but there is very little to compare with our passage. We can adopt this meaning here and bring the clause in connection with the first sin referred to in n. 3—4. Can we then retain *duš-miyān* and give it the meaning 'bad or wicked intermediary'? cf. *miyānjīkīh* 'mediation' and NP. compounds with *miyān-*. — There is a third meaning of

15. vinās i[1] hamēmārān, ⟨u[2]⟩ ka-š mātak[3] vičārt, ā-š pāδak vičārt; — ast kē ētōn
M 97 v gōwēt, ē[4]! pāδak-aš[5] ō bun nēst; ast kē ētōn gōwēt, ē! ētōn čiγōn draxt -1, kē vark bē hōsānēt[8].$_0$

16. vinās [i] ruvānīk, ka pa patīt bavēt[1], ā-š apāč ēstēt; u ka bē vičārēt, ā hūp; u ka bē nē vičārēt, ā-š pa satuš pātifrās bē kunēnd, [u] ahrav.$_0$[2]

17. kay[2]-ātur-bōžēt guft, ē[1]! ān-ač i hamēmārān, ka pa patīt bavēt[3], ā-š apāč ēstēt.$_0$ —

15. [As to] the sin which is relating to accusers, when its essence[6] is atoned for, then its foundation[7] is atoned for; — there are some who say thus, lo! its foundation[7] is not in the root[9]; there are some who say thus, lo! just as a tree, which causes[8] to wither[8] its leaves.

16. [As to] the sin which is relating to the soul, when one is in repentance, then it ceases[4]; and when he atones for it, then it is good; and when he does not atone for it, then they inflict punishment upon him during [the time of] the *satuš* [ceremony], and he is 'righteous' (i. e. redeemed[3]).

17. Kay-ātur-bōžēt has said, lo! [as to] even that which is relating to accusers[2], when one is in repentance, then it ceases. —

---

mērak, viz. 'husband', by adopting which we need not add this term in the next clause. In this sense it is used when occurring along with *ziyānak*, PV. **3.** 25 (86); PRivDd. **91.** 13; GBd. **228.** 10 (where the terms are repeated for *žan u šōδ* 'wife and husband'). In KnS. **9.** 12, 17 ff. *ziyānak* is used for *žan* which occurs a little above in 4 and in **4.** 16 in connection with the same person; similarly in Šnš. quoted in **5.** 2 n. 7. Hence *mērak* also can mean 'husband', though it is here used along with *žan*. [14] This is necessary, cf. PV. **3.** 42 (151) com. [15] Cf. the Str. *durgatimat-*, *a-muktātman-* and 6 n. 4. [16-17] West, "may quite forsake him"; but this is not the idea, cf. the parallel text *ahrav-dāt bē kunēnd* 'they make a pious gift [of the amount of debt]', PRivDd. **43.** 8. [18-19] This means 'is spoiled', (lit. 'torn, cut'), Pass.; the subject is not the accusers, I believe. — The Paz. in NP. let. of 2, 4—14 in M 52 (identified by West, SBE. **5.** lxvi but not by Bartholomae, ZHss. 83 f.) is of no help to us. It contains some peculiarities of M and commits several mistakes (as in **10.** 18 n. 9). Its beginning is **2.** 107 f. — It may be added that the present subject is referred to in the summary of several *nask-s*, s. DkM. **683.** 18 ff., **696.** 16 ff., **742.** 14 ff.

15. [1] K om. [2] M also. [3] Both n k d, i. e. the ideogram of the same word but meaning 'female'; s. n. 6. [4] K corr. from *ku*. [5] Both ad. γ before š, and sep. these from *pāδak*; the mistake is due to the next word γ n. [6] Or 'principal'; West, "the female [has] atoned for it", wrong; he has not seen the mistake of the MSS., s. n. 3. [7] Or '[different] degrees'. [8] NP. *xōsīdan* (not given by Vullers, but s. **3.** 10 n. 2), *xōš(ān)īdan*; whereas *xōsānīdan*, *xīs*^{0} means 'to cause to moisten'. [9] Or 'stock'.

16. [1] M ad. *u*. [2] M $^0_0$. [3] S. 6 n. 4, etc. [4] Lit. 'stands back'.

17. [1] Both *ā*. [2] M also, but Davar k n^0. [3] M ad. *u* (in the next line).

18. narsēh[9] burz-mihr ēn vāčak sē(h) guft, ku x^{v}ētōkdat mark-aržān[1] bē kanēt; u barsum[2], ka-š pātiyāpīh čiγōn asīm[3], ā šāyēt; u[4] mart, ka[5] žan i[6] x^{v}ēš āpustan.$_0$ —

19. ka[1] vinās andar āp kunēt: [ka] vazaγ u apārīk xrafstar i āpīk ōžanēt, ā-š vičārt[2] bavēt.

19 b. u ka-č ān i āp andar ātaš vičārēh, šāyēt[3]; [u] ka[4] ān i ātaš andar āp vičārēh, šāyēt[5]; — ast kē ētōn gōwēt, ē! gazdum[6]-ač, šāyēt.$_0$

18. Narsēh[9] Burz-mihr has said these three sayings, that the *x^{v}ētōkdat*[10] extirpates a *mark-aržān* [sin]; and [as to] the *barsum*, when its[7] purification is like silver[3], then it is allowed[8]; and [as to] the man, when his own wife is pregnant. —

19. When one commits a sin against water: when he kills frogs[7] and other noxious creatures belonging to water, then it becomes [as] atoned for.

19 b. And even when thou atonest unto fire for that [sin] which is [against] water, it is allowed; and when thou atonest unto water for that [sin] which is [against] fire, it is allowed; — there[8] are some who say thus, lo! [when one kills] even scorpions, it is allowed[9].

---

18. [1] Both, but West ^{0}*ānān*. [2] K ^{0}*sam*. [3] Both a yym; this defective writing occurs in our text for *ēsm* 'fire-wood', but this does not suit the context, s. n. 7—8. [4] M om. [5] M ad. *-š*. [6] K om. [7-8] West, "their ablution is [such] as [renders them] improper for firewood", wrong. Davar seems to follow him inasmuch as he joins *ā* with the foll., as if *a-š*^{0}, but the MSS. are clear, and moreover, the latter form (though commonly accepted by Bulsara in N.) is not certain. [9] S **1.** 3 n. 10. [10] Riv. **202.** 5 ff., etc. says the same thing, and adds that the *yazišn* ceremony is of no effect (but cf. above 4). The connection between the two terms is perhaps not without significance, esp. in Riv. **308.** 8 f.; cf. Šnš. **18.** 3f., where our term occurs along with *gāhānbār* and other ceremonies. Still, its meaning may be as usual, 'next-of-kin marriage' which is adopted in the NP. version of this piece, s. SBE. **5.** 389 n. 4; ZHss. 36; cf. also the parallel PRivDd. **169.** 9 ff.

19. [1] Both *kē* which may be genuine but s. 20. [2] K ^{0}*rēt*, but seems to be corrected. [3] M om. leaving some blank space. [4] K om. [5] K ad. $_0$. [6] Thus the Paz. and the Arm. transcription, s. ArmGr. 94 (where, however, also *garzang* for *karčang* 'cancer'). In Mx. **2.** 191; AVn. **37.** 3 the orthography is yp instead of y z, but still, the pronunciation need not be *gaž*^{0}, if it is connected with *gazītan* (yp^{0}) 'to bite, to sting', — that is, if its lit. meaning is 'that which has a stinging tail'. (NP. *gažīdan* in Vullers cannot be genuine, cf. Afg. *ăγzai* 'thorn', etc.) Our term reads in NP. as *kaž*^{0}, *gaž*^{0} (Vullers does not give *gaz*^{0}, though Horn, NpEty. No. 855, does) which is due to the wrong ety. which runs: *zī-rā ki dum-aš kaǰ mī-bāšad* '[it is so called] from this reason that its tail is crooked'. [7] West, "lizard", wrong even if that also be the meaning of *vazaγ*; — Steingass applies it to it, but Vullers only to *vazaγa*, which, moreover, is an Arab. lw., s. Horn, NpEty. 242. [8-9] Apparently this explanation refers to the last statement, and so we can say that to kill scorpions meant to atone for a sin against fire.

M 97 r **20.** u ka-š vināš ē tanāpuhr kart ēstēt[1]: [ka] drōn -1[2] bē[3] yazēt, aδāp kirpak 1 tanā-
K 68 r puhr bē kunēt, ā-š vičārt bavēt.$_0$

21. ka mark-aržān -1 kart ēstēt, u mēnišnīk pa patīt bavēt, u rat dānēt, ku ⟨ka-š⟩ tan bē apāyēt dātan, ā bē dahēt; — pātaxšāy, ka-š[1] bē ōžanēt, hat! čē pa sūt i ōhrmazd ēstēt.

22. hač-ač ⟨i⟩ mang[5] i[1] yazəmna[2] kaṯ nā[3] hakaṯ paδtāk: ⟨u⟩ u-š dast pa pātiyāp ō bavēt, nikān[4] kirpak hamāk ō bavēt, ⟨u⟩ u-š yazišn i[3] yazatān ō[3] kunišn[3].$_0$

23. āturpāt[1] i māraspandān guft, ku-š pa yazišn i yazatān[2] kartan hakirč ān žamān[3] tuxšāktar apāyēt būtan[9], ka[4] mark-aržān 1- čand kart ēstēt.

20. And when one has committed one *tanāpuhr* sin: when he offers up one *drōn* (cake), or performs one *tanāpuhr* good work, then it becomes [as] atoned for.

21. When he has committed a *mark-aržān* [sin], and he is mentally in repentance, and the spiritual leader knows, that it is necessary to give up the body, then[2] he gives it up[3]; — it is authorised, when he kills him, lo! because he[4] stands[5] for the benefit of Ōhrmazd.

22. Moreover from the rule[5] of *yazəmna kaṯ nā hakaṯ* (worshipping whether — or when — a man at once . . .) it is evident: and his[6] hands become as purified[7], concealed[4] good work all accrues, and the *yazišn* [ceremony in honour] of God is to be performed for him.

23. Atūrpāt Māraspandān has said, that it is necessary for one to become more diligent in performing the *yazišn* [ceremony in honour] of God always [at] that time, when several *mark-aržān* [sins] are committed.

---

20. [1] Davar wrong about M; — moreover it ad. *u* which may be for redundant -n; in any case *ka* is necessary, though it is omitted in 19 also. [2] K om. [3] M also, but Davar om.; K rep.

21. [1] M om. [2-3] West, "he [will] not give it up", wrong; he might have taken *ā* as *a*-, s. 18 n. 7—8. [4-5] Or 'it is'; — cf. 13 n. 27—28.

22. [1] M om. [2] Both i z i mn. [3] K om. [4] Or *u- kān* [*i*] 'and the mine of' (cf. West and Davar) or *u kār u* 'and the work and', but all this is unnecessary; — for the idea cf. 5. [5] NP. *mang*. [6-7] West, "it becomes his through [ceremonial] ablution of the hands", wrong. In this context the clause can only mean that the sinner is redeemed, cf. 6, also for the last clause. I do not think that the reason for all this is given in 23, as declared by West.

23. [1] Davar misprint. [1-2] K om. [3] K om. [4] Both *ku*. [5] K ad. *u*; M -*u*. [6-6] So also West. It may be for [*pa*] p^0 [*u*] *dāt*^{0} or p^0- *γyān*[*īhā u*] d^0 'with full heart and according to law'. [7-8] M *bahr* 'lot, portion'. [9] M ^{0}t n. [10] Or om. and s. n. 11—12. [11-12] Or 'all sins are authorised (i. e. admissible) in repentance'; cf. West. — It is not certain whether this clause stands by itself, or is connected with the next. [13] West's "path" is here wrong, s. 2. 120 n. 4.

23 b. pa patīt[5] vinās hamāk [vičārtan[10]] pātaxšāy, ka purr-γyān-dātīhā[6] vičārēh; ē! ka hač bun [i] vinās pa patīt bavēt, hač vinās, ⟨i⟩ i-š vinās pa patīt būt, bavēt; čē ōhrmazd dām i xᵛēš, bē pa rāh i apatīt[īk]īh, tāk, pa ganāk[14] mēnūk bē[7] nē[8] hilēt.$_0$

23 b. It[11] is authorised [to atone for] all sins through repentance[12], when thou atonest with[6] full sacrifice of life[6]; lo! when one is in repentance for the root of sin, he becomes [free] from [that] sin, for which sin he was in repentance; because, except on account[13] of non-repentance, till then, Ōhrmazd does not leave His own creatures unto the 'Evil Spirit'.

---

[14] Thus the Paz.; and though it cannot be explained etymologically, I prefer it to any of the numerous conjectures by modern scholars, s. Bartholomae, MirM. 1. 18. He has tried there (22 ff.) to establish *dawāk* 'deceiving' as the reading and meaning of our term; but the question remains how the mistake can occur in a case like this.

9.

1. hāsr i aγryak[1] [i] rōč-šapān pa 12 bahr ē bahr, u[2] hāsr i kas pa 18 bahr ē bahr[3].$_0$ —

2. āsrōk ka[1] pa uzd[ē]hīkīh[6] bē vitīrēt, pa[2] girān[3] dāšt ēstēt[4]; u ast dastowar, kē yut-dātastān[5]: ast kē 'šahr i an-ērān' gōwēt.$_0$

1. The longest *hāsr* relating[4] to day and night[5] is one part in twelve parts, and the short *hāsr* is one part in eighteen parts. —

2. When[1] a priest passes away in a foreign[6] place[6], it is[4] considered as grievous[3]; — and there are authorities, who are of different opinions[5] [about the word 'foreign place']: there are some who say, 'it is a non-Ērānian country'.[7]

---

1. [1] Both ^{0}yb. [2-3] M om. [4-5] For this meaning and for the whole s. Intr. 15.

2. [1] Both *kē*; if genuine, then '[As to] a priest who'. [2] M ad. *u*. [3] Both g^0, and hence M too, with its prec. *u* or *v-*, does not suggest *vērān* "desolate", as taken by West (and Davar who is silent about M). [4] Both ^{0}*ēh* (s. 8. 13 n. 20); if genuine, then 'thou hast'. [5] As only one opinion follows, we may conclude that the part relating to the other opinion is missing here, or that the word is to be read *šah*[*r*]*astān*. If the latter, then '. . who [say] 'it is a different city', [and] . . '. N. 11. 20 ff. shows that *uzdēhīkīh* can have such a meaning. In any case, the foll. 'non-Ērānian' suggests that the term referred to a different but Ērānian country according to others. — West is wrong in taking this part as referring to *vērān* (s. n. 3): he translates the last clause thus, "[he is as] a non-Iranian country". [6-6] West's "idolatry (*aūzdāyakīh*)" is wrong; (and "passes over into idolatry" more so, since *vitīr* is used generally in the sense of 'to die'). The 'defective' orthography (it occurs also in the first two cases below: can the term be simply *uzdahīkīh*?) shows that it is not to be connected with *uzdēs* 'idol', and for 'idolatry' we have *uzdēs parastišnīh*, Mx. 2. 93, or *uzdēs parastīh*, PV. 1. 10 (36) gl. — Further, wherever our term occurs, it is in connection with something unhappy or miserable, and hence 'exile, banishment' may be meant here, s. KnS. 9. 5; Jn. 2. 12; DkM. 710. 8 (here perhaps not); 790. 15 (s. n. 7); MPT. and Sog. [7] A parallel passage, DkM. 790. 13 ff., throws light: *apar garzišn i mēnūk i gāhān: ⟨ka gāhān⟩ ka ēhrpat u dastowar pa uzdēhīkīh bē vitīrēt, u karp i ān mart apāč ō x^{v}ēš bum nē rasēt; ān rāδ: čē ⟨čē⟩ hač ān bē, andar ān bum zāyišn u stahmakīh i ahramōγān bavēt.* 'On the lament of the Spirit of the *Gāϑā*-s: [it takes place] when a priest or a high-priest passes away in a foreign place (or in banishment), and the body of that man does not come (i. e. is not brought) back to his own land; for this [reason]: because from that onwards, in that land the birth and oppression of heretics takes place'. If banishment is really meant, then we have here a remnant of the quarrel between the state and the church; otherwise the idea can be simply about the necessity of performing funeral ceremonies for a priest in his native place; — cf. 3 which too must be considered incomplete.

3. paδtāk, ku ka zaratuštotom -l pa uzd[ē]hīkīh bē vitīrēt, ahramōγ[1] -l andar ān mān bē zāyēt; u ēn girānīh ēvāč pa[3] zaratuštotom[4] guft ēstēt[2].$_0$ —

4. āstuvān[1] būtan i pa vēh-dēnī[h][2] rāδ, apāk ēhrpatān[3] -u dastowarān ō patkārišn[1]; u ka nē patkārēt, pātaxšāy[4], ka-š nē čāšēt[5].$_0$ —

5. yazišn i[1] andar mān i[1] ātašān kunēnd, ka nē hūp, ō[2] dēvān nē rasēt; u[3] ān i apārīk γyāk kunēnd, ka nē hūp kunēnd, ō dēvān rasēt; čē yazišn miyānak[4] nē bavēt, — aδāp ō yazatān aδāp ō dēvān rasēt. —

6. mart -l ka[1] nihātak -l nihāt ēstēt, u pa hu-tuvānīh i ōy bē[2] ōftēt[3], tāk tan i[4] pasēn ān kirpak ō rawēt.$_0$ —

7. kas kē andar kaštīk bē mīrēt[2], bīm i patvēšak[3] rāδ ō āp pātaxšāy awgandan; ast kē ētōn gōwēt, ē[1]! daxmak-aš x^{v}at āp.$_0$ —

3. It is evident, that when a 'supreme [follower of] Zaratušt' passes away in a foreign place, a heretic takes birth in that house; and this grievousness is said only as regards a 'supreme [follower of] Zaratušt'.[5] —

4. For becoming steadfast in the 'good religion', it is to be discussed with religious teachers and authorities; and when one does not discuss, [any of them] is authorised, when he does not instruct him.[6] —

5. The *yazišn* [ceremony] which they perform in the house of Fire, [even] when not well, does not reach unto the *dēv*-s; and that which they perform [in] other places, when they do not perform it well, reaches unto the *dēv*-s; because[5] the medium of the *yazišn* [ceremony] is not there[6], — [hence] it reaches either unto the *yazat*-s or unto the *dēv*-s, [as the case may be]. —

6. When a man has established[5] a custom[6], and it[2] happens[3] through his good ability, till the final existence that good work continues. —

7. [As to] a person who dies in a ship, one is authorised to throw him into the water for fear of contamination; there are some who say thus, lo! his *daxmak* is water itself. —

---

3. [1] For *-hr-* s. 9. 11 n. 4. [1-2] Recopied in K by a later hand, as the original has faded, but its traces are still to be seen. [3] K ad. k (on the original z?); and *ān* (z k) on the margin, both by a later hand; [4] Both ^{0}*oktom*. [5] S. 2 n. 7.

4. [1-1] S. 3 n. 1—2. [2] S. PV. 3. 42 (151) com. [3] K a r^0, also P; M only *-ān* which is again joined with the prec. [4] M n. *šāyad*. [5] M also, but Davar *čāšt*. [6] S. N. 21. 21 ff. for different views on this subject.

5. [1] K om. [2] K γ n. [3] M om. [4] M has not the gl. *xāna* as Davar says. [5-6] Also West gives the same idea; but if it is wrong, then, taking *čē* = *har čē*, 'whichever *yazišn* is not middling' (reaches..). In this case we need not add anything.

6. [1] Both *kē*. [2-3] M *pa patīt* 'in repentance'; in both p t yt is common, and the mistake is on the part of M, very probably owing to the frequent occurrence of the phrase *pa patīt*, s. n. 5—6. [4] M om. [5-6] West "relinquished a [bad] habit", thus giving sense to the reading of M (s. n. 2—3); for our meaning cf. NP. *āyīn nihādan*.

7. [1] Both *ā*, i. e. yy for yyy. [2] M ad. *u*; K *-u*. [3] S. 2. 7 n. 1.

8. ēn-ač[1], ku[2] pa tārīkīh xᵛarišn nē pātaxšāy[3] xᵛartan, čē ka[4] pa tārīkīh xᵛarišn xᵛarēt, ā-š dēv[5] u[6] druž xrat u[7] xᵛarrah[8] 3- ēvak -1 bē aparēt[9]; u hač ān γyāk paδtāk, i ōhrmazd ō zaratušt guft, ku ma pas hač rōšnīh[10] frāč rasišnīh, [u] apāv[11] šust dast, frāč xᵛarāt harvat[ā]t[12] u amurt[ā]t[12] āp u urvar[13]; čē hakar pas hač rōšnīh[14] frāč rasišnīh, [u] apāv[11] šust dast, frāč xᵛarēh harvat[ā]t[12] u amurt[ā]t[12]
M 99 v āp u urvar, bē hač tō druž aparēt 2- srišūtak ān i āsnīt[15] xrat bavēt; i: ka bē aparēt[16], xᵛarrah u dēn, kē ō tō ān rōč ō-baxt[17] bavēt, — ku xᵛēškārīh [i] ē rōč — apār bavēt.$_0$ —

8. This too [is evident], that it is not authorised to eat food in darkness, because when one eats food in darkness, then the *dēv* and *druž* rob one-third [of[his understanding and *xᵛarrah* (physical fire of the heart)[18]; and it is evident from that passage, which Ōhrmazd spoke to Zaratušt, namely: 'after the departure of light, and with unwashed[19] hands, let him not eat the water and vegetables of Harvatāt and Amurtāt; because if after the departure of light, and with unwashed hands, thou eatest the water and vegetables of Harvatāt and Amurtāt, away from thee robs the *druž* two-thirds [of] that which is innate understanding; which[20] [means]: when she robs it, the *xᵛarrah* and *dēn* (the physical and psychical fire of the heart)[18], which is destined[17] unto thee for that day, — that is, thy own activity of this day — is lost'[21]. —

---

8. [1] M *čē*. [2] Both *ka*. [3] M n. *šāyad*. [4] Both *kē* (Davar om.), but cf. *ā-š* 'then . . '. [5] M yy too many (but not as Davar). [6] M om. [7] K om. [8] Or ^{0}*ēh*, s. MirM. **5.** 20 n. 1. [9] Davar yyn^0 (s. FrP. **21.** 10) instead of yan^0 (ideogram) everywhere. The Paz. is also *apur*-(!); for *awar*-, s. AirWb. 942. n. 35. [10] Both ^{0}*īk*. [11] Both ap n ap. [12] Both ^{0}yt (instead of ^{0}t at) as usual; the former, it can be said, represents the defective writing and the change of t into d. Marquart, Untersuchungen zur Geschichte von Eran **2.** 215, says that yt stands for t and that the reading is *harōt* and *amurt* respectively from the OP. Nominative, and adds that the angels *hārūt* and *mārūt* are derived from them [13] M ad. and strikes off *bē hač*. [14] K ^{0}*īk*. [15] Both a yyyn yt; *āsn*, met with in PY. **25.** 6 (18), and Mx. **1.** 49; **2.** 195; **57.** 4—5 (West quotes *āsnūtak* ^{0}*nītak* from other sources, the original text was not known then), is the correct word; the other is the tr. of Av. ^{2}*ā-sna-* 'successful, effectual, efficient', and hence the confusion. [16] K ad. *u*. [17] Or *hu-baxt* or *han-baxt*; if wrong, the word must have the same sense as *apār* in the next clause, (cf. S. *bhañj-* 'to break') the whole of which, in that case, should be taken as the gl., and *kē ō tō ān rōč* should be rendered 'which are for thee that day'. [18] Thus, according to Hertel, IIQF. **6.** 184. [19] Thus, for *apāv šust*, *a*^{0}, **apāva-* 'unclean'; *pāv* and *avāv* (= *apāv*) are commonly used by the Parsis in ritual matters. [20-21] West, "which, when . . . , is the glory . . . , so that . . . becomes vexation", wrong at least in the last part; — *apār būtan* always means 'to be lost or robbed', and is connected with *apurtan*, s. Bartholomae, ZSR. **5.** 8, — not with NP. *āvār(a)*, s. Hübschmann PSt. 9.

9. pa panjom frakart i[3] pāžōn[1] γyāk -1 paδtāk, ku ēn yazišn i yazatān čahār ēvēnak daxšak gōwēt:$_0$ ēvak ān[2], kē apastāk rāst u[3] mart vat;$_0$ ditīkar ān, kē apastāk zaspān[4] u[3] mart nēwak;$_0$ sitīkar ān, kē apastāk rāst u[3] mart nēwak;$_0$ tasom ān, kē apastāk zaspān[4] u[3] mart vat.$_0$

10. kē apastāk rāst u mart vat, amahraspand[1] bē rasēnd u[2] bē niγōšēnd u nē patīrēnd;$_0$ kē apastāk zaspān[9] u[2] mart nēwak, amahraspandān[3] u yazat bē rasēnd[4] u nē niγōšēnd u bē patīrēnd; kē apastāk rāst u mart nēwak, amahraspandān[1] u yazat bē[5] rasēnd[6] u[8] ⟨bē[2] āyēnd[7]⟩ bē niγōšēnd u bē patīrēnd;$_0$ kē apastāk zaspān[9] u[2] mart vat, nē rasēnd u nē niγōšēnd[10] u nē patīrēnd.[11]$_0$

9. In the fifth chapter of the *Pāžōn*[1] a passage is evident, namely: one mentions these four kinds of characteristics of the *yazišn* [ceremony in honour] of God: one is that, of which the Apastāk is correct and the man bad; the second is that, of which the Apastāk is inexact and the man good; the third is that, of which the Apastāk is correct and the man good; the fourth is that, of which the Apastāk is inexact and the man bad.

10. [That,] of which the Apastāk is correct and the man bad, the *Amahraspand*-s do come to and do hear but do not accept; of which the Apastāk is inexact and the man good, the *Amahraspand*-s and *Yazat*-s do come to but do not hear and still accept; of which the Apastāk is correct and the man good, the *Amahraspand*-s and *Yazat*-s do come to and do hear and do accept; of which the Apastāk is inexact and the man bad, they do not come to and do not hear and do not accept.[11]

---

9. [1] So also M, Davar p n^0. — As above in PPGl. 22; but the reading uncertain, because we do not know the lit. meaning; cf. *pāzūn* or ^{0}*zōn*, Riv. **3.** 13; *pājam*, Riv. **5.** 4; **8.** 8; **10.** 11; *pāžak* (*k* may be *ī* etc.), DkM. **678.** 5; **682.** 2. — S. 10 n. 11. [2] K *ēn*. [3] K om., (even in M *-u*). [4] K *huzvān* 'tongue'; for the reading s. the Paz. in Šv., but it can be wrong, because the ligature sp can be y p, as once in M and J 2. 697, cf. PY. **65.** 9 (**64.** 35). West reads *zīfānŏ*, comparing NP. *zīf* which, however, means 'sin, churlishness, inhuman, pitch' (of music?). If at all, one may connect it with NP. *zēb*, *zībā*(*n*), because of *zībā kardan* 'to adorn one's business (ironically), to finish off', and because of *zībān* 'decked', (provided the latter means 'concealed' or the like). Unfortunately N. **54.** ff., dealing with the correct and incorrect recitation of the Avesta, does not contain the word in question, but *tanbān* (cf. NP. *tanbīdan* 'to be restless, to tremble') is given for Av. *arastra-* 'irregular', s. AirWb. 188 where *tan*^{0} is omitted.

10. [1] M *amašōs*^{0} (cf. ^{0}*šās*^{0}, FrP. **1.** 1) as is usual with it, s. AVn. **3.** 21 n. For *-hr-* s. 11 n. 4. [2] K om. [3] Both *amašōs*^{0}. [4-5] K om. [6] K *āyēnd*.. [7] K *rasēnd*. [8] M om. [9] S. 9 n. 4. [10] M ^{0}*šand*. [11] These passages are not to be traced in the extant summary of the *nask* given in DkM. **682.** ff.; but they may have been connected with *vičītan i mart ō zōtīh* [*u*] *rāϑwīkīh* (ϑw = sp) 'the selecting of persons for the office of the *zōt* and [for] the office of the *rāϑwī*', DkM. **682.** 17 f. We may as well compare the foll. from the next *nask: nīrang u awzār i andar īzišn i yazatān; gāh u x^{v}ēškārīh i zōtān -u rāϑwīkān* (ϑw = sp) *andar*

11. pa hamāk yazišn, pa bun[5] i[5] yazišn u bun i drōn yazatān u ahravān[4] fravahr[4] bē ō yazišn nivēδēnišn[1].

11. In every *yazišn* [ceremony], at the beginning[2] of the *yazišn* [ceremony] and [at[3]] the beginning of the *drōn* [*yašt*[3]] the *yazat*-s and the *fravahr*-s of the 'righteous' are to be invited to the *yazišn* [ceremony].

īzišn -ē 'the *nīrang* and implements in the worship of the *yazat*-s; the place and duties of *zōt*-s and *rāϑwī*-s in the *yazišn* [ceremony]', DkM. **685.** 3 ff. — A comparatively modern Paz. of the said passages is quoted in Riv. II. **20.** 10 ff. from *kitāb i avastā u zand* 'a (or the) book of A. and Z.'. If we are to take this name seriously, it can refer only to an Avesta *nask* with its Pahlavī version. This, however, does not necessarily mean that the said *nask* was extant in the days of Kāmdīn Šāpūr, from whose Rivāyat this portion is taken. It is possible that our text is the source for this item also, as it is for various other details in Riv. The foll. points from this Paz. may be noted: — The *nask* (s. 9 n. 1) is called *pāǰənṭ*, but *-ṭ* can be an easy mistake due to the word *pāzand*, and *-ǰən* can be also *-žōn*, etc. (cf. ZAirWb. 56 f.). The doubtful word (s. 9 n. 4) is read *zuvạn* and *zuwạn*, both once in each of the passages. And the redundant phrase *bē āyēnd* does not occur here. (Modi passes over this passage; Rosenberg takes it as referring to V. which is quoted a little above.) The item recurs in M 52 and M 55 in NP. let., s. SBE. **5.** lxvi, and ZHss. 170 where Bartholomae has not seen its relation to our text, and hence has left the name *pāzand*; the other term is *zasfān*.

11. [1] Thus AirWb. 1318 n. 18, but *niv*[*ē*]*hēn*[0], if the doubtful words in n. 15 and 16 are to be read *uzv*[*ē*]*h*[0] and *patv*[*ē*]*h*[0], cf. Horn NpEty. 70. — As to the meaning s. the ety., and the Str. *nimantrayāmi* which suits here better than Bartholomae's 'dedicate'. [2] This can hardly be the MP. *xšnūman* 'propitiatory (or dedicatory) formula' after Y. **0.** 3, since its contents do not fully justify the reference to the *yazat*-s, s. YbN. 1, 3 ff. Moreover note that the introduction proper begins at Y. **0.** 4; and hence the said 'beginning' refers to Y. **0.** 8—12, which portion is given as the *xšnūman*, s. YbN. 6, and which contains invocations to *yazat*-s, etc. Also in the description of this ceremony in N. **29.** 27 ff., **58.** 29 ff. only this part is called (*x*)*šnūman*. [3-3] As far as the *yazišn* ceremony is concerned there is no such ritual instruction at the beginning of or elsewhere in this part (Y. **3**—8); but if there is no mistake the reference can well be to Y. **3.** 1—4, to judge from the contents. In the *drōn* ceremony the name of a particular *yazat* or a *fravaši* is added after *xšnūmaine* (in Y. **3.** 1, etc.), s. Haug, Essays[2] 408; and therefore the reference is either to this ceremony (the phrase *pa har drōn* 'in every *drōn* [ceremony]' could have been left out, or omitted by mistake), or it is here applied to the *yazišn* ceremony, the former being a part of the latter. [4] In the Paz., *-hr-* of these and other words, that have *-š-* (*-rt-*) in Av., is replaced by *-š-*. This fact, however, does not disprove the existence of some other dialect with *-hr-*, because, as a rule, dialect words are avoided in the Paz., cf. *āyēn* for *ēvēnak*, *čahārom* for *tasom*, etc. But even Junker, AwAlph. 96 ff., says that whenever *-hr-* occurs for Av. *-š-* (*-rt-*), the former is to be

12. ka-šān[1] xᵛānēnd, yazišn bē patīrēnd; u ka-šān nē xᵛānēnd, pa staomi[2] bun[3] hamāk ahravān fravahr[4] bē xᵛānišn; u ka nē, tāk ō[5] frašōčarəϑrąm saošyantąm[6] pāyēnd[7], u ka-šān (ān)ōδ bē xᵛānēnd, yazišn bē patīrēnd; u ka nē, tāk ō[8] vīspå fravašayō ašaonąm[9] yaz∘[10] bē pāyēnd, ka[-šān] (ān)ōδ[11] bē[12] xᵛānēnd,

12. When they invoke them[1], they accept the *yazišn* [ceremony]; and when they do not invoke them [there], at the beginning of the *staomi*[2] (I praise) [chapter] all the *fravahr*-s of the 'righteous' are to be invoked; and when not, they wait up to *frašōčarəϑrąm saošyantąm*[6] (of the renovators, of the *saošyant*-s), and when they invoke them there, they accept the *yazišn* [ceremony]; and when not, they wait up to *vīspå fravašayō ašaonąm yaz∘*[10] (we worship

---

pronounced like the latter, and not *-hr-*, because *-rt-* does not become *-hr-* in any dialect. He adds that if *-hr-* occurs in such words even in MPT., then we are to see therein the Zoroastrian influence. This is perhaps not quite satisfactory. Moreover, he does not take into account that there occurs the Paz. *fravah(a)r* also (in NP. let. frhvhr, the first h being for a short vowel as often), s. Tīrandāz 266 ff., 276 ff., 370 f. (= PazT. **212**. 20, **213**. 2 f.), 375. In Riv. II. **14**. 15; **19**. 13; Sd. **13**. 3; SdBd. **51**. 1, 3; **95**. 1, 3 it is written frvhr (beside *fravašīn* (pl.) in SdBd. **53**. 1, 2, 4, 6); and the Parsis always use *farōhar* (which is not to be put, as is done by Nöldeke, PSt. 39, in the same category as *anhumā* for *ōhrmazd*, and the like which existed only for the few priests who busied themselves with Pahlavī, and that too as a sort of help to memory and nothing more), — *farōšī* or *farōxšī* (Riv. II. **12**. 8, 10; **16**. 1) only for the corresponding ceremony. Cf. also NP. *furūhar* 'essence (*gōhar*)', though it might not be occurring in some other work besides the Desātīr, and *farvar*, the source of which is not recorded. — Whatever may be the value of all this, I adhere to the usual reading in this and similar cases as declared in the Intr. 7. [5-5] M also thus, and not *bē* as Davar says.

12. [1] M sep., hence *yazatān* which West adopts, but that spoils the sense; note that what follows refers to the *fravaši*-s only, and therefore the *yazat*-s cannot be adopted here, unless something is missing after the next clause. [2] Both *stāu*⁰. — Parsi priests do not designate the chapters of Y. by their consecutive numbers but by their first word or words: this practice is to be found sometimes in MSS. also, s. J 2. 347. (Hence it is that chapters are not numbered in Y. MSS., whereas they are in V. MSS.) Thus, Y. **26**. 1 (and not e. g. Y. **17**. 18) is meant here, which, as far as the MSS. are concerned, begins with *st*⁰. Note that it is wholly devoted to the *fravaši*-s; and what precedes is the *xšnūman* portion. — West thinks of Y. **0**. 6, but that would be a strange manner of pointing out the *xšnūman* at the beginning (Y. **0**. 8—12, s. 11 n. 2), if this is meant at all. [3] K ad. the lower half of the usual punctuation 'o', which can hardly be compared with its usual *i*. Even if it be *i* (as in Av. words), it is added by mistake, and not for changing the meaning thus: 'at *st*⁰, the beginning of all . . . ', as West says. [4] S. 11 n. 4. [5] K corr. from *tāk*. [6] Y. **26**. 6, after which the dead are specially referred to. (Davar has two misprints in *fra*⁰.) [7] M blank space. [8] K om. [9] Both *ašāunąm*. [10] K *yaza∘*. — It is Y.

yazišn bē[12] patīrēnd; u[13] ka[14] nē, tāk ō tāsčā yaz∘[15] ašəm[16] vohū[16] 3-
K 70 v kānak, u[13] dāmanąm$_0$ 2 bār aoxtō-nāmanō[17], u[18] ašāṯ[19] hača, u[18]
yātumanahe ǰasaiti[20], — ka-šān[12] x^{v}ānēnd, bē[12] patīrēnd; u ka nē, ē
M 100 v nēzak bālāk ul šavēnd, u[8] bē ēstēnd,

all the *fravaši*-s of the 'righteous'), when they[12] invoke them there, they[12] accept the *yazišn* [ceremony]; and when not, up to *tāsčā yaz∘*[15] (we worship them) *ašəm vohū* [formula] three times, and *dāmanąm* (creatures), two times *aoxtō-nāmanō* (of the invoked name), and *ašāṯ hača* (through *aša*), and *yātumanahe ǰasaiti*[20] (he goes [into the punishment] of one practising sorcery), — when they invoke them, they accept it; and when not, they go up the height of a spear, and stop,

---

26. 11 where the dead are again referred to; and in another connection we are told to remember here all in 'prayer' *ba-vāǰ yād i tamām kardan*, Riv. **544.** 15. [11] M joins t (of the ideogram) to the prec., hence *-t čē*. [12] K ad. *nē* 'do not'. [13] M om. [14] M *kē*. [15] K *y∘*; M ad. *u*, — s. n. 20. [16] K *ašemvohūk*. [17] M om. *nā⁰*; s. n. 20. [18] Both in Av. let. [19] K ad. *u* in Av. let.; s. n. 20. [20] M *⁰te*. — The way, in which these later catchwords are given, is different from what precedes; from this and other reasons mentioned below it seems that they refer only to the *drōn* ceremony, cf. 11 n. 3—3. The chief reason is that the last phrase occurs only in Y. **8.** 4 where the *zōt* tastes the *drōn*, s. YbN. 46; and since the prec. phrases or catchwords are closely connected with it, they too relate to the same ceremony. Though they are too meagre to enable us to determine their respective places, we can do so by comparing PRivDd. **181.** 1 ff. and by taking into account Riv. **541.** 17 ff. The latter gives the *xšnūman i darūn*, the first one being '*xšnūmaine*' *i mīnō nāvar u ba-sipās i ardā farvaš* '. . . and in praise of the *fravaši*-s of the righteous' with which we are here concerned. The said passage of PRivDd. occurs in the chapter called "extracts" from N., but it is not to be found in the latter work, cf. however, below. (There are several dislocations and differences in the corresponding parts of these two works, but nobody has tried to clear them up. Dhabhar makes a general reference to N. 39—49, 112—115; Bulsara does not even mention the other text.) The passage is the reply to the question, *ēn ku vāč čand γyāk pātaxšāy dātan* (thus in one MS.; ed. *būtan*)? '[the question is] this that [at] how many places it is allowed to give *vāč*?' — To give *vāč* means to allow one to participate in the *drōn* ceremony or the highest type of the prayer before a meal (s. **3.** 35 n. 7), and consequently in the meal itself, cf. N. **30.** 16 (uncertain), MvA. **7.** 4; **8.** 3; and Riv. II. **8.** 13 with Modi's n. thereon. Thus the subject is different, but it is with reference to the same text, and so we can safely use the foll. information, PRivDd. **181.** 1 ff.: *tāsčā y⁰ i fratom ka a⁰ v⁰ 3 guftan* 'the first *t⁰ y⁰* when three *a⁰ v⁰* are to be recited', — the next word is doubtful and the foll. of no account; after *yāvar* we are to read *u ašāṯ* — not *ā šāyēt* — which phrase is given more fully; the order of the phrases is the same as in our text. Thus it is clear that the first point is the end of Y. **6** and the beginning of Y. **7.** (We are not to see two points here, as M seems to do by adding 'and', s. n. 15. The second

13. u ētōn gōwēnd, ku ēn mart[1] nē dānēt, ku man-ič hač gētīh[2] bē apāyēt šutan, u-m⟨ān⟩ apastān ō[3] ayātēnišn i martomān bavēt; hat[4]! nē mān dušxᵛārīh hač ē, ku mān ō yazišn i[5] ōy niyāč, bē mān dušxᵛārīh hač ē, ku ka mān nē yazēnd u nē xᵛānēnd, ka-šān anākīh apar rasēt, amān apāč dāštan nē tuvān.₀

14. dātār! čand drānāk ast andar(a)k[1] žī[va]ndak, ōy i rist? u-š guft ōhrmazd, ku čand ān i[2] maxš[3] parr[3], spitamān zaratušt! aδāp čand ān i šapāk[4]-parr[4] andar(a)k[1] avēnāk.[5] ₀₀₀

13. and say thus, namely, "this man does not know, namely, 'even for me it is necessary to depart from the world, and my[6] refuge is in the [act of] remembering by mankind[7]'; lo! not[8] [that][9] our uneasiness is from this, that we have need for his worship, but our uneasiness is from this, that when they do not worship and do not invoke us, when evil comes upon them, we are not able to keep it off."

14. O creator! [for] how much length [of time] among the living is he who is dead? And said Ōhrmazd, that as much as that which is the wing[-stroke] of a fly, O Zaratušt Spitamān! or as much as that of a bat[4] among the non-observing.[5]

---

part is added to determine the first which would be otherwise that at the end of Y. 4.) Then *ašāṯ h⁰* refers to Y. 7. 23, because this point must be before the last one, Y. 8. 4. Therefore the remaining one must be somewhere between 1 and 23. Both words occur several times in this part; but we can say that Y. 7. 18, 20 is meant here. Note that *dām⁰* might have been used just to determine the other, and not as an independent point, there being no 'and' after it, — the intervening passage is not recited in the ritual. In any case 20 (with changes for the proper *xšnūman*) is recited twice as required, s. Riv. **545**. 6 ff. — It may be added that the later writings do not refer to the waiting of the dead in this manner, but simply say that they wait from the dawn to the evening or midnight, Sd. **13**. 5; SdBd. **51**. 9; **93**. 3 f. The summary of the probable source, DkM. **683**. 9 ff. (the same *nask* as in 9), cannot be expected to give these details.

13. [1] M also; but Davar *bē*, perhaps a misprint. [2] Both ⁰yb. [3] K γ n. [4] K *hēnd*. [5] Both *-u*. [6-7] West, "our prayer is for reminding men", wrong. — The original has 'our', which means that the clause is to be connected with the foll., but owing to the contradiction it contains, it is better to take it with the prec., (though it is possible that the other view is correct for the same reason); cf. also Sd. **13**. 6; SdBd. **51**. 10, **93**. 5. [8-9] Cf. *na ān-ki*, Sd. **13**. 7; SdBd. **51**. 11; **93**. 5.

14. [1] Here *-ak* is not omitted as in **2**. 57 n. 4, because it seems to occur regularly when the term means 'between or among' and not 'in', s. PV. **1**. 7 (26); **5**. 27(85); PY. **33**. 7; **68**. 15 (**67**. 49); N. **186**. 7. [2] K om. [3-3] M as one word. [4-4] Both yan n ak p r, — M as one word, K sep. p r. To judge from the context, p r is *parr* 'wing', and the rest must be the name of some bird; and as such it can be compared with yan b ak (n and b are often mixed up) of GBd. **97**. 4, 6; **107**. 6; **154**. 10 (=BdK. **31**. 12, 14, 15; **38**. 11; **46**. 16 — here, with

the exception of the last, in Av. let. *šabā*, once *šaba*) and of Zs. 9. 23, — which means 'bat', s. its description. In NP. there occur numerous terms for this bird, with *šab* 'night' as the first component part, but none of them corresponds with ours. This can be read *šawāk*, to judge from its Paz., but what is *-āk*, if *šaw* is *šap* 'night'? I, therefore, take the whole as one term, believing that in the original Av. (s. n. 5) *pərənahe* stands for *xšapā-pərənahe* which, moreover, makes the quotation complete in itself. Then *šapāk* can be explained from *xšapā-*, and it can be suggested that it was used as an abbreviated form, and that too in its later pronunciation, for 'bat'. As regards *xšapā-p⁰* note that in the compounds this base is used in Av. and S., and cf. NP. *šab-parra* which is more common than the other terms for 'bat'; (Bal. is *šapčar*, with which cf. S. *kṣapā-cara-* lit. 'night-walker', 'any animal that goes out for prey in the night'). If, however, we are to retain *pərənahe*, we must read [*i*] *parr* and take the prec. as expressing its action 'clapping, flapping', which is not possible with the suf. *-āk*. s. GIrPh. 1. 278. Here too, the rest must be š p as in PV. 18. 75 (129); AVn. 28. 2; 50. 3; 52. 2; AZ. 43, or š y p as in PY. 62. 4 (61. 11). For the meaning we have support in S. *kṣip-*, though in MP. *škāftan* is used, PV. 18. 15 (34) gl. — West reads "*šinavāk* [*i*] *par*, the hearing a wing or the sound of a wing". [5] The style of this passage shows that it is a tr. from the Av., a part of which is quoted in PV. 8. 22 (64) com.: *yaϑa maxšyā pərənəm yaϑa vā pərənahe* 'as much as the wing[-stroke] of a fly or as much as the wing's [flapping]' (or reading *xšapā-p⁰* '[that] of a bat', s. n. 4—4). Here it is used in a different sense: *humānāk* [*i*] *ōy čiγōn maxš parr. ēn*: *pa nīrmat* [*i*] *xᵛēš tāk pa nīrmat* [*i*] *gētīkān, hamē ka-šān apāyēt, ā* (yb) *ētar hēnd* 'similar to that as the wing[-stroke] of a fly. This [means]: for the benefit of self as well as for the benefit of worldly beings, whenever they are required, then they are here'.

10.

1. ēvak[1] ēn[2], ku [ka] kustīk pa targōn[3] sē(h) angust ast, pa hamāk čāštak[4] šāyēt[5]; u ka kam[6], ast i nē šāyēt.$_0$

2. ēvak ēn, ku pa fravartīkān, šnūman i šut[1] bē nihātak, ⟨u⟩ gāhānbār u nōk nāwar u satuš u hōm drōn -u[2] apārīk artāk fravart kunišn; u ka nē kunēnd, pa ast i[3] čāštak[4] nē šāyēt.$_0$

1. One[1] [rule] is this, that when the *kustīk* is three fingers crosswise[3], it is allowed according to all commentaries; and when less, it is not allowed [according[7] to] some[8].

2. Another[5] is this, that in the days relating to the *fravart*-s, having applied the propitiation [formula] of the departed[6], the *gāhānbār* and *nōk nāwar* and *satuš* and *hōm drōn* and other *artāk fravart* [ceremonies] are to be performed; and when they do not perform them [so], it is not allowed according to some commentaries.

---

1. [1] M om. — West reads it *āīnak* and translates it throughout the chapter by "rule". But note that this defective form (for *āδēnak* or *āyēnak*) occurs only in FrP. 25. 2 as the explanation of *ēvēn(ak)*, and that the latter alone is met with in the books. It may be argued that NP. *yak* means also 'custom, law', but this is not certain, s. Vullers, and so we cannot apply this meaning to *ēvak*. I, therefore, connect *ēvak* . . . . *ēvak* . . . . and take them in the sense of 'one . . . . another . . .' as in Čk. 6 ff. [2] M *ān*. [3] Both t r y n n; M[+] n. *dō*, taking the original as an ideogram for 'two', which, however, does not suit the context. The other reading is quite possible, although it is nowhere met with. — The meaning is 'from one border or side to the other'; West, "[loose] transversely (that is, round the waist)", wrong; for details s. 4. 2 n. 4. [4] Both *čās*^{0}; M n. *kitāb* 'book'. [5] M *guft*. [6] Or remove the comma after *ast*, and omit *i*. [7-8] Thus, believing that *pa* of the prec. clause is understood, s. 2, and taking *ast i* in its common sense; or read according to n. 6 and omit this phrase.

2. [1] K *drōn*, which occurs just below in the next line. [2] K om. [3] Both after *č*^{0}; cf. 1 n. 7—8. [4] Both *čās*^{0}. [5] S. 1 n. 1. [6] Cf. NP. *šud*. West adopts *drōn* (s. n. 1), which is here out of place even if we take *šnūman* in the sense of 'dedication'; his tr. "*drōn* set aside at the dedication [formula] . . . is to be used at the season festivals . . . " is not in accordance with the text nor with the practice.

3. pa nask i niyātom[1] čāštak[2] gōwēt, ku [ka] mart -1 ō duždīh[3] kartan hamē[4] šavēt: [ka] dēvār -1 pati-š andar ōftēt, ā-š[5] ēwgat[6]; ka-š mart -1 ō žanēt, ā-š patiyārak;
K 70 r u[7] har 2 pa vināskārīh;₀ ka ō yazišn i[7] yazatān kartan hamē[8] šavēt, ā-š har 2 pa[9] avināsīh.[10]₀

4. ēvak ēn, ku žan ka[1] āpustan bavēt, tāk šāyēt, ātaš hūp pahrēžīhā andar mān dārišn; čē pa spand paδtāk, ku duγδāv, i zaratušt māt, ka pa zaratušt āpustan

3. In the *Niyātom*[1] *nask* a commentary says, that when a man is going to commit theft: when a wall falls upon him, then it is his destroyer[6]; when a man strikes him, then he is his adversary; and [yet] he (the thief) is in guiltiness [as regards][11] both; [but] when he is going to perform the worship (or *yazišn* [ceremony]) of God, then he is in innocence [as regards][11] both.[10]

4. Another is this, that when a woman is pregnant, as far as possible, fire is to be kept well carefully in the dwelling; because it is evident in the *Spand* [*nask*],

---

3. [1] Both n aa⁰ as in FrO. 10. 5; PV. 4. 10 com. (Ms. L); for the reading we can only compare *niyādăm*, *niyāram* (*r* for *d*), Riv. 3. 17; 7. 3. DkM. 678. 7; 693. 3. has *nikātom*. [2] S. 1 n. 4. [3] Both ⁰t ya, as usual; *-d-* occurs in PT. 67. 12; FrP. 13. 5. [4] K *ka*. [5] Davar wrong about M. [6] Both ayb yt (as in Mx. 2. 74; cf. ayn b⁰, DdA. 38. 13); the usual Paz. is *aibigaṯ*, but that in NP. let., *ēvgad*, shows how we are to understand it; in this as well as in the Paz. *aiwi-āsīṯan* (a yyb-) 'to approach', Mx. 2. 185; 7. 24, the original orthography, which too is a transcription of the Av., is mechanically followed; and we are to replace it by one according to ety. By comparing *frēh-būt* and '*aibi-būt*' (i. e. *ēw-būt*) explained by *apar mēnišnīh* 'haughtiness' and *tar mēnišnīh* 'perversity' respectively in DkM. 97. 17 ff., we can say that the first part of our word is identical with that of '*aibi-būt*' and that it represents Av. *aibĭ*, *aiwi* in the sense of 'opposite, contrary', AirWb. 87. The second part yt can be read *gat*, Av. *gata-* 'gone', as the Paz. suggests; the whole term then is a transcription, or a coin-word. If so, *aibigaṯ* and *ēvgad* are not meaningless as declared by Bartholomae, WZKM. 30. 34. He reads our term *dušmēn*, following a NP. gl.; but the gl. does not at all prove that the word in question is an ideogram, as is commonly supposed. Any MP. word that is no longer or not quite common in NP. is often glossed by a familiar NP. word, for instance in M. — As regards PY. 19. 15 (39) I may note that also J 2. 286 has only ayb gt, without *dušman*. As to the meaning, which would be lit. 'opponent, adversary', note that the term is commonly used for *ahraman*. [7] K om. [8] K ⁰*māk*. [9] K ad. *u*. [10] This passage cannot be traced in the extant summary of the *nask*, though there are many places which refer to thieves and theft. [11] If we do not add this, 'both' must be taken as subject, as West does (also in SBE. 37. 473), which would not yield good sense, unless we exchange the words 'guiltiness' and 'innocence', but then too the wall is spoken of in guiltiness etc.

4. [1] K om. [2] M an ta, *xᵛatā*[*y*] (?), which West adopts: "leader"; K ya yt a, as in PV. 3. 35 (119) gl. where one MS. *parīk*; also M⁺ n. *parī*; but the parallel, Šnš. 12. 11, *dēv*. [3] Both y, as usual. [4] M 60, but s. ZsA. 8. 1(SBE. 47.

būt, sē(h) šap, har šap -1 dēv[2] -1 apāk ē[3]-100 [u] 50[4] dēv[5] ō vināstan i zaratušt duvārast[6] hēnd, u[7] ātaš andar mān būtan rāδ, čārak kartan[1] nē dānast hēnd.[8]$_0$

5. ēvak ēn, ku hēnd[1] hač-ač[2] hāvištān[1], i[3], ka[4] ō yazišn [i] yazatān kartan hamē[5] šavēnd, maγūk[6] hamē havāsēnd[7]; u hakar ān havāsišn, u-[8] namb -1[9] hač-aš bē burtan rāδ kunēnd, nišīnān kunišn; čē pa yutdēvdāt[10], hač pāδ mēzišnīh rāδ, dastowarān čāšt, ku patmānak hambun-ač, u ō har čē rasēt, ō bavēt; — u[11] ōy kē[12] mēzēt, aš apastāk i[4] pa čamišn[13] bē gōwišn, u[4] pas tanāpuhr -1 vinās ō[4] bun[4]; u[11] ka nē gōwēt, girāntar[14].$_0$

that when Duγδāv, the mother of Zaratušt, was pregnant with Zaratušt, [for] three nights, every night a *dēv*[2] with a hundred and fifty *dēv*-s rushed for the destruction of Zaratušt, but owing to the existence of fire in the dwelling, they did not know to apply [their] means.[8]

5. Another is this, that there[1] are even among the novices[1], who, when they are going to perform the *yazišn* [ceremony in honour] of *yazat*-s, are cleansing[7] the pit[6]; and if that is to be cleansed, and they make moisture owing to the flowing [of the water] from it, it is to be done sitting; because in the Vidēvdāt[10], about making water [standing] on foot, authorities have taught, that its[15] measure may be even little, and it may reach to anything, [but the sin] does occur[16]; — and he who makes water, by him the Apastāk for making water is to be recited, and then it is one *tanāpuhr* sin for his stock; and when he does not recite it, it is greater.

---

140); Šnš. **12.** 11; Sd. **16.** 3 for 50. [5] Both ya yt a, s. n. 2. [6] M also, but Davar db n r^0. [7] M om. [8] We find this episode in the works based upon the said *nask*, s. DkM. **609.** 17 ff.; ZsA. **8.** 1 ff. (SBE. **47.** 30, 140 f.).

5. [1-1] Cf. *ast hač-aċ vēh-dēnān* 'there are even among those of the good religion', 30 below; West "they have a tank (*mōj*) for the disciples" (s. n. 2, 3), but for such meaning we require *ast* 'there is'. [2] M[+] n. *mōza* "boots" etc.; if 'tank', cf. NP. *mōž(a)*. [3] M *rāδ* which West adopts, s. n. 1—1. [4] M om. [5] K ^{0}*māk*. [6] Both m yn k; M n. *mōbad* which is in accordance with FrP. **13.** 1 (*hāvišt, moγūk, moγ*), but it does not suit the context. The other possible reading is *mēvak* 'fruit', which is used in the *yazišn* ceremony, after being washed; but this too does not suit the context well, especially what follows. Therefore I, like West, connect our word with *maγ* (cf. NP. *maγāk* beside *maγ*) 'pit, hole', used not only in the *barašnūm* ceremony but also for the call of nature, s. MYFr. **3.** 66—69, cf. also V. **14.** 6 esp. the MP. gl. To judge from the context the matter refers to the latter point, but the former is not out of the question. In both cases dirty water is to be removed. The novices must have done such dirty work also, as is the case elsewhere. It is hardly possible that the phrase is used euphemistically for making water, which is referred to in the later part. [7] S. **3.** 10 n. 2. [8] K one more *u-*. [9] M also, but Davar *i*. [10] Both ^{0}d y p^0; — The reference is to V. **18.** 40 ff; cf. PV. **18**, 44 (98) com. [11] K om. [12] M also, but Davar om. [13] S. **3.** 9 n. 5. [14] M *girān vināstar*, n. also *g^0 gunāhtar*. [15-16] West, "the measure it refers to applies to everything else, not even of a like origin", more clear and more to the point, but quite wrong as far as the original is concerned.

6. ēvak ēn, ku gāhān[1] apar vitartakān guftan pa sūtak nē dārišn, čiγōn ēn 3 hāt, i bun i uštovat[2] gāh, ka-č pa rāh gōwēt[3], nē šāyēt; ka-č mart -1 andar xānak apar gōwēt, bēšaz[4].o

7. ēvak ēn, ku pa šap maδ u sparm u ēč xᵛarišnīk[1] čīš[2] ō[3] apāxtar rōn nē rēčišn,
K 71 v čē druž āpus bavēt; u[4] ka rēčēt, y a ϑ ā[5] a h ū v a i r y ō[6] -1 bē gōwišn.o

8. ēvak ēn, ku škaft[1] pahrēžišn hač adātīhā kuštan i gōspandān[2] sartakān; čē pa
M 101 r stūtkar[3], apar ōyšān[4], kē gōspand adātīhā kušt, pātifrās ōγōn[5] guft ēstēt, ku

6. Another is this, that to recite [all][5] the *Gāϑā*-s over the departed is not to be considered as beneficial, since these three chapters, which are the beginning of the *Uštavaitī*[2] *Gāϑā*, whenever one recites on[6] the way[7], it is not allowed; whenever one recites them over a man in the house, it is healing.

7. Another is this, that in the night wine and basil and any [other] drinkable[7] thing not to be poured towards the northern direction, because the *druž* becomes are pregnant [thereby]; and when one pours them, one *y a ϑ ā a h ū v a i r y ō* is to be recited.

8. Another is this, that it is to be rigorously[1] abstained from the slaughtering of animal species in an unlawful manner; because in the *Stūtkar*[3], upon those, who

---

6. [1] K ad. *u*; M *-u*. [2] Both °p t. — It is not clear why these chapters are prohibited; but from what follows it can be said that they were intended for the health and prosperity of body, and hence unsuitable and even injurious for the occasion, which belief still exists. [3] M *guftan*. [4] Both plene *a*. [5] This is necessary, not only because of what follows, but also because of the fact that the funeral ceremony includes the recitation of the first *Gāϑā* partly at the house and partly on the way, s. Modi, Madr. Mem. Vol. 416 ff. [6-7] Cf. what follows and n. 5; otherwise one may be tempted to read *pa rāh* [*i ōy*] 'for his sake'.

7. [1] Both °*n -1*. [2] K ad. *-1* but strikes it off. [3] M om. n (from the ideogram). [4] M om. [5-6] K *yaϑā(a)hūvairyōk*. [7] Thus, not 'eatable', because of the verb *rēč* which is used with reference to liquids only, as far as I have ascertained; cf. V. **7.** 79; N. **98.** 24 ff. (48); **139.** 17 ff. (68) where the matter refers to the offering up of *zaoϑra* 'ceremonial drink'; Sd. **30.** 1 mentions only water; Šnš. **12.** 18 neither this nor basil, which is otherwise known as a fragrant plant or flower only.

8. [1] S. **8.** 13 n. 2; for this meaning or 'strongly' s. Av. *dərəzi*°; if 'painfully', 'fearfully' cf. Mx. **51.** 3; **52.** 8 (along with *anākīh* 'harm, danger', and Str. *mahā-kleśatā-*, *mahat-kaṣṭa-*); MYFr. **3.** 53, 70. [2] K seems to have added *-ān* afterwards, and *gōspand* alone is used in this phrase elsewhere, **2.** 109; and yet, we retain *-ān*, since it can be taken as an adj. suf. [3] So also in Vyt. **1.** 1 (this and M °gr, K °yr or °kr) and Riv. **3.** 12; **4.** 7; **8.** 4; — but DkM. **678.** 3, 10; **680.** 8 *sūtkar*. [4] K °*š*[*ā*]*n*, (being at the end of the line). [5] S. **2.** 121 n. 3. [6] Both t yyb, as in BdK. (**10.** 5, 19 etc.); elsewhere t yb, GBd. **43.** 5; **44.** 7; **90.** 9; PV. **9.** 10 (21), 32 (132) com.; DkM. **756.** 16; **757.** 13. The orthography and esp. the Paz. *təh* in BdK. **43.** 9 suggests the reading *tēh*, s. AirWb. 651; for *tēγ* cf.

mōδ [i] ōyšān gōspandān tēγ[6] i[7] tēž[7] humānāk bavēt, u[7] ōy i[8] adātīhā kuštār ōžanīhēt[9].

9. hač[1] kuštan[1] i gōspand, varrak u vahīk[2] u gāv i varzāk[3] u[3] asp i[4] kārīčārīk u xargōš u čihrāp[5] u xrōs u[6] vahuman[7] muryγ[7] u muryγ[8] i kāskēnak[9] u ⟨hač[10]⟩ muryγ[11] i sār[12] u humāk u parastūk[13] vēš pahrēžišn.[0]

have unlawfully slaughtered animals, punishment is thus spoken of, that the hair of those animals becomes like sharp spear-heads, and he who is a slaughterer in an unlawful manner is killed [therewith].[9]

9. From the slaughtering of animals, the lamb and the kid[2] and the ploughing ox and the war-horse and the hare and the hawk[5] and the cock and[6] the *Vahuman* bird (i. e. the owl[7]) and the magpie[9] bird and the thrush[12] bird and the vulture and the swallow are much to be abstained.[14]

Av. [1]*tiyra-* 'pointed', *bitaēya-* 'double-edged', Arm. lw. *tēg* 'spear-head', NP. *tēγ* 'point of a spear' (one of the meanings). Note that t yb can be for t yk, cf. BdK. **36.** 4 (t yyk, or t yk), GBd. **120.** 1 (t yb k). [7] K om. [8] K ad. and strikes of rn b. [9] Both ap[0] instead of an[0]. — This matter occurs in a different form in the summary of the said *nask*: *u ēn-ač, ku ōyšān-ač kē pah u stōr adātīhā kušēnd, i-šān* (for *aš*[0]) *zī*[*va*]*ndakīh u x*[*v*]*arrah kāhēt* 'and this too, that [as to] those also who slaughter small animals and large animals in an unlawful manner, their life and *x*[*v*]*arrah* diminish', DkM. **807.** 2 ff.

9. [1-1] M divides the ideograms into *kē yasn tan*; K into *kē* and the rest. [2] This reading is supported by DkM. **404.** 7, 9 where -yk points to *-īk*, and by GBd. **25.** 12, **56.** 3 where -aa- points to *-h-*, and by Riv. II. **56.** 15 where *vahī* occurs for the capricorn, as in the said texts. Otherwise, M writes the word n y[0] which suggests the reading *vēsak*, cf. Bal. *gēs* 'kid'. The parallel texts give for it *buz-yāla* instead of our term. [3] M also, but Davar om.; — M n. *varzā*, so also in the parallel texts, but unrecorded in NP. where, however, similar terms occur. [4] K om.; Davar wrong about M. [5] Both as in Mx. **61.** 9 where the Str. is *cakravāka-* 'duck', but this can hardly be meant in the present case, since it is allowed to eat its flesh, s. Riv. **260.** 15 (*bat i ābī*); and the fact of its being a favourite bird of the Iranians, s. Le Coq Ost-Turk. 63 n., can have no bearing on the point at issue. In the said Mx. passage the term occurs for the chief of birds, and as such *karšift* is given in PVr. **1.** 1 and GBd. **121.** 3 (= BdK. **57.** 20). This means that the two terms are identical; and they are really so, because in PV. **2.** 42 (139) *karšift* is glossed with *čaxrvāk*, a var. of *čihrāp*. Now the former means 'hawk' or the like, s. its ety. Av. *karšiptar-* AirWb. 458, and its explanation *čaryγ* (č r k), BdK. **57.** 20. (The statement about its being "a species of water-fowl" in SBE. **47.** 160 cannot be correct; very probably the text is to be corrected as is done by Anklesaria, ZsA. **23.** 2.) Therefore our term too must have the same meaning. West gives "bat (*čīharāž*)", very probably a conjecture, which does not suit the context. [6] M om., — West "or", thus identifying the cock with the *Vahuman* bird, but the former has relation

10. žan i[1] āpustan ka[2] bē vitīrēt, pa kam hač 4 mart[3], i-š hamwār pa ham-zōrīh andar hēnd, nē stānišn; — čē, apārīk nasāk, pas hač sak dītan, ka pa 2 mart[4] pa ham-zōrīh apar stānēnd, rēman nē bavēnd; u žan i[5] āpustan, 2 sak andar apāyēt, kē ham-zōrīhā[6] bē nimāyišn, u[7] [ka] pa čahār mart ham-zōrīhā apar stānēnd, rēman nē bavēnd; u ka pa 2 mart apar stānēnd, pa pixak šōδišn.$_0$

10. When a pregnant woman passes away, she is not to be taken[8] up[8] by less than four men, who are always in collaboration at it; — well[9], [as to] other corpses, after the seeing by a dog, when they[10] take them up through[11] two men in collaboration, they do not become polluted; and [as to the corpse of] a pregnant woman, two dogs are requisite, which are to be shown collaborately (i. e. jointly), and when they take it up through four men collaborately, they do not become polluted; and when they take it up through two men, they are to be washed through [the bath with the stick of nine] knots.

---

to *Srōš*, s. V. **18.** 14 f., 23, — it is even actually called *murγ i sarōš*, Riv. **267.** 12, — and the latter refers to another bird, s. n. 7. [7] Both v^0 m rn k. — For the meaning s. Sd. **14.** 8 f. . . . . *ki ū rā ašō-zušt x^{v}ānand, u bahman murγ nīz x^{v}ānand, [u] kūf nīz x^{v}ānand* '. . . which they call *ašō-zušt*, and they call also *Bahman* bird, and they call also owl'. In Riv. II. **441.** 10, where our term is not used, *ǰuγd* (or *čuγd*) occurs in the place of *kūf*, s. also AirWb. 259. *Vahuman* bird and *ašōk-zušt* are identified in BdK. **46.** 17 f. also, but the passage being corrupted, the fact is overlooked, s. GBd. **154.** 11. Again note that the flesh of owls is prohibited, Riv. **260.** 15. [8] S. **2.** 5 n. 1. [9] M ad. the sign o; n. *kāškīn[a]*, as in some parallel texts, but NP. *kās*^{0}. For the meaning cf. *kāskēn murv malak ō žanēt 'k.* bird destroys locusts', GBd. **155.** 8 (=BdK. **47.** 10; Sd. **34.** 3 has *gīrad* 'catches'); but this applies to 'jay' also, which, moreover, agrees with the description in Vullers and in Tīrandāz 393, and which is given by the Guj. translator of Bd., s. Justi. [10] This is a part of the next word and hence the mistake; otherwise it and the foll. *murγ* ⟨*i*⟩ must be before *čihrāp*. [11] Both ^{0}rn n, *murv* (e. g. in n. 9), but s. above. [12] K ^{0}ā r; — this is the common meaning of NP. *sār*, S. *sāri(kā)*- etc., and it can have been meant here, because it is *malax x^{v}ār* 'locust eater' (Vullers); otherwise 'buzzard' (s. **2.** 5 n. 8), cf. the foll. item. [13] NP. *piristū(k)* etc., but also *paras*^{0} (Wollaston); cf. the Paz., FrP. p. 79. [14] For further details s. my article, Lawful and Unlawful Animal Food according to Iranian Writings, in the forthcoming "Volume of Oriental Studies in honour of Dastur Pavry".

10. [1] K om. [2] Both *kē*, but *ka* is better. [3] M ad. *i*. [4] K ad. *sak* but blots it off. [5] M om. [6] K ^{0}*īh*. [7] M at least *-u*. [8-8] For this meaning here and below (instead of West's "carry away or along") s. PV. **3.** 14 (48) com., **7.** 26 (66) com. where *statan* and *burtan* (with the same object) are distinguished, and note the usual sense. The reference is to the preliminary arrangement of a corpse; of course, it applies to its transport also. [9] S. **1.** 3 n. 8. [10-11] That is, 'they are taken up by', here and below.

11. ēvak ēn, ku ka martom i vitartak rāδ āmurzišn xᵛāhēnd, ōγōn[1] čemīktar, ka gōwēt, ku hamē[2] ka vinās, i man andar ōy[3] yast, apāk[4] ān, i ōy andar man yast, bē āmārēnīt, u[5] vinās ēvak pa dit bē šut, u-š[6] vinās i frēh, i ōy andar man yast, aδak-am ahrav-dāt kart.$_0$

12. ēvak ēn, ku apē-mōčak nē rawēt; u-š sūt ēn-ač hač-aš, ku ka mōčak pa pāδ, u[1] pāδ apar nasāk nihēt, — u nasāk bē nē ǰumbēnēt, — rēman nē bavēt; u ka mōčak nē pa pāδ, u[1] pāδ apar nasāk nihēt, — u[1] nē ǰumbēnēt, — bē ka ēvar dānēt, ku sak dīt aδāp nē, ⟨u⟩ pa sak nē dīt dārišn.$_0$

13. ēvak ēn, ku [hač][1] duvāsrūǰit[2] paδtāk, ku andar sāl rōč -1 nimūt ēstēt, ku[3] har kē hač 14 sāl [u] 3 māh rōč -1 frēh, a[š][4] kustīk frāč bandišn; — ōγōn[5] hūptar,

11. Another is this, that when they desire forgiveness for a person passed away, it is more reasonable[7] so, when one declares, viz. 'whenever the sins, which I issued unto him, are[8] reckoned[8] with those, which he issued unto me, and sins are [thus] removed one by the other, and[9] there are further sins of his, which he issued unto me, then they are made a 'righteous gift' (i. e. are forgiven) by me'.[10]

12. Another is this, that one [should] not walk without boots; and his advantage is even this therefrom, that when a boot is on his foot, and he puts the foot upon a corpse (or carcass), — and [if] he does not move the corpse, — he does not become polluted; and when a boot is not on his foot, and he puts the foot upon a corpse, — and [even if] he does not move it[2], — except when he knows for certain, whether a dog has seen it or not, it is to be considered as [one that] a dog has not seen.

13. Another is this, that from[1] the *Duvāsrūǰit*[2] it is evident, that in the year [even] a day is shown, viz.[3] every one who is one day further than fourteen years and three months, by him the *kustīk* is to be tied on; — it is better so, that[9] when

---

11. [1] S. 2. 121 n. 3. [2] K ^{0}*māk*. [3] K *ō*; M *bē*. [4] K rn t. [5] K om. [6] Both *ā-š*. [7] West's "significant" depends upon NP. *čam* 'meaning, signification'. [8-8] Or 'you [gods] reckon' reading the original *āmārēnēt*, but cf. the foll. *šut*. [9] If 'then' (s. n. 6), we must add '[if]'. [10] Cf. PazT. 197. 1ff., a sort of condolence formula.

12. [1] K om. [2] West ad. "he is polluted", but that is wrong, because the pollution depends upon the foll. condition, which he translates incorrectly by adding "if" after 'or'. — The idea is that in this case the person becomes polluted, if a dog has not seen the corpse.

13. [1] Or [*pa*] 'in'. [2] MS. yn b a yy rn č yt; in DkM. 678. 8, 721. 1 ^{0}č t; for the reading cf. *duv*[*ā*]*srūǰid*, ^{0}*āsranǰid* of Riv. 4. 1; 7. 8. These may be misreadings, as they are in the opinion of West, but his "*Ganabā-sar-niǰat* the thief's head downstricken" (SBE. 37. 74) is by no means certain, although it is treated as such. [2-3] K om. [4] Thus, because as a rule *ā* 'then' does not occur, unless *ka* precedes, and it is not probable that *har kē* should be *har ka* or *ka har kē*. [5] S. 2. 121 n. 3. [6] K *sālak*? [7] K om. [8] M *panǰ* 'five'; in both ideograms the latter half is the same. [9-10] Or 'than . . at', but s. what follows.

M 102 r ku ka andar 15 sāl[6] ēstēt, kustīk bē bandēt; u[7] kē pahrēžōmandtar ōγōn, ku nōh[8] māhakān, i[7] andar aškomb i mātar, apar gīrēt.$_0$

14. ēvak ēn, ku ka[1] vāč[2] dārēt, vāt -1 i[3] [hač] hačaδar bē āyēt, [u] vāt -1 [i] hač dahān bē āyēt, har 2 ēvak[4].$_0$

15. ēn-āč, ku žan kē zāyēt, 10 žan ayārīh kartan rāδ[1] andar[2] apāyēt: panj žan pa gāhvārak[3] kār framāyišn; u žan -1 patīrak i[4] suft[5] i hōy[6], u ēvak suft⟨ak⟩[7]

one is within[10] fifteen years, he ties on the *kustīk*; and he who is more careful[11] is so, that he takes [into account] the nine[8] months, which [he passes] in the womb of the mother[12].

14. Another is this, that when one holds a prayer, the wind that comes from below, and the wind that comes from the mouth, both are one [and the same].[5]

15. This too, that [as to] a woman who gives birth, ten women are requisite for rendering help: five women are to[14] order (or oversee) the work for the cradle[15]; and one woman to hold her against the left shoulder, and one [against] the right

---

11-12 West, "cared for, that way, than a five-months' child (K 20 has 'nine-months' child'), on whom they should put [it] in the womb of [its] mother", wrong. The clause simply gives the reason for the limit fourteen years and three months; the same reason is given e. g. in Sd. **46**. 1. — The passage cannot be traced in the summary of the said *nask*.

14. [1] M om. [2] M *ēvāč* 'only', or 'voice'. [3] K om.; (M has *i* also, though Davar quotes only *-1* as in the next case). [4] M n. *yak ast*. [5] We are of course to understand that in both cases the prayer is null and void; cf. *ka-š vāt -ē bē āyēt, ā-š* (or leave *u-š* of the MSS. and change the next *u-š*) *vāč bē gōwišn, u-š vāč apāč gīrišn*; *u-š ētōn bavēt* (TD), *čiγōn hač bunīh* 'when a wind comes from him, then (or leave 'and' of the MSS. and change the next 'and') the prayer is to be recited by him, and a [new] prayer is to be held by him; and it becomes for him so, as from the beginning', N. **31**. 3 ff. (Bulsara's tr. is wrong, esp. as regards *vāt* which he takes as "gale", by which the priest "should not allow himself to be disturbed . . ., because in that case the attendants can at once protect him from its annoyance".) The same idea recurs with more details in Riv. II. **23**. 5, **26**. 6 where *bādī* cannot have any other meaning.

15. [1] K *nē*. [2] M om. [3] M dn a r k, (n. *dūr* 'far'); K yn^0, and joins to the prec. — West reads "*gavārak* cradle", and Davar supports him by quoting NP. *gavāra*; but the MP. word for this article is ya yyn^0 *gāhvārak*, s. DkM. **756**. 3, 5 and Arm. lw. *gahavorak*; and NP. *gavāra* is for *gāhvāra*. Therefore this meaning is doubtful, if we are to stick to the original. But it suits the context: the presence of five women can be necessary for some ceremonial act about the cradle, if not for its preparation. Again the parallel text, DkM. **755**. 9 ff., refers to the same matter, though it does not use the term in question: *pa čiγōn kartan i-š* (for *aš*) *gāh* 'about how to make its cradle (lit. 'place, seat')'. Thus we have some indirect proof for the emendation, which in its turn is merely the addition of the first letters. [4] Both *ē*; M ad. and strikes off *su*[*f*]*t* here, not before

i dašn[8] griftan[9]; u[10] žan -ē dast andar[11] gartan[12] i ōy awgandan[13]; u žan -l miyān i ōy griftan; u[10] žan -l, ka kōtak bē zāyēt, apar dāštan, u nāfak brītan.[16] — ātaš buland[17] kartan, [u]

16. 3 rōč u[1] 3 šap[2] miyān i ātaš u apurnāyak[3] kas nē vitaštan; u apurnāyak ō mart u žan i[1] vināskār nē nimūtan; gōkirt[4] andak -l sūtan, [u] pa āp i urvar[5] apar apurnāyak handūtan[6]; fratom x^{v}arišn parāhōm u[7] šapyār[8] dātan.

shoulder; and one woman to throw a hand on her neck; and one woman to hold her waist; and one woman, when the child is born, to take it up, and to cut the navel-string.[16] — The fire is to be made ablaze[17], [and]

16. three days and three nights no one has to pass between the fire and the child; and the child is not to be shown to a sinful man or woman; a little *gōkirn*[4] (white *hōm*) is to be pounded, and with the sap of the [pomegranate[5]] plant[5] it is to be rubbed[6] on the child; [as] the first food *parāhōm* [drink] and syrup[8] are to be given.

---

the next *suft* as Davar says. [5] M n. *pahlū*. [6] M n. *ćab* (written *ǰab*); K an d. [7] *-ak* is not wrong, but s. above. [8] M n. *rāst*. [9] M. n. *gīrand*. [10] M also, but Davar om. [11] K om. [12] K *kartan*, i. e. k n^{0} for y r^{0}. [13] M n. *afganand*. [14-15] Or 'to be ordered for the cradle work', but cf. the next clauses; — s. n. 3. [16] The foll. can be better connected with the next section than with this, as is done by West and Davar. [17] The lit. or original meaning of *buland* is 'bright' or the like, and not 'high', according to Hertel, IIQF. **6**. 14, (**9** and Beit. s. the cognate terms in the word-index). His view finds support in this clause!

16. [1] K om. [2] K *šapān*. [3] M n. *kōdak* [4] M yn k rt; K yn rt; and both join to the foll. Believing that our separation is correct and that K om. *-k-* by mistake, we can identify the term with that in BdK. **19**. 18; **42**. 11; **59**. 4. Now the latter stands for *gōkirn* of the corresponding text, GBd. **67**. 13; **149**. 10; **122**. 9. Therefore our term too can be the same, viz. *hōm i spēt* 'white *hōm*' as identified in GBd. **149**. 10; **116**. 2 ff. (= BdK. **64**. 1 ff. where too *gōkirn* is given), and elsewhere (s. AirWb. 480 *gaokərəna-*), and as can be judged from other details. And one of the MSS. actually glosses it with *hōm*. — Note that also the MS. IM (written by the copyist of GBd. DH) has *gōkirt* in PV. **20**. 4; and so I have not corrected it. But indeed we cannot take our word in the sense of NP. *gōgird* 'sulphur', as West and Davar do. Because as to *hōm* it is said to resemble the tamarisk, with a stem having many knots, and leaves like those of the jasmine, s. Vullers. Again I think that we are to consider this matter from the religious point of view, and not from that of hygiene and medicine: it refers to, say, the adoption of the child into the religion. — S. n. 5. [5] I believe it is this instruction that appears in the later writings, Sd. **24**. 2, Sd.-bt. **26** (Guj. tr. p. 188) and Farz. **1**. 14 f., as the provisional preparation of *parāhōm* by mixing *hōm*, *urvarām* and water. These are the same three articles as mentioned here, *āp i* 'sap of' being taken for *āp u* 'water and'. The term *urvarām* is the abbreviation of Av. *urvaraṃ haδānaēpataṃ* 'pomegranate twigs'

M 103 v **17.** ēvak ēn, ku[1] [ka] kas -l mart i[2] apēvinās rāδ bē žanēt, tāk dart bē nišīnēt, har rōč tanāpuhr -l vinās ō[3] bun bavēt.$_0$

17. Another is this, that when some one strikes a sinless man, [then] till the pain ceases[4], every day one *tanāpuhr* sin accrues to his stock.

---

pounded along with *haoma* twigs in the *yazišn* ceremony. Hence our *urvar* too is not any plant, but the said one; cf. PV. **18.** 3 (7) where *urvar* is explained by *barsum*. For the latter *gaz* 'tamarisk' or *anār* 'pomegranate' twigs are used, Riv. **467.** 12; and hence the same for the former also, — such is the case at least in modern times. (Riv. **469.** 13 ff. is silent on the point.) [6] K *-ūtan* partly worm-eaten, but there can be little doubt about the word. [7] K *u-*. [8] Both (but s. n. 7) yap ya r. West gives "aloes (*šapyār*)", which is one of the meanings of NP. *šabyār* and which is used as a purgative in India. Davar quotes the NP. word and the same meaning, but he adds: "With a slight change the word could be read *gāvšīr* cow's milk". This is true if he means the addition of *-ī-*, but there is something more: *gāv* is written yan, and not yap, s. FrP. **7.** 1. In any case both the meanings are not satisfactory. As to our meaning: note that the parallel text, DkM. **755.** 13, gives as the second food *rōγn i mētōkzarmīk* (MS. ^{0}zm r^0; — DkM. **747.** 2 f. does not name both the first and the second food). This is the same as Av. *zaramaya- raoγna-* lit. 'spring butter' (the other is 'mid-spring', but the additional part is clearly a transcription and hence it shows the nature of the whole term), but used to designate the food or rather the drink of the blessed in heaven. As such it cannot be mere butter, and so we can apply to it the description in Aog. 16: *āpēn, maδēn, šīrēn, angapēnēn* 'prepared of water, wine, milk, honey'; — strictly speaking it applies to the MP. text, to 'the immortal food etc.' in 15, which comes to the same thing. — From the manner in which the second food is referred to in the later writings, it seems that they place the emphasis on *parāhōm* only. It is possible that the original idea was forgotten and hence misunderstood. However, what they give is of some use to us: it is *šīr* 'milk' in Sd. **24.** 2, (so also M n.); 'water mixed with molasses or any sweet thing, and milk' in Sd.-bt. (Guj. tr. p. 188); and *ḳand u šīr* 'sugar-candy and milk' in Farz. **1.** 17. And the custom of giving the mixture of molasses and water is not unknown among the Indian Parsis; they call it *gor-vāṇī* (*gor* = *goḷ* 'molasses', and perhaps *vāṇī* = *pāṇī* 'water' or *vānī* 'dish, food'). But it can have been borrowed from their Hindu neighbours who call it *gaḷthuthī*. If such be the case, we are to note that the author of the last named work is an Indian Dastur, and that the text of the other work is not before us; — we have no reason to doubt the translator, but the detail is omitted not only in the original Sd., but also in its second version, to judge from Hyde's tr. (Hist. Rel. veterum Persarum p. 449). However this may be, we are not to ignore the statement about *rōγn i mētōkzarmīk;* and so we can say that our term is not the same as NP. *šabyār* 'aloes', but that it is *šabyāra*, explained by *šīra* 'syrup'. It is also possible that *šīr* referred to above stands for this *šīra*.

17. [1] M ad. and strikes off *andar* which occurs at this place in 18. [2] K om.; M *l.* but Davar silent about it. — We should have left *l*, since *rāδ* is very rarely

18. ēvak ēn, ku andar šahr, ku[1] dātowar[2] i drōžan[3] gumārēnd[4], u pa [v]āvarīkān[5] dārēnd[5], hač vināš u[6] mihrān-druž[īh][7], i ān dātowar kunēt, andar[6] ān šahr awr [u[8]] vārān kam, u šīrēnīh u čarpīh u[6] bēšazišnīh[9] i[10] pēm [i] gāvān u gōspandān bē[11] [k]āhēt[12], u apurnāyak andar aškomb [i] mātar vēš tapāh bavēt.[0]

18. Another is this, that in a country, where[1] they appoint a false judge, and consider[5] him as trustworthy[5], [then] owing to the sin and breach of trust, which that judge commits, in that country clouds and[8] rain [become] less, and the sweetness and fatness and healing power of[10] the milk of the cattle and small cattle does[11] diminish, and the young[13] ones[13] in the womb [of] the mother become much injured.[14]

---

used to express the Acc.; but if we take this in the sense of 'for', *apēvinās* must mean 'no sin', as opposed to *vināš rāδ* 'for sin'; Sd. **100.** 1 copies this use: *kas-ē kas-ē rā bēgunāh bi-ranǰānad yā bi-zanad.* [3] M ad. *ō*, expressed by another ideogram γ n; it cannot be a mistake for *ōy* 'his' which does not occur in this phrase. [4] Lit. 'sits down'.

18. [1] Both *ka* 'when'; but the other from the Paz. (in NP. let.) in ZHss. 83 is better. [2] M n. *dastūr;* so also the said Paz. [3] K d rn n č n n; — OP. *draužana-*. [4] For *gu-* s. Hübschmann, PSt. 95. [5-5] The said Paz. has *āfrīnagān āvarand* 'they bring blessings' which is not only doubtful, but also unsuitable owing to the prec. *pa* (p h); hence the mistake lies on its part. — The first word as it is can be read *aparīkān,* meaning 'upper ones' in Šv. **4.** 51; here we may take it in the sense of 'superior' or the like, but that does not suit the context so well as the other. We have added *v-* in spite of NP. *āvar* 'truth, certainty' and *āvarī* 'a man of truth', because only the other form is met with in MPB., MPT. and Arm (as lw.). [6] K om. [7] S. Mx. **36.** 21 etc.; the said Paz. has *mihr druǰ.* [8] Thus the said Paz.; but if [*i*], then 'rainy clouds', cf. *awr i vārandak,* Mx. **56.** 5. [9] Both plene *-a-;* K -yy for -ya. — The said Paz. gives a meaningless reading; also of the prec.: z l f š for our č r p ya, whereas *šīr*[0] is correct. Bartholomae omits all this. [10] Both *u* 'and', but the other is better; or we may add *i pēm* 'of the milk' before it. [11] M *bun* (i. e. b n n for b n a) 'bottom, foundation', with a corresponding (?) n. *az pay.* West, "a portion (*bavan*)", — NP. *baun.* [12] M n. *kāhad;* the said Paz. *bast* 'bound', emended from our aa yt! [13-13] West, "children", but note the context, and cf. Vyt. **2.** 43: *stōr, gāv u gōspand kōtaktar zāyēnd . . .* 'large cattle, cattle and small cattle are born smaller . . .', — also for the whole clause; otherwise this can be 'the young ones in the womb make the mother much injured' through the change of *bavēt* into *kunēt* as in **2.** 106 n. 5. [14] This can be compared, if not traced to, the *Nikātom nask,* which dealt with *apar vināskārīh i dēh sardār pa ziyān, i andar dēh hač āfrāsīh u duš framānīh i ōy bavēt* 'on the sinfulness of the chief of the country for the injury, which takes place in the country through his punishments and evil orders', DkM. **717.** 7 f.

19. ēvak ēn, ku mart, ka žan nē kunēt, mark-aržān nē bavēt; u[1] žan, ka šōδ nē kunēt, mark-aržān ō[2] bavēt; čē žan[3], bē pa ham-vimēžišnīh i apāk martān[4], frazand nē bavēt, u patvand[5] hač-aš[6] nē rawēt; u mart, yut hač žan, ka apastāk, čiγōn pa yutdēvdāt guft ēstēt, bē[7] gōwēt, patvand[8] i[1] tan i pasēn frāč rawēt.$_0$

M 103 r **20.** ēvak ēn, ku dandān-frēš[1] pōst pāk bē tāšišn; čē dastowarān čāšt, ku ka[2] dandān[3]-frēš[1] pa pōst ō[4] dahān kart, u[5] bē ōftēt, u žan i[5] āpustan ka-š pāδ apar nihēt, pa nasāk būtan bīmōmand[6].$_0$

19. Another is this, that a man, when he does not take a wife, does not become a *mark-aržān* [sinner]; but a woman, when she does not take a husband, does become a *mark-aržān* [sinner]; because [as to] women, except by intercourse with men, an issue does not take place, and [so] the lineage does not proceed from them; but [as to] a man, [even] without a woman, when he recites the Apastāk, as it is declared in the Vidēvdāt, the lineage of the final existence proceeds further [from him].[9]

20. Another is this, that a[7] toothpick[1] is to be shaped clear of bark[8]; because authorities have interpreted, that when a toothpick with bark is applied to the mouth, and it falls down, and when a pregnant woman puts her foot upon it, she is apprehensive[6] about there being a dead[9] child[9].

---

19. [1] K om. [2] K n o. [3] K zn n. [4] K ad. *u;* M -*u*. [5] Both p t n d. [6] Davar rep. *h*^{0}. [7] K b n ā. [8] K p t n d. [9] A similar version in ZHss. 170. — The idea is based upon V. **18.** 45—52 which gives the prayer to be recited after a seminal discharge, and from which we learn that this is like entrusting a child to Ārmaiti, who delivers it back as a grown-up man to the person in question at the final existence; cf. Riv. **193.** 3 ff., Farz. **18.** 13 ff.

20. [1] Both once p r ya, and once p r y yan (also in MF. **188.** 13). In PT. **123.** 17, **124.** 3, DdA. **39.** 6, MF. **189.** 5 it is p r y ya, corresponding with the Paz. *frēš*, PazT. **121.** 6; whereas in PT. **123.** 17 n., Šnš. **12.** 13, PX^{v}Ap, **57.** 14 it is p r yan, corresponding with the Paz. *par(a)sni* (!), PazT. **73.** 23, (**74.** 14). The forms recorded in NP. are still greater in number and no less doubtful; but since *āprīš* is not possible, we may not trust *parīš*, whereas *afrīš* and *farīš* speak for *frēš*. — Bartholomae, in Junker mp. Schulgespräch 19, thinks of two possibilities: *frašn* from Av. (*ərəzatō.*)*frašna-* 'some part of armour', or *parš* from Av. *parša-* 'ear of corn' (rather 'stalk, halm'); but the former (and also *fraš* 'a weapon to be hurled', AZ. 103 etc.) can hardly be compared with 'a tooth-pick'. As to the latter we may note that the article is actually spoken of as *kāh* '(a piece of) hay' or *čōb* 'a stick, shoot' in the marginal remark in M$^+$ (ZHss. 106), cf. also Riv. **350.** 18 ff.; but the occurrence of -y- after -r- cannot be explained in the case of *parš*(*an*) as in the case of *fraš*(*an*). [2] M ad. -*š*. [3] M ad. *u*. [4] K γ n; M n. *dar*. [5] K om. [6] Both sep. *bīm hēnd*, where *h*^{0} can be for *ast* or *hāt:* 'there is or may be fear'; Šnš. **12.** 13 *vimān* 'there is doubt'. [7-8] Thus because of *tāš*^{0}; otherwise 'the bark of a tooth-pick is to be cut off clean therefrom (*hač-aš*, occurring in Šnš. **12.** 13)'. [9-9] Thus or 'miscarriage', not "dead matter" (West), because of Sd. **17.** 2: . . . *bīm ān buvad, ki kōdak ba ziyān āyad* 'the fear is that, that the child may come to injury'.

21. ēvak ēn, ku pa frazand i čakar patīraftan, nikīrišn kunišn; čē pa čahārdahom [i] nask i[1] huspāram dastowarān čāšt, ku man pus tō-č[2] pus šāyēt, u man duxt tō-č duxt[3] nē šāyēt.$_0$

21. Another is this, that in accepting the child of a *čakar*[4] ('subordinate') wife, discrimination is to be exercised; because in the fourteenth[5] of the *Huspāram nask*[6] authorities have interpreted, viz. 'my son is allowed also [as] thy son, but my daughter is not allowed also [as] thy daughter'.

---

21. [1] K om. [2] K *čē*. [3] K ad. and strikes off *ku*. [4] This term is applied to a woman who marries again after the death of her husband as follows: . . . *ba-čăkar i šōy i pēšīn ba-šōy bāyad dād* 'it is necessary to give her to a husband as the *čăkar* of the former husband', Riv. **180**. 17 etc. (for other details s. below and Riv. **185**. 19 ff., (II.), ZHss. *43, 37, 133). This shows that even in Riv. *čakar* does not signify merely a widow, as is commonly supposed; — for 'widow' we have MP. *viδavak* (Av. *viδavā-*) or *vēvak* (NP. *bēva*). This view as well as that of a 'serving wife' (from NP. *čākar* 'servant, maid') is rejected by Bartholomae, SRb. 6 ff., and by Anklesaria, JIA. **1**. 241 f., at least as regards the MP. sources. The latter would identify *čakar* with Arab. *ṣayīr* 'a minor' (*ṣayar* 'being small'), and says that "it is possible that *čakar žan* means a 'minor-female' adopted and married to a young man in order to appropriate her first-born male child". This meaning he applies in GBd. **236**. 1 ff. (=BdK. **80**. 2 ff.), but he himself admits that "the contradiction in the text will still remain unexplained as to H. having been *born* of I.". (Other difficulties, with which we are not concerned here, are: *hač aranǰ zāt ēstēt* of DkM. **667**. 3, **671**. 5, **674**. 8 can hardly mean "was begotten without travail", but rather 'was born of A. (or how else we may read the name)'; and hence the said epithet cannot be *aranǰ i brātān* "the comfort of the brothers", but some name; — note the orthography b y r^0 and in BdK. *nəyradā* in Av. let.) Again it is a question whether it would suit in all cases where the term occurs; and note that a woman married in this manner is called *ēvak zan*, Riv. **180**. 11 ff. etc., **184**. 5 ff. — Bartholomae, ZSR. **1**. 32 n., considers our term a reduplicated form and suggests its relation to Av. *čarāitī-* 'maiden, young woman': then 'a transferable wife' may be taken as the lit. meaning! In any case it refers to 'a subordinate wife' as opposed to 'a chief wife' *pātaxšāh žan*. The passages treated in SRb. 5, 8 show that the former is a wife who is not divorced but is given freedom over her person by the husband. She can then marry another as a *čakar* wife, but her children through him belong to the first husband. This latter detail explains the statement 'my son etc.' in our passage, cf. also SRb. 9 n. For further information we have N. **7**. 27 f.: *čakar gāyēt, dužīh* [*i*] *čakar x^{v}ēš* '[if] one seduces a *čakar*, it is the theft (or he is the thief) of the *čakar* herself', — because she is free from or not protected by her husband; and Riv. **185**. 13 f.: *pursiš ān-ki, sālār i čakar zan ki bāšad? pāsux īn-ki, zan i čakar, sālār-ē, i x^{v}ad gumārad, sālār i ān bāšad* 'the question is that, viz. "who can be the guardian of a *čakar* wife (or woman)?" The reply is this, that [as to] a *čakar* wife, a guardian, whom she herself appoints, can be her guardian'. — What follows does not refer to her, but to

22. ēvak ēn, ku apēr tuxšēt[1] pa frazand[2] zāyišnīh, — ēvāč[3] frēh[4] kirpak handōžīh rāδ; čē pa nask [i] niyātom[5] dastowarān čāšt, ku kār u kirpak, i[6] pus kunēt, pit ētōn bavēt, čiγōn ka-š pa dast i xᵛēš kart hē;₀[7] u pa dāmdāt paδtāk, ku ham-ač kirpak ham handāčak, i pit ō xᵛēšīh rasēt.₀

M 104 v **23.** ēvak ēn, ku čīš, [i[1]] bē ō aržānīkān[2] dahēnd, čand[3] šāyēt, ō xᵛarišn[4] handāčišn; čē pa niyātom[5] dastowarān čāšt, ku [ka[1]] mart -l [i] virsnak nān dahēt, [u ka-č[1]] apēr vas[6], ā-č har ān kirpak, i ōy pa ān[7] sērīh bē kunēt, ōy ētōn bavēt, čiγōn ka-š pa dast i xᵛēš kart hē.₀

24. ēvak ēn, ku [ka] xᵛafsēt, pa frārōnīh u apēvināsīh[1] xᵛaftišn[2], -u ašemvohūk -l bē gōwišn; u ka vigrāt[3] ēstēt, hamgōnak; — ka ētōn kunēt, har vēn[4] āwarišn

22. Another is this, that one [should] persevere much in the begetting of children, — only for the acquisition of further good works; because in the *Niyātom nask* authorities have interpreted, that the work and good work, which a son performs, becomes [that of] the father so, as when he would have performed it by his own hand; and in the *Dāmdāt* it is evident, that it is also the same good work [and] the same measure, which reaches the father as his possession.

23. Another is this, that a[8] thing, which they give to the worthy, as much as is possible, is to be measured as food[9]; because in the *Niyātom* authorities have interpreted, that when one gives a hungry man bread, and when it is highly sufficient, just then all that good work, which he performs through that satiety, becomes his [who gave it] so, as when he would have performed it by his own hand.[10]

24. Another is this, that when one lies down, he has to lie down in uprightness and innocence, and one *a š ə m v o h ū* is to be recited; and when he has awoke, [in] the same manner; — when he does so, [at] every single drawing of the

---

the *xᵛad-aš rāy* (or *xᵛad sarāy*, cf. ZSR. **1.** 31 n.) *zan*, as can be seen from Riv. **180.** 18 ff. etc. [5-6] Thus both, also in Šnš **12.** 14; to judge from DkM. **748.** 4, 17 ff. the matter does not occur in the fourteenth chapter but in the last part or group of fourteen chapters of the said *nask;* but the matter could have as well occurred above, cf. DkM. **739.** 1 ff.

22. [1] Thus the Paz. etc., but Salemann, GIrPh. **1.** 298, *tōxš-*. [2] M p zn n d. [3] K ad. and strikes off *frāč* corr. into *frēh*. [4] M ad. *i*, which can be inserted, but s. Šnš. **12.** 15. [5] S. 3 n. 1. [6] K om. [7] M ₀₀.

23. [1] S. Šnš. **12.** 16. [2] K ₀*k*. [3] Davar ad. *u-*. [4] Davar rep. [5] S. 3 n. 1; M n. *haftum* (or *haš*₀) *pargard* 'seventh (or eighth) chapter'. [6] K k n n, for k b d. [7] M also, but Davar om. [8-9] West, "they shall give to the worthy as much of anything as is proper for eating [and] accumulating", wrong. The idea is that the gift must be so that one can satisfy his hunger. [10] This might have occurred in the said *nask* at the point where it deals with gifts, DkM. **715.** 20 ff.

24. [1] Davar wrong about M. [2] One more example of the category discussed by Bartholomae IF. **38.** 7. — West seems to have read *ōftišn*, to judge from his "circumstances"; but he is wrong. [3] M d r at, i. e. om. n- (*vi-*) and d for g. — Av. [1]*gar-*, cf. *frāč vigrāyišnīh* H. **1.** 13 (28); our word leaves no doubt that Haug's

-ē sē(h) srōšočarnām kirpak, ast [i] 10 dra(x)m sang u dāng[5] 4 purr sang[6], bavēt.$_0$

25. ēvak ēn, ku ka kār -1 aδāp dātastān[1] -1 frāč rasēt, u[2] nē dānēt, ku vinās aδāp kirpak: ⟨u⟩ ka-š[3] tuvān[4], ā-š bē hilišn, — nē kunišn; čiγōn gōwēt pa sakātom, ku[5] nē čikām-ač-ē ⟨zaratušt⟩ hač harvist, bē sē(h) bār pa zaratušt[6] pa ē[7] kār apar burt[5]: [8][ku apāk[9] vazurk vičīnišnīh [vičīnišn]; u[10] ka nē dānēt, ku vinās aδāp kirpak, franāmišn, — ku nē kunišn.$_0$][8]

breath there becomes three *srōšočarnām* good work, which is ten *dra(x)m*-s worth and four *dāng*-s full worth[6].

25. Another is this, that when a work or a judgment comes forth, and one does not know, whether it is a sin or a good work: when it is possible for him, then it is to be left out by him, — it is not to be executed; since [a passage] says in the *Sakātom*, viz.[5] 'not [about] everything whatever ⟨Zaratušt⟩ from all [things], but about this work it is conveyed three times by Zaratušt[5]: [8][that it is to be distinguished with great distinction; and when one does not know, whether it is a sin or a good work, it is to be passed over, — that is, it is not to be done'.][8]

---

reading *vīrāyišnīh* (from *vīrāstan* etc., AVn. Gl. 107) is wrong. [4] S. **4.** 14 n. 5. [5] Both m z instead of m d. [6] This estimate differs from those that are given in Intr. 16 g, which s. also for West's change of 'and' (*u*) into 'of' (*i*). — I have preferred to take this part as a parenthetical clause (for *ast i* 'which is' s. **1.** 1 n. 8); but if we are to take it as a relative one, then *ast* 'is' would go with *kirpak* 'good work', and *bavēt* 'becomes' with the estimate portion, which is better as regards the order of the words but not as regards the idiom of the language.

25. [1] M has no -k as given by Davar. [2] K om. [3] K corr. *-š* from *vinās*. [4] K ad. *u*, M *-u*. [5-5] It is possible that this part does not belong here, but it suits here more or less, which it does not do in any other place, as far as the disturbed sections are concerned. — I have omitted *zaratušt* because of the foll. *pa z.* 'by Z.'. [6] K ad. *u*. [7] K om., or *1*? [8-8] This part from 27 (and not what follows, which is quite another matter) must belong here, since it is what is said to occur in the *Sakātom nask* above, and since its wording resembles that in DkM. **755.** 2 ff.: *apar nikīrītan i mart kār pēš hač kartan: — ka nē dānēt, ku vinās aδāp kirpak: ka-š tuvān, bē spōxtan, — nē kartan* 'about a man's scrutinizing a work before doing it: — when he does not know, whether it is a sin or a good work: when it is possible for him, it is to be thrust aside, — it is not to be done'. [9] M ^{0}m, for ^{0}mn (in the ideogram). [10] M *i*. [11-11] This part (and probably the next clause also; s. 29 n. 2-2) from 29 must belong here. [12] Both an yyt. Had Bartholomae noticed this orthography, viz. *x^{v}ast*, not *x^{v}āst*, he would not have perhaps declared in MirM. **2.** 33 that the ideogram occurring in so many places in the sense of 'to repeat or learn by heart a holy text' is a corruption from *apar x^{v}āndan*, which is nowhere met with in any form, and the difference between the orthography of the two words is not so slight. Let it be also noted

25 b. [11][ēvak ēn, ku apastāk u[2] zand ka bē x^{v}ast[12], bē nē žōyišn[13]; —][11] ku, tāk apastāk
M 104 r zand ka-š narm bē kart, ō gōwišn, u[2] bē nē žōyišn, čē pa žūtan [i] baγān[14] ahunavar girāktar[15];

25 b. [11][Another is this, that when the Apastāk and Zand is repeated[12], it is not to be mumbled[13]; —][11] that is, till when the Apastāk and Zand is committed to memory, it is to be recited, and it is not to be mumbled, because through the mumbling of the piece[14] *ahunavar* it is very grievous[15];

---

that NP. *bar x^{v}āndan* has no special meaning, it is the same as *x^{v}āndan* and "to attribute". I believe FrP. 18. 4 is right except in the orthography, note the context: 'to speak, to repeat or to learn, to teach'; and 'to repeat' etc, can well be connected with 'to press' etc., the ascertained meaning of *x^{v}astan*, from the standpoint of semasiology, cf. 'cram' and 'to hammer a thing into a person', and Guj. *ṭhas^{a}vũ* 'to be impressed', *ṭhasāv^{a}vũ* 'to impress', the lit. sense of which is preserved in Hin. *ṭhus^{a}nā* etc. 'to be stuffed, to be crammed'. — West, "laughs (*xandēt*)", wrong. [13] Both yn y-*išn*; but yn-*tan* below shows that the readings *dand-* by Darmesteter, ZA. 3. 86 f. n. 7, 10, and *žand-* or *gand-* by Bartholomae, WZKM. 29. 47, are wrong, since all of them would require yn yyt n n (i. e. yn y -*ītan*), which is nowhere met with, s. N. 20. 8, 13, 24, 26 f., 29 — everywhere yn t (*ēstēt*), hence also yn yt (ib. 14, 18) is a mistake for yn t, not for yn yyt. (Bulsara reads *dang-* comparing NP. *dang* 'stupefied', but the same difficulty applies to it.) Again note that as regards *dand-* the ety. is unknown, s. AirWb. 745 f. and as regards *žand-* or *gand-* *bē*, taken by Bartholomae as a necessary part of the term for its ety. and meaning, viz. 'forget' (*bē* = for-), does not occur in most of the cases. In the absence of any other reading that corresponds to the orthography, I identify our term with *žūtan*, *žōy-* 'to eat, chew', s. 2. 105 n. 2; note that the corresponding NP. *žāvīdan* means 'to howl' besides 'to chew', — it is given by Vullers with one example, though he does not give 'to scream like birds' and 'to hawk, spit' for its var. *ǰāvīdan*. I do not see why the other should be a mistake for *zārīdan* 'to weep, cry'; cf. German 'Worte kauen' and Guj. *cāvīne bol^{a}vũ* 'to speak affectedly (lit. chewingly)'. In our case we may say 'mumble' or 'stammer' from 'to pass over, leave out, drop', and not from 'forget', s. 26 n. 7 and the N. passages with *pa vināskārīh* 'out of sinfulness, sinfully'. Again this meaning of *žūtan* explains why *drāyān-žōiyišnīh* is translated by 'speaking during prayer' or 'praying chatteringly', and not 'devouring chatteringly' in SX^{v}Ap. 41. 27, s. 5. 1 n. 3—4. [14] Both $^{0}\gamma^{0}$; DkM. 873. 8, 874. 11, 876. 13 ^{0}k^{0}, also only *baγ* (b k) in DkM. 873. 13, 878. 8 with the same meaning; from Av. *baγā-*, though its Ptr. is *baxtārīh* 'part, portion', — the gl. in PY. 55.7 (54. 23), *frakart* 'chapter' cannot be applied in other cases. [15] Cf. *girāk*, common in PV. and connected with *girān*. — M d^{0}, if genuine, the word may be read *darrāktar*, (or *dirr^{0}*, s. PSt. 62, GIrPh. 1 b. 125), and the phrase without the addition of *i* can be rendered 'the piece *ahunavar* is very corrupted' (West, "more chattering"), but that is not meant in the foll. quotation.

26. čiγōn gōwēt pa baγ[1], ku kē[2] [andar][3] ān i man [axᵛ][3], zaratušt! baxtārīh[5] i hač ahunavar dranǰēt[4], — ku narm bē kunēt, — -u[6] apāč bē rānēnēt[7] — ku bē žōyēt[8] — čand nēmak aδāp srišūtak aδāp[9] čaϑrušūtak aδāp panǰūtak, bē ōy[10] pāyom[11], man kē ōhrmazd hom, ruvān hač ān i pahlom axᵛ, — ku-š apāč[12] dārom[13], — pa and[14] zahāk[15] čand pahnāk i ēn zamīk.[16]

27. S. **29** (**b**) n. 4, and **25** n. 8—8.

28. ēvak ēn, ku čīš[1] pa hampursakīh[2] i apāk vēhān kunišn; -u handāčak [i] ān-ič pa čiϑradāt[3] paδtāk, ku spandarmat[4] ō manuščihr[5] guft, ku ān-ič [i][6] tēžtar asp

26. as [a passage] says in the *Baγ*[2], viz. 'who [in][3] that which is my [world][3], O Zaratušt! the piece[5] which is that of *ahunavar* repeats[4], — i. e. commits to memory, — and [thereby] passes[7] over (omits[7]) — i. e. mumbles[8] — as much as a half or one-third or one-fourth or one-fifth, [as to] him[10] do I stop[11], I who am Ōhrmazd, the soul from that which is the 'best existence', — i. e. I keep it back, — at so much distance[15] as the breadth of this earth.[16]

27. S. 29 (b) n. 4, and 25 n. 8—8.

28. Another is this, that a[9] thing is to be done through consultation with the 'good'; and a simile of[10] even that is evident in the *Čiϑradāt*[3], that Spandarmat said to

---

26. [1] M b k, as in DkM. **678**. 3, 10, **681**. 3, **873**. 8; K b γ. [2] Both *hač*, but s. PY. **19**. 7 (12). [3] Added from PY. **19**. 7 (12); *man* 'my' cannot be connected with *baxᵒ* (as West does), because *žarᵒ* stands between them. [4] Both ᵒj yyt, but it is not wrong, as West declares by reading it *drūǰist* "most fiendish"; -yyt is a common mistake for -yt, and *dranǰēt* is as correct as *dranǰēnēt* of PY. **19**. 7 (12), s. Av. [2]*drang-*. [5] Both b aatᵒ instead of b atᵒ — a common feature, but written so as to be read *bēštārīh*; hence West's alternative tr. "vexation", which as well as his other remarks is wrong. — For the foll. phrase (instead of 'which is from') s. the original Av., Y. **19**. 7. [6] K om. [7] In PY. **19**. 7 (12) *apārōkēnēt*, Av. [3]*raod-*, [2]*raoϑ-* (S. [2]*rudh-*) with *apa* etc.; the other occurs elsewhere — in PV. **13**. 49 with the gl. *hil-* 'leave out'. [8] M written above *gōwēt*, but again so marked as to be read *gōyēt*, (K dᵒ); and hence West's "shall utter [it aloud]"; for the other s. 25 n. 13. [9] M ad. and strikes off *časr-*, the usual orthography of the next word. [10] Av *dim*. [11] K n ytᵒ, yt for t is not rare; PY. **19**. 7 (14) *tanavom*, Av. *tan-* with *pairi* 'withhold'. West, "shield", wrong, cf. **7**. 2 n. 5. [12-13] PY. **19**. 7 (14) *bē gīrom* (or *kunom*). [14] M erased (with the exception of the d- mark) owing to the patch upon it being carelessly removed; its copy has *ān* 'that' (given by Davar also), a wrong conjecture. [15] Lit. 'size, measure'; M n. *pahnā* 'breadth' which occurs below. [16] In this phrase are combined two clauses of the original, s. PY. **19**. 7 (15).

28. [1] Davar *rōč* 'day', i. e. mn- is omitted from the ideogram. [2] M ᵒ*sīh*. [3] K -*ro-*, as in DkM. **688**. 6; but **678**. 9, 12 resembles M. In Riv. **3**. 16, **6**. 19, **11**. 16 -yat (-*dāt*) is read -št. [4] K s p-, M sp-, as usual in them. [5] Both m an n yᵒ [6] Or the prec. thus: *ān i-č*, s. GIrPh. **1**. 322. [7] Both join -*ēn* to the next word. [8] M ad. *i*. [9-10] West, "an opinion of anything is to be formed . . . good",

M 105 v tāčānak andar apāyēt, u ān i tēžtar kārt i pōlāpatēn[7] awsān andar apāyēt, u ān i dānāktar mart hampurs[ak]īh[8] andar apāyēt.₀

29. [1]⟨ēvak ēn, ku apastāk u zand ka bē xᵛast bē nē žōyišn⟩[1] čē[2] ōhrmazd xrat[3] harvisp-ākās[2].

29 b. [ēvak ēn,][4] [ku] kirpak⟨īh⟩ [i] vazurk kunišnīh i rātīh ast, bē apēr pahrēžišn[5]
K 73 r hač avičītār[6] dahišnīh; čē pa ratuštāiti[7], apar girān pātifrās i avičītār dahišnān[8] pa mēnōk, vas čīš [i] dužvār[9] guft ēstēt.₀

Manuščihr, that [for[11]] even that which is the swiftest horse the whip is requisite[12], and [for] that which is the sharpest knife made of steel the whetstone is requisite, and [for] him who is the wisest man consultation is requisite;[13]

29. [1]⟨Another is this, that when the Apastāk and Zand is repeated, it is not to be mumbled; —⟩[1] because[2] [only] Ōhrmazd's understanding is all-knowing[2].

29 b. [Another is this,][4] that a great good work is the practice of charity, but [there must be] extreme abstinence from inconsiderate[6] giving; because in the *Ratuštāiti*[7], on the severe punishment of inconsiderate givers in the spiritual [existence], many harsh things are related.[10]

---

wrong. [11-12] Thus, not 'even . . . horse requires the whip' etc., which is not correct grammatically. [13] The extant summary of the said *nask* (DkM. **688.** 6 ff., s. **689.** 10) does not contain any trace of this; but in a work based upon it we read about Sp. coming in the house of M., ZsA. **4.** 4 (SBE. **47.** 134), cf. ŠE. 38.

29. [1-1] This part we have removed to its proper place, the beginning of 25 b, because it is difficult to see its relation to what follows, viz. about care in charity. [2-2] This clause too cannot be connected with the foll. matter; it may be taken along with the prec. to 25 b, if we translate it 'because it is Ōhramazd's all-knowing wisdom' (for the idea cf. Av. *xratav-* with *ašavan-*; — does the last clause of Vr. **19.** 1 refer to the same idea, if we change the case of Ahura?); but it disturbs what follows there. Hence I believe it forms the end of 28. [3] M joins it to the foll. [4] This beginning is from 27, the rest of which we have added to 25. — It is difficult to account for all these dislocations. The matter becomes simpler, if we take the prec. clause to 25 b (s. n. 2—2): viz. two parts have exchanged their places; but even then, there remains the wrong insertion of *ēvak ēn*. It may be suggested that that is due to its being written on the margin, and that the same can be the case with the said clause. In any case, there is no doubt about the dislocations, although West and Davar leave the text as it is in the MSS., and without any notice of the fact. [5] K ad. *u*. [6] West, "irritation (*hanjītār*)", wrong; so also his "unhelpful" in SBE. **37.** 467; s. n. 10. [7] Both -ya (*-īh* etc.), but -y in DkM. **678.** 5, 11, **684.** 19. As to the reading I follow Riv. **3.** 14, **5.** 10 etc. rather than accept West's "*rato-dāt-aītag* concerning the habits of a priestly master", SBE. **37.** 19. [8] K corr. *-ān* from *-īh*. [9] Both yn č n a r; s. Hübschmann, ArmGr. 143. [10] The foll. is preserved about this matter in DkM. **685.** 6 f.: *u masīh i vičītār-dahišnīh andar kirpakān, u ēvēnak i vičītār-dahišnīh* 'and the greatness of considerate giving among good works, and the kinds of considerate giving'.

30. ēvak ēn, ku ast hač-ač vēh-dēnān anākās[1] dēnīh rāδ: ka mātak pa ēvēnak [i] xrōs vāng kunēt, kark bē ōžanēnd; pōryōtkēšān[2] ōγōn[3] guft, ku vināstārīh ast i hač yātūkān andar ān mān, -u xrōs pa apāč dārišnīh apattūk[4], u mātak ān vāng ayārōmandīh [i] xrōs rāδ kunēt; u[5] hamē[6] ka apāyēt, xrōs -1 i dit andar ān mān āwarišn.$_0$

31. ēvak ēn, ku žūžak[1] ka vēnēt, aδak apāč[2] ō dašt γyāk i apēbīm pahrēžišn; čē pa yutdēvdāt[3] dastowarān čāšt, ku žūžak ka har rōč andar mōr-āšānak[4] -1 mēzēt[5], ast[6] ka[6], ē[7]-1000 mōr bē mīrēt.$_0$

32. ēvak ēn, ku andar yutdēvdāt haft[1] ēvēnak čīš guft ēstēt: ka mart[2] vahān i markīh ān bavēt, tāk gāh i[3] pēš pati-š andar āyēt, nasrušt[4] apar nē duvārēt; u pa

30. Another is this, that there are even among those of the 'good religion' ignorant[7] [persons] as regards religious commands: [so e. g.] when[8] a female [fowl] makes a sound (i. e. crows) in the manner of a cock, they kill the hen; [but] supreme law-givers have thus said, that there is mischief-making from wizards in that dwelling, and the cock is incapable of withholding, and [so] the female [fowl] makes that sound for the assistance of the cock; and[9] whenever it is [thus] necessary, one other cock is to be brought in that dwelling[10].

31. Another is this, that when one sees a hedgehog, then it is to be preserved again[2] in a field-place free from danger; because in the Vidēvdāt authorities have interpreted, that when a hedgehog urinates every day in an ant nest, it[6] happens that[6], a thousand ants die.[8]

32. Another is this, that in the Vidēvdāt things of seven[1] kinds are mentioned: when [one of] those becomes [for] a man the cause of death, till the day-period next

---

30. [1] M also, but Davar ^{0}k ya. [2] K ad. *u*; M *-u*. [3] S. 2. 121 n. 3. [4] ap t n k; s. ZWb. 182. [5] M om. [6] K ^{0}*māk*; M *nāmčist* (*nām* = *u ham-*). [7-8] Or '[who] on account of the ignorance of religious commands, when', which would require *-īh i pa* after *anākās*. [9-10] West, "especially when the bringing of another cock into that dwelling is necessary", wrong; if the reading of M (n. 6) is to be adopted the tr. will be: 'when it is especially necessary . . .' or 'special (from what they have said is:) when it is necessary . . .'.

31. [1] M n. *ǰānvar i ašō* 'a "good or sacred" animal'. [2] Both *apāk* which occurs in the same sense, ZSR. 1. 30; but s. Šnš. 12. 20. — West suggests *apāk ōy* '[along] with it'. [3] Both d y p, for *dēv*. [4] M n. *guruh i mōr* and in Av. let. *mōr-āšyāna*. [5] M n. *baul kunad*; (it has no -k). [6-6] Both *ast kē*, but then must follow *ētōn gōwēt*. For the adopted meaning one might expect *ast ku*, but only the other is met with, s. ZSR. 1. 23 n. 2. [7] Both y, as usual. [8] This is not to be found in the extant commentary of the work, but it might have occurred in some other, — V. 13. 1 f. calls the animal a 'thousand-killer'. For further details s. GBd. 156. 2 ff. (= BdK. 48. 1 ff.) and SBE. 4². 156.

32. [1] Thus both, but in V. 7. 3 eight cases of unnatural death are given. [2] Must *rāδ* be added? [3] K om. [4] As in PT. 121. 4, 7; MvA. 18. 3, 5, 25. 3.

ēn čem, ēn-ač vēhān nēwak, ku hamist[5] nasāk pa gāh [i] pēš sak hūpīhā apāč nimūtan.$_0$

33. ēvak ēn, ku ōyšān, ka[1] nasāk pa pākān pahrēžēnd, aδak-šān[2] sak ō nasāk nikīrišn[īk]tar[3] nimāyišn; čē nasāk i sak nē dīt, ka-č ē[4]-1000 tan apar stānēnd, hamāk rēman hēnd.$_0$

K 74 v **34.** ēvak ēn, ku gōšt, ka hambun-ač gandakīh aδāp vaštakīh[1] ast, nē yazišn;$_0$ drōn
M 106 v u[2] gāuš-[u]dāk[3], ān[4] i hač[4] duž[5] u[2] apar nē yazišn[6].$_0$

to it sets in, the *nasuš* (Putrefaction) does not rush on; and for this reason, this too is beneficial for the 'good', viz. to show again a dog well [unto] all[5] corpses in the next period of the day.[6]

33. Another is this, that [as to] those, when[1] they preserve a corpse from its cooks[1], then by them a dog is to be shown to the corpse very observantly; because [as to] a corpse which a dog has not seen, even when a thousand persons take it up, all are polluted.

34. Another is this, that [as to] meat, when there is even little stench or decomposition[1], it is not to be offered up; [as to] the (sacred cake) *drōn* and the (sacred butter) *ǵāuš-[u]dāk*[3], those which are from[7] theft and robbery[8] are not to be offered up.

---

[5] Both k aymn; its Paz. is *xāmast* which, however, is a more or less mechanical representation of aam (y) yyt (not aym^0 as Bartholomae, ZHss. *53 n. 3, gives) occurring in BdK. 8. 7, 9. 13, 11. 14. I read *hamist*, taking aa- for a- as in other cases, since the term must be connected with *hamāk* 'all' which is its meaning, — and not "previous" (or "primitive" etc.) as West and others give. I now find that Bartholomae has given up his former view in ZSR. 3. 33 f. [6] This conclusion is not drawn in PV. 7, but in any case it resembles the modern usage.

33. [1] Both *kē* 'who', which is preferable, if *aδak* 'then' in the next clause can mean 'even'. [1-1] West, "who attend to a corpse among the pure", but that cannot be the idea here. Fur *pākān* 'cooks', s. *nasāk pāk*, Av. *nasu-pāka-* (some more details are given in PV. 8. 74 (236) com.). [2] M also, but Davar *-ēšān* (a y^0). [3] S. App. [4] Both y- as usual.

34. [1] Believing that this is the same word that commonly occurs as the gl. of *hī-[va]ndakīh* (s. Salemann, MSt. 92 f.), Av. *axtay-* 'pain, illness, weakness', I read it as Bartholomae does — from *vaštan* 'to turn [bad]'; but we can read also *naštakīh*, NP. *našt* 'spoiled' etc., Av. *nas-* (*našta-*) 'disappear'. [2] M *-u*. [3] M *dahēnd* 'they give'; K ^{0}dyk, but s. 2. 43 n. 1. [4-4] M om. [5] M *ōž* 'strength', i. e. an č, for yn č. [6] M corr. from ^{0}*zēt*. [7-8] West, "hairy" (without any reading), wrong.

35. žan pa zōtīh [i] žanān šāyēt; u ka drōn hamē[1] yazēt[2], u-š ašemvohūk 2 guft[3], barsum apāč ō barsum-dān nihēt, apāč āwarēt[2], u ēvak i[4] dit bē gōwēt[5], — u hūp; u ka, pēš hač čāšnīk[6] kartan, nē pa nikīrišn mānāk gōwēt, šāyēt.$_0$

35. A woman is allowed for the office of the *zōt* [priest] of women; and when she is offering up the *drōn*, and two *a š ə m v o h ū* are recited by her, [then][7] she [should] put the *barsum* back on the *barsum*-stand, bring it back [to its place], and recite another one, — and it is good; and when before[8] the performance of the *čāšnīk* (tasting), she recites it not in the manner of observation[9], it is allowed.

---

35. [1] M *rāδ* (or *nē* 'not'). [2] M also, but Davar -ť for -yt. [3] M ad. *-u* and joins also the next word. [4] K *-u* [5] Both ^{0}*wišn*. [6] M also, but Davar ^{0}*štīk*. [7] It is possible that it should be in the prec. clause, instead of 'and'; but, although *u-š* and *ā-š* are often exchanged, we have to replace *guft* (yn p t) by *gōwēt*, or read it *guftan*, and change the foll. accordingly. On the other hand if we are to adopt here 'and' of M (s. n. 3), 'then' can be placed before 'it is good': *u* for *ā* occurs also in PRivDd. **185**. 5 as N. **45**. 16 shows; — but s. n. 8—9. [8-9] West, "she says it is not expedient to do [it] attention before a meal", wrong. His tr. is also otherwise not precise. — Of course the details gained by our one cannot be justified from modern usage (YbN. 46; Modi, Cerem. 298, 324), but they find some support in N. — Women are allowed to officiate as *zōt*-s in the Av., but the MP. gl. adds *pa ān i x^{v}ēš* 'for that of one's own (or of relatives)', — cf. *pa ān i kasān* 'for that of [other] persons' as regards minors, N. **62**. 26 ff. It is perhaps this clause, upon which the present statement is based. — As regards the manner or order of recital, cf. *ān ašemvohūk 3 dō vičārīhā pa dānišn gōwišn* 'those three *aš.* are to be recited in double performance (i. e. in two divisions) knowingly', PRivDd. **182**. 15 f. The corresponding N. **49**. 10 omits this clause; and the ed. joins *dō vi*^{0}, but what is then the meaning? It can be *hu-vi*^{0} (yn- for an-)! For our interpreation s. further below, esp. *ast kē 'pēš pas' gōwēt* 'there are some who say 'before [and] after' (i. e. not continuously)'; cf. also few lines above, though the matter is not clear: *a. v. 3 bē gōwišn*; *pa har 2 . . . pa ān ē bār* (N. **45**. 11 ff.). — As to the detail about the *barsum* it seems that it is to be removed before the *čāšnīk* (tasting), so that it might not be unclean through it. Of course this idea is not clearly expressed in N. **45**. 15 ff. (cf. PRivDd. **185**. 4 ff., **183**. 6 ff.), but it is implied therein; — it is enough to note that after the *drōn* is ended (*sar kart* which Bulsara translates 'the head is turned towards'; he is wrong also otherwise), directions are given first about the clean and unclean *barsum* and then about the *čāšnīk* (tasting). — As to the last clause cf. N. **46**. 28 ff. (= PRivDd. **177**. 10 ff.) which enjoins that various articles are to be looked at when the corresponding words are recited. In the present case the reference is to the last *ašəm vohū*, and hence the difference.

36. drōn[1] i žan i[2] du[š]srav[3] nē yazišn, bē uzēnak[4] kunišn.$_0$

37. ka pa nikīrišn čiš -1 pēš i ātaš nihēt, -u[1] tan [i] brih[2] nē vēnēt, t a v a ā ϑ r ō nē gōwišn.$_0$

38. pa[1] šap ka[2] bē x'afsēt, dast bē šōδišn.$_0$

39. ān[1], i hač žan i daštān ō kas aδāp ō čiš rasēt, hamāk pa gōmēz u āp bē šōδišn. $^0_0{}^0_0{}^0_0{}^0_0{}^2$

⟨**40.**⟩ *ēvak ēn, ku āturpāt māraspand[1] guft: ka har[2] kas -1 bē vitīrēt, padām u vastrakač hač dāsrān[3] hūp kunišn, ku[4]-š ruvān āsāntar bavēt.*$_0$ *fražaft[5] pa drūt u šātīh.*

36. The *drōn* of a disreputable woman is not to be offered up, but expense[4] is to be made [by her].

37. When one puts in sight a thing before fire, and [so] does not see the body of the blaze, the words *t a v a ā ϑ r ō* (to thee, the fire) are not to be recited.[3]

38. At night when one lies down, the hands are to be washed.

39. [As to] that which comes from a menstruous woman to a person or to a thing, all is to be washed with cattle's urine and water.[2]

⟨40.⟩ Another is this, that Āturpāt Māraspand has said: when anybody passes away, the *padān* (the mouth-veil) and also the clothing are to be well made from the gifts[3] [of clothes dedicated in the fourth-day ceremony for the dead][6], so that the soul may become more comfortable.[7] Finished with benediction and joy.

---

36. [1-2] M om. [3] *-š-* is not written in Mx. also, but s. FrO. **26.** 10. [4] For the reading etc. s. MirM. **1.** 30 ff. — If *kunišn* is wrongly replaced for *gīrišn*, the tr. would be 'is to be taken [from her]'. And if we are to read the other word *avičīnak*, it would be 'it is to be made unapproved'.

37. [1] K om. [2] Both b r aa, as in PV. **16.** 2 (8) com., but it is not to be read *brāh* or *barāh*, s. Šv. [3] S. the last part of 35 n. 8—9.

38. [1] M different handwriting up to the end of 39. [2] Both *kē*.

39. [1] Both an n. — S. 38 n. 1. [2] K has no such sign, but leaves the rest of the line blank; and ad. the foll. colophon in NP., dots being generally omitted: ⟨*āδar*⟩ *rōz āδar, māh mihr pērōzgar, sāl haftsad pārsī, man, dīn banda, hērbad zād, mihr-ābān kaixusrav mihr-ābān marz*[*b*]*ān* '[on] the day Āδar (9th), the month *Mihr* (7th) the victorious, the year 700 Pārsī, I, a servant of the religion, a son of a priest, M. K. M. M. [have written this]'. — M ad. in a different hand the foll. interpolation in faulty language.

⟨40.⟩ [1] MS. m a r a s-. [2] So also in Vkd. 138. [3] Vkd. 138 has in this place k an b, which Bartholomae, IF. **11.** 120 f., reads "*kanab* Hanf", but it is to be connected with k an b n in PT. **66.** 13 ff., which means 'old', NP. *kahun* or *kuhan* 'old, worn out'. In practice also white and washed old clothes are used for the purpose as enjoined in Sd. **12.** 1—2 (the tr. of which by West is wrong), and cf. V. **5.** 58—61 and Šnš. **12.** 4. This explains why a copyist of M takes

our term as 'worn out'. [4] MS. *ka*, Vkd. 138 *tāk* [5] MS. -p t n joined to the next. [6] For this interpretation cf. the fourth quotation from some Rivāyat in Bharucha, Rist 89; otherwise we must change *hač* into *pa* for the meaning 'as gifts', referring to what the Indian Parsis technically call *sivā* (which is from Arab. *ϑiyāb* 'clothes', however strange it may be), and to *ǰāma* or *ǰāma-yi ašōdād*, Riv. **152**. 19; **156**. 16, which is in use among the Persian Zoroastrians, s. Madr. Mem. Vol. 311, and lastly to *yāmak* Šnš. **17**. 4; but that is not the idea, s. n. 3, 7. [7] In the beginning of the 18th cent. one of the controversies was about the use or not of the *padān* for the dead — (the practice differs even today), s. Cama Mem. Vol. 175. A partisan seems to have tried here forgery to baffle his opponents and to cheat his followers in the name of Āturpāt Māraspand, (who is said, also in a Rivāyat, to have given a similar enjoinment about the *padān*, s. Bharucha, Rist. 90). This is done on a larger scale and not with disinterested motives in Vkd. In M later also — Šnš. **12**. 4 — *yāmak* has been scratched out and replaced by *padām* by a later hand. Both West and Davar have not seen this.

Appendix

of incomplete quotations and other additions.

§ 2. Add at the end: and in our text *patīt*(. . .) is not written p yt⁰ as is done in Mx. and AVn. Hence in these cases also -yt- and -t- are mixed up as elsewhere, and the former does not represent the northern pronunciation *pet*(. . .).

§ 3 c. *ēsm* is written in both a yym (instead of a yyym) as said in **8.** 18 n. 3.
hamē is written like *hamāk* in K (as said in the notes).
In Av. words M uses the Ir. *y*- and the ligatures of *s* and *č* and of *a* and *h*.

§ 9. As to *dirahnā*: it occurs also in Tīrandāz 344 as *durahnā*, whereas in the same piece in PazT. **206.** 9 we have *daraṇā* (cf. *drānā* in the same phrase, **213.** 23). Hence we can say that -*h*- represents a short vowel as it does in some transcriptions of Av. terms (s. **9.** 11 n. 4), and that the word is to be read *dranā*. If such be the case, the MP. orthography d rn⁰, which is very common in GBd. (s. also PRivDd. **179.** 1 f.), is not defective. I refer to this for the sake of completeness, irrespective of its being correct and useful for the question or not.

§ 10 b. As to an mn yt in AZ. 76 (etc.): Bartholomae, MirM. **4.** 36 n. 1, explains it differently: a copyist found a yt, for which he wrote the ideogram of *ēt* or *hēt* 'you are', whereas the original meant *ēt* 'this'. For the existence of the latter he refers to *ētōn* 'thus' and MPT. *ēd* 'this', which is perhaps not enough. However this may be, it does not affect the main question.

§ 13. As to *grah* s. below **4.** 11.

§ 14 c. As to *tars* (*i*) *astūdān*: in Riv. II. **34.** 1 f., **478.** 12 the term is written t r s s t u d a n, with the explanation *ya'nī se* (*3*) *vandīdād i sarōš dar se* (*3*) *šab* 'that is, three *vandīdād* [ceremonies in honour] of Sarōš in three nights'. As we have seen, this orthography is given by Bharucha also. If it is genuine, the term does not refer to *astūdān* or *daxma*, which fact supports our doubts about the matter.

§ 16 b. As to seven for eight, note that the same phenomenon occurs in **10.** 32. In the latter case we have left the number seven, since the eight cases of death by accident or violence are not mentioned there.

1. 0 n. 10. As to *ayār*(. . .) s. below **10.** 15.

2. 2 n. 7. The name is written in PV. **6.** 35 (73) com. just as in our text. It is possible that *vanand* of M⁺ n. is wrong, and that the original is to be read *vind* for *vindāt* 'obtained', cf. *māh-vindāt* in Vyt. **3.** 3, PY. (**9.** 33, **10.** 57, **11.** 22, **19.** 27, — here more or less defective, and Str. omits and in the last case misinterprets it), and *dāt-ōhrmazd* in Vyt. **1.** 7, **3.** 16, PY. (**10.** 57, **11.** 22, — Str. omits it).

2. 4 n. 2. The last of the NP. words, *pōža*, is wrong. It is *pūža* and means 'thigh'. Then like NP. *panǰa* there occurs *panǰ* 'paw' in GBd. **95.** 4 (= BdK. **29.** 12), but this is not meant in our case.

2. 9 n. 4. 'all covered, not all uncovered, except those corpses, which they bring out from a house, till then it is not allowed'.

2. 10 n. 2, 6. The reading and the meaning are not quite certain. The word occurs in PRivDd. **49.** 3 thus: *awr* aamnn *u* (s. var.) *vārān virēkīh* (s. var., — the first -y- is plene) *kunēt* 'clouds . . . and rain fly away (disappear)' as a sign of the *myazd* having reached the *dēv*-s. Here the word in question must be a noun just as 'clouds' and 'rain', or an adj. qualifying one of them. I have nothing to suggest for the former, and for the latter only *hămīn* 'summer'. At least in our case *awr* [*i*] *hămīn* 'summer clouds' as opposed to *awr i vārān* or *vārandak* 'rainy clouds' (s. **10.** 18 n. 8) will be quite suitable.

2. 13 n. 3—4. Sd. **41.** 3 runs thus: *čūn nān xᵛāhand xᵛardan, dast ba-āstīn kunand, yā čīz-ē bar bālā-yi āstīn nihand; — mī-bāyad, ki dast i barahna i ū hīč ǰā bāz na-yāyad* 'when they (menstruous women) wish to eat bread (i. e. to take their meal), they should keep their hands in the sleeves, or should put a thing on the top of the sleeves; — [because] it is necessary, that their naked hands do not come direct to any place'.

2. 34 n. 5. As to *mat* s. below **2.** 72.

2. 38 n. 7. *čīdan* means 'to collect, select' and it can be said that the various fires are really collected or selected in the process, but its object is to save them from the danger of impurity, and hence to remove and purify them. The quotation means: 'and small trees (i. e. bushes) are to be removed clean by him', when preparing a *barašnūm gāh.*

2. 38 n. 10. 'when they [can] give away [the fire] over the dead, even then it is to be given away'.

2. 42 n. 1. 'the clothing and ornaments, which people keep on the body, are pure'.

2. 43 n. 1. Riv. **12.** 2 gives the same as PazT. **232.** 9; also ZHss. 175, where Bartholomae does not explain the word in question, but says that it is for *ǰīvām.* The term is used also in Riv. II. **24.** 3.

2. 44 n. 3—4. 'when they (menstruous women) wish to bathe, cattle's urine must be applied twice on the head'.

2. 46, (47 n. 1). Riv. II. **378.** 11 f. shows that *gumbat* need not be a cupola or the like, but simply an apartment; it is used there for the apartment for persons on the point of death.

2. 49 n. 2. The text runs: *xākistar-aš agar* (*dar se 3 gām*) *garm buvad, pāk bāšad* (once *buvad*); *ān-či sard buvad rīman bāšad.*

2. 52 n. 1. Sd. **41.** 5 runs: *u har pādiyāv-ē, ki bāšad, az pānzdah gām i zan i daštān bi-bāyad parhēzīdan* 'and every single consecrated object, which might be [there], is to be preserved (or taken care of) fifteen steps of a menstruous woman'.

2. 57. The name of the commentator is throughout read Kūštanŏ- instead of Kay-ātur- by West and others. The wrong insertion of n after k (s. **8.** 17 n. 2, — it is very common in PV.) has led them to it.

2. 61 n. 6—7. 'what about a monkey? and is its menstruation polluted or not? According to the commentary of M. its menstruation is polluted'; and:

'[as to] a monkey every single thing becomes so, as [that of] a human being'.

2. 63. As to *ǰumb-* we do not know the ety. (s. GIrPh. **1.** 302); Bartholomae, WZKM. **29.** 42, reads *yumb-*, but it can be also *žumb-;* and so I have left it as in NP.; cf. *čand-*.

2. 66 n. 2—3. As regards *bē ka . . . aδak(-aš)* or *tāk(-aš)* or *ēnyā* (which last he reads *ēnīh,* but s. **2.** 66 n. 4) Bartholomae, SRb. 10, ZSR. **4.** 27, etc., believes that only the last is the correct word and that the other two are mistakes for it. He supposes that there existed another form an ya *(anīh* besides *ēnīh)* which was read *andā,* the Paz. of *tāk,* and was replaced by the corresponding ideogram. Now the said form occurs in FrP. **25.** 3 as the explanation of the common one, but there is nothing to support the rest of the supposition, and the use of *tāk-aš* in **2.** 68, 71, **3.** 15, 23 goes against it, though *-aš* could have been added later on. As regards *aδak-aš* and *ēnyā* it is true that they can be easily mixed up; but it cannot be said that such is really the case in the present phrase. Of course, *ēnyā* 'otherwise' suits it far better than *tāk-aš* 'till . . ' or *aδak-aš* 'then . . ', (both of which I have translated by 'till then'), and so it is probable that Bartholomae may be right.

2. 69 n. 12—13. Cf. also *andar ō bun bavēt* '[the sin] accrues into the stock', PV. 4. 17 (54 ff.).

2. 71 n. 3. The same orthography is used in AVn. **53.** 5, PV. **8.** 36 (116, but missing) etc., GBd. **152.** 10 (= BdK. **45.** 3 f.), — and in Šv. to judge from the Paz. *čandišni* ("movement" Str. *cañcalatā-*). All this and esp. the Paz. shows that the term is not an orthographical var. of *ǰumbēn-* as explained in AVn. Gl. 127. Moreover, we have an equivalent term in Bal. and Jewish NP., s. NpEty. 271.

2. 72. As to *mat* I did not say that M has got the ideogram of *āmat,* as I considered them one and the same. It is true that in AVn. **10.** 6, **11.** 8 K gives *mat* whereas M has the other, and that the parallel text in PazT. **359.** 6 shows the same difference as regards **1.** 43. But in other cases they are not mixed up: in Mx. whenever the Paz. has *maδ* or *madan,* i. e. *mat* or *matan,* the original has the same and not the ideogram of *āmat(an),* for which *āmaδ(an)* is used. In most of the cases the meaning too is different. In our text (s. **2.** 16 ff., 36 f., 88 f., 119) *mat* corresponds with *rasēt,* and not with *āyēt*; and such seems to be the case in the Ptr. also, where *āmatan* is not used, or is used only in the commentaries, s. AirWb. 153, 501, PV. Gl. 150, 253, 255. On the other hand *madan* does not exist in NP.

2. 75 n. 1—2. The same term occurs in PV. **14.** 6 (18) gl., but *xᵛēš* is expressed with its ideogram, and only the last part, *gāh,* is separated. The gl. is given in connection with the removal or destruction of pits filled with polluted matter (*may i rēman*); it runs: *ān kē andar šust ēstēt*; *ast kē "ān i xᵛēš-š[ā]h gāh" gōwēt* 'those in which one has washed [dirty things]: there are some who say "those which are . . ." '. The context suggests

'privies, closets', and the term is explained in my copy with the NP. equivalent *ǰāy i ẕarūr*. This meaning makes it doubtful whether we are to read *xᵛēš-š[ā]h gāh* or *xᵛēšīhā gāh*. In the latter case we shall have to read the parallel term *xᵛēšīhā-kān*, and so the former can be left: such euphemisms are not rare. The new meaning 'privy' can be applied in our case also, for it should not be considered strange that the place is referred to as being superior to the apartment for menstruous women.

2. 77 n. 5. 'that among Thy sons (or emanations) Vahuman is the first, — when I saw Vahuman, I thought thus, that he is Thy son (or emanation)'.

2. 94 n. 3. 'it is not (?) authorised to carry [a corpse] from water [to rain, when] rain is [connected with] the same water', — thus, adding *ka* and not *ō*, and without *i*; cf. the other quotation which means '. . . that (or where) rain is not made connected [with water]; that (or where) it is connected water or separate water; and if it is connected water, it is authorised; and if separate water, it is not authorised'.

2. 99 n. 2. 'afterwards in the wood they spun (or wove?) the *sarmak* (orach!) [plant], and prepared that which is the spun clothing (or the clothing from the spun material, viz. from cotton *tatak*)'.

2. 105 n. 4. 'the child . . . is to be washed with cattle's urine and water, [and] when it becomes acquainted with [the bath with the stick of nine] knots, or reaches the age of seven, then it is to be washed through [the bath with the stick of nine] knots'.

2. 116 n. 10. 'when the reed is tied (or it is built of reeds), lo! it is made for use (or into a fabric), it is to be considered as a separate house'.

2. 116 n. 14. 'amber is a gem, jet and turquoise are stones, . . . and ebony is wood'. The other: 'they consider turquoise as a gem'.

3. 1 n. 2. 'whatever is left off by her from her keeping is pure; and whatever she sits on with menstruation, that is menstruous (i. e. polluted)'.

3. 2 n. 7. '. . . then all are left off by her from her keeping, [and so] all are pure; and when she becomes menstruous on the carpet, [and] goes upon the mattress, [then] the mattress is polluted, [and] the carpet pure'. And: 'both are pure, because those all are (or were) in her keeping'.

3. 7 n. 3—4. 'when she holds a prayer, then the prayer is to be recited by her'.

3. 8 n. 3—4. 'when she holds a prayer, and menstruation comes on to her, then the prayer is to be recited by her, and it is not doubtful (i. e. null and void) for her'.

3. 12 n. 1. Sog. *p'r'yč* (e. g. in VJ. 1037) is not an orthographical var. of *pr'yč*; the first ' is the augment as will be shown by Reichelt, and is not the plene *a* as I thought it to be. Hence it does not support the reading *parēč* which, however, is preferred by Bartholomae, MirM. 1. 14 n. 3.

3. 12 n. 3. 'he collected hillocks into pits'.

3. 13 n. 6—7. PV. 16.7 (20) com. runs: *kē apāk žan [i] daštān hamkaržak bavēt, aš tan vastrak pa gōmēz āp bē šōδišn; ka* (MSS. *kē*) *tan apāk vastrak* (*u vastrak apāk vastrak*), *bē pa čāštak i sōšyans čānč nēst* 'he who becomes connected with a menstruous woman, his body and clothes are to be

washed with cattle's urine and water; when his body [becomes connected] with her clothing (and [when] his clothing with her clothing), [then], except according to the commentary of Sōšyans, it is nothing'. — The portion in the round brackets is omitted in Spiegel; cf. the second statement in our text, which it contradicts as far as the reference to Sōšyans is concerned.

3. 16 n. 6—7. 'it is not necessary to observe it till three days'; — i. e. the interval is not necessary for the special case referred to.

3. 21 n. 4. PV. 16. 7 (17) com. runs: *u-šān pa pihan gāh dast pa gōmēz bē šōδišn* 'and at the meal time the hands are to be washed by them with cattle's urine'. The other means: 'then the hands are to be washed by her, and the prayer is to be held by her', — when 'something happens, so that it is not possible for her to bathe'.

3. 35 n. 6. 'when a man is fifteen years old, and the [initiative] *yašt* is not performed by him, then bread and water are to be given to him in the manner of dogs and birds'. The next: 'and they had the religious scripture by heart, and had performed the [initiative] *yašt*'. The last (Sd.): ' . . . till they perform the initiative *yašt* and become *nō-zōd*-s (new sacrificers, initiated priests)'.

4. 3 n. 3. '[as to] that person, who does not know [how] to offer up (or consecrate) the *drōn*, it is necessary that he holds the prayer of Ōrmazd-chapter (?), and if he does not know even this, he should recite '*iϑā* . . .''.

4. 5 n. 6—7. As to our meaning of *harəϑra-* cf. similar formations: Av. *dōiϑra-* 'eye', *dvariϑra-* 'leg'; S. *carítra-* 'foot, leg', *bharítra-* 'arm'; — *-ə-* must then be for *-i-*.

4. 6 n. 4. 'when one moves uncovered or naked or in a clothing of two folds, then for him there is ⟨not⟩ in the stock the sin of running uncovered'.

4. 11 n. 3. -yy in PRivDd. 176. 1 also; and both -yy and -ya in PV. 6. 35 (73) com., 9. 14 (41) gl. For *grah* cf. S. *grantha-* beside *granthí-*; and as to NP. *girih* cf. *firistādan* beside MP. *frastātan* (from Av. *stā* 'to stand' (cf. S.), not from Av. *aēš-* 'to move, to hurry' as Lentz ZII. 4. 289 f.), and note that Fallon gives *girah*.

5. 1 n. 3—4. As to the idea underlying the sin cf. also Tīrandāz 346 (PazT. 206. 24) where *vāǰ xᵛar* 'eater with the prayer' is contrasted with *d(a)rāyān* 'chattering', and the terms are explained as *vāǰ xᵛaranda* and *bī-vāǰ xᵛaranda* (one who eats with the prayer and without the prayer) respectively.

5. 2 n. 7. PRivDd. 49. 9 ff. runs: *žan, kē-š yašt kart ēstēt, aš xᵛaršēt u ātaš i varhrān niyāyišn nē apāyēt kartan, u-šān ustofrīt nē apāyēt yaštan* [*u*] *xᵛartan, u-šān yazišn i pa zōhr nē apāyēt kartan, — ćē-šān bē ō gumbat nē hilišn, — u-šān gāhānbār ō apāyēt yaštan* . . . '[As to] women, by whom the [initiative] *yašt* is performed, [even] for them it is not befitting to perform the praise [ceremony] of the sun and the Fire of Varhrān, and for them it is not befitting to offer up (or consecrate) the *ustofrīt* (food-offering) and to eat it, and for them it is not befitting to perform the *yazišn* [ceremony] with *zōhr*, — because they are not

to be let into the cupola [of the Fire of *V.*], — and for them it is befitting to consecrate (or celebrate) the *gāhānbār* . . . (etc.)'. — The last statement shows that there is no mistake in the first clause; in other words, *nē* 'not' is not omitted by mistake before *kart* 'performed', as might be easily supposed. Again cf. N. **63**. 21 ff. where too women are not allowed (*nē šāyēt*) to perform the adoration of the sun and the moon, (which further shows that *apāyēt* means here 'is befitting or suitable', and not 'is necessary' as usual). Otherwise we may say that instead of *yašt kart* (thus in one MS., in the other two only *k-* is joined to the prec.) we are to read *daštānīk* 'menstruous', because of N. **63**. 9 ff.: *žan tāk daštān bavēt, aš yazišn pa zōhr ō kunišn;* [*ka*] *daštān būt, andar gumbat nē hilišn* '[as to] women, till menstruation takes place, by them the *yazišn* [ceremony] with *zōhr* is to be performed; [but] when menstruation has taken place, they are not to be let into the cupola [of the Fire of *V.*]'. — It seems that '*yazišn* with *zōhr*' means the proper ceremony as performed by priests, cf. Riv. II. **12**. 6 ff. which gives the relative merit of this and other ceremonies when performed with *zōr* and *barsam* and when without them. The latter refers merely to the recital of the texts, since the verb used is *xᵛāndan* 'to recite' and not *yaštan* 'to offer up (or celebrate)' or *kardan* 'to perform' as in the former.

5. 3 n. 1. In a later work, ZSR. **1**. 34, Bartholomae reads the word as we have done.

6. 7 n. 9. As to Arm. lw. *dehkan* the matter is different; it stands for *dehikan* or rather for *dehukan*, since we have in MP. *dēhīkān* (along with *mānīkān*) 'those belonging to (i. e. having) land' and *dēhūkānīh* (written as if *dahiyū⁰*, — along with *vazurkīh, dēn rāstīh*) 'the state or honour of being a landlord', Vyt. **2**. 26. Bartholomae is not quite right about this last word; in MhD. **1**. 1, *mart -1 i dēhūkān i šāhān šāh*, it can mean 'districts, countries'; but in other cases it has the usual sense as in Arm. (lw.) and NP.

7. 2 n. 9. The same idiom, *čīš hač ān rasēt*, is met with in N. **45**. 27 (= PRivDd. **183**. 7); a different one, *čīš -1 andar miyān bē āyēt* 'something comes in the midst [of it]' in PRivDd. **180**. 11.

7. 9. As to 'gathered' s. above **2**. 38 n. 7.

8. 13 n. 23—24. PRivDd. **43**. 13 ff. runs: *har ān i tuvānīk, aš bē apāyēt vičārtan; u* (MSS. *i*) *ka tnvānīk, u* (s. var.) *nē vičārēt, ā-š patīt nēst* '[as to] all those who are able (or those [things] which are possible), for them it is necessary to atone for [sins]; and when one is able, and [yet] does not atone for them, then it is no repentance for him'.

8. 14 n. 14. PV. **3**. 42 (151) com. runs: . . . *nē*[*w*]*-š*[*ā*]*hpuhr guft, ē! vinās i hamēmārān pa ēvak-ač nē bavēt, — n ō i ṯ m a r ạ m p a i r i š t ə m —; pa har 2 čāštāk ham-dātastān būt hēnd, ku apāmīhā bē bavēt, u mart druvand nē kunēt* ' . . . Nēw-šāhpuhr has said, lo! sin relating to opponents does not become as even one (i. e. is not removed, s. the Av.; — the simple meaning 'through even one' does not suit the context), — [as

the Av. declares:] it is not removed . . . (s. ²*stā-* with *pairi*; *marām* is doubtful, it may belong to ¹*mar-* 'to die', hardly to ²*mar-* 'to mark, count, etc.') —; in both the commentaries they have been of the same opinion that it becomes as debt, and it does not make the man 'wicked' (i. e. damned)'. — The former part may be doubtful and it may have nothing to do with the latter, but this must be thus construed in the light of our text.

8. 18 n. 10. Riv. **308.** 8 f. runs: *kas-ē xētyōdaϑ u yazišn ba-kas-ē dīgar farmāyad u dāyišn* (so! for *dāšan*) *i ān bi-dahand, — čunān bāšad, ki ba-dast i xᵛad kardā bāšad, yā na?* 'a person orders (i. e. gets performed) the *xētyōdaϑ* and the *yazišn* [ceremony] through another person, and gives its wages, — does it become so, as it might have been performed by one's own hand, or not?' (The reply is that it is better if one is able to perform it by himself; if not, it becomes the same in the other case also.)

9. 8. The quotation looks like a translation from the Av., and though there is no *ku* 'that is' before *āp u urvar* 'water and vegetables', it is preferable to take them as the gl. of *Harvatāt* and Amurtāt, and not as we have done. The latter are used in this sense, s. AirWb. 144 n. 7.

9. 13. As to *ayāt*(. . .) s. below **10.** 15.

10. 2. Note that *nāwar* is written n ap r, so also in Šnš. **13.** 2, N. **121.** 9, 18, **168.** 10; but n ayn r in N. **53.** 18, **65.** 7, **68.** (20), 22, **69.** (3), 8, 11, **92.** 11; and in PRivDd. **50.** 5 n aab r, n ayb r; cf. *nābar*, and *nāvar*, Riv. **541.** 17 f., II. **26.** 16, **37.** 2 f., and *nāvarām*, SAVn. 2. 1. — The ety., *nava-* 'new' and *bar-* 'to carry (offerings)', given by Modi Cerem. 199 f. cannot be accepted, since the term is regularly preceded by *nōk* 'new' in MP., and at least for this reason *nā-* must be something else.

10. 3 n. 6. As to the Paz. *aiwi-āsīṯan* (a yyb-) Bartholomae, ZWb. 102 f., compares MPT. *ayāsām* and reads it accordingly, saying that -yyb- represents only *-y-* as in other cases, s. below **10.** 15. This view does not disprove what we have said about *aibigaṯ* and *ēvgad*.

10. 15. As to *ayār*(. . .) I have not adopted the ety. and reading ascertained by Bartholomae in IF. **12.** 107 ff., since he has given it up in ZWb. 25 n. He does not distinctly say so, as he does in the case of *ayāt*(. . .), but he reads our word *ayār*(. . .), taking -yyb- for *-y-* in both cases. Tedesco, MO. **15.** 207 f. (Dialektologie) connects these terms with the northern forms and reads them *'byy't* and *'dyy'r* respectively. He even derives *hiyār* from *adyāvar*, just as *miyān* from **madyāna-*. — Cf. Lentz ZII. **4.** 306.

10. 15 n. 17. It may be added that if *buland kartan* were used with reference to a lamp, it would not be strange. Again this idiom cannot have to do anything with the modern Parsi euphemisms *ātaś vaḍā karᵃvā* 'to extinguish fire' and *ātaś vaḍā thayā* 'fire is extinguished', — wherein *vaḍā* (pl. maj.) means 'great', — because they are rather connected with the common Guj. ones *dīvo vaḍo* (or *rāṇo* or *rāj*, both meaning 'king', — the Parsis use only the other term) *karᵃvo* 'to extinguish a lamp'.

10. 25 n. 12. We may compare also Guj. *bharaḍ^{a}vū* 'to bruise, to grind' and its emphatic equivalents *bhar^{a}ḍī javū* and *bhar^{a}ḍī mār^{a}vū*, all of which are used in the sense of 'to learn a thing by heart without understanding it'. This meaning is not recorded in the dictionaries (say, of Mehta and of Belsare), but they give at least 'to speak without any consideration'.

10. 33. I have added *-īk-* in *nikīrišnīktar*, because words ending in *-išn* can have adjectival (and thence adverbial) meaning only in compounds, e. g. *duš-menišn, rāst-gōwišn, frārōn-kunišn*, etc. Hence it is that I have not added *-īk-* in *nazdīk-mānišntar* in *Šnš.* **12.** 30, s. **5.** 2 n. 7. In the absence of further examples it cannot be said that *nikīrišntar* was influenced by such terms, or that it was considered as a compound.

1.

Die Rama-Sage bei den Malaien ihre Herkunft und ihre Gestaltung

von

Alexander Zieseniss

Gr. 8⁰. 114 Seiten. 1928. RM. 7.—

Die Abhandlung sieht zunächst ihre Aufgabe darin, die malaiischen Hikayat Sri Rama in den zwei zur Verfügung stehenden Fassungen von Roorda van Eysinga und Shellabear sowohl mit der Ramasage des altindischen Epikers Valmiki wie auch mit den indischen außerepischen Ramadichtungen zu vergleichen. Diesem Vergleich dient eine ausführliche Inhaltsangabe des malaiischen Werkes. Der in ihr enthaltene Stoff wird sodann abschnittsweise seiner Entsprechung bei den Indern gegenübergestellt. Dank einer besonderen Technik dieser Vergleichung ergibt sich gewissermaßen ein Motivlexikon für die Ramasagen, das dem Malaiologen wie dem Indologen willkommen sein dürfte. Das Ergebnis ist, daß die H. S. R. eine volkstümliche, durchaus nachepische Form der Ramasagen darstellt, die vermutlich zwischen dem 13. und 17. Jahrhundert durch mündliche Überlieferung aus Indien nach Indonesien gelangt ist.

2.

Der Kumārapālapratibodha

Ein Beitrag zur Kenntnis des Apabhramśa und der Erzählungsliteratur der Jainas

von

Ludwig Alsdorf

Gr. 8⁰. XII. und 227 Seiten. 1928. RM. 12.—

Der Verfasser behandelt die im Jahre 1185 von Somaprabha verfaßte Sammlung von Jaina-Erzählungen im Hinblick auf den geschichtlichen Rahmen und die Verteilung von Dichtung und Prosa in verschiedenen indischen Sprachformen auf die einzelnen Teile. Es werden sodann die in Apabhramśa-Sprache verfaßten zusammenhängenden Stücke und Einzelstrophen stoffgeschichtlich, grammatisch und metrisch untersucht, mit Beigabe eines Glossars kritisch herausgegeben und übersetzt. Ein Anhang gibt die Belege bis in die frühneuindische Zeit hinein. Die beiden Hauptstücke sind eine allegorische Erzählung und die Jaina-Legende von Sthūlabhadra.

THE HEBREW GODDESS

RAPHAEL PATAI

THIRD ENLARGED EDITION

Foreword by Merlin Stone

THE HEBREW GODDESS

In the beginning God created . . .
This God is the Supernal
Mother who rides and rises
with a triumphant shout.

(Tiqqune haZohar, 47a*)*

Index *351*

FOREWORD

It is an honor and a pleasure to write this foreword to the work of one of the most dedicated and erudite scholars of our time. Throughout the years, Dr. Raphael Patai has contributed an impressive body of work that is treasured by both serious researchers and the general population. He has brought together religious literature, history, archaeology, mythology, and folklore to arrive at an exciting new understanding of material that had once been scattered and often misunderstood. With the initial publication of *The Hebrew Goddess,* Dr. Patai opened up several important areas of research and consideration. First published in 1967, this seminal book discerned the patterns in the evidence of ancient Goddess figures in pre-Israelite Canaan, described the continued existence of these figures among the Hebrew people in the biblical period and explained how they had afterwards been woven into Judaic thought and practice. Most important, Dr. Patai created a well-organized overall structure in which the pertinent evidence could be viewed and better understood.

Dr. Patai's discussion of this subject was elaborated upon with a wealth of specific writings and quotations that pointed towards not only a female aspect of God, but to the specific actions and images of a Goddess figure within Judaism. We initially read of the major Goddess figures in Canaan,

such as Asherah, Anath, and Astarte, who were worshiped before and during the Biblical period. Following these historical threads, Dr. Patai then examined divine female imagery in Talmudic, Kabbalistic, and other Hebrew literature that existed at a time when the general perception of the Hebrew God was solely as male. Gathering together a multitude of small pieces of evidence gleaned from numerous texts, he was able to draw the many miniscule parts into a meaningful whole as, with the skill of the finest of teachers, and a vision that is broad and encompassing, he allowed us to watch as he carefully fit each one of the pieces of the jigsaw puzzle into place, eventually enabling us to see the entire picture. In this updated edition of *The Hebrew Goddess,* Dr. Patai has included valuable additional materials that further flesh out that original structure. With keen insight and articulate commentary, he helps us to comprehend the new materials as well as the subtle, ongoing discourse concerning polytheistic elements within a religious belief system based upon monotheism.

In the original edition, Dr. Patai presented a great deal of information about various divine female images within Hebrew literature, such as *Hokhma [Wisdom]*, the Shekhina, the Matronit, and the Bride and Queen Sabbath. He amassed an impressive body of material that gave clear portrayals of each of these images. But in the nature of the true scholar, the publication of the original *Hebrew Goddess* did not call a halt to his research. The image of the Shekhina drew him further into the study of some of the most fascinating material on this subject, the role of the Shekhina in Judaism over the last few centuries. His original reconstruction of an overall narrative of the Shekhina, alongside his documentation and analysis of the struggle to explain her role in a monotheistic worship, provides witness to the nature of an alive and theological debate that has seldom been achieved elsewhere.

That ancient religious beliefs reveal the worship of major deities that are female, and that these divine female figures, seemingly suppressed and forgotten, yet seeped into the Bible, the Talmud, the Kabbala, and other Hebrew literature, has recently garnered a great deal of attention and interest, more than would normally be expected of such an academic subject. Much of this interest has been the result of the rise of the feminist movement over the last two decades. The popular explosion of the feminist movement in late 1968, and its rapid growth over the next few years, raised many questions about the status and roles of women in our society. Relationships and social institutions were challenged by investigations into the part each might be playing in constructing and/or maintaining a negative role for those of the feminine gender. With some initial hesitancy, even the bastions of religion were eventually placed under the feminist microscope. From that time on, many women have been questioning and confronting

the impact of various religions in formulating women's status.

Over these last two decades feminists have been observing the various existent religious systems from a feminist point of view, but from diverse positions in society and thus diverse perspectives. Many have been examining a specific religion from the perspective of a member of that religion. They don't want to throw the baby out with the bath water. Revision and reform have resulted. women have become ordained as Episcopalian priests, Jewish rabbis, and ministers in many Protestant denominations. Many Catholic nuns have been trying to change Church rulings on women to enable them to be ordained as priests. Liturgies and prayer books of nearly all Western faiths have been questioned and many of them changed to wording that includes both female and male in references to divinity as well as to the congregation.

When I first began my book *When God Was a Woman* in 1969, my own intention was simply to make people aware of the ancient worship of God as female—as Goddess, Creator of Heaven and Earth, e.g. the Goddess Nammu in Sumer—to challenge the idea that it was the natural or the divine plan for men to rule over women as stated in Gen. 3:16. It was important to me to show that Goddess worship had existed long before the writing of the Hebrew Scripture [the Old Testament], which is held as sacred by both Jews and Christians, and that Goddess reverence had affected the status of women in many positive ways. Since the publication of *When God Was a Woman* in 1976, the interest in a contemporary reclamation of Goddess history, as well as the contemporary enactment of celebratory Goddess rituals, began to form into what is now most often referred to as the women's spirituality movement. Today, thousands of women are drawing upon Goddess reclamation in all areas of work and study. Goddess figures and imagery have emerged in women's painting, sculpture, drama, novels, poetry, music, dance, and films. New books, articles and academic theses dealing with the reclamation of some specific aspect of Goddess history are continually being written and published. The teaching of history, art history, sociology, psychology, philosophy, anthropology, theology, and, of course women's studies, has been affected by this ever growing body of information about ancient Goddess worship. And women's groups all across the U.S. as well as in Canada, Europe, and other areas have been meeting to create and enact Goddess rituals at the times of the solstices, equinoxes, new or full moons, and at other times of celebration or life passage.

Looking back, I realize that had I known of Dr. Patai's *The Hebrew Goddess* during the years of my own research for *When God Was a Woman* it would have saved me a great deal of time and effort. But it was not until 1978, when I was finishing my second book, *Ancient Mirrors of Womanhood*,

that I discovered it. The Avon/Discus paperback edition of *The Hebrew Goddess* had come out in August of that year. At the time of my first reading of *The Hebrew Goddess* I was deeply impressed not only by the dedicated and painstakingly detailed research Dr. Patai had done many years before, knowing from my own work what this entails, but also by his courage in presenting his thesis on the continuation of Goddess reverence within Judaism. I found the book to be a treasure of fine scholarship as well as an inspiring example of the integrity of stating what others may have preferred not to discuss or even see.

I did notice that Dr. Patai had not considered what reclamation of the Goddess might mean to and for women. In his chapter on the Matronit, he had suggested that the existence of a Goddess image may have occurred as a somewhat natural response to a basic need and perception of womanhood by "the male of the species." Yet these past few years have shown us that it has been primarily women who have wanted and needed to image deity as female. I cannot say that men have not also become interested in the recent Goddess reclamation, especially where interest in the Goddess is aligned with the sanctity of nature and the Goddess thus becomes an ecological symbol. But judging from the startling numbers of women currently involved in the large and rapidly expanding women's spirituality movement, it is primarily women who have responded to reviving the Goddess and are mainly responsible for spreading the word, incorporating this reclamation into so many diverse areas of culture and spiritual celebration today. This in turn leads me to the mention of a prediction made by Dr. Patai in 1967—before the popular emergence of the women's movement.

At the end of his introduction, Dr. Patai asked, "Is the Hebrew Goddess dead, or does she merely slumber, soon to awaken . . . ?" He went on to say that "should she manage to revive, we can expect this to take place only in the Land of Israel." We must remember that this was written several years before the start of the feminist movement and even more years before the rise of the women's spirituality movement. And, as the wise among us understand, events we expect to happen do frequently occur, but often in the least expected ways. So it interesting to note, some 22 years after Dr. Patai's contemplative question, that the Hebrew Goddess has indeed revived—but in perhaps a most unexpected manner. This revival has resulted directly from the women's spirituality movement, which itself grew from within the feminist movement, in the United States. Nonetheless, much of the revival of the Hebrew Goddess has been based upon information in Dr. Patai's writings.

Along with the many Goddess figures in which contemporary women have shown a special interest, figures such as the Sumerian Inanna, the

Akkadian Ishtar, the Greek Gaia [Earth], Demeter, and Artemis, the Mexican Coatlicue, the African Yemaya and Oshun, the Celtic Cerridwen and Rhiannon, the Tibetan Tara, the Hawaiian Pele, the image of the Shekhina has again risen to be recognized and revered. She began to awake at the writing of Dr. Patai's book and has now been more fully awakened by Jewish feminists. As I mentioned, many feminists have remained within their familial religion, working to make changes from within male-oriented religious systems. Thus Rabbi Lynn Gottlieb and Rabbi Leah Novick have spoken and written about the importance of the Shekhina. Drorah Setel has written and performed songs about the Shekhina. A Jewish women's group was formed by Irene Javors to study the meaning of the Shekhina in their lives. Javors explains that many of the women felt the image of the Shekhina had been primarily formulated by men in the past and that, for the future, the women felt the need to image and define the Shekhina from a female perspective.

Even among the many women who have rejected their own familial religion and have in some way involved themselves in women's spirituality and Goddess reclamation, we find that the choice of a specific or favorite Goddess image oftimes reflects a woman's own racial or ethnic heritage. Oshun and Yemaya are most often of greatest interest to Afro-American women. Women of Celtic descent are frequently drawn towards the legends about Cerridwen. It is not difficult to understand why women who were raised in the Jewish faith, and might still culturally identify themselves as Jewish even though they do not follow Jewish beliefs or ritual, would be drawn to the image of the Shekhina. Yet, as the Shekhina exists within monotheistic Judaism, or as Hindus speak of Parvati, Kali, Uma, Durga, and Lakshmi as aspects of Devi, the Goddess is a singular divinity to many women today, who take a monotheistic approach and regard the numerous historical goddess figures as aspects of "The Goddess." (Semirams)

One of the most interesting concepts that has arisen from within the women's spirituality movement is the idea or belief that the Goddess is immanent, i.e within us, even within all life, as contrasted to the idea of a transcendent deity high above us. In considering Dr. Patai's descriptions of the Shekhina as an aspect of God—or a Goddess—who dwells on earth with the people, we cannot help but observe the similarity of these concepts. The point at which these two ideas may differ is in the efforts made to have the Shekhina rejoin God in heaven, as explained in fascinating detail in Dr. Patai's new materials. I would suspect that most women involved in women's spirituality today would prefer that the Goddess remain with us. And, at the risk of being regarded as flippant, they would perhaps also prefer that if God and Goddess were to be reunited, God would come to

us here on earth to join the Goddess. I will refrain from making further analogies here about single parent homes or emotionally distant fathers, other than to mention that in this sort of mythic consideration they do come to mind.

Despite these differences, the wealth of information and the crystal clear presentation and analysis of the evidence in *The Hebrew Goddess* demand that it be read by anyone interested in religious history, theology or the reclamation of the Goddess today. Dr. Patai has given us a classic work on the subject of the continual emergence of divine female figures within Judaism. It offers an insight into Judaism that has long been ignored. But even beyond Judaic Studies, it provides some very valuable streams of thought that may be useful for the study of religion in general. During my own years of research, I have found an amazing diversity of perception, narrative, imagery, and symbolism of divinity, both in ancient cultures and in those that still survive. This diversity raises questions about why the divine or the sacred is perceived as it is—in specific forms at specific times and places. In *The Hebrew Goddess*, which covers such a vast chronological spectrum and such a broad geography, Dr. Patai succeeds not only in presenting a body of work on a Goddess figure within Judaism but, perhaps even more importantly, allows us to gain some insight into the very process of debate, transformation, and continual development of many, if not all religious images and beliefs.

I first found *The Hebrew Goddess* in an updated edition published eleven years after its initial publication; this new expanded edition, now being published some eleven years later again, will, I hope, reach many more readers. I expect that they will be as surprised, excited, and enlightened as I have been by Dr. Patai's valuable contribution to our deeper understanding of the relationship between humanity and divinity as it is revealed in *The Hebrew Goddess*.

Merlin Stone

Preface to the Third Enlarged Edition

The present third edition of this book has been augmented by three new chapters numbered VII, VIII, and IX. Consequently, the old chapters VII and VIII of the second edition have now become chapters X and XI.

Chapter VII, "The Myth of God and the Shekhina," discusses the attitudes of students of Jewish mysticism to the myths contained in scattered passages in Kabbalistic literature, and includes a tentative reconstruction of what I consider the central myth of the Kabbala and Hasidism.

Chapter VIII, "*Yiḥudim*—Unifications," presents data on the Kabbalistic and Hasidic tradition that requires of the believers to recite a *yiḥud* ("unification") spelling out the purpose of the prayer about to be recited or the *mitzva* about to be performed, namely the unification of God and the Shekhina. It shows that these brief declaratory statements called *yiḥudim* were (and among the Hasidim and the tradition-bound Sephardi and Oriental Jews still are) recited many times daily, and thus indicate that the Shekhina, the feminine aspect (or "person") of the Godhead was (and is) a living reality in the belief system of considerable contingents of the Jewish people.

Chapter IX, "The Shekhina as *Maggid* and Vision," presents a different

aspect of the same theme. Mysticism, as popularized by the Kabbala and later by Hasidism, saturated the consciousness of major segments of the Jewish people with the concept of the Shekhina (or Matronit), daringly spoken of in most deeply revered sources as the spouse of God the King. This, in turn, created an atmosphere conducive in the case of some of the enthusiasts, to experiencing hallucinations in which they heard the voice of the Shekhina, or visions in which they saw her in the shape of a woman, a female divine figure. I consider this chapter merely a first step in assembling some of the material bearing on this subject, and in drawing some preliminary conclusions. The role of the feminine deity in popular Jewish consciousness must constitute the subject matter of much further study before we shall be able to get a full picture of the popular Jewish belief in the Shekhina and its functional correspondence to the popular Catholic Mariolatry.

Fatima Virgin many visions

Apart from adding these three new chapters, I corrected in this edition some minor errors that slipped into the previous one, and added a complete bibliography.

I wish to thank Doris B. Gold of Biblio Press for having first raised the idea of a new, expanded edition of this book.

Acknowledgments

Four of the chapters contained in this book were published originally, in a somewhat different or shorter form, in scholarly journals: Chapter I, "The Goddess Asherah," in the January-April 1965 issue of the *Journal of Near Eastern Studies;* Chapter IV, "The Shekhina," in the October 1964 issue of the *Journal of Religion;* Chapter VI, "Matronit—the Goddess of the Kabbala," in the Summer 1964 issue of *History of Religions;* and Chapter X, "Lilith," in the October-December 1964 issue of the *Journal of American Folklore*. I wish to thank the editors of the four journals for their permission to reprint these papers in an altered and expanded form.

My thanks are also due to the following institutions who helped me in obtaining and reproducing pictorial material: the Bollingen Foundation, Inc., New York; the British Museum, London; the Israel Museum and Israel Department of Antiquities and Museums, Jerusalem; the Louvre, Paris; the Metropolitan Museum of Art, New York; the Oriental Institute, Chicago; the Palestine Museum of Archaeology, Jerusalem; the Princeton University Press; the Reifenberg Collection, Jerusalem; the Royal Ontario Museum, Toronto; the Semitic Museum, Harvard University, Cambridge, Mass.; the Syrian Directorate of Antiquities and Museums, Aleppo; the University Museum, Philadelphia.

In addition, Mr. R. D. Barnett, Keeper of the British Museum; Dr. Elie Borowsky, of Zurich; Col. Norman Colville, London; Prof. Cyrus H. Gordon, of Brandeis University, Waltham, Mass.; my cousin, Michael Klein, a graduate student at the University of Pennsylvania; Mrs. Inna Pommerantz, Research Secretary at the Israel Museum, Jerusalem; Prof. James B. Pritchard of the University of Pennsylvania; and Prof. Claude F. A. Schaeffer of Paris extended their help in securing illustrative material, and my thanks are herewith expressed to them.

As in several of my previous books, it is my most pleasant duty to express my gratitude to the New York Public Library, and in particular to Abraham Berger, head of its Jewish Division, and Francis Paar of its Oriental Division, without whose patient and expert help this book could not have been written.

Forest Hills, N.Y.
May, 1967

INTRODUCTION

1 | *The Ubiquitous Goddess*

Goddesses are ubiquitous—this, in a nutshell, is the conclusion one reaches from a perusal of the voluminous and still growing literature on the history of religion.

They stood by the cradle of Homo Sapiens, and testified to his earliest known appearance in Europe, some thirty to forty thousand years ago, as evidenced by the discovery in Aurignacian deposits of statuettes of nude women with enormous breasts and buttocks and protruding abdomens. These figurines, representing in a highly stylized and exaggerated form women in an advanced stage of pregnancy, are usually referred to as paleolithic Venuses—of Willendorf, Menton, Lespugne, Laussel, to mention only a few—and are generally regarded by students of prehistory as having had religious significance.[1]

They are strikingly paralleled by finds of a later provenance, unearthed in Mesopotamia and Syria, and dating from the so-called Halafian age of the 5th millennium B.C.E. Both the European Old Stone Age and the Near Eastern Halafian figurines served the same purpose: to ensure fertility and delivery; in all probability, they served similar ends in relation to the animal

and vegetable worlds as well. The earliest attested role of the goddess, therefore, was that of the numinous mother who endowed her worshipers with her own mysterious qualities.

At least as old as the Near Eastern nude statuettes are myths in which goddesses play a larger, more universal role. The earliest answers to the great question of "Whence?" all reiterate, in various forms, the same idea: it was out of the body of the primordial goddess that the world-egg emerged, or that the earth was born; or alternately, it was the goddess' body itself that provided the material from which the earth was made. Thus the oldest cosmogonies, like the oldest worship of concretely represented deities, typically start with a primal goddess.

Once these phenomena were ascertained, and long before the data were adequate, attempts at explanation began. One of the earliest was that of the 19th-century cultural evolutionist who posited an early matriarchal social order in which the supposedly general predominance of women was assumed to have been paralleled by a similar situation in the divine realm. The family was ruled by the mother, the people by queens, and the heavens by goddesses.

In a modified form this explanation recurs as late as the 1930's in Father Wilhelm Schmidt's theory on the origin of religion. He no longer adhered to the view of unilinear cultural evolution, but instead assumed the existence of several simultaneous "primitive cultures" of food-gatherers, whose religion was centered around a High God or a Supreme Being. Out of these developed, says Father Schmidt, the three "primary cultures": the matrilineal-agricultural, the patrilineal-totemic, and the patriarchal-nomadic. Since the cultivation of plants was first undertaken by women, their importance in the social structure greatly increased, which, in turn, gave rise to a cult of Mother Earth, as well as to a mythology of the moon conceived as a female. Under the influence of these factors, "the Supreme Being was often thought of as a female."[2] Thus Father Schmidt assigns an early but secondary place to the goddess in his multilineal scheme of religious evolution.

The Freudian position[3] on the goddess is that she represents that stage in the early development of the human individual in which the mother appears to the child as the all-powerful source of both gratification and deprivation. The goddess is a mother figure whose qualities are universal because they stem from unconscious fantasies common to all peoples from time immemorial, which have their primary source in the infantile mind. The child in its jealousy of the father repudiates his role in procreation, wishes to deny that the mother is a sexual being, preferring to think of her as pure and virginal—hence the virginity of the goddess image. When the child learns "the truth," its wish that the mother should be a virgin is frustrated, and it then unconsciously regards her as a harlot—hence the

goddess is not only a virgin but a harlot. Moreover, in very early fantasy life the frustrated nursling wants to devour the mother's breast, imagines that he actually is destroying the mother, and, projecting his own hostility upon her, fears that she will devour him—hence the bloodthirsty character shared by the ancient Near Eastern virginal and wanton love goddesses.

Jungian analytical psychology considers the Great Goddess as a primordial image or archetype in the sense of an inward image at work in the human psyche and symbolically expressed in her figures as represented in the myths and artistic creations of mankind. The workings of the goddess-archetype can be traced in rites, myths, and symbols throughout history, as well as in the dreams, fantasies, and creative works of both the sound and the sick of our own day. The archetypal Feminine, designated only relatively late in the history of mankind as the Great Mother, was worshiped and portrayed thousands of years before the appearance of the term. A wealth of symbolic images surrounded her, and she herself appeared in numerous manifestations, as goddesses and fairies, she-demons and nymphs, sometimes friendly, sometimes hostile. An essential feature of the primordial goddess archetype is that it combines positive and negative attributes.

> This union of opposites in the primordial archetypes, its ambivalence, is characteristic of the original situation of the unconscious, which consciousness has not yet dissected into its antitheses. Early man experienced this paradoxical simultaneity of good and evil, friendly and terrible, in the godhead as a unity; while as consciousness developed, the good goddess and the bad goddess, for example, usually came to be worshiped as different beings.[4]

2 | *"Church"-less Judaism*

In view of the general human, psychologically determined predisposition to believe in and worship goddesses, it would be strange if the Hebrew-Jewish religion, which flourished for centuries in a region of intensive goddess cults, had remained immune to them. Yet this is precisely the picture one gets when one views Hebrew religion through the polarizing prisms of Mosaic legislation and prophetic teaching. God, this view maintains, revealed Himself in successive stages to Adam, Noah, Abraham, Isaac and Jacob, and gave His Law to Moses on Mount Sinai. Biblical religion, in this perspective, is universal ethical monotheism, cast in a ritual-legal form.

Historical scrutiny, however, shows that for many centuries following the traditional date of the Sinaitic revelation, this religion, idealized in ret-

rospect, remained a demand rather than a fact. Further study, undertaken in the present volume, indicates that there were among the Biblical Hebrews other religious trends, powerful in their attraction for the common people and their leaders alike, in which the worship of goddesses played as important a role as it did anywhere else on comparable stages of religious development. It will also be attempted to show that the female deities of the early, monarchic period did not subsequently disappear but underwent transformations and succeeded in their changed forms to retain much of their old sway over religious sentiments. How these different religious trends could coexist requires some explanation.

In contrast to the Roman Catholic faith with its single body, the Church, Judaism has never developed a monolithic structure which could superimpose its authority upon all Jewish communities in the many lands of their diaspora. Local variations exist, to be sure, between one Catholic diocese and another, as well as between folk belief and practice, on the one hand, and the official teachings and rites of the Church, on the other. Yet there is only one Catholic faith, one doctrine and one practice, which unites believers throughout the world. Doctrines and rites may change, as they did in the course of centuries; but when they do, it is because the Church, as embodied in the Pope and the Roman Curia, decides on a modification and makes it, from that time on, the rule equally mandatory upon the entire far-flung body of the Church.

No such unity exists in Judaism, nor has it ever existed, with the possible exception of a brief period when the Great Sanhedrin exercised central authority in Jerusalem. Prior to that time and after it to this day, Jewish doctrine and practice, although derived from one ultimate source, the Bible, differed from place to place, because, lacking a coordinating and sanctifying central authority, their precise formulation was left to local religious leadership. For example, European Jews, in obedience to a certain medieval rabbinical authority, accepted the religious ban on marrying two or more wives, while their brethren in the Middle East continued to consider plural marriages legal and to practice polygamy to the present time.

Differences in doctrine among Christians led to schism. Among Jews, they led to heterodox groupings without secession, because there was no organized religious body from which to secede or which might have cut off the offending limb. There was, to be sure, disapproval of the views and conduct of groups other than one's own, there were even arguments and conflicts; but however erroneous the ways of others appeared, such errors were never considered serious enough to warrant a formal break. Jewish history contains examples of excommunication of individuals because of apostasy—Uriel Acosta's case comes readily to mind—but no body of relig-

ious leaders ever used the weapon of the *ḥerem* ("ban") against any Jewish group, however great the disapproval provoked. A case in point is the situation that developed in the 18th and 19th centuries when the Jews of Eastern Europe became sharply divided into *Hasidim* (roughly, Mystics) and *Mitnagdim* (Opponents). The antagonism between the two groups increased to such a degree that intermarriage between them was completely out of the question. Yet, at no point during the great struggle, did any Hasidic or Mitnagdic leader go so far as to cast a doubt upon the Judaism of the opposing group. Similar furcations have occurred repeatedly in Judaism, before and since, but without ever splitting Jews into rival, discrete groups.

The relevance of these observations to the subject of the present study is as follows. Whatever formulation was given to the Jewish faith by any local religious leadership, simultaneously and side by side with it existed divergent faith-variants within the broad and flexible overall framework of Judaism. Consider the situation in Palestine in the days of the great Hebrew prophets. There was Yahwism, preached by the prophets; there was an official cult, organized by the court and headed by the king; there were local variants, combining elements from these two as well as from other sources, practiced by the simple country folk; and there were sects such as the Rechabites who constituted an early example of what religious historians call primitivists. Yet all these trends were part of the "Hebrew religion" of the Biblical period.

The average layman, whether Jew or Gentile, still believes that the official Hebrew religion was a strict monotheism beginning with God's revelation of Himself to Abraham. Scholars date the origin of Hebrew monotheism a few centuries later, during the days of the great prophets. As we shall see, even this qualified statement must be modified somewhat in view of certain doctrines, which succeeded in being admitted into the literary depositories of the official religion during Talmudic times, and in view of the Kabbalistic adumbration of a plurality of persons in the deity. Let us here stress the fact that in addition to "official" Judaism—that crystallization of the religion which represented the consensus of most of the religious leaders of a certain time and place—Judaism has always comprised heterodox variants as well. Moreover, since there was no hard-and-fast dividing line between official and non-official versions of the faith, there was constant interaction between the two. The feminine numina discussed in this book must, therefore, be considered part of the Hebrew-Jewish religion, whether they were admitted into the "official" formulation of the faith or accepted only by the simple people, against whose beliefs and practices the exponents of the former never ceased to thunder.

3 | *The Masculine Godhead*

Let us now proceed to look at the person of the deity as He appeared, first of all, in the Biblical and Talmudic writings. To begin with, let us restate that the legitimate Jewish faith, beginning with the earliest formulations of its belief-system by the great Hebrew prophets, down to its various present-day versions (e.g., those of Orthodox, Conservative, and Reform Judaism in the United States), has always been built upon the axiom of One God. This credo had its complementary corollary in the denial of the very possibility of other gods.

As for God, He is not merely the One and Only God, but also eternal, omnipotent, omnipresent, omniscient, aphysical (and therefore invisible), inscrutable, and incomprehensible, as well as just, good, compassionate, merciful, and benevolent. Since, being pure spirit, he is without body, he possesses no physical attributes and hence no sexual traits. To say that God is either male or female is therefore completely impossible from the viewpoint of traditional Judaism. As Maimonides, the greatest medieval Jewish philosopher, put it, "God is not a body, nor can bodily attributes be ascribed to him, and He has no likeness at all."

Yet one factor, a linguistic one, defied all theological repugnance to the attribution of bodily qualities to God. It is in the nature of the Hebrew language that every noun has either the masculine or the feminine gender (except a very few which can take either). The two Biblical names of God, *Yahweh* (pronounced, out of reverence for its great holiness, as "Adonai" and usually translated as "the Lord") and *Elohim* (or briefly *El,* translated as "God"), are masculine. When a pronoun is used to refer to God, it is the masculine "He"; when a verb describes that He did something or when an adjective qualified Him, they appear in the masculine form (in Hebrew there are male and female forms for verbs and adjectives). Thus, every verbal statement about God conveyed the idea that He was masculine. Most people, of course, never stopped to think about this, but every Hebrew-speaking individual from early childhood was imbued with the idea that God was a masculine deity. No subsequent teaching about the aphysical, incomprehensible, or transcendental nature of the deity could eradicate this early mental image of the masculine God.

In fact, during Biblical and Talmudic times, no efforts were made to counteract the popular image of a masculine God. On the contrary, while the Bible stresses that man cannot see God and survive, and the Talmud contains the axiom that "God sees but cannot be seen," both of these great source-books of Judaism contain innumerable references to God which reinforce belief in His masculinity. The Biblical prophets, psalmists, mor-

alists, and historians, as well as the sages, scribes, theologians, rabbis, and teachers of the Talmudic period, constantly use unmitigated anthropomorphisms in referring to God. He is a "Man of War," a "Hero," "Lord of Hosts," "King," "Master of the Universe," and "Our Father in Heaven," to mention only a few expressions. Needless to say, these appellations all carry a pronouncedly masculine connotation, and, together with the words of the prayer, "We are Your sons, and You are our Father," or "Have mercy upon us as a father has on his sons!" indelibly impressed all Jews not only with the Kingship and Fatherhood but also with the Manhood of God.

Theologians will point out that none of these expressions are indicative of an actual belief in, let alone a doctrine of, the masculinity of God. Human imagination, they will argue, needs symbols to fasten on. The fatherhood of God (which connotes His masculinity) is merely such a symbol. We do not mean, when we pray to Our Father in Heaven, that He actually is our male progenitor, but that we feel that we are dependent on Him, as we were on our father in childhood. We certainly have no quarrel with this argument. The God of Judaism is undoubtedly a father-symbol and father-image, possibly the greatest such symbol and image conceived by man. Nor can there be any doubts as to the greatness of the psychological need answered by this image. This, together with the great moral imperatives, was the unique contribution of prophetic Judaism to mankind.

Comparative religion, however, teaches us that there is in man an equally great, or possibly even greater, need for yet another symbol: that of the divine woman who appears in many different forms throughout the world, yet remains basically the same everywhere. Most familiar to us in the Western world is the figure of Mary, who rose to such prominence in Christianity, and especially in Catholicism. Did Judaism, the mother-religion of Christianity, fail to fulfill this need? Is it conceivable that the human craving for a divine mother did not manifest itself at all in Judaism?

It is true, of course, that official Judaism, to a greater extent than Christianity, let alone the ancient Near Eastern religions, stressed the moral and intellectual aspects of religion, to the relative neglect of its affective and emotional side. The prophetic demand for justice and mercy and the knowledge of God as the core of religion, rather than ritual observance, points in this direction. By the beginning of the Talmudic period, Judaism was characterized by an emphasis on the study of the Law as the essence of religion, as against mere belief expressed in traditional and emotion-laded images. It is characteristic of this development, as well as of the incipient reaction to it, that as against the thousands of new religious laws contained in the vast compendium of the Talmud, one finds in it only one single significant addition to the realm of religious faith: the loosely sketched,

vague aspects of God's Presence, called *Shekhina*, of whom more anon.

4 | *The Genius of Idolatry*

The Biblical God-concept, intuitively grasped by the prophets and gropingly reached by the people, reflects the strictly patriarchal order of the society which produced it; this patriarchal society gave rise to a religion centered around a single, universal deity whose will was embodied in the Law, but who was abstract, devoid of all physical attributes and yet pronouncedly male, a true projection of the patriarchal family-head. But, among the simple people, old popular religious traditions were too strong to be easily overcome. According to a Rabbinic tradition, "the instinct of idolatry was eradicated" in the days of Mordecai and Esther, or in those of Hanania, Mishael, and Azaria,[5] that is to say, well after the destruction of the Jerusalem Temple by Nebuchadnezzar which took place in 586 B.C.E. According to another tradition, the idolatrous instinct, or "the Genius of Idolatry," as the name can be equally translated, was overcome only as late as the days of Nehemiah, that is, in 445 B.C.E., when the Levites among the Judaeans "cried with a loud voice unto the Lord their God."[6] Their request, a Talmudic myth recounts, was:

> "Woe and woe! It is he [the idolatrous instinct, or the heavenly Genius of Idolatry] who destroyed the Sanctuary, burnt the Temple, killed the pious, and exiled Israel from their land, and yet he still jumps about among us. Is it not that You [God] gave him to us only in order to grant us a reward [if we overcome him]? We want neither him nor his reward!". . . .
>
> [In response] a tablet fell down from heaven and upon it was written "Truth," . . . which is the seal of God. Thereupon they sat in fasting for three days and three nights, until he [the Genius of Idolatry] was delivered up to them. He emerged from the Holy of Holies like a young fiery lion, and the prophet Zechariah said to Israel: "This is the Genius of Idolatry," as it is written, "This is the Wickedness."[7] As they got hold of him, a hair was torn out of his mane and he let out a roar which was heard over four hundred parasangs. They said: "What shall we do, lest, God forbid, they take pity on him from heaven?" The prophet said to them: . . . "Lock him into a leaden kettle and seal its mouth with lead, for lead absorbs the voice . . . "[8]

What happened to the fiery lion embodying the idolatrous instinct after he was thus rendered harmless, we are not told. What is, however, most

remarkable in the above story is that it makes the leonine Genius of Idolatry dwell in the adytum, the Holy of Holies itself, in that innermost sacred chamber of the Temple in which God Himself was believed to dwell. Historically this means that the adytum, and the Jerusalem Temple as a whole, were recognized in the retrospect of Talmudic times as the very center of the idolatrous enticements to which the people succumbed throughout the days of the First Temple and down to the time of Nehemiah, some two generations after the return from the Babylonian exile.

In a more general sense, too, there can be no doubt that down to the very end of the Hebrew monarchy the worship of old Canaanite gods was an integral part of the religion of the Hebrews. As we shall see in the first two chapters, the worship of goddesses played a much more important role in this popular religion than that of gods. The reason is not far to seek. The image of Yahweh, in the eyes of the common people, did not differ greatly from that of Baal or the other Canaanite male gods. Often it would have been difficult to determine whether a certain cult was legitimately Yahwistic, heretically Yahwistic, or unequivocally pagan. The worship of Yahweh thus easily merged into, complemented, or supplanted that of the Canaanite male gods.

But Yahwism lacked the female touch which was such an important part of Canaanite religious life. Nothing it could offer replaced the Canaanite goddesses. Therefore, the prophetic denunciations of these idols had little effect. The devotees of the goddesses could not be swayed to give them up and to concentrate instead exclusively on the worship of a male god.

5 | *The Hebrew Goddess*

Were Asherah, Astarte, and the other goddesses served by the Biblical Hebrews, *Hebrew* goddesses or merely foreign abominations as labeled by the prophets? Gods are rarely invented or discovered; rather they are taken over by one group from another. Even Yahweh had pre-Hebrew antecedents, and so had the deity called El and identified by the Hebrews with Yahweh. The Roman Jupiter goes back to the Greek Zeus Pater, who, in turn, is derived from the Sanskrit Diaus Pitar. As long as a god is alive, he can easily cross international frontiers and establish himself in a new country in superficially changed but basically identical image and function. This is what probably happened to Asherah, Astarte, and Anath: they arrived, at different times no doubt, among the Hebrews, and although foreign in origin, they soon adopted the Hebrews as their children, and allotted them all the benefits man finds in the worship of a goddess. There can be no

doubt that the goddess to whom the Hebrews clung with such tenacity down to the days of Joshiah, and to whom they returned with such remorse following the destruction of the Jerusalem Temple, was, whatever the prophets had to say about her, no foreign seductress, but a Hebrew goddess, the best divine mother the people had had to that time.

Following the death of the "spirit of idolatry" in the days of Nehemiah, the Hebrew goddess succeeded in surviving. She underwent, to be sure, an astounding metamorphosis, but then that, too, is the mark of a living deity. In one of her manifestations she penetrated—in what period we can only conjecture—the rebuilt sanctuary as a female Cherub, poised in marital embrace with her male partner in the dark cell of the Holy of Holies. In another, she became the manifestation of God's presence, the Shekhina—a feminine name just as God's is masculine—the loving, rejoicing, motherly, suffering, mourning, and, in general, emotion-charged aspect of deity.

Her role thereafter was minor and restricted, difficult to trace, for several centuries. One can, however, surmise that she must have gained strength in the course of that time, and gradually asserted her independence, because during the 13th century, when Kabbalism invested Judaism with a new vitality, she emerged as a distinct female deity, possessing a will and desire of her own, acting independently of the traditional but somewhat shrunken masculine God, often confronting and occasionally opposing Him, and playing a greater role than He in the affairs of Her children, the people of Israel. Corresponding to this reassertion of her personality, she, although often still called by her old name Shekhina, assumed another name as well, more fitting to her new and high status: *Matronit,* the Matron, Lady, or Queen.

The new mythology of the Kabbala, revealed in the writings of the Jewish mystics of the 13th century and amplified in those of the 16th, knows evil goddesses in addition to the good ones. They are the she-demons of yore, Lilith, Naamah, and Igrath bath Mahalath, who first appear in Talmudic literature as lowly and hairy female ghouls and who managed to work themselves up to much higher position, until their queen, Lilith, became God's consort. This happened following the destruction of the Jerusalem Temple and the subsequent exile of Israel, which came to be regarded as catastrophic events not only for the people but also for God. The Shekhina, or Matronit, as she now was called, in her motherly love of her children went into exile with them. This brought about a separation between her and the King, who thereupon allowed Lilith, queen of the demons, to attach herself to him and take the place of the Matronit as his spouse. The similarity between Matronit and Lilith is one of the rather uncanny aspects of Kabbalistic mythology.

The Matronit, meanwhile, continued to be closely concerned with her children. Like a true goddess, she played the role of spouse as well as mother to her people. She also assumed the form of a divine queen and bride, who joined them every Friday at dusk to bring them joy and happiness on the sacred Sabbath. To this day, in every Jewish temple or synagogue she is welcomed in the Friday evening prayers with the words "Come, O bride!" although the old greeting has long been emptied of all mystical meaning and is regarded as a mere poetic expression of uncertain significance.

Is the Hebrew goddess dead, or does she merely slumber, soon to awaken rejuvenated by her rest and reclaim the hearts of her sons and lovers? No one can say. But should she manage to revive, we can expect this to take place only in the Land of Israel. It was there that she first clasped to her bosom the wild Hebrew warriors who irrupted from the desert. It was there that most of her life-history, including her amazing metamorphoses, took place. And it was there—less than four hundred years ago!—that her Rachel and Leah forms revealed to the pious and the learned the divine meaning of earthly love, the last of her great motherly-wifely acts, and that her identity with the ancient Biblical goddess Asherah was recognized[9] in a remarkable flash of intuitive insight. It will be there, therefore, if at all, that she will re-emerge, in who knows what surprising old-new image, to mediate, as of old, between man and God and to draw the returning faith-bereft sons with new bonds of love to their patiently waiting Father.

I

The Goddess Asherah

In embarking now upon an examination of the various forms in which the feminine principle was conceived by the Biblical Hebrews and their successors, the Jews of the Hellenistic, Talmudic, and Kabbalistic periods, we begin, so as to proceed in chronological order, with the Goddess Asherah, who was the earliest female deity known to have been worshiped by the Children of Israel.

1 | *The Problem*

The beginnings of the period we are dealing with here go back to the time following the arrival of the Israelite tribes in Canaan. For about six centuries thereafter, that is to say, down to the destruction of Jerusalem by Nebuchadnezzar in 586 B.C.E., the Hebrews worshiped Asherah (and next to her also other, originally Canaanite, gods and goddesses) in most places and times. Only intermittently, although with gradually increasing intensity and frequency, did the prophetic demand for the worship of Yahweh as the one and only god make itself be heard and was it heeded by the people and their leaders. This much is apparent, although the religious history of the period as a whole—in spite of the numerous studies devoted

to its untangling—is still obscure, due to the inadequacy of the available sources.

The primary literary sources pertaining to the period are contained in the Biblical canon. While undoubtedly based on ancient oral tradition, some of it reaching back into the Mosaic period, or even as far as the patriarchal age, the Biblical accounts are preserved in relatively late reworkings and are therefore not contemporary, in a strict sense of the word, with the events they describe. Editorial revisions were especially thorough when the subject matter pertained to the non-monotheistic phases of early Hebrew religion. References felt to be offensive were toned down or abridged, and we have, of course, no way of knowing how many were excised altogether. In the narratives which deal with the subsequent period of the Hebrew monarchy, the monotheistic point of view is even more stringent, so that all references to non-monotheistic forms of popular worship are not only consistently derisive and unrelentingly condemnatory but are kept purposely in vague and general terms.

The archaeological data, while obviously suffering neither from subsequent modification nor from contemporary tendentious representations, are disappointing because of their paucity or lack of clarity. The temples, sanctuaries, high places, altars, and other religious structures which were unearthed from the early Hebrew period, contain, as a rule, no clear-cut evidence as to the identity of the deity to whom they were dedicated. From a comparison of Biblical references and archaeological discoveries we know that the rituals of both Yahweh and the Canaanite gods followed the same general pattern, and it is precisely this circumstance which makes the identification of the deity worshiped at any particular archaeological site extremely difficult.

In the case of the small figurines and statuettes, of which many hundreds were found all over Palestine, and a considerable percentage of which can be attributed without any doubt to the Israelite monarchic period, there is a difficulty of another kind. While it can be taken for granted that these figurines, mostly nude females, were used in some religious-ritual context, in many cases we cannot be sure whether the goddess so represented was worshiped by the Hebrews or by the Canaanite population who lived side by side in early Palestine. The greatest frustration, however, for the historian of religion is the absence of contemporary literary documents, such as inscribed tablets, monuments, statues, or walls, which would contain clear evidence of the nature of popular Hebrew religion in the early period ending with the Babylonian captivity of 586 B.C.E.

Having stated what we do not have, let us now turn to the extant evidence on which one can nevertheless base an attempt at reconstructing

early Hebrew popular religion. This can be divided into four categories:

1. The evidence of the Bible, which, in spite of the efforts of its monotheistically oriented authors and/or editors, contains incidental information as to the court ritual and popular religion which a few judges and kings and all the prophets strove to suppress, eliminate, and replace by monotheistic Yahwism.

2. Local archaeological evidence, admittedly limited, but nevertheless useful and, with the intensive work going on in Israel, daily increasing in volume and variety.

3. The considerably more ample data contained in Canaanite, Syrian, Mesopotamian, Iranian, Anatolian, and Egyptian archaeology and mythology, with their detailed information about the deities who, according to Biblical evidence, were worshiped by the Hebrews.

4. Literary sources of post-Biblical Judaism, which flow richly especially in the first few centuries of the Christian era; which, because of their less sacred character were not subjected to the same meticulous scrutiny as the Holy Book; and in which, therefore, many references and recollections of early Hebrew polytheism were able to pass muster.

This enumeration of the types of source material bearing on early Hebrew popular religion indicates the amount and nature of the information we can expect concerning the female deity whose person, image, and worship form the subject of the present chapter. We are forewarned that the data will be neither ample nor explicit, neither exhaustive nor detailed, and, in some cases at least, neither conclusive nor irrefutable.

As far as the Biblical books are concerned, their anti-polytheistic attitude manifests itself in, among other things, a pronounced reluctance to allow any ritual detail of pagan worship to enter the references they contain to Israel's religious transgressions. Nevertheless, it is from Biblical sources that we know the names of the three goddesses who were worshiped by the ancient Hebrews down to the days of the Babylonian exile: Asherah, Astarte, and the Queen of Heaven, who was probably identical with Anath. It is with the first of these three that the present chapter deals. Let us begin by reviewing what extra-Biblical sources tell us about Asherah.

2 | *The Canaanite Asherah*

That Asherah was the chief goddess of the Canaanite pantheon we know from the rich mythical material unearthed a few decades ago at Ugarit, the modern Ras Shamra, near the northeastern corner of the Med-

iterranean. In Ugaritic mythology, as preserved on numerous tablets, written in a language quite close to Biblical Hebrew and dating from the 14th century B.C.E., Asherah figured prominently as the wife of El, the chief god. Her full name was "Lady Asherah of the Sea"—apparently, her domain proper was the sea, just as that of her husband El was heaven, She was, however, also referred to simply as Elath or Goddess. She was the "Progenitress of the Gods": all other gods, numbering seventy, were her children, including Baal, Anath, Mot, and the other chief protagonists of the Ugaritic pantheon. One of her servants was Qadesh wa-Amrur, called the "fisherman of Lady Asherah of the Sea," who fished at her bidding and, in his capacity as her equerry, saddled her donkey and helped her to mount. Asherah's relationship to her husband El was not unlike that of an Oriental queen to her master: when entering into his presence, she would prostrate herself, whereupon El would kindly inquire after her desire. When Baal wished to obtain permission from El to build a house, he sent his mother Asherah to intercede with El. Upon the death of Baal, El asked Asherah to name one of her sons to succeed him as king.

Asherah was a motherly goddess and as such she, together with her daughter Anath, served as the wetnurse of the gods. She suckled even human princes who were exceptionally deserving, such as Yassib, the son of King Keret. She also seems to have foretold the fortunes of her devotees, for in a 14th-century B.C.E. letter, found at Taanach near Megiddo (in Palestine), reference is made to a "wizard of Asherah" through whom she seems to have spoken.[1]

Little is known of Asherah before the period of the Ugaritic myths. In a Sumerian inscription, set up by an Amorite official in honor of Hammurabi and dating from ca. 1750 B.C.E., and other contemporary documents, she is called Ashratum (i.e., Asherah), the bride of Anu.[2] Since the Sumerian and Akkadian deity Anu closely corresponded to the Canaanite El in being the god of heaven, it appears that Asherah held the position of the chief or mother goddess for at least three centuries prior to the Ugaritic period. She was also known in Southern Arabia, where her name had the form Atharath, as in the Ugarit tablets.[3] In the 14th century B.C.E. Amarna tablets, containing letters written by Canaanite petty chieftains to their overlords, the king of Egypt,[4] the names Asherah and Astarte interchange, which may indicate a lack of clear distinction between the functions and personalities of these two goddesses. As we shall see below, the same confusion between Asherah and Astarte is found in the Bible and persisted even among scholars down to our days.

Asherah was associated with several cities where she was worshiped in her local manifestations. She was the "Asherah of Tyre" and the "Elath

[Goddess] of Sidon"—both Tyre and Sidon having been for long periods not only the capitals of independent states but also important Mediterranean seaports whose prosperity depended on the bounty of the sea and the good graces of its ruling lady. A third port, Elath, far to the south on the Gulf of Aqaba, may have been named after her. There were thus Asherahs of many localities (just as there are a Virgin of Fatima, a Virgin of Guadalupe, etc.), and when the Biblical references state that the Israelites served "the Asherahs," this can only mean that they adopted the worship of several of these local manifestations of the great goddess.

A king of the Land of the Amorites, mentioned in the Amarna letters, was called Abdu-Ashirta, i.,e., "Slave of Asherah,"[5] clearly showing that he was a devotee of her cult, which included the sacrificing of cattle and flocks.[6]

3 | *What Was the Hebrew Asherah?*

It was almost inevitable that the cult of this great Canaanite mother-goddess, who was venerated also in many other parts of the Ancient Near East,[7] should penetrate Hebrew religion as well. In fact, it was not long after the Israelite conquest of the Canaanite hill country, in the period of mixed Israelite-Canaanite settlement, that this development took place, together with intermarriage between the Israelites and the Canaanites, Hittites, Amorites, Perizzites, Hivites, and Jebusites, "among whom they dwelt." The establishment of family and religious ties went hand in hand, and "the Children of Israel . . . served the Baals and the Asherahs."[8]

While it is not easy to reach a definite conclusion as to the physical shape in which Asherah was represented among the Hebrews, a careful perusal of the numerous Biblical references to the "Asherahs"[9] seems to indicate that they were carved wooden images which were set up by implanting their base into the ground. In early times they often stood next to altars dedicated to Baal;[10] later, a "statue of Asherah" was set up in the Jerusalem Temple itself.[11] The word Asherah in Biblical usage can thus refer either to the goddess herself or to her image.[12]

From a story told in the Book of Judges about Gideon, who lived in the 12th century B.C.E., we learn that the Asherah worship in those early days was a communal or public affair. However, the wooden image of the goddess belonged to the town's chieftain who, at one and the same time, was also the priest of Asherah and Baal. This chieftain was none other than Joash the Abiezrite, Gideon's father. When Gideon, an early precursor of zealous Yahwist reformers, demolished the altar of Baal and cut down the Asherah, he incurred the wrath of the entire town of Ofra. His immediate

punishment by death was demanded by the men of the city, and he was saved only because his father stood by him.[13]

Gideon's act remained, for several generations at least, an isolated incident. The cult of the Goddess Asherah continued among the Hebrews throughout the periods of the judges and the kings. Unfortunately, in the climate of Palestine, with its annual heavy winter rains, wooden objects do not survive. Therefore, however large was the number of the carved wooden poles or statues which represented the Goddess Asherah and around which her communal worship took place, as it did in the town of Ofra until its disruption by Gideon, no archaeological evidence can attest to their existence.

On the other hand, there is ample archaeological evidence as to the importance of Asherah as a household goddess, a variety of the Teraphim. This evidence consists of numerous small clay figurines of nude women already referred to above. These were found all over Palestine and can be dated with confidence as deriving from all ages of the Israelite period. Many of these figurines conform to types which can be taken as stereotyped representations of Asherah. This seems especially to be the case with those figurines which show a woman with protruding breasts below which, however, instead of torso and legs, the figure consists of a straight cylindrical column with a flaring base. One can assume that these figurines are the small clay counterparts of the larger wooden Asherah poles which were set up by implanting them into the ground. (See Plates 1–7, and the Asherah figure on Plate 8). Judging from the frequent occurrence of these female figurines, not matched anywhere by images of male gods, the worship of the goddess must have been extremely popular in all segments of Hebrew society. One of the reasons for her popularity may have been the belief that she promoted fertility in women and facilitated childbirth. In a 7th-century B.C.E. Hebrew incantation text, found in Arslan Tash in Upper Syria, the help of the Goddess Asherah is sought for a woman in delivery.[14] Such an invocation of Asherah may have been contained in the original form of the exclamation made by Leah at the birth of Zilpah's son, whom she named Asher.[15] If so, we have here a testimony to the worship of Asherah in the early period in which the patriarchal traditions of Genesis originated.

4 | *Solomonic Idolatry*

While the worship of Asherah was thus a central feature of popular Hebrew religion in the premonarchic period, and her statues stood in many a local sanctuary, it remained for King Solomon to introduce her worship into his capital city of Jerusalem.

As is well known, the very manner in which Solomon's Temple was

built in Jerusalem was conducive to the establishment of a polytheistic-syncretistic cult. Solomon's religious proclivities are condemned by the Yahwist historian, who begins his account of Solomon's reign by stating that "Solomon loved Yahweh," but feels constrained to add in the same sentence that "he, nevertheless, sacrificed and burnt incense on the high places."[16]

The architects and builders who, at Solomon's request, were sent by King Hiram of Tyre to Jerusalem to build the temple hewed close to the patterns familiar to them from their own temples. That this was the case is indicated by a comparison of archaeological discoveries with the Biblical description of Solomon's temple. Of the numerous Canaanite and Syrian temples excavated, the one most closely resembling Solomon's is that of Tell Tainat in Syria from the 9th century B.C.E. That temple, like the one of Jerusalem, was divided into three sections, a vestibule, a nave, and an inner sanctuary, and like it, had two pillars at its entrance. A much older Canaanite temple, which might be considered as the prototype of Solomon's, dating from the end of the Late Bronze Age, was found at Hazor.[17] In Solomon's temple, all the brass work, including the two pillars Jachin and Boaz, was executed by a Tyrian craftsman also called Hiram.[18] Again, archaeology teaches us that these brass furnishings of the Jerusalem temple were made in a manner customary in temples dedicated to "other gods" along the east Mediterranean coast. It is probable that this similarity in structure and furnishings was matched by a similarity of the worship itself: the difference between Yahweh and other gods lay not in ritual, but in the ideology and morality, which was developed in his name by the great Hebrew prophets.

The chronicler of Solomon's reign reproaches him for having built places of worship for many gods, yet he does so in a curiously restrained manner: Solomon's heart, he says, "was *not whole* with Yahweh his god," and "he did what was evil in the eyes of Yahweh, and went *not fully* after Yahweh as did David his father."[19] In the passage in question, two extenuating circumstances are offered in excuse of Solomon's acts: he did what he did because his wives, to whom "he cleaved in love," turned his heart; and all this happened when Solomon was old.[20] Historical considerations, however, invalidate these excuses.

Firstly, we know that political marriages between a ruler and foreign princesses were an accepted means of strengthening alliances or friendly relations between states. Secondly, the introduction of a foreign princess into a royal household inevitably meant the admission of her gods as well. Thirdly, while such marriages may have taken place any time during the reign of a king, the most ambitious of Solomon's political marriages, that with the daughter of Pharaoh, was entered into at the very beginning of Solomon's reign.[21] It is reasonable to assume that he married the Sidonian

princess[22] about the same time that he set about to carry out his great building projects for whose execution he needed the friendship and help of the Phoenicians. A Hittite princess at his court—whose presence served as a living political bond between Solomon and the neo-Hittite states of Syria—was also valuable for him at the same time, as were daughters of his Moabite, Ammonite and Edomite vassals. These marriages were in the nature of guarantees of security, without which he would have had to keep powerful troup contingents in constant readiness at a time when he needed all the available manpower in the country for the construction of his grandiose religious and royal compounds. It is thus more than probable that all these marriages were contracted by Solomon soon after his succession, and that the introduction of the respective divinities worshiped by his wives also took place at the same time.[23]

Among the deities whom Solomon worshiped was "the Goddess of the Sidonians" who, as we have seen, was none other than Asherah. However, the historian recording this calls her "'Ashtoreth, Goddess of the Sidonians."[24] Also, the prophet Ahijah the Shilonite, an uncompromising Yahwist who flourished towards the end of Solomon's reign and in the years following it, reproaches the Israelites once with worshiping "'Ashtoreth, the Goddess of the Sidonians," and another time with serving Asherah.[25] However, such a confusion of Asherah and Astarte is not confined to the Biblical authors who equally detested both of them; it is found, as mentioned above, already in the Amarna letters written in the 14th century B.C.E. by people who should have known better because they believed in the two goddesses and worshiped them. But we have to keep in mind that in polytheistic cultures the prevalent tendency often was to identify one god with another, substitute one god for another, combine one god with another, or call one god by the name of another, as we know from many examples in the Egyptian, Babylonian, Hittite or Canaanite religions. In any case, there can be little doubt that it was the worship of Asherah, already popular among the Hebrews for several generations, which was introduced by Solomon into Jerusalem as part of the cult of the royal household, for his Sidonian wife.

5 | *Asherah in Israel*

Close to the end of Solomon's reign, a dramatic encounter took place between the prophet Ahijah of Shiloh, and Jeroboam the son of Nebat, a young and brave foreman of Solomon's work force. As the two men met in the fields outside of Jerusalem, Ahijah grabbed the new mantle

worn by Jeroboam, tore it into twelve pieces, and said to the astonished youth:

> Take ten of these pieces, for Yahweh, the God of Israel, will tear away the dominion over ten tribes of Israel from Solomon, because he forsook Yahweh, and served 'Ashtoreth, the Goddess of the Sidonians, Chemosh, the God of Moab, and Milcom, the God of the children of Ammon. If you will hearken to all that Yahweh commands you, He will be with you and give you Israel.[26]

As is well known, Ahijah's hopes in Jeroboam were bitterly disappointed. No sooner had Jeroboam established himself in the northern part of the country, when he set up two golden calves, one in Beth-el, just a few miles from Jerusalem, and the other in Dan, the northernmost point of Israel. "These are your gods, O Israel, who brought you up from Egypt," he proclaimed.[27]

One can imagine the pain and the anger felt by Ahijah. As soon as the stern Yahwist prophet had an opportunity, he prophesied the downfall of the house of Jeroboam, as he had foretold its rise some years previously. The charge was again the worship of "other gods and molten images" in general, coupled with a more specific accusation levelled against the people of Israel as a whole: "Because they have made their Asherahs, provoking Yahweh."[28] The fact that of all forms of idolatry only the cult of Asherah was mentioned specifically by Ahijah must mean at least that the one variety of religious worship in which the Israelites engaged more frequently than in any other was the cult of the Goddess Asherah, symbolized and represented by her carved wooden images.

The introduction of the Asherah worship into the ritual of the royal court had to wait for the arrival in the capital of Israel, Samaria, of another Sidonian princess, as bride of King Ahab (873–852 B.C.E.). She was Jezebel, daughter of Ethbaal, King of Sidon, in whose capital city the "Elath of Sidon," i.e., the Asherah of Sidon, had been worshiped as early as at least five centuries prior to his own time. Under Jezebel's influence, and in order to cement the alliance with her father, King Ahab of Israel built an altar to Baal in Samaria and "made" an Asherah.[29]

The extent of the worship of these Sidonian deities in Ahab's court is attested by the report that 450 prophets of the Baal and 400 prophets of Asherah ate at the table of Jezebel.[30] It was these prophets whom Elijah met on Mount Carmel, in a great public rain-making contest which ended with the utter defeat of the Canaanite god and a miraculous vindication of Yahweh.[31] It is interesting to observe that Elijah did not accuse the people of having abandoned Yahweh for the foreign gods but merely of dividing

their attentions between both.[32] Although the 400 prophets of Asherah seem to have attended the meeting on Mount Carmel, only the 450 prophets of Baal were challenged to the contest by Elijah, and no further word is said in the entire detailed narrative about the prophets of Asherah. The appeal of the Baal prophets to their god and that of Elijah to Yahweh are surprisingly similar, in fact, almost identical. When Yahweh's fire (lightning?) descends on Elijah's altar and thus proves His superiority, the people side with Elijah, and burst into shouts of "Yahweh is the god!" Thereupon the 450 prophets of the Baal are seized, dragged down into the valley, and slaughtered at the River Kishon.[33] No word is said about the fate of the 400 prophets of Asherah. The inference must be that, not being part of the contest, no harm befell them. If so, they must have continued unhindered to serve their goddess. Nor was the Asherah which Ahab had "made" and set up in Samaria removed or in any way harmed either as a result of Elijah's victory over the prophets of the Baal, or during the remaining years of Ahab's reign. It would appear then that only the Baal was considered by Elijah (and the strict Yahwists in general) as a dangerous rival of Yahweh, while the Goddess Asherah was regarded as his inevitable, necessary, or at any rate tolerable, female counterpart.

Ahab died ca. 852 B.C.E. and was succeeded by his son Ahaziah (ca. 852–851), who in turn was followed by his brother Joram. In 841–842 Jehu overthrew the dynasty and became King of Israel, to be followed, after a reign of 27 years, by his son Joahaz (814–798). It is from the days of this king that the next report about the Asherah of Samaria dates. The *Book of Kings* states tersely that during the reign of Joahaz the people of Israel "departed not from the sins of the house of Jeroboam, wherewith he had made Israel to sin, but walked therein; and also the Asherah remained standing in Samaria."[34]

The persistence of the Asherah cult in Samaria, indicated by this statement, is in marked contrast to the much lesser tenacity of the Baal cult. For we are told that Joram, son of Ahab, "removed the pillar [*masseba*] of the Baal that his father had made."[35] This pillar of the Baal must have been the same cult object which, when erected by Ahab, was referred to as "an altar for the Baal in the house of the Baal which he had built in Samaria."[36] The absence of any indication of what, if anything, Joram did with the other cult object, the Asherah, which his father Ahab had made,[37] could mean that he did not touch it, because the worship of Asherah was considered, as in the days of Ahab, a legitimate religious pursuit even by those who objected to the Baal cult.

Even more remarkable is the absence of any action on the part of Jehu and his zealous supporters, the Rechabites, against the worship of Asherah

in Samaria. Against the Baal worship Jehu proceeded ruthlessly: by a clever ruse he induced all the prophets of Baal (evidently, the 450 prophets of Baal killed by Elijah less than two decades earlier were not all the Baal prophets in the country; or possibly, new ones arose in the interval), as well as all the priests and worshipers of Baal, to gather in the temple of Baal in Samaria and had them put to the sword there. Then he had the pillar (or pillars) of Baal broken into pieces and destroyed the Baal temple itself, desecrating its very site by making it a place of latrines.[38] The narrative concludes with a statement which both gives credit to Jehu for what he did and blames him for what he left undone:

> Thus Jehu destroyed the Baal out of Israel; but the sins of Jeroboam the son of Nebat, wherewith he had made Israel to sin, Jehu departed not from them: the golden calves that were in Beth-el and that were in Dan.[39]

No word is said in this entire detailed account as to any action against the prophets of Asherah—most of the 400 spared by Elijah must have been still alive—the priests of Asherah, the worshipers of Asherah, or the Asherah statue itself which still stood unharmed in Samaria. When the reign of Jehu's son, Joahaz, came to an end (798 B.C.E.), the statue of Asherah still stood in Samaria,[40] and if it stood, it must have been worshiped.

This state of affairs continued in the Kingdom of Israel during the remaining three-quarters of a century of its existence after the death of Joahaz. Both the court and the people continued to worship Asherah. Only in the eyes of the post-exilic historian, looking back at the period of the divided monarchy from the vantage point of his advanced Yahwist monotheism, does the Asherah worship appear as a sin. When he gives his melancholy account of what brought about the subjugation of Israel by Shalmaneser, King of Assyria, in about 722 B.C.E., he lists several religious transgressions: they set up pillars and Asherahs for themselves upon every high hill and under every leafy tree, and burnt incense there, on all the high places (*"bamoth"*), as did the nations whom Yahweh expelled before them; committed evil acts, thereby angering Yahweh; served idols; made themselves molten images of two calves; made an Asherah; bowed down to the host of heaven; served Baal; caused their sons and daughters to pass through the fire; and used divination and enchantment. As we see, this list of ritual transgressions, although given in two parts separated by several verses,[41] contains no repetition with the exception of the worship of Asherah: first it is stated that the Israelites set up pillars and Asherahs for themselves upon every high hill and under every leafy tree; then, that they made an Asherah—this time in singular. The context clearly shows the reason for this repeti-

tion: the first mention, in plural, refers to the Asherahs of village sanctuaries on hilltops; the second, to the statue of Asherah which stood in Samaria, in the royal chapel of the capital. The twofold mention of Asherah alone indicates the relatively great importance of the worship of this goddess among all the deities served by the Israelites down to their Assyrian exile.

On the basis of the above rapid survey, one can summarize the history of Asherah worship in Israel. The Goddess Asherah was worshiped in Israel from the days of the first settlement in Canaan, the Hebrews having taken over the cult of this great mother goddess from the Canaanites. For public worship, the goddess was represented by carved wooden images, implanted into the ground, usually next to an altar dedicated to the god Baal, and located on hilltops, under leafy trees. For private religious use, innumerable small clay figurines of Asherah were in circulation, showing the goddess in the nude, with the characteristic gesture of holding her own breasts in emphasis of her fertility aspect.

During the reign of Ahab, under the influence of his Sidonian wife Jezebel, the worship of Asherah received added impetus: a statue of Asherah, probably much more elaborate and impressive than the wooden images simple villages could afford, was made and set up in Samaria, making that city, Ahab's capital, the center of the Asherah cult. At the same time, Beth-el in the south and Dan in the north of the Israelite kingdom remained the centers of the court-approved cult of Yahweh, identified with the Canaanite deity who manifested himself in the shape of a bull-calf and was related to either Bull-El or his son Hadd, the Baal (i.e., the Lord) of the Ugaritic pantheon.

The cult of the Asherah escaped the popular anti-Baal and pro-Yahweh uprising which, led by the prophet Elijah, took place under Ahab. Several years later, when all the Baalists were massacred and Baal's temple in Samaria destroyed by Jehu, the Asherah of Samaria again escaped unharmed, and her worship survived down to the end of the Israelite monarchy.

The Assyrians put an end to the Kingdom of Israel in 721 or 722 B.C.E.; yet at least one center of Asherah worship and one statue of the goddess Asherah survived the national catastrophe by a hundred years. As part of his great Yahwist reform, King Joshiah of Judah, in or after the year 621 B.C.E., purged Beth-el of the remainder of the religious buildings and institutions erected there by Jeroboam more than 300 years previously. The terse one-verse notice, in which the Book of Kings reports this,[42] states that Joshiah destroyed the altar and the high place (*bamah*) that Jeroboam had made, "and burned Asherah." No word in this notice about the Golden Calf which Jeroboam had set up for worship in Beth-el and against which Hosea found it necessary to prophesy as late as the second half of the 8th

century B.C.E.,[43] only a short time prior to the destruction of Israel. The Golden Calf was, in all probability, removed by the Assyrian invaders, and in its place new gods and cults were established all over Samaria, brought along by the new settlers from all parts of the Assyrian Empire.

Beth-el, a town lying some ten miles to the north of Jerusalem, while traditionally a part of the kingdom of Israel, came under the rule of Judah when Joshiah succeeded in pushing the boundaries of his kingdom a few miles to the north of the old frontier between the two sister-states. In the century that had elapsed between the Assyrian conquest of Israel and this modest expansion of Judah, some remnants of the Israelite population must have managed to hold out in Beth-el, and it must have been they who carried on the worship of their old goddess Asherah. Thus the goddess survived all the upheavals that passed over Samaria during the Assyrian invasion and following it, until she fell under the axe of Joshiah, that last great Yahwist reformer among the Judaean kings, who could tolerate the worship of no other god besides Yahweh in any part of the country under his control.

How are we to explain the extraordinary hold Asherah exercised over the people of Israel? We can only make an informed guess to the effect that she answered the psychological need for a mother-goddess which was keenly felt by the people and its leaders alike throughout the centuries following the conquest of Canaan. Equally intriguing is the question: why was the Yahwist opposition to the Asherah worship so much milder and, at any rate, so much less effective than the struggle against Baal?

Could it be that even in the eyes of those with the strongest pro-Yahwist sentiments, who were ready to put to death every Baalist and eradicate all physical traces of Baal worship, the cult of Asherah did not appear as an equal ritual sin? Was the goddess perhaps regarded as complementary to, rather than competitive with, Yahweh, and her worship therefore tolerated? Or was the cult and the accompanying belief so strongly entrenched in the populace that even zealous Yahwists like Elijah, Jehu, and the Rechabites, however offensive Asherah was in their eyes, did not dare take action against her? Wherever the answer lies, the continuity of Asherah worship in Israel is a fact which must be recognized and remembered in any attempt to trace the subsequent role played by the concept of a female divinity in the popular religion of the people of Judaea and their heirs, the Jews.

6 | *Asherah in Judah*

As far as it is possible to reconstruct the history of Asherah worship in Judah from the terse Biblical references, the goddess first penetrated

the Jerusalem Temple itself under Rehoboam, the son of Solomon (ca. 928–911 B.C.E.). His mother, Naamah, was the Ammonite wife of Solomon, under whose tutelage Rehoboam must have been introduced to the worship of Milcom. Rehoboam's favorite wife was Maacah, the daughter of Abshalom[44]—that is to say, she was his paternal cousin. Maacah bore several sons to Rehoboam; her eldest, Abijah or Abijam, was his father's favorite, whom Rehoboam appointed to be chief over his other sons by his other wives, and made him heir to his throne during his lifetime. In all this one recognizes, of course, Maacah's hand; her position remained equally strong after her son Abijam actually succeeded Rehoboam, when she assumed the position of *Gevirah,* or queen-mother.[45]

Maacah used her influence to introduce the Asherah already worshiped in Jerusalem since the days of Solomon, into the Temple itself.[46] During the short reign of Abijam (911–908 B.C.E.) the image of Asherah remained in its place; but Abijam's succession by Asa (908–867 B.C.E.)[47] marked the end of both Maacah's dominance as queen-mother and the worship of her Asherah. Under the influence of a prophet—a certain Azariah, the son of Oded—Asa, in the fifteenth year of his reign, instituted the first religious reform in the history of the Judaean kingdom.[48] He "put away the detestable things [i.e., the appurtenances of idol worship] out of all the land of Judah and Benjamin," removed the sacred male prostitutes, and all the idols, took away the strange altars and the sun-images, broke down the pillars and hewed down the Asherahs, and, finally, removed the Asherah made by Maacah, made dust of it and burnt it in the Kidron Valley, at the same time deposing Maacah herself from her exalted position of queen-mother.[49]

One notes that the setting up of the Asherahs which Asa removed from all over the land of Judah is nowhere mentioned in the Biblical sources. This leads to the conclusion that this popular form of Asherah worship was a heritage from the pre-monarchic period discussed above.

Asa's son and successor, Jehoshafat (870–846 B.C.E.), continued his father's cleanup work: he removed, we are told, all the Asherahs from the countryside.[50] Although this was already done by Asa, he either did not complete the job or the Asherahs had sprung up again soon after they were removed by him. The seer Jehu, son of Hanani, complimented Jehoshafat for his zeal,[51] but even this victory of Yahwism over Asherism was short-lived.

Some ten years after the death of Jehoshafat, Joash (836-798 B.C.E.) ascended the throne of Judah. At first, under the influence of Jehoiada the priest, he "did what was right in the eyes of Yahweh," and engaged in extensive restoration work in the Temple. But, following the death of Jehoiada, Joash gave in to the demands of the princes of Judah and led the people back to the worship of the Asherahs and the idols. In all probability, it was

during this period that an image of Asherah was reintroduced into the Temple itself, where it remained until, a century later, King Hezekiah (727–698 B.C.E.) removed it. By that time, the countryside too was again overrun by the traditional Canaanite cult objects, such as high places and pillars, and all these were also removed, and destroyed by Hezekiah. In the Jerusalem Temple itself, Hezekiah "cut down the Asherah and broke into pieces the Brazen Serpent which Moses had made, for unto those days the Children of Israel used to burn incense to it, and it was called Nehushtan."[52] The Asherah referred to must have been a statue which stood in the Temple, just as the Brazen Serpent did and was worshiped like it.

We do not know what was the precise connection between Hezekiah's reforms and the activities of Isaiah and Micah, the two great Yahwist prophets of his day. It is, however, probable that the king's work echoed the prophetic demand. For, in keeping with their monotheistic Yahwist point of view, the prophets, within the general framework of their overall opposition to any form of idolatry, spoke up against the Asherah cult in particular. Isaiah regarded the breaking of the altar stones into pieces and the removal of Asherahs and sun-images as the prerequisites for the expiation of the nation's sin, although he expected this to happen only at a future, indeterminate, date.[53] In the same future day, Micah too expected witchcraft, soothsaying, graven images, pillars, and Asherahs to be uprooted from the midst of the people.[54]

However, no sooner was Hezekiah dead than his son and heir Manasseh (698–642 B.C.E.) reverted to the old religious customs. The chronicler dryly enumerates the sins of which the young king was guilty:

> He rebuilt the high places which his father Hezekiah had destroyed; he set up altars for the Baal, and made an Asherah, as did Ahab King of Israel, and he bowed down to all the host of heaven, and served them. And he built altars in the House of Yahweh . . . for all the hosts of heaven, in the two courts of the House of Yahweh. And he made his son to pass through the fire, practiced soothsaying, used enchantments, and appointed them that divine by a ghost or a familiar spirit; he wrought much evil in the sight of Yahweh to anger Him. And he set the statue of the Asherah that he had made in the house [of Yahweh].[55]

The similarity between this list of ritual sins and the one which is given as the causes which brought about the destruction of Israel is striking.[56] What interests us in the present context is one detail; in both lists of transgressions Asherah alone of all the idolatrous appurtenances is mentioned twice. The reference to King Ahab indicates that Manasseh was considered

to have in some way imitated Ahab's Asherah. It is also noteworthy that the only image said to have been introduced into the Temple in the course of Manasseh's restoration of old forms of worship was that of Asherah. If Manasseh did not bother to replace the Brazen Serpent, the other image removed from the Temple by his father, this was probably due to the fact that with the passage of time the worship of a deity symbolized or represented by a serpent figure had become obsolete. Not so Asherah, whose motherly figure must have been dear to many worshipers and whose restoration to her traditional place in the Temple was therefore considered a religious act of great importance. It is tempting to conjecture that the mythical motivation behind Manasseh's act was the conviction that Yahweh's consort, the great mother-goddess Asherah, must be restored to her old and lawful place at the side of her husband.

With Joshiah (639–609 B.C.E.), another reformer came to the throne whose Yahwist zeal, stimulated by the discovery of the *Book of Deuteronomy* in the eighteenth year of his reign, surpassed even that of Hezekiah. The Deuteronomic legislation had no such leniency towards Asherah as Elijah, Jehu, and the Rechabites had displayed. Its point of view was unequivocal; it commanded the complete destruction of the seven nations that had inhabited Canaan, prohibited intermarriage with them, and ordered their altars to be broken down, their pillars to be dashed to pieces, their Asherahs hewed down, and their graven images burnt.[57] In addition, it warned:

> You shall not plant for yourself an Asherah, any tree, beside the altar of Yahweh your god which you shall make for yourself. Neither shall you set up a pillar, which Yahweh your god hates.[58]

In the remaining twelve years of his life and reign, Joshiah carried out these commandments faithfully. He had all the vessels that were part of the service of Baal, the Asherah, and all the host of heaven removed from the Temple and burned in the Kidron Valley outside of Jerusalem. Then, as if afraid that even the charred remains of these idolatrous utensils might have power to defile, he had the ashes carried to Beth-el, a place which he seems to have regarded as of old contaminated by idolatrous practices. Following this, he brought out the image of Asherah herself from the Temple, had it burned in the Kidron Valley, ground it up into powder, and cast the dust over the graves of those who had worshiped her. Next he demolished the quarters of the Qedeshim, the sacred male prostitutes, which were in the Temple and in which the women wove "houses" (clothes?) for the Asherah. Finally, he turned his attention to the countryside and cut down the Asherahs wherever they were found, filling their places with human bones. In a similar manner he destroyed, removed, and defiled all the other high places

and objects of idolatry which were originally set up by Solomon.[59]

However, not even the most thorough and zealous Yahwist reform was able to eradicate the tenacious worship of Asherah. Following Joshiah's death, her worship, and that of her son, Baal, with whom Yahweh was popularly identified, sprang up again all over the countryside. Consequently Jeremiah, whose main prophetic activity fell into the 23 years between Joshiah's death (609 B.C.E.) and the destruction of Jerusalem by Nebuchadnezzar (586 B.C.E.), again found it necessary to prophesy against idolatry in general, and Asherah worship in particular. Most frequently, it is true, Jeremiah reproaches his people for their worship of Baal.[60] He never mentions Astarte, whose cult seems to have disappeared from Judah with Joshiah's reform.[61] But he speaks up against the "altars and the Asherahs by leafy trees and upon high hills."[62]

To sum up, we find that the worship of Asherah, which had been popular among the Hebrew tribes for three centuries, was introduced into the Jerusalem Temple by King Rehoboam, the son of Solomon, in or about 928 B.C.E. Her statue was worshiped in the Temple for 35 years, until King Asa removed it in 893 B.C.E. It was restored to the Temple by King Joash in 825 B.C.E. and remained there for a full century, until King Hezekiah removed it in 725 B.C.E. After an absence of 27 years, however, Asherah was back again in the Temple: This time it was King Manasseh who replaced her in 698 B.C.E. She remained in the Temple for 78 years, until the great reformer King Joshiah removed her in 620 B.C.E. Upon Joshiah's death eleven years later (609 B.C.E.), she was again brought back into the Temple, where she remained until its destruction 23 years later, in 586 B.C.E. Thus it appears that, of the 370 years during which the Solomonic Temple stood in Jerusalem, for no less than 236 years (or almost two-thirds of the time) the statue of Asherah was present in the Temple, and her worship was a part of the legitimate religion approved and led by the king, the court, and the priesthood and opposed by only a few prophetic voices crying out against it at relatively long intervals.

7 | *Ezekiel's "Image of Jealousy"*

The years immediately preceding Joshiah's reform or following his death must be the time recalled by Ezekiel in his great vision of the sins of Judah which, in his prophecy, appear as the cause of her impending doom. There is, to be sure, no consensus of scholarly opinion on the subject, and some Biblical scholars think that Ezekiel refers to the very time in which the vision came upon him, that is, the year 592 B.C.E., six years after the exile of Jehoiakim and six years before the destruction of Jerusalem.[63]

The vision itself, whether based on more than thirty-year-old memories or on fresh intelligence (such as a visit to Jerusalem or reports), contains the most detailed account of idolatrous practices in the Jerusalem Temple found in the entire Bible. The prophet, while being visited in his house in Chaldaea by the elders of Judah, suddenly feels the hand of the Lord Yahweh upon him, sees Him as a blinding fiery apparition, feels His hand taking hold of him by a lock of his hair, lifting him up between heaven and earth and taking him to Jerusalem, and depositing him there at the northern gate of the inner Temple court.

Then God points out to Ezekiel one by one the "abominations" being committed by the "house of Israel" in His sanctuary: first He shows him the "Image of Jealousy, which provokes to jealousy," standing near the northern gate which leads to the altar. Then, on the inside wall of the court, or of the Temple building itself, He shows him reliefs of creeping things and beasts and all kinds of idols, being worshiped by seventy elders of Israel led by Jaazaniah, the son of Shaphan: each has a censer in his hand, out of which clouds of incense billow upwards. Thence God takes Ezekiel to the northern gate of the Temple itself and there shows him the women sitting and weeping for the Tammuz. The next stop is in front of the Temple, between the hall and the altar, where the prophet sees some 25 men prostrating themselves to the rising sun, with their backs turned to the Temple of Yahweh. All this, Ezekiel hears God tell him, provokes Him utterly: His punishment will be unsparing.[64]

Ezekiel's visionary enumeration of idolatrous practices is arranged in a crescendo: every next rite mentioned is a "greater abomination" than the preceding one.[65] Taken literally, this means that, in the judgment of Ezekiel, the presence of the "Image of Jealousy" was considered the smallest sin, followed in increasing order by the burning of incense to creeping things, beasts, and other idols, the mourning of Tammuz, and finally the worship of the sun.

Apart from the fact that the "Image of Jealousy" is regarded by Ezekiel as the last of all the idolatrous transgressions seen by him in his vision, there is one significant difference between it and the rest: in speaking of all the other sins, he describes and condemns idolatrous *acts*: the reliefs on the wall are worshiped by burning incense to them; the Tammuz—by mourning; the sun—by prostrations. Only the "Image" has no worshipers: it merely stands in its place, its mere presence a sin of the house of Israel.

What was this "Image of Jealousy"?[66] Biblical scholars generally accept the view that it was the statue of Asherah set up in the Temple by King Manasseh. If so, we have here some independent contemporary testimony to the presence of Asherah in the last years of the Jerusalem Temple. Since,

as we have seen above, following the death of Joshiah, the Asherah worship was reestablished all over the countryside, it was to be expected that it would be restored in the Jerusalem Temple as well. This is borne out by the testimony of Ezekiel's vision.

8 | *Conclusion*

It is on this note that we take leave of the Biblical Asherah, this elusive yet tenacious goddess to whom considerable segments of the Hebrew nation remained devoted from the days of the conquest of Canaan down to the Babylonian exile, a period of roughly six centuries. In the eyes of the Yahwists, to whom belonged a few of the kings and all of the prophets, the worship of Asherah was an abomination. It had to be, because it was a cult accepted by the Hebrews from their Canaanite neighbors, and any and all manifestations of Canaanite religion were for them anathema. How Asherah was served by the Hebrews we do not know, apart from the one obscure and tantalizing detail of the women weaving "houses," perhaps clothes, for her in the Jerusalem Temple.

Yet whatever her origin and whatever her cult, there can be no doubt about the psychological importance that the belief in, and service of, Asherah had for the Hebrews. One cannot belittle the emotional gratification with which she must have rewarded her servants who saw in her the loving, motherly consort of Yahweh-Baal and for whom she was the great mother-goddess, giver of fertility, that greatest of all blessings. The Hebrew people, by and large, clung to her for six centuries in spite of the increasing vigor of Yahwist monotheism. From the vantage point of our own troubled age, in which monotheism has long laid the ghosts of paganism, idolatry, and polytheism, only to be threatened by the much more formidable enemy of materialistic atheism, we can permit ourselves to look back, no longer with scorn but with sympathy, at the goddess who had her hour and whose motherly touch softened the human heart just about to open to greater things.[67]

9 | *Addendum: New Discoveries*

In the ten years that have passed since the publication of the second (paperback) edition of this book, archaeological work has brought to light additional evidence relating to the worship of Asherah among the Biblical Hebrews and the neighboring peoples, much of which is summarized by John Day in a concise paper titled "Asherah in the Hebrew Bible

and Northwest Semitic Literature."[68] One of the most intriguing finds that has come to light in the past decade is that of Kuntillat 'Ajrud in the northeast Sinai, some forty miles south of 'Ayn al-Qudayrat (equated with Kadesh-Barnea), where two large *pithoi* (storage jars) were discovered. They are over three feet high, and one of them carries this inscription (in my translation): "Amaryau said to my lord . . . may you be blessed by Yahweh and by his Asherah. May he bless you and keep you, and be with my lord."[69]

Another inscription from the same site reads: "I have blessed you by Yahweh *shmrn* and his Asherah."[70] The meaning of *shmrn* is uncertain; possibly it refers to *Shomron*, that is, Samaria. The Kuntillat 'Ajrud *pithoi* have been ascribed to ca. 800 B.C.E., that is, to the middle period of the divided Judean-Israelite monarchy.

At Khirbet al-Qom, a site some nine miles west of Hebron, another inscription was found. It reads: "Uriah the rich has caused it to be written: Blessed be Uriah by Yahweh and by his Asherah; from his enemies he has saved him."[71]

These inscriptions show that in popular religion the Goddess Asherah was associated with Yahweh, probably as his wife, and that "Yahweh and his Asherah" were the most popular divine couple.

In the light of these finds some Biblical scholars have suggested an emendation to a difficult passage in Hosea. In the Massoretic text Hosea 14:9 reads (God speaking): "As for Me, I respond and look on him [on Ephraim]." In the original: *ani 'aniti wa'ashurenu*. The text as it stands, does not make good sense. The form *wa'Asherato,* which appears repeatedly in the a. m. inscriptions, suggests the reading *ani 'Anato wa'Asherato,* that is, "I am his Anath and his Asherah." If so, what God says (through Hosea) is, "I am Ephraim's Anath and Asherah"—I am the one who provides the people with the blessings of fertility. This emendation restores the parallelism between v. 9a and 9b, lost in the Massoretic text. The whole passage, then, would have God say:

> Ephraim, what have I to do any more with idols?
> I [Yahweh] am his Anath and his Asherah,
> I am like a leafy cypress-tree
> From me is thy fruit found.[72]

The combined import of these recent archaeological finds and the suggested emendation of the passage in Hosea—added to the historical record as it can be gleaned from the Biblical references summarized above—is that the worship of Asherah as the consort of Yahweh ("*his* Asherah"!) was an integral element of religious life in ancient Israel prior to the reforms introduced by King Joshiah in 621 B.C.E.

II

Astarte-Anath

It is a typical feature of Ancient Near Eastern and Mediterranean religions that the divinities who people their pantheons form family groups and belong to at least two successive generations. In Chapter V we shall have a closer look at the manner in which this old Near Eastern concept re-emerged in the Kabbalistic mythology of the 13th and 16th centuries. In the present chapter, we propose to discuss the goddess who was considered along the east coast of the Mediterranean the daughter of Asherah and her husband El, and who at times and in certain places overshadowed her mother in popularity and in the hold she exercised on human imagination and emotion.

Her proper name was Anath. However, she was equally well known, far beyond the boundaries of Syria and Palestine, by the name Astarte (Hebrew: 'Ashtoreth, or, in plural 'Ashtaroth), which seems originally to have been her most favored epithet. It is characteristic of the unsatisfactory state of our knowledge of the history of ancient Canaanite religion, that we cannot as yet be sure whether Anath and Astarte were originally one and the same goddess or two separate female deities who, in the course of gradual development, became identified. In the following we shall have to leave this problem unsolved and discuss separately first Astarte and then

Anath, while presenting also the data which connect the two goddesses.

1 | *The Canaanite Astarte*

Most of the chief gods of ancient Syria, to judge from the Ugaritic sources, had two names; occasionally one was a proper name and the other an epithet. As we have seen above, the Lady Asherah of the Sea was also referred to as Elath, that is Goddess. Her husband, properly named Father Shunem, was in most cases styled El (i.e., "God"), or Bull El. Asherah's son Hadd is almost always called Baal or Master. The Divine Mot is also called El's Darling Ghazir. Another god is alternatingly called Prince Yamm (Sea) and Judge Nahar (River). In like fashion, Asherah's daughter seems to be called either Anath or Astarte ('Ashtoreth).

Two names for a deity are a prosodic requirement for classical Semitic poetry, a favorite device of which is the reduplication of significant statements without a repetition of the same words. In order to be able to express the same idea in two parallel sentences, using two sets of synonymous words, the Semitic poet had to have at his disposal two names for his gods who figure so prominently in his mythological poems. The following examples, all taken from the Ugaritic tablets, illustrate the point:

Then came the messengers of Yamm,
The envoys of Judge Nahar . . .[1]

Or:

She penetrates El's field and enters
The pavilion of King Father Shunem.[2]

Or:

And say unto Divine Mot.
Declare unto El's Darling Ghazir.[3]

Or:

He cries to Asherah and her children,
To Elath and the band of her kindred.[4]

In the same way, the names Anath and Astarte appear in parallel positions making it probable that the two names refer to one and the same goddess:

Whose fairness is like Anath's fairness

Whose beauty like 'Ashtoreth's beauty.[5]

Or in another passage where the first part of the crucial name Anath has to be conjecturally completed:

His right hand (Ana)th seizes
'Ashtoreth seizes his left hand.[6]

Such Semitic refinements of style were lost on the Egyptians, and thus we read in a 12th-century B.C.E. hieratic papyrus that Neith, the Great, the God's Mother, demands that the Ennead (the nine great gods) should thus address the All-Lord, the Bull Residing in Heliopolis: "Double Seth in his property; give him Anath and Astarte, your two daughters . . ."[7] Other Egyptian documents, some as early as the 13th century B.C.E., also show that Anath and Astarte were accepted in Egyptian religion as two separate goddesses of war.[8] By the 18th Dynasty, Astarte had become a goddess of healing in Egypt, referred to as "Astar of Syria."[9] Rameses III calls Anath and Astarte "his shield."[10] Both Anath and Astarte, as well as a third goddess derived from the Canaanite-Syrian pantheon, Qadesh, bore the Egyptian title "Lady of Heaven." (See Plate 25.) An Egyptian stele erected in Beisan, Palestine, in the 12th century B.C.E., shows an Egyptian worshiping the goddess "Anath, Lady of Heaven, Mistress of all the gods."[11] Of the three, Astarte seems to have been the most popular in Egypt; she had her own priests and prophets[12] as Asherah had in Israel. Also in Moab the name of Astarte appears with the omission of the feminine ending, as 'Ashtar and is coupled with Chemosh on the Moabite Stone of ca. 830 B.C.E.[13] Astarte seems to have been the consort of Chemosh, Moab's national god.

A Canaanite city, called 'Ashtarot or 'Ashtartu, in the Bashan, is mentioned in several Egyptian documents from the 18th century B.C.E. on, as well as in the Amarna letters which date from the 14th century B.C.E.[14]

At a much later period Astarte became the chief goddess of Sidon, replacing Asherah. When this transition occurred is unknown, but by the 4th century B.C.E. it was completed as can be concluded from the fact that at that time the kings of Sidon were also the priests of Astarte and their wives had the title "priestess of Astarte." However, the changeover could not have taken place much earlier, because a century later Sidonian king Eshmun'azar reports that he and his mother built a temple for Astarte in Sidon-by-the-Sea and Shamem-Addirim, two sections of Byblos; in other words, in his days the cult of Astarte was still spreading in Phoenicia. The same inscription of Eshmun'azar which contains the above details also tells us the full Sidonian name of Astarte: it was 'Ashtart-Shem-Baal, i.e., "Astarte

of the Name of Baal." Astarte and Eshmun, "the Holy Prince, the Lord of Sidon," were termed "the gods of Sidon."[15] The name "'Ashtoreth of the Name of Baal" occurred to the north of Sidon over a thousand years earlier: This is how the goddess, in all probability Anath, is called in two passages on the Ugaritic tablets.[16]

This is more or less the gist of what we know about Astarte from Canaanite and Phoenician sources.[17] As we shall see later, the Canaanite mythical material about Anath is much more abundant.

2 | *Astarte in the Bible*

In passing now to an examination of the Biblical references to Astarte, let us begin with those which show the clearest correspondence with the extra-Biblical sources. The city of 'Ashtartu in the Bashan is referred to several times in the Bible, as a city of Levites. Once it is called Be'eshterah,[18] once 'Ashterah,[19] but usually 'Ashtaroth, in the plural form which is frequently employed in Biblical place names.[20] 'Ashtaroth was originally the capital city of Og, the legendary giant king of Bashan,[21] and of his people the Rephaim who were smitten by Chedorlaomer.[22] This last mentioned detail is contained in an old semi-historical, semi-mythical account which is the only reference to retain the full old name of the city: *'Ashteroth-Qarnaim* (i.e., "Astarte of the Two Horns"). The concept behind this designation is graphically illustrated by several Astarte-figurines found at various archaeological sites in Palestine and actually showing the goddess with two horns.[23] (See Plates 9 and 10.)

The original meaning of the name Astarte ('Ashtoreth) was "womb" or "that which issues from the womb."[24] Such a meaning is most appropriate as an appellative for a goddess of fertility: she is called "she of the womb," i.e., the inducer, as well as symbol, of fertility, just as her brother-consort Baal was the inducer and symbol of male fertility.[25] Thus the primary meaning of the names of the divine couple Baal and Astarte was begetter and conceiver, man and woman, husband and wife.

This being the case, the name 'Ashtoreth or Astarte must have originally been but an epithet of the goddess whose proper name was Anath, just as Baal (Master) was the epithet of the god whose proper name was Hadd.[26]

Now as to the Biblical references to the goddess Astarte, the first mention of her worship by the Hebrews comes from the early period of the Judges, soon after the penetration into Canaan: "And they forsook Yahweh and served the Baal and the 'Ashtaroth."[27] A little later more explicitly:

And the children of Israel again did that which was evil in the sight

> of Yahweh, and served the Baalim and the 'Ashtaroth, the gods of Aram, and the gods of Sidon, and the gods of Moab, and the gods of the children of Ammon, and the gods of the Philistines, and they forsook Yahweh and served him not.[28]

The first purge of these Baals and Astartes took place at the bidding of Samuel, and was immediately followed by a decisive intervention by Yahweh in favor of His people in their battle against the Philistines.[29] As to the Philistines themselves, their Astarte must have been a goddess of war as well as that of love and fertility, and this is why, when the Philistines defeated Saul, they deposited his armor in the Temple of 'Ashtaroth, undoubtedly as a token of gratitude.[30]

In Chapter I we argued that the goddess whose worship Solomon introduced into Jerusalem in honor of his Sidonian wife was none other than Asherah, the Elath of Sidon. As a result of a confusion between Asherah and Astarte, which, as we have seen, began with the 14th century B.C.E. Amarna letters and whose sporadic traces can be found down to our present day, the Hebrew historian of the Solomonic era repeatedly refers to the goddess of whose worship Solomon was guilty as "'Ashtoreth, the goddess of the Sidonians."[31] In a reference to the same goddess at a later time, she is no longer accorded the title "goddess" but instead is called "'Ashtoreth, the detestation of the Sidonians."[32] This is how she is spoken of by the historian who records that King Joshiah of Judah defiled the high places which Solomon had built for 'Ashtoreth.

3 | *The Archaeological Evidence*

The Goddess Astarte is mentioned only nine times in the Bible as against the forty times that Asherah is referred to. The Bible thus fails to convey any idea as to the prevalence of the worship of Astarte among the Hebrews. A somewhat better idea can be gained from the archaeological evidence that has come to light in excavations conducted in the last few decades in many parts of Palestine. By the early 1940's, a total of no less than 300 terracotta figurines and plaques representing a nude female figure had been unearthed. These nudes fall into several distinct types, such as those with arms extended to the sides and holding stalks or serpents, or with hands holding the breasts, or with one hand placed over one breast and the other over the genital region, or with hands crossed before the breasts. Some are figures of pregnant women, other pillar figurines, etc. The persistence and ubiquity of these figurines is remarkable. They have been found in every major excavation in Palestine, and their prevalence extends

from Middle Bronze (2000–1500 B.C.E.) to Early Iron II (900–600 B.C.E.), that is, to the end of the period of the divided Israelite monarchy, and even later. The so-called Qadesh-type is clearly associated by its symbolism with a goddess; the other types are assumed by most scholars to have been representations of the goddesses Asherah, Astarte, or Anath, although no direct or definite identification could be made so far. According to a very cautious view, it is still an open question whether the figurines represented "the goddess herself, a prostitute of the cult of the goddess," or were talismans "used in sympathetic magic to stimulate the reproductive processes of nature."[33] (See Plates 11–18.)

In the following remarks we shall concentrate on one single site which has been studied more thoroughly and systematically than probably any other in the country. This is Tell Beit Mirsim, to the southwest of Hebron, today on the Israeli-Jordanian border. The Tell (mound of ruins) was excavated in the course of several years by William F. Albright and identified as the Biblical town Devir.[34] The systematic archaeological study of this Tell has shown that the site was first occupied by Canaanites in the Early Bronze Age, Period 4 (ca. 21st century B.C.E.), that it flourished during the Middle and Late Bronze Ages (ca. 21st–13th centuries B.C.E.), and that is was destroyed towards the end of the 13th century, evidently by the Hebrews who at that time conquered the area. In the beginning of the Early Iron Age (12th century B.C.E.), the town was resettled by the Hebrews, and it flourished until the end of the 6th century B.C.E., when it was destroyed in the course of the general devastation of Judaea at the time of the First Exile (586 B.C.E.), All in all, there were in Devir some ten or eleven periods of occupation. The town itself was larger that the average Israelite towns of the First Temple period, measuring about 7½ acres inside the walls.[35]

The old name of the town was Kiriath-Sefer, meaning "Book City." At an undetermined date this name was changed to Devir, which is the Biblical term for the Holy of Holies of the Jerusalem Temple.[36] The name seems to indicate that there was a temple or sanctuary in Devir, which is reported to have been given "unto the children of Aaron the priest," together with eight other cities in the territories of Judah and Simeon.[37]

Whether or not the town played a special role in the religious life of the Canaanites prior to the Israelite occupation, we do not know. It is, however, a patent fact that the commonest religious objects found in the Late Bronze levels (21st–13th centuries B.C.E.) of Tell Beit Mirsim are the so-called Astarte plaques, made of clay, generally oval in shape, bearing the impress (from a pottery of metal mold) of the nude figure of the goddess Astarte. In many cases she holds her arms upraised, grasping lily stalks or serpents or both. The goddess' head is adorned with two long spiral ringlets

identical with the Egyptian Hathor ringlets, or she wears a Philistine-type helmet. Other plaques show the goddess with her arms hanging down, or with her hands clasped together under her protuding navel. These plaques go back to earlier prototypes found in Mesopotamia, where they have a long pre-history in the Early Bronze. Other types of naked goddesses, both plaques and figurines, also occur.[38] (See Plates 19–23).

When we come to the Israelite layers (12th–6th centuries B.C.E.), the character of the finds changes. In Stratum A alone, stemming from the 8th and 7th centuries B.C.E. no less that 38 recognizable examples of female figurines were found, as well as many more fragments of such figures. These differ from the Astarte plaques, inasmuch as these Israelite naked female figures wear none of the insignia of the earlier or contemporary Canaanite goddesses. One must assume that these figures do not represent Astarte; they have a style and appearance of their own, with a broader face emphasized by the straight horizontal hairline across the forehead, with curly hair framing the face as well, and with no trace of the horns or "Hathor" ringlets characterizing the Canaanite Astarte. The breasts are usually strongly emphasized, but below them the body line becomes that of a pillar, with its base flaring outward, which indicates that these figurines were intended to stand up unsupported.[39] Because of the pillar-like appearance of these figurines, some scholars suggest that they may have been clay representations of Asherah, the goddess whose larger images were carved out of tree trunks.

However that may be, the archaeological evidence leaves no doubt that these figurines were very popular among the Hebrews in the period of the divided Kingdom. "The clay molds were doubtless made by a few potters who were good sculptors, and these men [non-Israelites] would sell their molds to ordinary Israelite potters scattered throughout the land."[40] One type of these nude fertility figurines, representing women in the process of parturition, was probably used as a charm to bring fruitfulness to women or to ensure an easy delivery. Seals with Hebrew names, such as Elyaqim, Yoyakhin, etc., found in the same Stratum A, prove beyond a doubt that these female figurines were made and bought by Israelites who used them for religious purposes.[41]

4 | *The Ugaritic Myth of Anath*

As mentioned above, the Canaanite mythical material about Anath is abundant. This is due to the discovery and decipherment of the alphabetic cuneiform tablets of Ugarit, written in a language closely resembling Hebrew and dating from the 14th century B.C.E. In Ugaritic mythology, Anath is

the by far most important female figure, the goddess of love and war, virginal and yet wanton, amorous and yet given to uncontrollable outbursts of rage and appalling acts of cruelty. She is the daughter of El, the god of heaven, and of his wife the Lady Asherah of the Sea. She has so many features in common with the Sumerian Inanna and the Akkadian Ishtar that one must regard her as heir and kin of those great Mesopotamian goddesses.[42]

However, instead of being concerned primarily with finding ever new divine, human, and animal bedfellows, as Ishtar was reputed to have been, Anath spent most of her energies on the battlefield. She too, to be sure, was a typical goddess of love, both chaste and promiscuous. Her character is aptly epitomized in a 13th-century B.C. Egyptian text in which she and Astarte are called "the goddesses who conceive but do not bear," meaning that they are perennially fruitful without ever losing their virginity. In the Ugaritic myths her constant epithet is "the maiden Anath" or the "the Virgin Anath." And, as late an author as Philo Byblius, who flourished in the early 2nd century C.E. still refers to the virginity of Anath, whom he identifies with Athena, the famous virgin goddess of the Greeks. Like Ishtar, Anath was called "lady of heaven, mistress of all the gods," and, again like Ishtar, she loved gods, men, and animals. (See Plate 24.)

Her foremost lover was her brother Baal. When she approached, Baal dismissed his other wives, and she, in preparation for the union with him, bathed in sky-dew and rubbed herself with ambergris from a sperm whale. The actual intercourse between Anath and Baal is described with a graphic explicitness which is unique even among the unrestrained accounts of love-making usual in ancient Near Eastern texts. In a place called Dubr, Baal lay seventy-seven times with Anath, who assumed the shape of a heifer for the occasion, and, it appears, that the wild bull born to Baal was the issue of this union. A mortal lover of Anath was Aqhat, whom, after what must have been an intimate tête-à-tête (description unfortunately missing), Anath addressed as "My darling great big he-man!" On the motherly side, Anath was said to have been one of the two wetnurses of the gods, to have given suck to a son of King Keret, and one of her appellations was "Progenitress of the Peoples." In Egypt, Anath came to be regarded as the wife of the god Seth, and an Egyptian magical text from the 13th century B.C.E. describes in surprisingly sadistic terms how Seth deflowers Anath on the seashore.

Yet all these adventures in the fields of love pale to insignificance next to Anath's great exploits in war and strife. In fact, no ancient Near Eastern goddess was more bloodthirsty than she. She was easily provoked to violence and, once she began to fight, would go berserk, smiting and killing right and left. One sees her plunge into fighting with real pleasure: she

smites the peoples of both East and West, so that their heads fly like sheaves and their hands like locusts. Not satisfied with this, she binds the severed heads to her back and the cut-off hands to her girdle, and plunges knee-deep in the blood of troops and hip-deep in the gore of heroes. Now she is in her element: her liver swells with laughter, her heart fills up with joy.

It was this bloodthirsty and warlike Anath whose worship penetrated Egypt sometime prior to the 13th century B.C.E. She was, for the Egyptians as well, "Anath, Lady of Heaven, Mistress of All the Gods," a war-goddess who was associated with horses and chariots and who, equipped with shield and spear, protected the Pharaoh. Indeed, because of her warlike nature, Anath in Egypt was called "the goddess, the victorious, a woman acting as a man, clad as a male and girt as a female."[43]

5 | *Anath in the Bible*

It is a remarkable fact that the name Anath is never mentioned in the Bible as that of a foreign goddess. The explanation seems to be that the Biblical authors referred to her by her epithet 'Ashtoreth rather than by her proper name, just as they referred to her Canaanite-Phoenician brother and lover by his epithet Baal ("Lord") rather than by his proper name, Hadd.

This, however, does not mean that the proper name Anath is entirely absent from the Bible. Mention is made of a Canaanite town in the territory of Naphtali called Beth Anath ("House of Anath"),[44] whose inhabitants were subjugated but not dispossessed by the Hebrews. Better-known is the priestly town of Anathoth, north of Jerusalem (today Anatha) which was located in the territory of Benjamin and was the birthplace of Jeremiah and other Biblical figures.[45] Place names such as these point to some connection with the goddess Anath; most probably, their founders named them after the goddess and in her honor, in accordance with the custom prevalent all over pre-Biblical and Biblical Palestine to name localities after deities.

Anathoth is the plural of Anath (as 'Ashtaroth is of 'Ashtoreth, or Baalim is of Baal), and it indicates generalization of the concept; the town was not named after any local Anath in particular, but after the Anaths in general who manifested themselves in many places. The same form, Anathoth, appears also as the name of two men: one of them, a grandson of Benjamin, lived in the early days of the Israelite judges; the other, a contemporary of Nehemiah, after the return from the Babylonian exile.[46] From the days of the Judges the name of another individual survived, in the singular: one of the Judges themselves, we read, was a son of Anath. One single heroic deed is reported of this Judge, Shamgar son of Anath: he

"smote of the Philistines six hundred men with an ox-goad" and thus saved Israel.[47] It is tempting to conjecture that Anath was the name of the mother (and not of the father) of Shamgar, and that in the brief notice there is a residue of an old myth about a son of the goddess Anath who inherited his mother's warlike qualities. The ox-goad Shamgar used as a weapon reminds us of the two bludgeons, Ayamur ("Driver") and Yagrush ("Chaser"), which Baal, Anath's brother and lover, used to defeat his arch-enemy Yamm.[48]

The last Biblical reference to Astarte-Anath does not contain either of these names but refers to the goddess as "Queen of Heaven." As we shall recall, the title "Lady of Heaven" was given to Anath and Astarte by their Egyptian worshipers,[49] which makes it more likely that the "Queen of Heaven" who formed the subject of a heated argument between Jeremiah and his Judaean fellow-refugees in Egypt was none other than the "virgin Anath," the "maid" Astarte. Jeremiah was convinced, and tried to convince also the remnant of Judah in Egypt, that the great national catastrophe that had befallen them had come about as a punishment by Yahweh for the people's sin of idolatry. Unless they would repent, the prophet warned them, they would all perish in Egypt as the others had in Judaea.

But the people's interpretation of the downfall of Judaea was diametrically opposed to that of Jeremiah. They too recognized that the calamity that had overtaken them was a divine punishment for a religious sin, but a sin which, they felt, they had committed against the Queen of Heaven and not against Yahweh. The answer given to Jeremiah by "all the people that dwelt in the Land of Egypt, in Pathros"[50] therefore was:

> As for the word that you have spoken to us in the name of Yahweh—we shall not listen to you. But we shall without fail do everything as we said: we shall burn incense to the Queen of Heaven, and shall pour her libations as we used to do, we, our fathers, our kings and our princes, in the cities of Judah and in the streets of Jerusalem. For then we had plenty of food, and we all were well and saw no evil. But since we ceased burning incense to the Queen of Heaven and to pour her libations, we have wanted everything and have been consumed by sword and famine.

To these words the women added:

> Is it that we alone burn incense to the Queen of Heaven and pour her libations? Is it without our husbands that we make her cakes in her image and that we pour her libations?[51]

This unique passage allows us a glimpse of the actual ritual of the Hebrew Astarte worship. The rites were led by kings of Judah and her

princes; its participants were the men, women, and children of the people; the locale was Jerusalem and the other cities of the realm. About the ritual itself we learn more details from another passage in Jeremiah in which the prophet is addressed by God as follows:

> Do you not see what they do in the cities of Judah and in the streets of Jerusalem? The children gather wood and the fathers kindle the fire, and the women knead the dough to make cakes to the Queen of Heaven and to pour out libations to other gods, in order to anger Me![52]

The two passages together contain the following features of the ritual performed in honor of the Queen of Heaven:

1. The children were sent to gather wood.
2. The fathers lit the fire.
3. The women kneaded dough and made cakes.
4. The cakes were baked over fire.
5. The women, assisted by the men, burnt incense; and
6. Poured out libations.
7. They poured libations to other gods as well.
8. In return for this veneration, the Queen of Heaven was believed to provide the people with plenty of food and to secure their well-being in general.
9. It can be assumed that the Kings of Judah led the ritual in Jerusalem, and the princes in the other cities.
10. The burning of incense, the offering up of cakes, and the pouring of libations presuppose altars, which, in turn, may have stood either in sanctuaries in the cities or on "high places" in the countryside.

The lighting of fire on altars, the burning of incense, and the pouring of libations are all rites well known from both the Jerusalem Temple and the other ancient Near Eastern rituals. Only the baking of cakes requires a word of explanation.

In Athens, Artemis was honored with round cakes called *selenia*, which represented the moon. A Babylonian hymn on Ishtar mentions the *kamanu*, sacrificial cakes, offered her. If Hebrew *Kawwan* ("cake") is, in fact, derived from Babylonian-Assyrian *kamanu*, then it is likely that the Queen of Heaven worshiped in Jerusalem corresponded to the Babylonian-Assyrian Ishtar, who is referred to as *Sharrat Shame*, Queen of Heaven, and similar titles.[53]

A recent archaeological find enables us to think of another explanation. In the course of excavations conducted at Nahariah (in Israel, north of

Acre), on a *bamah* ("high place"), a stone mold was found dating from the 17th century B.C.E. The mold was used for casting small figures of the goddess Astarte—her identity is clearly indicated by the two horns which protrude to the left and right over her ears. She is "Astarte of the Horns," standing naked, except for her tall, conical headdress, looking down at her protruding navel, with an enigmatic smile on her lips.[54] (See Plate 9.) Could it be that such molds were used to bake cakes in the shape of Astarte, either to be eaten by the celebrants (perhaps as a precursor of the Holy Communion in which the Host, which is supposed actually to turn into the body of Christ, is eaten) or to be burnt on the altar? More data will be needed before this question can be answered, but the possibility that this is what was meant by the cakes in the image of the Queen of Heaven is an intriguing one.[55]

If the equation of the Queen of Heaven with Anath-Astarte is correct, as we believe it to be, then we can determine the period recalled by the Judaean exiles in Egypt as the time of their devoted Astarte worship. As we have seen above, the service of Astarte was forcibly terminated by King Joshiah.[56] Joshiah's reforms were carried out beginning with the 18th year of his reign,[57] that is, after the year 621 B.C.E. The controversy between Jeremiah and the people about the Queen of Heaven must have taken place within a year or two after the arrival of the Judaean refugees in Egypt, say, in 585 B.C.E. The Astarte ritual, forbidden by Joshiah only 36 years previously, could therefore have been quite well remembered by the older Judaean exiles in Egypt. Since Jeremiah began his prophetic activities in the 13th year of King Joshiah's reign,[58] that is, in 626 B.C.E., his description of the worship of the Queen of Heaven in Jerusalem and the other cities of Judah must date from the five years that elapsed between 626 B.C.E. and the reforms of Joshiah in 621.

That the Judaean exiles meant what they said to Jeremiah is proved by their history in the subsequent two centuries. In the Jewish military colony at Hermopolis in Egypt, the worship of the Queen of Heaven was pursued in the 5th century B.C.E. Her temple is mentioned in an Aramaic papyrus from that community, side by side with those of other deities.[59]

The last mention of the name of the old goddess in a Jewish environment comes some 175 years after the determined vow of the Judaeans in Egypt to return to the worship of the Queen of Heaven. In one of the letters written by a member of the Upper Egyptian Jewish military colony on the island of Elephantine, dating from 419 or 400 B.C.E., it is stated that Yedoniah, the son of Gemariah, who was the priest and head of the Jewish community, had collected the following donations; for Yaho (i.e., Yahweh) 12 karash and 6 shekels; for Ishumbethel 7 karash; and for Anath-

bethel 12 karash.[60] Since each contributor gave 2 shekels, and 20 shekels made 1 karash, one can easily calculate that, in addition to the 123 contributors who "gave money to the God Yaho" and whose names are enumerated in the Aramaic document, there were 70 who gave their two shekels each to Ishumbethel and 120 who gave the same amount each to Anathbethel. Ishumbethel was a male, and Anathbethel a female, Aramaean deity. In the name Anathbethel the two elements Anath and Bethel are unmistakable. It has been argued that these two deities were worshiped by non-Jewish Aramaeans who lived in Elephantine and for whom Jedoniah acted as treasurer or banker.[61] This is unlikely for two reasons. Firstly, it is not probable that members of competing rival religious sects should entrust their cultic donations to the hands of a man who was the leader of another religious group. The keen religious rivalries which are known to have been a feature of life in Elephantine would have prevented this.[62] Secondly, in at least one letter written by an Elephantinian Jew to another, blessings are invoked of Yaho and another deity,[63] which proves that the Jews of the island could and did worship, along with Yahweh, other deities as well.

III

The Cherubim

Whenever and wherever images were worshiped by the Hebrews, as it frequently happened in the period which ended with the Babylonian captivity of 586 B.C.E., such practices were always and uncompromisingly condemned in the Biblical and later sources as idolatrous abominations. The legal crystallization of this attitude was the commandment which ruled out the making and worshiping of "graven images or any manner of likeness." Biblical and subsequent Jewish religion has, therefore, justly been called "aniconic."

However, it is the exception that proves the rule. In the case of aniconic Judaism the exception was represented by the Cherubim, those winged human figures which were an integral part, and according to at least one Rabbinic opinion, the most important part, of all the Hebrew and Jewish sanctuaries and temples. The Cherubim were, by any criteria, "graven images," and yet they continued to figure prominently in the Temple ritual down to the very end of the Second Jewish Commonwealth (70 C.E.). Moreover, in their last version the Cherubim depicted a man and a woman in sexual embrace—an erotic representation which was considered obscene by the pagans when they at last had a chance to glimpse it. And nevertheless, the entire contemporary and subsequent Hebrew-Jewish literature contains not

a word that could in the remotest be construed as a condemnation of the Cherubim. On the contrary, their presence in the Holy of Holies, the innermost sanctuary of the Temple, and the ritual significance attributed to them, are invariably referred to as a most sacred mystery. Only the Hellenistic Jewish authors, such as the philosopher Philo of Alexandria and the ex-priest Josephus Flavius, speak about the Cherubim with an embarrassment obviously created by the apprehension lest the pagan Greek readers for whom they wrote consider the Cherubim as but the Jewish equivalent of the statues of their own gods and goddesses and thus find a basis to refute and reject the claim that the Jews worshiped only the one invisible God.

Since one of the two Cherubim was a female figure, we find that, in addition to the Canaanite goddesses whose worship was condemned by the Hebrew prophets and Jewish sages, the Temple of Jerusalem contained a representation of the female principle which was considered legitimate at all times. It is to an examination of the Cherubim, their history, their changing appearance and their evolving symbolism that the present chapter is devoted.

1 | *The Ivory Cherubim*

Excavations in Samaria in the palace of King Ahab of Israel (873–852 B.C.E.) have brought to light a number of small ivory plaques whose presence in that royal residence earned it the name "Ivory House."[1] Among them is one which shows two crouching female figures facing each other. The women are shown in profile, with both arms stretched forward, and underneath each arm is a wing whose upper edge seems to adhere to the lower contours of the arm. In each hand the figures hold an object which seems to be a large flower, probably a lotus. The upper body of the figures is upright; their legs are bent so that their knees protrude forward toward each other and their buttocks rest on their upturned heels. The arms and legs are naked, but around the shoulders they wear wide, fringed collars, and breast-plates hang down from their necks. Their heads, covered by Egyptian-type head-cloths which bind their foreheads tightly and flow freely down over the shoulders behind the ears, are crowned by a hollow, ring-like ornament rising vertically upward. Between the two figures is a vertical ritual object, with the same kind of ring on top, and under it a four-tiered structure supported by slender, out-turned legs. This object engages the attention of the two figures who seem to shield or fan it with their wings.[2] (See Plate 26.)

Whatever the actual purpose of this ivory plaque, it is the closest illustration found to date of the Cherubim, which in the Solomonic Temple

shielded the Ark in the Holy of Holies—closest not only in general arrangement and detail, but also in time of provenance and place of discovery, as well as origin since both Solomon's and Ahab's Cherubim point to Phoenician workmanship. Of all this we shall have more to say later, but one detail should be stressed already here: the two genii from Ahab's ivory palace are *female* figures.

A very similar pair of winged protective female genii is shown on an Egyptian relief from Karnak, from the time of Thutmoses II (ca. 1500 B.C.E.). The two genii are seated, face each other, their upraised wings touch at the tips, and in each of their hands they hold an *ankh,* the Egyptian key of life.[3]

We cannot go into a discussion of the numerous variations of winged beings, human, animal or composite, which have been unearthed in excavations in Palestine, Egypt, Mesopotamia and other places in the Near East. Let us only mention in passing that the representation of such imaginary hybrid forms was a favorite theme all over the area for several thousands of years, and that the winged female genii of the Cherub type were merely one of the many sub-varieties of these ubiquitous creatures of fantasy.

That the Cherubim in Solomon's Temple were human and not animal figures has been convincingly argued by Biblical scholars.[4] Others opinioned that they were animal figures, shaped like winged oxen, or winged lions. The Samarian ivory plaque suggests that they were, indeed, winged women.

Before reviewing the Biblical evidence, a word should be said about the meaning and derivation of the term Cherub (Hebrew, *K'rubh*). Many attempts have been made to explain this Biblical Hebrew noun, none of them completely satisfactory. It has, however, become accepted that it is related to Akkadian *karibu,* which designates an intermediary between men and the gods, a being who presents the prayers of men to the gods.[5]

2 | *The Cherubim of the Desert Tabernacle*

Let us leave aside the complicated question of the historicity of the Book of Exodus in general and of the passage describing the Cherubim of the desert Tabernacle in particular. For our present purposes it makes little difference whether Exodus truly portrays the conditions of the tribes of Israel during their wanderings in the desert in the 13th century B.C.E., or whether, to take the other extreme view, it represents the ideas of the post-exilic Judaeans about the early history of their ancestors after their liberation from Egypt. In any case, as far as the Cherubim in Solomon's Temple are concerned, it must be taken for granted that they were patterned

after earlier prototypes, which, through the Shiloh Tent which was called "the House of Yahweh,"[6] may well have derived from an ancient period reaching as far back as the age of Moses. This must be considered a distinct possibility even if the actual execution of the Solomonic Cherubim was entrusted to Phoenician artists and craftsmen.

According to the Biblical tradition, in both the desert Tabernacle and the Jerusalem Temple the only supernatural beings represented were the Cherubim. These, however, were shown so often that they must be regarded as the architectural and decorative, and consequently also the religious, *leitmotif* of both sanctuaries.

In the Tabernacle, two figures of Cherubim stood on both sides of the ark-cover, separated by its width of one and one-half cubits (or 2¼ feet). They were made of beaten gold, and, together with the ark-cover, formed a single piece. Their faces were turned to each other, and downwards toward the ark-cover, which was shielded by their outspread wings. It was upon the ark-cover, from between the two Cherubim, that God was believed to speak to Moses.[7]

Cherubim-figures appeared also on each of the ten curtains which formed part of the sides of the Tabernacle.[8] In addition, Cherubim were depicted on the Veil, which separated the Holy from the Most Holy of the Tabernacle. This Veil hid the Ark and its two Cherubim from all eyes, but it carried a picture of the Cherubim, reproducing on the outside what it concealed within. Like the ten curtains mentioned above, the Veil was made of fine twined linen, blue, purple and scarlet, and was "the work of the skilful workmen."[9]

By simple count we thus find that there were twelve pairs of Cherubim represented in the desert Tabernacle: one over the Ark in the round, and one embroidered on the Veil and ten on the ten curtains.

3 | *The Cherubim of Solomon's Temple*

In the Solomonic Temple the Cherubim motive was even more in evidence. There were, first of all, the two Cherubim over the Ark. These were made of olive wood and overlaid with gold. Their height was ten cubits (15 feet), and their wing-span measured the same. Both Cherubim were of equal size and form; their inner wings touched each other, while their outer wings reached the two opposite walls of the Holy of Holies in which they stood: the total span of the two pairs of wings was 20 cubits (or 30 feet), stretching across the entire width of the Holy of Holies.[10] Beneath the inner wings of the Cherubim stood the Ark.[11] The pattern, we are told, for the Cherubim, as for the entire Temple and all its holy vessels,

was handed down by David to his son Solomon.[12]

The ten curtains of the Tabernacle embroidered with Cherubim were replaced in the Solomonic Temple by solidly built walls, and these, in turn, were decorated with the Cherubim-motive: "And he [Solomon] carved all the walls of the House round about with carved figures of Cherubim and palm-trees and open flowers, both within and without." Also on the two wings of the main entrance door to the innermost Sanctuary (*devir*) "he carved carvings of Cherubim and palm-trees and open flowers, and overlaid them with gold," and, similarly, on the outer door of the Temple (*hekhal*), which was made of cypress wood, "he carved Cherubim and palm-trees and open flowers, and he overlaid them with gold fitted upon the graven work."[13]

According to Chronicles, there was no door between the Holy and the Holy of Holies, but a veil separated them, as had been the case in the desert Tabernacle. The manner in which it was made and decorated was also the same as in the old Tent of Meeting: blue purple, crimson and fine linen, with Cherubim wrought thereupon.[14]

In addition to the above, Cherubim figured among the decorating of the wheeled bases of the ten lavers. On the frames of these bases "there were lions, oxen and Cherubim," while on the sides of the bases there were engraved "Cherubim, lions and palm-trees according to the space of each, and wreaths round about." All these bases were cast in one mold, and they were placed five to the right and five to the left of the House.[15]

Ezekiel, in his vision of the Temple, singles out the walls and the doors only as being decorated with figures of Cherubim:

> It was made with Cherubim and palm-trees, a palm-tree was between Cherub and Cherub, and every Cherub had two faces: there was a man's face towards the palm-tree on the one side, and a young lion's face towards the palm-tree on the other side, thus was it made through all the house round about. From the ground unto above the door were the Cherubim and the palm-trees made, and so on the wall of the Temple. . . . And the Temple and the sanctuary had two doors: each door had two wings, two turning leaves were there to each door. And on the door-wings of the Temple there were made Cherubim and palm-trees like as were made upon the walls. . . .[16]

While it may be difficult to establish the precise meaning of each detail of this visionary description of the Cherub-decorated walls and doors of the Temple, it largely corresponds to the Solomonic Temple, with a few added details: in the description of the Temple of Solomon we are not told how the Cherubim and palm-trees were arranged; from Ezekiel we learn that these two decorative motives alternated: one Cherub, one palm tree.

We also learn that the Cherubim and palm-trees were quite large: they reached from the floor to above the height of the door. And finally we are told that the Cherubim had two faces each, one human face and one lion's face, turned Janus-like in opposite directions.

As we see, in all the above references to the Cherubim in the Solomonic Temple they are consistently associated with palm-trees. Cherubim and palm-trees appear side by side on numerous ivory plaques, such as those that decorated the bed of Hazael, King of Damascus, in the late 9th century B.C.E., or those found in Arslan Tash, northern Syria, and dating from the 9th–8th century B.C.E. (See Plates 27 and 28).

From all this it becomes evident that the Solomonic Temple contained a surfeit of Cherubim. From the moment one entered the Temple court from where the House itself was visible, nowhere could one's glance escape the impact of this ubiquitous, endlessly repeated decorative motive. The outer walls of the Temple were full of carved Cherubim, and so were the doors and the inner walls. On the right and left sides of the Temple stood five huge lavers, each supported on bases decorated lavishly with Cherubim. The Veil which one faced upon entering the Temple, displayed figures of Cherubim embroidered in white, blue, purple and crimson. And those to whom it was granted to glance behind the Veil into the Holy of Holies, saw there again two huge, sparkling, golden statues of Cherubim, fifteen feet tall and filling with their outstretched wings the entire thirty-feet width of the adytum.

4 | *The Cherubim as Yahweh's Mounts*

No less interesting than the question of the Cherubim's shape is that of their symbolic import, or, to be more precise, of the successive reinterpretations of their symbolism.

The earliest symbolic meaning attributed by the Hebrews to the Cherubim was that they represented, in a tangible, plastic form, the clouds of the stormy winter sky upon which God was supposed to ride across the face of the earth. That gods ride on clouds is an old mythologem, traces of which can be found among many peoples.[17] Among the Canaanites it is attested in the 14th century B.C.E. Ugaritic myths, in which "Rider of the Clouds" is one of Baal's epithets.[18] The same epithet, "Rider in the clouds," refers to Yahweh in one of the Psalms, while in another, Yahweh is addressed thus:

> Who makest the clouds Thy chariot
> Who walkest upon the wings of the wind,

> Who makest winds Thy messengers,
> The flaming fire Thy ministers.[19]

Isaiah, in an eschatological vision, sees Yahweh "riding on a swift cloud" on His way to Egypt.[20] The cloud as the mount of God is personified as a Cherub: "He rode upon a Cherub, and did fly; yea, He did swoop down upon the wings of the wind."[21] Yahweh's epithet, "Rider in the clouds," was paralleled by another which referred to him as "the Sitter on the Cherubim."[22]

In a magnificent prophetic epiphany Habakkuk sees Yahweh appearing in an earth-shaking storm, riding on his horses and chariots, treading the sea with his stallions, and making Cushan and Midian tremble.[23] Clouds—winds—Cherubim—horses and chariots, all these, then, appear as interchangeable concepts in the poetic and prophetic imagery of the Bible in speaking of the vehicle or mount on which Yahweh appears. Of them, only the clouds, *'arabhoth* in Hebrew, have the feminine form. Yahweh's horses have the masculine gender, although mares were known to the Bible as Egyptian chariot horses.[24] However, there seems to have existed an old tradition which held, possibly under the influence of the She-Cherubs, that God's mount, when in animal shape, was a mare. A late trace of this view is found in the midrash which tells of God riding a mare—and, in a more daring version, of taking himself the shape of a mare—and being pursued by the ruttish Egyptian stallions into the Sea of Reeds.[25]

A more personified concept of the Cherubim is expressed in the myth of Genesis, according to which God placed at the east of the Garden of Eden Cherubim with "the revolving sword of flame" to watch over the way leading to the Tree of Life.[26] Related to these angel-like Cherubim is the jewel-bedecked Cherub who was set by God into the Garden of Eden until he became overweening and rebelled.[27]

In connection with the desert Tabernacle there was an explicit mythical tradition according to which God descended onto and into it in a cloud. In fact, the desert Sanctuary was called Tabernacle (Hebrew, *mishkan;* literally, "dwelling place") because of the divine cloud that abode (*shakhan*) over it and in it. When Moses finished the construction of the Tabernacle,

> the cloud covered the Tent of Meeting and the glory of Yahweh filled the Tabernacle. And Moses was not able to enter into the Tent of Meeting because the cloud abode thereon, and the glory of Yahweh filled the Tabernacle. And whenever the cloud rose up from over the Tabernacle, the Children of Israel set out on their journeyings. But when the cloud did not rise up, then they journeyed not till the day that it did rise up. For the cloud of Yahweh

> was upon the Tabernacle by day, and there was fire therein by night, in the sight of all the house of Israel, throughout all their journeys.[28]

This passage must not be subjected to logical scrutiny (because the latter would, e.g., lead to the conclusion that Moses was able to enter the Tent only when Yahweh raised the cloud which, however, was the signal for breaking camp and setting out on the day's journey), but instead be treated as a myth. It says that God's presence in the Tabernacle was indicated by a cloud which both seemed to hover over the tent and to fill it, and which at night glowed like fire. This conception of the manifest presence of God on and in the Tabernacle closely parallels that of God's presence on Mount Sinai: there too, cloud covered the mount, and in that cloud was God: "He called unto Moses out of the midst of the cloud"; and at the same time, "the appearance of the glory of Yahweh was like devouring fire on the top of the mount in the eyes of the Children of Israel."[29] The cloud that filled the House was the palpable sign of God's presence in Solomon's Temple as well: after the priests deposited the Ark in the Sanctuary, under the wings of the Cherubim, "when the priests were come out of the holy place, the cloud filled the house of Yahweh, so that the priests could not stand to minister because of the cloud, for the glory of Yahweh filled the house of Yahweh."[30]

The connection between clouds and Cherubim as the vehicle of God is emphasized in the visions of Ezekiel. Once the prophet sees "the glory of the God of Israel rising above the Cherub"; another time he sees four Cherubim, each standing upon a wheel and, in turn, supporting the divine throne. As the glory of Yahweh "mounts up from the Cherub to the threshold of the Temple" the latter fills with a cloud, and "the sound of the wings of the Cherubim is heard even to the outer courts as the voice of God Almighty [*El Shaddai*] when He speaks." These Cherubim, moreover, had four faces each: a Cherub face, a human face, a lion's face, and an eagle's face. Their bodies, even their backs, hands and wings, were full of eyes. Each Cherub had four wings, and when they spread them to fly, the whole apparition, the Cherubim, the wheels, the throne and the glory of God, rose up from the earth as one unit.[31]

This then was the myth: in both the desert Tabernacle and the Temple of Solomon, Yahweh's presence was manifested by a cloud, personified in the Cherubim-figures, which made it impossible for Moses, and later the priests, to enter the holy place. That the Cherubim were the translation of this myth into ritual reality is shown by the statement in Exodus that Yahweh was believed to have spoken to Moses "from between the two Cherubim which were upon the Ark of Testimony."[32] As far as the Biblical

period is concerned, the Cherubim were thus unmistakable the symbolic representation of the clouds "out of the midst of which" God spoke and which served also as His mount or chariot.

5 | *Philo's Cherubim*

A different view of the Cherubim appears in the earliest post-Biblical Jewish source in which references to them are found. Philo, the early-1st-century C.E. Alexandrian Hellenistic Jewish philosopher,[33] gives no less than three interpretations of the Cherubim, ranging from cosmological to theosophic. Philo did visit Jerusalem, and may have seen the Cherubim in the Temple, although he does not mention that he saw them. In general, in describing the Temple he exhibits a remarkable reticence. As long as he speaks of the courtyards and the exterior of the Temple, his description is detailed and even verbose. But when he comes to talk of the Holy of Holies, he manages to say nothing definite about it without, however, stating that there was nothing in it:

> All inside is unseen, except by the High Priest alone, and indeed, he, though charged with the duty of entering once a year, gets no view of anything. For he takes with him a brazier full of lighted coals and incense, and the great quantity of vapor which this naturally gives forth covers everything around it, beclouds the sight and prevents it from being able to penetrate to any distance.[34]

Could Philo have had any reason to refrain from stating categorically that there was nothing in the Holy of Holies? Could it be that he, indeed, knew, either because he was told, or because he himself saw it, that the adytum contained the Cherubim? The manner in which Philo treats the Cherubim of the desert Tabernacle seems to indicate that the question must be answered in the affirmative. When describing that portable sanctuary whose existence, according to tradition, lay in a period preceding his own by more than a thousand years, Philo talks of the ten curtains which were in it, but does not mention that they were decorated by figures of Cherubim. And as to the Cherubim over the Ark, all he has to say is: "The mercy-seat serves to support the two winged creatures which in the Hebrew are called Cherubim, but as we should term then, recognition and full knowledge."[35] After which he launches into his symbolic explanations of the Cherubim of which more anon.

Philo's tendency to gloss over the tangible form of the Cherubim even in the archaic desert Tabernacle and to direct all attention to their symbolic significance is quite evident. That he was nevertheless greatly preoccupied

with the physical appearance of the Cherubim, as he himself may have seen them in Herod's Temple, is shown in his treatise *On the Cherubim*. In that book, soon after setting out to explain the significance of the Cherubim whom God placed "at the East of the garden of Eden," he inadvertently slips over into a discussion of the Cherubim figures of the Sanctuary. The passage in which this occurs contains Philo's three interpretations of the Cherubim:

> The Cherubim and the sword of flame which turns every way . . . are an allegorical figure of the revolution of the whole heaven. . . . One of the Cherubim then symbolizes the outermost sphere of the fixed stars . . . the other of the Cherubim is the inner contained sphere. . . .
>
> This is one interpretation. The second is:
>
> But perhaps, on another interpretation, the two Cherubim represent the two hemispheres [of heaven], for we read that the Cherubim stand face to face with the wings inclining to the mercy-seat; and so, too, the hemispheres are opposite to each other. . . .

The Cherubim which "incline their wings to the mercy-seat" are, of course, no longer the living Cherubim who with their flaming sword bar the way to the tree of life, but the sculptured ones which, according to Biblical tradition, were placed into the desert Tabernacle over the Ark.

In propounding his third interpretation, Philo ostensibly speaks again of the Cherubim of Paradise, but here, too, he cannot rid himself of the image of the two Cherubim with the Ark between them:

> But there is a higher thought than these. . . . While God is indeed one, His highest and chiefest powers are two, even goodness and sovereignty. Through His goodness He begot all that is, through His sovereignty He rules what He has begotten. And in the midst between the two is a third which united them, Reason, for it is through reason that God is both ruler and good. Of these two potencies, sovereignty and goodness, the Cherubim are symbols, as the fiery sword is the symbol of reason . . . these unmixed potencies are mingled and united . . . where God is good, yet the glory of His Sovereignty is seen amid the beneficence . . . where He is sovereign, through the sovereignty the beneficence still appears.[36]

In the Genesis narrative there is not the slightest hint as to the position occupied by the fiery sword in relation to the Cherubim. To say that "the flaming sword which turned every way" was "in the midst between the

two" Cherubim and "united them" is, to say the least, forced. It is quite clear that Philo here is thinking again of the Cherubim which stood in the Holy of Holies, with the Ark cover (or "mercy seat") between them and actually uniting them into one single piece of statuary, as explicitly stated in Exodus: "on one piece with the ark-cover shall ye make the Cherubim."[37] The uncertainty in Philo's mind concerning this "third which united" the Cherubim is also indicated by his inconsistency with regard to the symbol that stood for Reason. In the above passage he says that Reason was symbolized by the fiery sword; elsewhere, however, he states that God the father is Reason, while Knowledge is God the mother, and these two aspects of the godhead are symbolized by the two Cherubim.

Before turning to the passages in which Philo expresses these ideas, let us note that while in his interpretations of the Cherubim just quoted the idea of bisexual symbolism is hinted at or implied, he stops short especially of saying anything about a female aspect of God. God's goodness is the begetter, i.e., the male principle, this he states; but he does not make God's other aspect, His sovereignty, the female principle; instead, all he says is that "through His sovereignty He rules what He has begotten."

In speaking of the creation of the world, however, Philo does take this highly significant step when he says:

> . . . the Architect who made this universe was at the same time the father of what was thus born, whilst its mother was the Knowledge possessed by its Maker. With His Knowledge God had union, not as men have it, and begot created things. And Knowledge, having received the divine seed, when her travail was consummated, bore the only beloved son who is apprehended by the senses, the world which we see. Thus in the pages of one of the inspired company, wisdom is represented as speaking of herself after this manner: "God obtained me first of all his works and founded me before the ages."[38] True, for it was necessary that all that came to the birth of creation should be younger than the mother and nurse of the All . . . I suggest, then, that the father is reason, masculine, perfect, right reason, and the mother the lower learning of the schools, with its regular course or round of instruction. . . .[39]

The process of *creation* is represented in this passage in symbolic terms, but quite unequivocally, as *procreation:* God, the Father, who is Reason, had union with the Mother, who is God's Knowledge (also called by Philo Wisdom, Lower Learning and Education, and "the Nurse of All"); the Mother "received the divine seed," and, "when her travail was consummated, bore the only beloved son," the visible world. Elsewhere Philo calls God

"the husband of Wisdom," who drops the seed of happiness for the race of mortals into good and virgin soil."[40]

Philo employs a varied terminology in expressing the same idea in different contexts. In two other passages, speaking of the Cherubim of the Sanctuary, he says that they symbolized "the two most ancient and supreme powers (or 'virtues') of the divine God": his creative power, called "God" which is a "peaceable, gentle, and beneficent virtue," and his kingly power, called Lord, which is "a legislative, chastising and correcting virtue."[41]

It is clear that in all these explanations Philo had in mind one and the same dichotomy which can be subsumed as follows:

God (Elohim)	*Lord* (Yahweh)
Father	Mother
Husband	Wife
Begetter	Bearer
Creator	Nurturer
Reason	Wisdom (Knowledge, Learning, Education)
Goodness	Sovereignty (Kingly Power)
Peaceable	Legislative
Gentle	Chastising
Beneficent	Correcting
Symbolized by Cherub A	Symbolized by Cherub B

Each of these two series of divine attributes is symbolized, according to Philo, by one of the two Cherubim. Here, then, is the earliest indication of the idea that one of the Cherubim in the Temple represented a male, the other a female figure. This is consonant with the Talmudic tradition, to be discussed anon, according to which the Cherubim couple was shown in marital embrace in a sculpture which stood in the Holy of Holies of the Second Temple. This statuary, we read in Talmudic sources, was shown to the pilgrims who flocked to the Temple on the three pilgrimage-festivals. It is thus probable, or at least possible, that when Philo made his pilgrimage to the Temple, he saw the Cherubim "entwined" like man and wife, as the Talmudic phrase has it. Thus when Philo says that the two divine potencies of goodness (male) and sovereignty (female), represented by the two Cherubim, were "mingled and united," he may be influenced by the Cherubim as he had seen them in the Temple of Jerusalem.

We shall see below that the two divine "virtues" or "powers," formulated by Philo, became subsequently a part of Talmudic theology and were

systematically developed in the theosophy of the Kabbala. What is surprising, at first glance, in Philo's dichotomy of the deity is that he attributes the "legislative, chastising and correcting" activities, as well as the kingly power, to the female, maternal aspect of deity, and the "peaceable, gentle, and beneficent" virtues, as well as goodness, to God's male, paternal aspect. However, there is a logical consistency in thus assigning these two sets of attributes. The mother is the bearer, nurturer, educator, that is, the establisher and maintainer of order; she, therefore, must be the one who wields the legislative, chastising, and correcting powers which are the attributes of sovereignty. The father, who is, of course, the begetter and creator, is, by contrast to the mother, representative of gentleness, beneficence, goodness. In thus assigning "soft" qualities to the father, Philo may also have had in mind Biblical passages such as "Like as a father has compassion upon his children, so has Yahweh compassion upon them that fear him,"[42] and many others which speak of God's compassion; while in characterizing the mother as the maintainer of order, he may have relied on verses which talk of her as the parent who has to be obeyed, or as a fierce lioness.[43] However this may be, there can be no doubt that it is in this Philonic doctrine that we have to look for the earliest roots of medieval Kabbalistic symbolism in which, as Scholem has pointed out, "women represent not, as one might be tempted to expect, the quality of tenderness, but that of stern judgement," a concept which "was unknown to the old mystics of the Merkabah period, and even to the Hasidim in Germany, but . . . dominates Kabbalistic literature from the very beginning and undoubtedly represents a constituent element of Kabbalistic theology."[44] In the Kabbala, as in Philo, "Kingdom" is the female aspect of the deity (in the Kabbala "Kindgom" is the tenth Sefira and identical with the Shekhina, the personified, female "Presence" of God), is associated with the stern, uncompromising, divine principle of justice, while the male aspect is manifested in the qualities of compassion and mercy.

6 | *Josephus on the Cherubim*

Should we hope to obtain additional information about the Cherubim from the writings of Flavius Josephus (ca. 37–100 C.E.), the only eyewitness who left us a detailed description of the Jerusalem Temple as it appeared in the last years prior to its destruction by Titus (70 C.E.), we shall be sorely disappointed. Josephus, like Philo half a century before him, shows extreme reticence even when describing the earlier Cherubim, those that formed part of the desert Tabernacle and the Temple of Solomon. About the former he says:

> Upon its [the Ark's] cover were two images which the Hebrews called Cherubim; they are flying creatures, but their form is not like that of any of the creatures which men have seen, though Moses said he had seen such beings near the throne of God.[45]

There seems to be an intention here to deny all similarity between the Cherubim and any living creature, and to assert that they were supposed to represent *divine* beings, stationed near the throne of God. Incidentally, instead of "Moses" one should read "Ezekiel"; it is in the latter's prophecies, and not in the Pentateuch, that the Cherubim surrounding the throne of God are described.[46]

Even more remarkable is the omission by Josephus of any reference to the Cherubim which adorned the curtains and the Veil in the desert Tabernacle. He describes the curtain as "composed of purple and scarlet and blue and fine linen, and embroidered with diverse kinds of figures, excepting the figures of animals," and the Veil which separated the Holy from the Holy of Holies as "very ornamental, and embroidered with all sorts of flowers which the earth produces; and they were interwoven into all sorts of variety that might be an ornament, excepting the form of animals."[47] His account, as we see, follows closely the one contained in Exodus, except that where Exodus mentions the Cherubim, Josephus substitutes the words "excepting the figures of animals."

In describing Solomon's Temple, Josephus proceeds in a similar manner: he says nothing about the Cherubim on the Veil, on the walls of the Temple, or in any other place, and purposely emphasizes that there is general ignorance as to the shape of the Cherubim over the Ark. The passage in question reads:

> He [Solomon] also had veils of blues and purple and scarlet and the brightest and softest of linen, with the most curious flowers wrought upon them, which were to be drawn before those doors [leading from the Holy into the Holy of Holies]. He also dedicated for the most secret place, whose breadth was 20 cubits and the length the same, two Cherubim of solid gold; the height of each of them was five cubits; they had each of them two wings stretched out as far as five cubits; wherefore Solomon set them up not far from each other, that with one wing they might touch the southern wall of the secret place, and with another the northern; their other wings, which joined to each other, were a covering to the Ark which was set between them: but nobody can tell or even conjecture what was the shape of these Cherubim.[48]

Let us interject one single comment here. All the measurements con-

tained in this passage are identical with those in Kings, except that of the Cherubim's height which is given as ten cubits (15 feet) in Kings and as five (7½ feet) by Josephus. It seems that by reducing the height of the Cherubim to one-half of the Biblical figure, Josephus hoped to reduce their importance as well.

Preceding the above-quoted sentences, Josephus describes the walls of the Temple which, as we shall recall, were decorated by alternating figures of Cherubim and palm trees as well as by flowers. All that Josephus has to say, however, is that Solomon, "as he enclosed the walls with boards of cedar so he fixed upon them plates of gold, which has sculptures upon them. . . ."[49] Again, not a word as to what these sculptures represented.[50]

When reading these descriptions of Josephus in which he flatly contradicts Biblical texts, one begins to suspect that he must have had a definite purpose in mind in omitting to mention the Cherubim so ubiquitous in the Solomonic Temple. It is not difficult to surmise his reasons for so doing. By underplaying the Cherubim in both the desert Tabernacle and the Solomonic Temple, he leads up to the total omission of any reference to them in his description of the Temple of Herod with which, as a priest, he had a thorough, firsthand familiarity. As we shall see below, there can be little doubt that there were Cherubim in the Holy of Holies of the Second Temple; they even played an important role in the ritual of the pilgrimage festivals. If Josephus passes over them in silence, his reason, as that of Philo before him, must have been that as an interpreter of Judaism to the Hellenistic world in general and to Rome in particular he was loath to admit that aniconic Judaism did, in fact, tolerate the representation of human or semi-human and semi-divine figures within the sacred precincts of the Temple. Writing as he did after the destruction of the Temple, he wished to portray it as a place of pure spiritual worship, unmarred by any figure of living creatures, whether human, animal or divine. To be able to do so, he had to obliterate the memory of the Cherubim, and he tried to do this by the simple expedient of silence.

It is, however, not easy to deny something one knows, and especially when that knowledge is of considerable weight. Josephus *knew* that the Holy of Holies contained the statues of the Cherubim pair, but he wanted to assert that there was nothing at all in that most holy place of the Temple. The result was that he got involved in a peculiar series of self-contradictions which bear looking into. In one passage he writes:

> The innermost part of the temple of all was of 20 cubits. This was also separated from the outer part by a Veil. *In this there was nothing at all.* It was inaccessible and inviolable and not to be seen by any; and was called the Holy of Holies.[51]

Contrast with this what Josephus says in another passage:

> . . . although Theos [Epiphanes], and Pompey the Great, and Licinius Crassus, and last of all Titus Caesar, have conquered us in war, and gotten possession of our Temple, yet has none of them found any such thing [i.e., an ass's head made of gold] there, nor indeed anything but what was agreeable to the strictest piety; *although what they found we are not at liberty to reveal to other nations. . . .*
>
> But for Antiochus [Epiphanes], he had no just cause for that ravage in our temple that he made . . . *nor did he find anything there that was ridiculous. . . .*

This is again contradicted in the very next section where Josephus says:

> . . . nor is there anything [in the Temple], but the altar [of incense], the table [of showbread], the censer, and the candlestick, which are all written in the law: *for there is nothing further there,* nor are there any mysteries performed that may not be spoken of; nor is there any feasting within the place.[52]

This curious vacillation between the categorical assertion that there was nothing at all in the Holy of Holies, and the admission that something indeed was there but that it was not anything ridiculous, and that "we," i.e., the Jews or the priests, were not at liberty to reveal to other nations what it was, seems to stem from two mutually contradictory impulses. On the one hand, Josephus felt constrained to deny the existence of any image or object in the Holy of Holies in accordance with his tendency to represent Judaism as a purely aniconic religion in both doctrine and ritual. On the other, he felt impelled to impress upon his readers, and especially so in his polemical treatise *Against Apion,* his own thorough familiarity with even the most secret aspects of Jewish religion: hence the sentence on the imperative of secrecy which slipped into his argument.

What was there in the Holy of Holies of which Josephus knew but of which he did not want to speak, we could surmise, even without the evidence of the Talmudic sources, on the basis of his omission of any reference to the Cherubim reliefs on the walls of the Temple: it could have been nothing else but the figures of the two Cherubim. These figures, as we know from the earlier evidence of Philo as well as the later one of the Talmud, had assumed, by the beginning of the 1st century C.E., the character

of sacred mystical symbols. Yet Jewish apologists familiar with Hellenistic culture and religion, as both Philo and Josephus were, feared that the idolatrous Hellenistic world, if it knew about the Cherubim, could not but regard them as analogous in purport and intent to its own images of gods and goddesses housed in Greco-Roman temples all over the Mediterranean area. To explain that the Cherubim were sacred symbols and not idols, that they tangibly expressed certain attributes of God, without in any manner representing or depicting God himself, would have been a well-nigh impossible task. The impression, therefore, both Philo and Josephus wished to create among their Hellenistic readers was that although in an archaic period of Jewish history, it is true, the Sanctuary contained symbolic figures called Cherubim, of unknown shape and appearance, all that was a thing of the distant past, while in the present Temple (or, from the point of view of Josephus, in the recently destroyed Temple) there was no image at all. In the first part of this statement Philo and Josephus are unanimous. In the second, Philo, who wrote while the Temple still stood, avoids the possibility of being caught in a lie by the simple expedient of saying that only the High Priest was allowed to enter the Holy of Holies once a year, and even then he could see nothing because of the incense smoke. Josephus, writing after the destruction of the Temple, is bolder: he asserts that there was nothing in the Holy of Holies of the Herodian Temple; then he invalidates this denial by asserting that there was nothing shameful in it and that he was not at liberty to divulge what the most holy chamber actually contained.

7 | *The Cherubim in Embrace*

An echo of Philo's Cherubim symbolism is found in a midrashic passage attributed to Rabbi Pinhas ben Yair, a 2nd century C.E. Palestinian teacher who seems to have been an Essene and certainly was a man of extreme piety. The passage, which is quite lengthy and contains a symbolic interpretation of each and every part of the Tabernacle, begins as follows:

> The Tabernacle was made so as to correspond to the creation of the world. The two Cherubs over the Ark of the Covenant were made so as to correspond to the two Holy Names. . . .[53]

The "Two Holy Names" are, of course, those of God: Yahweh ("Lord") and Elohim ("God"), which is precisely the idea expressed by Philo as we have seen above.

The midrashic source containing the above passage subsequently discourses about the symbolism of the Tabernacle's successor, the Solomonic Temple, and, in returning to the Cherubim, becomes guilty of a curious

confusion between the Cherubim statuary that stood in the Temple's Holy of Holies and the cosmic or elemental Cherubim which, as we have seen, were the personification of the world-embracing winds: "The wings of the Cherubim [in Solomon's Temple] reached from one end of the world to the other. . . ."

This is followed by a remarkable statement which indicates that, at least according to one school of thought, the Cherubim were the most important feature in the entire Temple:

> It was due to them [i.e., the Cherubim], and due to their maker [or: makers] that the Temple stood. They were the head of everything that was in the Temple, for the Shekhina rested on them and on the Ark, and from there He spoke to Moses.[54]

From a Talmudic tradition[55] we learn that the Cherubim, although they were golden statues, were held to have possessed a certain amount of life and mobility: As long as Israel fulfilled the will of God, the faces of the Cherubim were turned toward each other: however, when Israel sinned, they turned their faces away from each other.[56]

As late as the 3rd and 4th centuries C.E., the memory of the original function and the significance of the Cherubim in the Sanctuary survived among the Babylonian Talmudic masters. According to one of them, a certain Rabh Qetina, who flourished in the late 3rd and early 4th century,

> When Israel used to make the pilgrimage, they [i.e., the priests] would roll up for them the *Parokhet* [the Veil separating the Holy from the Holy of Holies], and show them the Cherubim which were intertwined with one another, and say to them: "Behold! your love before God is like the love of male and female!"[57]

Rashi, the 11th-century commentator, explains the passage: "The Cherubim were joined together, and were clinging to, and embracing, each other, like a male who embraces the female."

Whether the above tradition referred to the First or the Second Temple, was no longer clear to the Babylonian teachers. Some held that it must have referred to the First Temple, because in the Second there were no Cherubim; others, like Rabh Aḥa, son of Jacob (a contemporary of Ḥana bar Qetina), argued that it referred to the Second Temple and that the Cherubim discussed in it were those painted or engraved on the wall.

Yet another detail concerning the Cherubim is given by Rabbi Shimeon ben Laqish (ca. 200–275 C.E.), an outstanding Palestinian teacher:

> When strangers entered the Sanctuary, they saw the Cherubim

> intertwined with each other; they took them out into the market-place and said: "Israel, whose blessing is [reputedly] a blessing and whose curse is a curse, should occupy themselves with such things!" And they despised them, as it is written, "All that honored her, despise her, because they have seen her [shameful] nakedness."[58]

The same tradition is contained in several Midrashim with a few added details:

> When the sins caused that the gentiles should enter Jerusalem, Ammonites and Moabites came together with them, and they entered the House of the Holy of Holies, and found there the two Cherubim, and they took them and put them in a cage and went around with them in all the streets of Jerusalem and said "You used to say that this nation was not serving idols. Now you see what we found and what they were worshiping!"[59]

As to the time when the Cherubim were shown to the people filling the courts of the Jerusalem Temple, the only statement we have is that of Rabh Qetina: the showing, and the accompanying explanation, were made "when Israel made the pilgrimage" to the Temple. According to Biblical command, every male Israelite was duty-bound to make the pilgrimage to the Temple three times a year: on Passover in the spring; on the Feast of Weeks, seven weeks later; and on the Feast of Booths (Sukkoth) which fell in autumn, two weeks after New Year.[60] Of the three, the greatest and most enthusiastically celebrated was the last one, on which, more than on any other Hebrew holiday, the populace was commanded to rejoice.[61] From descriptions contained in the Mishna and in Talmudic sources we know not only the ritual details of this joyous feast,[62] but also the fact that both men and women participated in it, and that on the seventh day of the festival the two sexes used to mingle and commit what is euphemistically referred to as "lightheadedness." We can only surmise that the showing of the Cherubim representing a male and a female figure in marital embrace, may have preceded, and, indeed, incited the crowds to, the commission of this "lightheadedness," which could have been nothing but an orgiastic outburst of sexual license.

Such ritual license was in accordance with both old Hebrew practice and the religious customs of other ancient Near Eastern peoples. As to its Hebrew antecedents, we happen to know from the incident of the Golden Calf that sexual rioting was the traditional response to the exhibition of statuary symbolizing or representing the deity. When Aaron made the Golden Calf (as a representation of Yahweh) and showed it to the people, they "offered burnt-offerings and brought peace-offerings and . . . sat down to

eat and to drink," and then engaged in sexual intercourse.[63]

Ritual license as a regularly (in many places annually) recurring feature of temple worship is well attested from all over the ancient Near East. It was, one might say, standard practice of the cultic veneration of the divine powers of life and fertility. As Nelson Glueck recently observed: "The excitement of pagan worship and participation in feasts of sacrificial offerings apparently often led male and female worshipers to join together in feverish consummation of fertility rites."[64]

The mythical counterpart of this orgiastic ritual was, in ancient Israel as well as among the other ancient Near Eastern peoples, the great cosmogonical and cosmological myth cycle, according to which the annual period of vegetative fertility was preceded by a union of the male and female elements of nature. To ensure that this great cosmological copulation take place in the proper measure and with the requisite intensity, man himself, it was felt, had to perform the sacred sex act, thereby both indicating to the elements of nature what was expected of them and inducing them to do the same through the compulsive force of a religio-magical act.[65]

However, what was considered in earlier days as a proper manifestation of popular enthusiasm at the sight of divine statuary, became intolerable in the eyes of the sages, probably in the last century of the existence of the Second Temple of Jerusalem. They felt they had to put an end to the festive "lightheadedness," and where originally the women used to gather in the Great Courtyard of the Temple, the so-called Women's Court, while the men stood without, they ordered that the two sexes should change places, in the hope that this would prevent the repetition of the mass orgy. However, next year, they had to witness the futility of their measure, proving to them once again that in the hour of joy the "evil inclination," that is, the sexual drive, is apt to overpower both men and women. Thereupon they had special galleries built on three sides of the courtyard, leaving open only the side which faced the Sanctuary, and confined the women to them.[66]

When this important reform took place, we do not know. But we can understand, to some extent, the stubborn popular resistance to it if we assume that the exhibition of the Cherubim in embrace was continued at the three annual feasts of pilgrimage, while at the same time the populace was prevented by the reform from indulging in its old traditional practice of *imitatio dei* called for by the momentary glimpse of divine mystery.

8 | *The Provenance of the Cherubim-in-Embrace*

When these Cherubim-in-embrace replaced the earlier two Cherubim figures which were equal in shape and touched each other only with

the tips of their inner wings, is an intriguing question. The incident remembered by Shimeon ben Laqish, when the foreigners broke into the Temple and exposed the holy figures to the sacrilegious glances of the mob, can serve as *terminus ad quem*. Can the date of this incident be fixed with any degree of certainty or at least likelihood?

In the year 170 B.C.E., Antiochus Epiphanes, the Seleucid King of Syria (175–164 B.C.E.), on his return from an Egyptian campaign, took Jerusalem, massacred its inhabitants, and looted the Temple. He removed all the Temple treasures, including the three large sacred gold objects, the incense altar, the seven-armed candelabrum, and the table of showbread, and, as Josephus indignantly remarks, "he did not abstain even from the Veils, which were made of fine linen and scarlet, but took everything along with him to Antiochia."[67] Two years later, Antiochus sent his henchmen to Jerusalem to Hellenize the city; those of the Jewish population who were recalcitrant were exterminated: the men murdered, the women and children sold into slavery. Whoever could, fled from the city, and in their places foreigners were settled.[68] This was a sequence of events into which an incident such as that of the Cherubim would have fitted well. In contrast to Nebuchadnezzar, who was not interested in combating the religious beliefs and practices of the Judaeans, Antiochus Epiphanes was passionately intent on eradicating Judaism. He may have seized upon the opportunity of publicly humiliating the Jews by parading the Cherubim in the streets.

Another consideration which points to the same conclusion is that it is much more likely that the sages of the Talmud, in whose names the Cherubim incident is recorded, would retain an oral tradition concerning an event that had occurred four centuries earlier, in the days of Antiochus Epiphanes, rather than one that had taken place almost nine centuries before their time. Legends concerning the cruelties of Antiochus and his henchmen, which provoked the Maccabees to their revolt, circulated in Rabbinic circles throughout the Talmudic period and even following it.[69]

If the Cherubim incident took place in 170 B.C.E., their male and female figures in embrace must have been introduced into the Holy of Holies sometime prior to that date, that is, between 170 B.C.E. and 515 B.C.E., when the Second Temple was rebuilt. It is, however, unlikely that this was done at the time of the rebuilding of the Second Temple. We know that the Cherubim in the Solomonic Temple had a completely different appearance: they were two identical human figures, flanking the Ark on both sides and touching each other only with their wings, which met over the Ark. It is not known whether, when Ezra rebuilt the Temple, he had new Cherubim placed into the Holy of Holies; but if he had, it is most probable that his new statuary was a copy of the old one, since his purpose was to *restore* the Temple in the shape it had when it was destroyed a few decades earlier. A

change in the shape of the Cherubim could have been made only at a time when there was a tendency to improve upon existing forms, to embellish the building, to refurbish the sacred vessels, to increase the splendor of the appurtenances. By a mere chance, we happen to know of such a period.

Among the scanty documents relating to the second Jewish commonwealth, there is a little book about whose historicity there has been much scholarly controversy. It is the so-called *Letter of Aristeas*, which was written in Greek, in Alexandria, in all probability shortly after 132 B.C.E.[70] This treatise has the pseudepigraphic form of a letter written by Aristeas, a gentile, to his brother Philocrates during the reign of Ptolemy II Philadelphus (285–247 B.C.E.), and it discusses three major subjects: the golden vessels Ptolemy had made for the Jerusalem Temple; the translation of the Pentateuch prepared at his insistence; and a series of questions concerning kingship he put to the Jewish sages, together with the latter's philosophical-moralistic answers. The overriding aim of the treatise was to demonstrate the excellence of Jewish religion and the folly of idolatry.[71]

In spite of the late date of its composition—at least 120 years after the events described in it—and its ample legendary embellishments, *Aristeas* seems to contain a solid kernel of historical truth. As to the translation of the Pentateuch into Greek, for instance, scholarly opinion is that, whether the story told in *Aristeas* of the 72 elders sent by the Jerusalem High Priest Eleazar to Alexandria to do the translation is true or not, it seems to be a historical fact that the Pentateuch was translated in the time of Ptolemy II, for it fitted in with his general policy of Hellenization.[72] It seems to me that precisely the same argument supports also the historicity of the presents of exquisite Alexandrian workmanship which, according to *Aristeas*, were sent by Ptolemy II to the Jerusalem Temple. It is in this event that we can find a clue as to the installation of the Cherubim-in-embrace into the Holy of Holies.

The presents were ritual objects, mostly made of gold, to whose description *Aristeas*, and, following him, Josephus[73] devote an inordinate amount of space. They consisted of a table of pure gold (of which, more anon); two large golden bowls set with stones, of a capacity of 20 gallons each; several highly polished silver bowls; golden flagons with inlaid stones; etc.[74] The longest description, quite out of proportion with the rest of the treatise, is accorded to the table which was sent to Jerusalem to replace the old table of the showbread, one of the most sacred objects in the Temple.[75] The instructions the king gave to the goldsmiths in making this table are described in detail in *Aristeas*: "Where there was no prescription in Scripture, he ordered the construction to follow principles of beauty; where there were written prescriptions, their measurements were to be adhered to."[76]

The table and all the other vessels were duly delivered to the hands of the High Priest Eleazar who "devoted them to God,"[77] in other words, put them to use in the Temple. Thus far the semi-legendary account of Ptolemy II Philadelphus' bountiful gifts to the Temple. Does the historical background of the period render it likely that such an event actually took place?

The religious atmosphere in Palestine in the first few decades following the penetration of Hellenism was a relatively liberal one. Many Jewish leaders felt no qualms about paying lipservice to Greek polytheism, as attested, for instance, by the use of the phrase "many thanks to the gods," in a letter written to Apollonius, the head of the finances in the Ptolemaean empire, by the Jewish merchant-prince Tobias in the middle of the 3rd century B.C.E.[78] In these circumstances there was no objection raised on the part of the Temple authorities to the introduction of ritual vessels and other objects donated by foreigners.[79] Even as late as the early 1st century C.E., King Monobaz and Queen Helena of Adiabene (a kingdom on the left bank of the Upper Tigris) had the handles of all the Temple vessels used on the Day of Atonement overlaid with gold, and donated a golden lamp which was placed over the door of the Holy House; Nikanor presented the Temple with bronze door panels; Alexander Lysimachus had all the door-panels covered with gold.[80] Especially close was the relationship between the Temple and the Jewish craft-guilds in Alexandria, headed by those of the gold and silversmiths who are several times mentioned in Tannaitic sources as having carried out repairs on Temple equipment. Thus when the old cymbals and copper mortar, which, according to tradition, dated "from the days of Moses," became damaged, they were repaired by Alexandrian craftsmen; when the family of Garmu refused to divulge the trade-secrets of the preparation of the showbread, and again, when the members of the Eutimos family did the same with regard to the preparation of the incense, the sages tried to break the monopolies of these artisan families by sending for Alexandrian Jewish experts. While all this took place about the middle of the 1st century C.E.,[81] the practice of importing Alexandrian artifacts to Jerusalem must have begun with the spread of Hellenism to Palestine and Egypt.

The first half of the 3rd century B.C.E., described in *Aristeas* as a period of what today would be called "interfaith cooperation" between Jerusalem and Alexandria, seems to be the most likely time for the introduction of a new Cherubim statuary into the Temple. At a time when the High Priest replaced the old table of the showbread with a new one, of identical size but executed in a completely different style with the utilization of the latest achievements of the Alexandrian goldsmiths' art, he may have accepted from the same source a new Cherubim group, also conforming in size to the

traditional one, but representing the current artistic and symbolic understanding of the ancient figures described in Exodus and Kings.

We cannot know the details of the work or the process of its execution. Was it Ptolemy who entrusted the Alexandrian Jewish goldsmiths with the task, so sensitive from both the artistic and the religious point of view? Did it precede or follow the translation of the Pentateuch into Greek, which made the description of the Cherubim in the desert Tabernacle available to the Hellenized Jewish artisans ignorant of Hebrew? Were they, in giving their Cherubim the shape of a male and a female figure in marital embrace, influenced by Egyptian or Hellenistic mysteries in which they may have participated at that early date as did their descendants several generations later, arousing the ire of Philo?[82] Or did they rather emulate early prototypes of that type of Indian temple sculpture which we know from such late examples as the Konarak façade, showing divine pairs in various positions of ecstatic embrace, and which may have been known to them following the onset of cultural contact between Hellenistic India and Egypt?[83] Did the Cherubim-in-embrace, once installed in the Holy of Holies of the Jerusalem Temple inspire the idea of the male and female aspects of the one God first expressed by Philo? Or did the idea precede the representation, and the golden statue of the Cherubim merely express in tangible form notions that had jelled either in Jerusalem or in Alexandria? There are no answers to these questions, nor will there be unless completely new and unexpected evidence comes to the surface. The argument of this section must, therefore, remain conjectural, based on circumstancial evidence and a few, more or less equivocal, passages.

One counter-argument may be disposed of before closing this section. If, it may be asked, a Cherubim statuary was installed in the Temple at or about the time when the new table and other vessels were, why is there no mention made of this in *Aristeas*? The answer, I believe, lies in the same considerations which explained above the reticence of Philo and Josephus when speaking of the decorations of the Tabernacle and the First Temple. Like Philo and Josephus, so their predecessor who wrote *Aristeas*, endeavored to represent Judaism as a pure, aniconic faith. No mention could, therefore, be made in his treatise of the Cherubim who, in the eyes of the pagans, would have appeared as idolatrous symbols. In fact, *Aristeas* goes even further in this respect than either Philo or Josephus: in his description of the Temple, which he maintains to have seen on a visit to Jerusalem, the only object inside the Temple he mentions is the curtain.[84]

One last question remains to be answered before we can go on to the Kabbalistic reflection of the Cherubim-in-embrace. This is whether, follow-

ing the removal and public exhibition of the Cherubim by Antiochus Epiphanes, a new statuary of the Cherubim was set up in the Temple to replace the old one. Such a step could have been taken by the Maccabees when they cleansed and rededicated the Temple in 165 B.C.E. No mention of the Cherubim is found in the Book of Maccabees, but then that book tells only in most general terms of the restoration of the Temple, so that one could not expect to find in it a reference to the Cherubim in particular. However, on the general principle that *restoration* meant the re-establishment of the status quo, one is inclined to assume that every sacred vessel and object contained in the Temple when it was desecrated by the Syrians was restored in it five years later by the Maccabees. The words of Philo and Josephus quoted above also point in this direction. Nor does the recollection of Rabh Qetina about the showing of the Cherubim to the Temple pilgrims read as if it would refer to a period which came to an end more than four centuries prior to his time, but rather sounds like a tradition handed down from eyewitnesses a few generations previously.

However that may be, the Cherubim-in-embrace were regarded as a fitting symbolic expression of the relationship between God and Israel. Rabh Qetina was, of course, far from being the first to speak of this relationship as one like that between man and wife. God as the husband and Israel as His wife had become a prophetic commonplace, from Hosea to Ezekiel, that is for the last two centuries of the First Temple period. It was this relationship that the Cherubim visually depicted, according to the Talmudic sages quoted above.

While the female Cherub thus symbolized Israel, she also became closely attached to God, due to her position in the Temple. Once the idea of a female Cherub emerged, it was further developed in Rabbinic literature. A midrash, e.g., says that the Cherubim whom God placed to the east of Eden to watch over the way to the tree of life constantly changed their shapes: at times they were men, at other women, then again spirits, or angels.[85] The angels likewise change their sex according to the will of God: at times He makes them appear in the shape of women, and at others in that of men, while occasionally He makes them assume the appearance of wind or fire.[86]

9 | *The Cherubim in the Middle Ages*

For many centuries after the destruction of the Jerusalem Temple by Titus (in 70 C.E.), and the consequent disappearance of the Cherubim statuary, the problem of the symbolic significance of those winged male

and female figures continued to preoccupy some of the most outstanding teachers and thinkers to Judaism. Those among them who were rationalistically inclined, tended to disregard the Talmudic tradition according to which the Cherubim were represented in marital embrace, and concentrated on attributing new symbolic meanings to them. The mystics, on the other hand, seized precisely upon this aspect of the Cherubim and utilized it for the reinforcement of their basic doctrine about the sanctity and cosmic necessity of cohabitation between man and wife.

Maimonides, the greatest of medieval Jewish philosophers (born in 1135 in Cordoba, Spain; died in 1204 in Cairo, Egypt), can be quoted as an example of the former group. In describing the furnishings and sacred vessels of the Sanctuary, he has the following to say about the Cherubim:

> God, may He be exalted, has commanded that the image of two angels [i.e., the Cherubim] be made over the ark, so that the belief of the multitude in the existence of angels be consolidated, this correct opinion, coming in the second place after the belief in the existence of the deity, constituting the originative principle of belief in prophecy and the Law and refuting idolatry, as we have explained. If there had been one image, I mean the image of one Cherub, this might have been misleading. For it might have been thought that this was the image of the deity who was to be worshipped—such things being done by the idolaters—or that there was only one individual angel, a belief that would have led to a certain dualism [i.e., belief in one God and one angel]. As, however, two cherubim were made and the explicit statement enounced: "The Lord is our God, the Lord is one,"[87] the validity of the opinion affirming the existence of angels was established and also the fact that they are many. Thus measures were taken against the error that they are the deity—the deity being one and having created this multiplicity.[88]

Maimonides' view is reechoed in the *Midrash Ha-Gadol*, a midrashic compilation only slightly later than the renowned *Guide of the Perplexed*, and which was made in Yemen. In it we find also a unique description of the Cherubim:

> "And thou shalt make two Cherubim,"[89] These Cherubim, what was their purpose? To make known that there are Cherubim on high. . . . If so, would one not have sufficed? No, lest people err and say, "It is God [Eloah]." What was their appearance? Their faces, backs, hands and breasts looked like those of human beings, and they had wings like the wings of the fowl, like the Cherubim of the *Merkaba* [the divine chariot] on high. . . .[90]

As to the Kabbala, it found in the Cherubim-in-embrace a most welcome basis for two of its central doctrines: one, that only the togetherness of male and female is a state of blessedness; and two, that when a man sins he thereby causes the separation between the male and female aspects of a deity (of which more in the next two chapters), which, in turn, leads to a transcendental and universal disaster. In the Zohar, the *magnum opus* of 13th-century Spanish Kabbala, these two ideas are expressed as follows:

> Three time a day a miracle took place with the wings of the Cherubim. When the holiness of the king [i.e., God] revealed itself over them, the Cherubim, of themselves, stretched out their wings and covered their bodies with them. . . . A cloud descended, and when it settled upon the Lid, the wings of the Cherubim intertwined and they beat them and sang a song. . . . And the Priest in the Temple heard their voices as he was putting the incense in its place. . . . The two Cherubim, one male and one female, both sang. . . . "And he heard the Voice speaking unto him . . . from between the two Cherubim, and He spoke unto him." Rabbi Yitzhak said: From this we learn that God is "just and right,"[91] that is, male and female, and likewise the Cherubim were male and female.[92]

We shall easily recognize in this passage a late variant of the theme we first found adumbrated by Philo twelve hundred years earlier: the male and female Cherubim representing the male and female element in God. The Talmudic view quoted above to the effect that the position of the heads of the Cherubim changed, reflecting the moral behavior of Israel, is also elaborated in the Zohar:

> Rabbi Yose said: Woe to the world when one Cherub turns his face away from the other, for the verse "with their faces one to another"[93] [refers only to times] when there is peace in the world. Rabbi Yitzhak said: This is meant by "The nakedness of thy father and the nakedness of thy mother shalt thou not uncover"[94]—woe to him who uncovers their nakedness.[95]

What this Zoharic passage means is that woe to him who creates strife in the world, because thereby he causes the two Cherubim to turn their faces away from each other, which in turn is but the visible manifestation of the separation of the divine Father (the King) and the divine Mother (the Matronit). Such a sundering of the Father and the Mother is spoken of repeatedly in the Zohar as an uncovering of their nakedness, because the

disruption of their union denudes them of each other, weakens them and dishonors them.

A little younger than the Zohar is the Kabbalistic Bible commentary of Baḥya ben Asher, the distinguished Spanish exegete who lived in Saragossa and died in 1340. Baḥya refers repeatedly to the Cherubim in the Temple, whom he considers as having been male and female, in embrace, and representing symbolically a number of important things.

The two Cherubim corresponded to the brain and the heart in man, Baḥya says, or the human soul and the human reason.

> Of the two Cherubim, one was male and the other female, because the human soul and reason are like male and female, one acts, is active, and the other receives, is passive.
>
> The two Cherubim were different in their substance, one being male and the other female . . . in order to make manifest how greatly Israel was loved by God, like the love of male and female. . . . The Cherubim in this form were a powerful symbol testifying to the uttermost attachment between God and Israel with nothing intervening between them. . . .[96]

10 | *Conclusion*

In conclusion, let us return for a moment to the earliest period of Hebrew history from which unequivocal data are so scant that they invite conjectures and hypotheses. Hugo Gressmann, in a study about the Ark, expressed the view that originally there must have been two images in it, that of Yahweh and that of his wife Anathyahu, or Astarte.[97] Twenty years later, more cautiously yet along the same lines, Julian Morgenstern conjectured that the two sacred stones in the Ark originally "represented Yahweh and, in all likelihood, His female companion."[98] The findings of the present study tend to agree with these conjectures. In the beginning, the story can be recapitulated, two images, or slabs of stone, were contained in the Ark, representing Yahweh and his consort. At a later stage, when this anthropomorphic view of the deity was overcome, Yahweh was conceived of as the male, patriarchal, and only God, whom it was forbidden to represent in visual form. His erstwhile female companion now was reduced to the position of a female guardian, represented by one of the two Cherubim, who covered the Ark with their wings, which at the same time also served as the seat of Yahweh. Following the destruction of the First Temple, the idea slowly gained ground that the one and only God comprised two aspects, a male and a female one, and that the Cherubim in the Holy of Holies of

the Second Temple were the symbolic representation of these two divine virtues or powers. This was followed by a new development, in Talmudic times, when the male Cherub was considered as a symbol of God, while the female Cherub, held in embrace by him stood for the personified Community of Israel. When, finally, the Kabbala developed its mystical theory of the Sefirot, and especially of the two most important divine entities of the King and the Matronit, and endowed each of them with a mythical, independent existence, it considered the Cherubim pair as the fitting visual representation of these two divine concepts.

IV

The Shekhina

Shekhina is the frequently used Talmudic term denoting the visible and audible manifestation of God's presence on earth. In its ultimate development as it appears in the late Midrash literature, the Shekhina concept stood for an independent, feminine divine entity prompted by her compassionate nature to argue with God in defense of man. She is thus, if not by character, then by function and position, a direct heir to such ancient Hebrew goddesses of Canaanite origin as Asherah and Anath. How did the Shekhina originate and develop, and what did she mean for Talmudic Judaism? These are the questions that we shall attempt to answer in this chapter.

1 | *The "Dwelling" of God*

In Biblical times, when God was imagined to dwell in or ride upon clouds, as Baal had done in the older Canaanite mythology,[1] the mythological validation of the sanctity of the desert Tabernacle and the Solomonic Temple was the myth of Yahweh descending in a cloud into the sanctuary.[2] The presence of God in this "cloud of Yahweh"[3] was regarded as something more tangible than its visual aspect: because of the cloud,

"Moses was not able to enter into the Tent of Meeting."[4] Similarly, after the completion of Solomon's Temple, "the cloud filled the House of Yahweh so that the priests could not stand to minister by reason of the cloud, for the glory of Yahweh filled the House of Yahweh."[5] The archaic nature of this mythologem of the deity's physical presence in his temple is attested by the poetic passage following the above statement: Then spoke Solomon:

> Yahweh meant to dwell in darkness,
> But I built a house for Thee
> A seat to abide in forever.[6]

A careful perusal of the passages referring to the manifestation of God in the sanctuary shows that the nouns "cloud" and "glory" are used interchangeably, and that the "cloud" was undoubtedly regarded as the visible form taken by the "glory" of Yahweh when He wished to indicate His presence in His earthly abode, the sanctuary.[7]

Since Yahweh was believed to have "dwelt" in the desert Tabernacle, one of the names of that tent-sanctuary was *mishkan*, "dwelling" or "abode."[8] According to the older Elohistic tradition, Yahweh merely put in temporary appearances in the Tent of Meeting; he was a visiting deity whose appearance in, or departure from, the Tent was used for oracular purposes.[9] In contrast, the younger Priestly tradition makes Yahweh a permanent inhabitant of this sacred Abode,[10] thus retrojecting into the mythical past a belief that was an integral part of the Jerusalem-centered theology of the later monarchy, i.e., that God's permanent abode was on Mount Zion, in His holy Temple.[11]

2 | *Ḥokhma—Wisdom*

While the quasi-physical manifestation of God's "dwelling" in His sanctuary is thus an integral feature of Biblical theology, the term Shekhina does not occur in the Bible. However, in the late Biblical period a theological tendency made its appearance which prepared the ground for the emergence of the Talmudic Shekhina. The trend referred to is that of interposing personified mediating entities between God and man. These entities, originally conceived of either as having been created by God or as being His attributes or emanations, gradually developed into angel-like beings who act upon man and the world under instruction by God. The most frequently appearing of these intermediaries, or *hypostases* (as they are called), is *Ḥokhma*, or Wisdom. In the Book of Job,[12] Wisdom is described as a personage

whose way is understood and place known only by God himself, while the Book of Proverbs[13] asserts that Wisdom was the earliest creation of God, and that ever since those primeval days she (Wisdom) has been God's playmate.

In the Apocrypha, this role of Wisdom is even more emphasized.[14] A passage is the *Wisdom of Solomon* states that "she [Wisdom] proclaims her noble birth in that it is given to her to live with God, and the Sovereign Lord of all loved her. . . ."[15] It was observed by Gershom Scholem that the term "symbiosis" used in this passage appears again in the same chapter in the sense of marital connubium, and that it is therefore clear that Wisdom here was regarded as God's wife.[16] Philo states quite unequivocally that God is the husband of Wisdom.[17]

Wisdom played a particularly important role among the Jewish Gnostics. References to the role of Wisdom in the primordial days of the world seem to indicate the existence of a Gnostic Ḥokhma-myth which originated in Jewish circles and was hypothetically reconstructed as follows:

Out of the primeval Chaos God created the seven archons through the intermediacy of his Wisdom, which was identical with the "dew of light." Wisdom now cast her eidolon, or shadow-image, upon the primeval waters of the Tohu wa-Bohu, whereupon the archons formed the world and the body of man. Man crawled about upon the earth like a worm, until Wisdom endowed him with spirit. Satan, in the shape of the serpent, had intercourse with Eve who thereupon bore Cain and Abel. Thus sexuality became the original sin. After the Fall, the sons of Seth fought the sons of Cain. When the daughters of Cain seduced the sons of Seth, Wisdom brought the flood upon the earth. Later, in her efforts to help mankind, Wisdom sent seven prophets, from Moses to Ezra, corresponding to the seven planets. In the myth Wisdom, acting like a female deity, clearly resembles the Gnostic concept of the *anima mundi*, the "world soul."[18]

Whether this myth reconstruction is or is not correct in all details could be decided only on the basis of a thorough study of Jewish, Early Christian, and Gnostic sources, However, there can be little doubt as to the importance of Wisdom in Jewish Gnosticism, which built its speculations on the role assigned to Ḥokhma in the late books of the Bible itself.

While Wisdom thus had all the prerequisites for developing into a veritable female deity, no such development took place within Judaism. Instead, post-Biblical Judaism created for itself a new concept of feminine divinity in the figure of the Shekhina, who first appears in the Aramaic translation-paraphrase of the Bible, the so-called *Targum Onkelos*. While the exact date of this work is still in doubt (some scholars hold that it was written as early as the 1st century C.E., while others think that it had not

attained its final form until the 4th century), it is generally agreed that its author used an older version as the basis of his translation.

3 | *The Early Shekhina*

Shekhina (*sh'khinah*) is a Hebrew abstract noun derived from the Biblical verb *shakhan* discussed above and means literally "the act of dwelling." These abstract nouns, constructed from the verbal root-letters with the added *-ah* suffix, have the feminine gender. In actual usage, the term Shekhina, when it first appears, means that aspect of the deity which can be apprehended by the senses. Whenever the original Hebrew Biblical text speaks of a manifestation of God through which He was perceived by man, the *Targum Onkelos* interpolates the term Shekhina. For instance, the verse "Let them make Me a Sanctuary that I may dwell [*w'shakhanti*] among them,"[19] is rendered by the *Targum Onkelos* as follows: "Let them make before Me a Sancturary that I may let My Shekhina dwell among them." The original "I will dwell [*w'shakhanti*] among the Children of Israel . . . that I may dwell [*l'shokhni*] among them,"[20] becomes in the *Targum* "I will let My Shekhina dwell among the Children of Israel . . . that I may let My Shekhina dwell among them." The Biblical "that they defile not their camp in whose midst I dwell"[21] becomes "that they defile not their camp in whose midst My Shekhina dwells."[22] The *Targum*, evidently, could not tolerate a direct reference to God even in a poetic text, and thus it paraphrases the original "He [God] found him [Israel] in a desert land . . . He compassed him about . . ."[23] as follows: "He filled their needs in a desert land . . . He let them dwell around His Shekhina . . ."

From these examples, to which many more could be added,[24] it appears that the earliest use of the term Shekhina was in the sense of an abstract hypostasis, interpolated wherever a Biblical statement appeared to be too anthropomorphic to the greater sensitivity of a later age. The fact that the noun Shekhina had the feminine gender (*Shekhinta* in Aramaic) had no significance at all in these early references.

In the Talmudic literature, the term continued to be used in the same sense. E.g., Rabbi Yehoshua, a 1st–2nd century Palestinian teacher, states that the following features were enjoyed by Israel in the desert: the manna, the quails, the well, the Tabernacle, the Shekhina, the priesthood, the kingship, and the Clouds of Glory.[25] A Talmudic discussion flatly equates God with the Shekhina: "Rabbi Yose (2nd century) said: 'Never did the Shekhina descend to earth, nor Moses and Elijah ascend to heaven. . . .' It is correct that the Shekhina never descended to earth? Is it not written, 'And Yahweh came down upon Mount Sinai . . .?'"[26]

At the same time, however there is a tendency to endow the Shekhina with more physical attributes than those associated with God, and thus to distinguish between the deity Himself who is beyond all sense-perception and His tangible manifestation as the Shekhina. One passage in which this physical view of the Shekhina is expressed with great clarity is the following:

> All those years that Israel was in the desert, these two caskets, one of a corpse [of Joseph] and the other of the Shekhina [containing the two stone tablets of the Law] were carried [by the Israelites] side by side. When the passersby would say: "What is the nature of these two caskets?" they would answer: "One is the casket of a corpse, and the other of the Shekhina." "Is it the custom that a corpse should be carried with the Shekhina?" They would answer: "This one [i.e. Joseph], observed what is written in the other one."[27]

It is evident that the presence of the Shekhina in the casket is imagined in this passage in a manner corresponding to that of Joseph's body in the other casket—both are actual, physical presences.

Similarly, the Biblical notion that the Tabernacle was built in order to serve as a dwelling place for Yahweh is transformed in Talmudic literature into the idea that both the desert sanctuary and the Solomonic Temple were the earthly abode of the Shekhina. It was the Shekhina who, according to Rabbi Azaria in the name of Rabbi Yehuda bar Simon, the 4th-century Palestinian Amora, dwelt in the Temple, lining it, as it were, with love.[28]

The notion is made tangible by Rabbi Yehoshua of Sikhnin is the name of Rabbi Levi, a 3rd–4th century Palestinian Amora:

> A simile: Like unto a cave on the seashore: when the waves rise, it fills with water, yet the sea is in no way diminished. Thus it was with the Tent of Meeting: it became filled with the glory of the Shekhina, but the world was in no way diminished.[29]

According to Rabbi Yehoshua (end of 1st century C.E.),

> . . . while the Children of Israel were still in Egypt, the Holy One, blessed be He, stipulated that He would liberate them from Egypt only in order that they build him a Sanctuary so that He can let His Shekhina dwell among them. . . . As soon as the Tabernacle was erected, the Shekhina descended and dwelt among them.

To this Rabh (the early-3rd-century Babylonian Amora) added:

> On that day a thing came about which had never existed since the creation of the world. From the creation of the world and up to

> that hour the Shekhina had never dwelt among the lower beings. But from the time that the Tabernacle was erected, she did dwell among them.[30]

According to another opinion however, the Shekhina originally did dwell here below, on earth. However, when Adam sinned, she removed herself to the first heaven. When the generation of Enosh sinned, she moved up from the first to the second heaven. The sins of the generation of the Deluge caused her to withdraw to the third heaven; those of the generation of the Tower of Babel—to the fourth. When the Egyptians sinned in the days of Abraham, she withdrew to the fifth heaven. The sins of the Sodomites impelled her to seek refuge in the seventh heaven. But when the seven righteous men (Abraham, Isaac, Jacob, Levi, Kehat, Amram, and Moses) arose, they brought her back down to earth step by step.[31]

Since the Shekhina dwelt in the Temple, any desecration of the holy place affronted her directly. When King Manasseh set up a graven image in the house of God, he did this purposely so that the Shekhina should see in and be angered.[32]

It was a Talmudic tenet that the physical presence of the Shekhina in the Temple, or in any other place on earth, was of such a nature that it could be localized, and her movements from place to place followed. The classical expression of this view is the statement of Rabbi Yehuda ben Idi in the name of Rabbi Yoḥanan bar Nappaḥa (a teacher in Tiberias who died in 279 C.E.), according to which the Shekhina went through the following ten stages of wandering:

> From the ark-cover she moved onto the Cherub;
> from the Cherub onto the other Cherub;
> from the second Cherub onto the threshold of the Temple;
> from the threshold into the court of the Priests;
> from the court onto the altar in the court;
> from the altar onto the roof of the Temple;
> from the roof onto the wall;
> from the wall into the city of Jerusalem;
> from the city into the mount of Olives;
> from the mount into the desert.[33]

The idea is that each of these stations in the wanderings of the Shekhina took her to a place more remote than the previous one from her original dwelling place over the ark-cover. It was, of course, the sins of Israel which caused the Shekhina thus to go into exile. In the desert, the Shekhina waited

six months for Israel to repent. When they failed to do so, she said in desperation. "Let them perish!"[34]

According to another version, the Shekhina dwelt for three and a half years on the nearby Mount of Olives, and cried out from there three times a day: "Return, you backsliding children!"[35] When all this proved futile, she began to fly around and say, "I shall go and return to my place till they acknowledge their guilt,"[36] that is to say, she withdrew to heaven to wait there for repentance to bring redemption.

4 | *Personification*

As to the presence of the Shekhina in the Second Temple, opinions were divided. Some said that while in the First Temple the Shekhina dwelt continuously, in the Second Temple she was present only intermittently.[37] Some sages, however, like the 4th-century C.E. Palestinian Amora, Shemuel ben Inya, asserted that the Shekhina never graced the Second Temple with her presence, and that this circumstance constituted one of the seven features marking the inferiority of this sanctuary in comparison with the First Temple.[38] Rabbi Yoḥanan, too, was of the opinion that the Shekhina never dwelt in the Second Temple, the reason being that it was built with the aid of the Sons of Japheth, i.e., the Persians, and, as stated in Genesis 9:27, God dwells only in the tents of Shem, that is in a Temple built by the Children of Israel themselves.[39]

Again others held not only that the Shekhina was present in the Second Temple,[40] but that, following its destruction, she transferred her seat to several important synagogues in Babylonia, where her presence was both visible and audible. Especially two synagogues, those of Huzal and Shaf Weyatibh, had the reputation of serving as alternate dwelling places for the Shekhina. The Shaf Weyatibh synagogue in Nehardea was built, according to tradition, by King Yechonia and his men, of stones and dust they had brought along from Jerusalem.[41] At times the Shekhina would dwell in this synagogue, at others in that of Huzal. Once, so the story goes, the fathers of Shemuel and Levi were sitting in the Shaf Weyatibh synagogue in Nehardea when the Shekhina appeared making a noise, whereupon they got up and left. On another occasion, blind Rab Sheshet sat in the same synagogue when the Shekhina again came, but he made no move to leave. Thereupon ministering angels came to frighten him away, but he said: "Master of the World! If one is afflicted and the other is not, who is to yield?" Whereupon He (i.e., the deity) spoke to them: "Let him be!"[42]

As to the precise nature of the noise made by the Shekhina, another Talmudic passage describes it as follows: "The Shekhina rang before him

[Samson] like a bell."[43] As we shall see in another context, God's approach, too, was said to have been accompanied by the tinkling of bells.

In general, it was an accepted article of faith that wherever their exile took the people of Israel, whether to Egypt, to Babylonia, or to Edom (Rome), the Shekhina went along with them, and that she would remain with them until the time of their redemption.[44]

In addition to her appearance in places of primary or secondary sanctity, the Shekhina would also show herself to individuals and even to animals. According to a Palestinian view, transmitted to Babylonia by Rabh Dimi (early 4th century C.E.), the Shekhina spoke to Adam, to the Serpent, and to the fishes, and, as a consequence of this distinction, members of these three species copulate in a face-to-face position, while all the other animals perform the sexual act face-to-back.[45]

That the Shekhina can be seen is almost a commonplace in the Midrash. The sign of the Abrahamic covenant which the Children of Israel carried on their flesh enabled them to gaze at the Shekhina; had it not been for the circumcision, they would have fallen flat on their faces at her appearance.[46] Even Nadab and Abihu, the two rebellious contemporaries of Moses, "feasted their eyes on the Shekhina, but had no enjoyment from her; Moses, on the other hand, did not feast his eyes on her, but enjoyed her."[47] Already as a babe, Moses was joined by the Shekhina. When the daughter of Pharaoh found the ark of bulrushes into which he had been placed by his mother, and opened it, she saw the Shekhina in it.[48] Of all men, Moses was the only one to whom the Shekhina spoke "every hour, without setting a time in advance." Therefore, in order to be always in a state of ritual purity and readiness to receive a communication from the Shekhina, Moses separated himself completely from his wife.[49]

The Shekhina joins the sick to comfort them,[50] and helps those who are in need.[51] Moreover, she has special concern for the repentant sinners of Israel:

> [These] are accepted by the Shekhina as if they were righteous and pious persons who never sinned. They are carried aloft and seated next to the Shekhina. . . . He whose heart is broken and whose spirit is low, and whose mouth rarely utters a word, the Shekhina walks with him every day. . . .[52]

Good deeds, even if performed by idolaters, attract the Shekhina: when the prophets of the Baal practiced hospitality, the Shekhina descended and rested upon them.[53]

If husband and wife are worthy and deserving, the Shekhina rests between them.[54] On the other hand, Rabh Abin bar Ada, a Babylonian Amora of

the 3rd–4th centuries, said in the name of Rabh: "He who marries a woman not suitable for him, when God lets his Shekhina rest, he will give testimony concerning all the tribes, but him."[55]

A different view of the Shekhina shows her as being attracted by aesthetic and aristocratic qualities. "The Shekhina rests only on him who is wise, heroic, rich and tall of stature."[56] Rabbi Yoḥanan bar Nappaḥa (died 279 C.E.) enumerated a very similar list of excellences as attracting the Shekhina: "God lets His Shekhina rest only on him who is heroic, rich, wise and modest."[57] Rabbi Ḥama bar Ḥanina, a Palestinian Amora of the 3rd century, said: "When God lets His Shekhina rest, He will let her rest only on the noble families in Israel."[58] According to another view, "the Shekhina rests only where there is no sadness, no sloth, no laughter, no levity, no merriment, and no senseless chatter, but where there is rejoicing over the fulfillment of a commandment."[59]

Lest one think that the Shekhina was thought of as ranking merely with the angels, we adduce a few passages which emphasize her superiority to them: The splendor of the Shekhina feeds the ministering angels. Her radiance, however, is so great that the angels must cover their faces with their wings so as not to see her.[60] The ministering angels are removed from the Shekhina by myriads of parasangs, and the body of the Shekhina herself measures millions of miles.[61]

These ideas are complementary without being contradictory: on the one hand, the Shekhina can be so small as to find place in the Tabernacle or even in the small ark of bulrushes next to the child Moses; on the other, her size overshadows the world. A midrash neatly reconciles the two ideas:

> The emperor said to Rabban Gamliel: "You say that wherever ten men are assembled, the Shekhina dwells among them. How many Shekhinas are there?" Thereupon Rabban Gamliel beckoned the servant and began to beat him [saying]: "Why did you let the sun enter the emperor's house?" ["Nonsense"] said the emperor, "the sun shines all over the world!" "If the sun," answered Gamliel, "which is only one of a thousand myriad servants of God, shines all over the world, how much more so the Shekhina of God!"[62]

The problem of how to reconcile the omnipresence of the Shekhina with her "dwelling" in the sanctuary was solved in a different manner by Rabbi Yoḥanan bar Nappaḥa by the introduction of the concept of "contracting" of which the Kabbala was later to make extensive use in its cosmogony. Yoḥanan explained that when Moses heard God say "Let them make Me a Sanctuary,"[63] he was frightened by what he assumed would be a task of immense magnitude, because he knew that even the "heaven and

the heaven of heavens cannot contain" God.[64] But God reassured him that a small Tabernacle would, indeed, be sufficient for Him: "I shall descend and contract my Shekhina between [the planks of the Tabernacle] down below.[65]

5 | *The Shekhina Confronts God*

These, and many other similar passages clearly demonstrate a pronounced tendency to personify the Shekhina and to conceive of her as a manifestation of the deity in a lower form, capable of being perceived by the human senses. This Shekhina was the direct heir of the Biblical Cloud of Glory which had dwelt in the sanctuary and had been the visible manifestation of Yahweh's presence in His House. There is as yet no indication in any of these passages that the Shekhina was considered a divine entity separate from God to the extent of being able to confront him. However, in view of the mystical dualistic theosophy of Philo and the Cherubim-symbolism of the Second Temple,[66] it was inevitable that the step from regarding the Shekhina as the manifestation of God to seeing in her a discrete divine entity should be taken. The earliest evidence that it was, dates from the end of the 3rd century C.E.

Before presenting the passage in question, a word must be said about the relationship of the two Talmudic concepts of the Shekhina and of the "Holy Spirit." As A. Marmorstein has convincingly shown, these two concepts were used synonymously in the Talmudic period.[67] When, therefore, a Talmudic teacher speaks of the Holy Spirit, he may as well have used the term Shekhina. With this in mind, let us quote a saying of Rabbi Aḥa, a Galilean teacher who lived ca. 300 C.E.

> The Holy Spirit comes to the defense [of sinful Israel by] saying first to Israel: "Be not a witness against thy neighbor without a cause,"[68] and thereafter saying to God: "Say not: I will do to him as he hath done to me."[69]

This passage has great significance in the historical development of the Jewish God concept. We have here a very early testimony as to the idea that the "Holy One, blessed be He" or God, and the Shekhina or Holy Spirit, are two separate and discrete divine entities. The Holy Spirit is said here to have admonished God not to practice retribution and to refrain from punishing Israel. She (she, because the "Holy Spirit," like the Shekhina, is feminine) was, therefore, considered to have an opinion, a mind, a will, and a personality of her own. She is opposed to God and tries to influence him.[70]

The Shekhina plays a similar role in another passage which is of considerable later provenance. It is found in Midrash Mishle, whose late age is indicated by the fact that the first to quote it was Rabbi Ḥananel (died 1050 C.E.). In it we read:

> When the Sanhedrin wanted to add King Solomon to the three kings and four commoners who had no share in the World to Come, Shekhina rose up before the Holy One, blessed be He, and said: "Master of the World! Seest Thou a man diligent [i.e. Solomon] . . . ?! They want to count him among mean men." In that hour, a divine voice was heard saying to them: "Let him stand before Kings, let him not stand before mean men!"[71] [i.e., do not include Solomon together with those mean men who are excluded from the heavenly Paradise.]

A clear-cut differentiation between God and the Shekhina is made by Moshe Hadarshan, the early-11th-century Midrashist of Narbonne, in his book entitled *Bereshit Rabbati*. He says, in the name of Rabbi Akiba (the 2nd century C.E. Tanna), that

> when the Holy One, blessed be He, considered the deeds of the generation of Enoch and that they were spoiled and evil, He removed Himself and His Shekhina from their midst and ascended into the heights with blasts of trumpets. . . .[72]

Although three passages may be considered rather meager evidence, they are sufficient to establish that the idea of two separate divine entities did exist in Talmudic times and that there were at least some teachers who saw nothing exceptionable in it. Others, however, took a different view, and opposed any implication of such a plurality, thereby adding indirect evidence to the existence of such beliefs. Rabbi Eliezer, the Palestinian Amora of the 3rd century, warned that one must carefully refrain from implying a divine plurality even inadvertently in translating Biblical passages which contain references to the physical appearance of God:

> Rabbi Eliezer said: "He who translates a Biblical verse literally is a liar, and he who adds to it is a blasphemer. For instance, if he translates the [Hebrew] verse 'And they saw the God of Israel'[73] [into Aramaic]: 'And they saw the God of Israel,' he is a liar, for the Holy One, blessed be He, sees but cannot be seen. If, however, he translates 'And they saw the glory of the Shekhina of the God of Israel,' he blasphemes because he makes three [i.e., instead of one God, he refers to three deities], namely, Glory, and Shekhina,

and God. What 'And they saw the God of Israel' means is that they feasted their eyes on the splendor of the Shekhina."[74]

Rabbi Eliezer here objects to both the literal translation of a Biblical anthropomorphic expression and its paraphrase by the interpolation of such terms as Glory and Shekhina. The basis of his objection to the first method is that it makes it appear as if God could directly be apprehended by human sense organs, which, of course, is untrue with reference to a purely spiritual deity. His objection to the second method must stem from the experience or knowledge that his contemporaries tended to regard such expressions as Glory and Shekhina as designations for discrete deities. While Rabbi Eliezer considered such a view as blasphemous, others, as we have seen above, saw nothing exceptionable in it, at least as far as the Shekhina was concerned.

6 | *The Feminine Shekhina*

The passages which establish the Shekhina as a separate divine personality, indicate her femininity in no way except by the grammatical gender of her name. It should be emphasized, however, that both in Hebrew and Aramaic, the gender of the subject plays a much greater role in the sentence structure than in Indo-European languages. In English, for instance, one can say, "The Shekhina rose up . . . and said," without becoming aware at all of the gender of "the Shekhina." In Semitic languages, the verb as well as the adjective have separate male and female forms; in the sentence "the Shekhina rose up . . . and said," therefore, both verbs impress the reader (or hearer) with the femininity of the Shekhina by taking themselves the feminine forms. Thus, even without any explicit pronouncement to the effect that the Shekhina was a female divine entity, her sex was kept in the forefront of consciousness by every statement made about her.

In Midrashic homilies, the Talmudic sages allowed themselves considerable latitude in throwing light on the mystery of the deity by comparing him to human beings of both sexes. The following passage, transmitted in the name of Shemuel bar Naḥman, a Palestinian teacher of the 3rd and 4th centuries, can serve as an example:

> It is the wont of the father to have mercy, "Like as a father has compassion upon his children, so has the Lord compassion upon them that fear Him";[75] and it is the wont of the mother to comfort, "as one whom his mother comforts, so will I comfort you."[76] God said: "I shall do as both father and mother."[77]

It is, of course, a far cry from saying that God acts like a father and a

mother to asserting, as Philo did,[78] that he has two components, a fatherly and a motherly. Yet the Shekhina, with her feminine gender, comes quite close in the Talmudic sources to being regarded as a feminine manifestation of the deity. The following statement by Rabbi Aḥa definitely points in that direction:

> When the Shekhina left the Sanctuary, she returned to caress and kiss its walls and columns, and cried and said: "Be in peace, O my Sanctuary, be in peace, O my royal palace, be in peace, O my precious house, be in peace from now on, be in peace!"[79]

In another passage it is the Community of Israel (Knesseth Yisrael, also of feminine gender and subsequently identified with the Shekhina or symbolized by her), lamenting the destruction of the Temple:

> The Community of Israel said before the Holy One, blessed by He: "Master of the World! I remember the safety, the security and the peace which I used to enjoy, and now it is all departed from me. And I cry and lament and say: O, if I could return to former years when the Sanctuary stood, and when you used to come down into it from the high heavens, and let your Shekhina rest on me, and the nations of the world would praise me! And when I would seek forgiveness for my sins, you would answer me. But now I am covered with shame and disgrace."
>
> And she also said before Him: "Master of the World! My heart breaks in me when I pass by your house and it is destroyed, and the voice of silence is in it and says: The place in which Abraham's seed presented sacrifices before you, and the priests stood on their platform, and the Levites intoned praise on their harps, how can it be that now foxes dance in it?! . . . But what can I do, since my sins brought this about, and the false prophets who arose in me led me astray from the way of life to the way of death. . . . "
>
> When the temple was destroyed by fire, the Holy One, blessed be He, said: "Now that I have no seat on earth, I shall remove my Shekhina from her [the earth] and shall ascend to my first abode." . . . In that hour the Holy One, blessed be He, cried and said: "Woe to me, what did I do, I let my Shekhina dwell below for the sake of Israel, and now that they sinned, I returned to my first place . . . I became a laughter unto the nations and a derision to the creatures." In that hour Metatron [God's chief ministering angel] came, fell upon his face, and addressed God: "Master of the World! Let me cry in Your place!" But God answered him: "If you

> do not let me cry now, I shall retire to a place into which you have no permission to enter, and shall cry there." . . . [Thereafter] God said to the ministering angels: "Come, let us decend, I and you, and see what the enemy did to my house." . . . When God saw the Sanctuary, He said: "Verily, this is my house, and this is my resting place, into which the enemy entered and did what he wanted." And God cried and said: "Woe to me because of my House! My sons, where are you? My lovers, where are You? What shall I do to you? I warned you, but you did not repent."[80]

That the Shekhina is the love aspect of God is clearly stated in a parable which compares the Temple to Solomon's palanquin: just as the latter was inlaid with love, so did the Shekhina fill the sanctuary.[81] But she also represents the divine punitive power. This is most succinctly expressed in a Tannaitic passage which states that on ten occasions did the Shekhina descend from on High: after the Fall, when she entered the Garden of Eden to punish Adam, Eve, and the Serpent; when she confused the builders of the Tower of Babel; when she destroyed Sodom and Gomorrah; when she saved the Children of Israel from Egyptian slavery; when she drowned the Egyptians in the Sea of Reeds; when she appeared on Mount Sinai; when she led the Children of Israel in the pillar of cloud; when she entered the Sanctuary; and once more will she descend in the future in the days of the battle of Gog and Magog.[82] We note that in the above list, which actually enumerates only nine descents—one evidently got lost while the tradition still circulated orally—five descents of the Shekhina are punitive expeditions. As we shall see in a subsequent chapter, the punitive aspect of the Shekhina, closely paralleled by the cruel aspect of the ancient Near Eastern love-goddesses, plays an important role in the Kabbalistic figure of the Shekhina-Matronit.

A mixture of the punitive and the merciful aspects of the Shekhina appears in the legends which attribute to her the function of taking the souls of exceptionally meritorious men. There were six individuals, we read in the Talmud, whom the Angel of Death could not overcome, and who died only through a kiss of the Shekhina; they were Abraham, Isaac, Jacob, Moses, Aaron, and Miriam.[83] According to another passage, it was God who took the soul of one of them, Moses, by kissing him on the mouth.[84] But after Moses died, it was the Shekhina who carried him on her wings a distance of four miles to the place where he was to be buried.[85]

Since Moses is said to have to given up all carnal contact with his wife in order to be always ready to receive communication from the Shekhina, it seems probable that a notion clearly stated in the Zohar was already

present in rudimentary form in Talmudic times: the idea that the relationship between Moses and the Shekhina was like that of husband and wife.[86] If so, there is an interesting parallel between the Shekhina carrying her dead husband, Moses, to his burial place, and the Ugaritic myth about Anath carrying the body of her husband-brother, Baal, to his burial place.[87]

7 | *Conclusion*

We have followed, in this chapter, the development of the Shekhina concept from its Biblical antecedents, through its early Targumic beginnings in the 1st or 2nd century B.C.E., to the stage it reached a thousand years later, just prior to being taken up by Kabbalism and made into one of the cornerstones of its mystical theosophy. At first, it seems, the Shekhina served merely as a convenient means of solving the problem presented by Biblical anthropomorphisms in the eyes of a later, more sensitive, theology. By interpolating the Shekhina, it was no longer God himself who was said to have acted in a human manner, but his "presence" which, evidently, was conceived as something akin to a "presence" manifesting itself at a spiritualists' seance, a barely visible indication of what is acknowledged to be pure spirit and therefore not apprehensible by the senses.

Before long, however, this spiritual "presence" began to take on substance. Her movements from place to place could now be discerned, and, having acquired a physical aspect, she became subject to historical events: more and more closely joined to the fate of Israel, she suffered its vicissitudes, accompanied the people into their exiles, and experienced the hopes and despairs with which Israel reacted to the blows dealt her by fate or, as the Sages of the Talmud would have put it, shared in the punishments meted out by God to his sinful people. In this capacity, the Shekhina came very close to being identified with the Knesseth Yisrael, the personified, female "Community of Israel."

Next, almost inadvertently, as the distance between God and the Shekhina grew, the latter took on increasingly pronounced physical attributes. The more impossible it became to think of God himself in anthropomorphic terms, the more the Shekhina became humanized. Now she could be heard as well as seen, and, having found her voice, it was inevitable that she would speak not only to man but to God. Once she was allowed to do this, there was no longer any doubt that the deity was considered as comprised of two persons: God and the Shekhina.

In Biblical times, there was nothing strange, let alone heretical, about a plural concept of the godhead. Most of the nations in whose midst Israel dwelt recognized divine pluralities, and the old Hebrew myth saw nothing

remarkable in the fact that Yahweh appeared to Abraham in the shape of three men who, however, were unhesitatingly recognized by Abraham as one person. The narrative is masterly in conveying the mystery of this three-in-one deity by changing back and forth between plural and singular,[88] to which has to be added the further mystery of the unexplained changeover of the "three men" into "two angels" by the time they reached Sodom, and their contradictory identification as Yahweh's messengers.[89] Thus, Philo's theosophic discernment of the two aspects of the deity[90] is, in fact, not too far removed from this old Biblical indeterminacy as to the number of persons in the deity, nor is the Talmudic postulation of God and the Shekhina as two divine entities.

Philo assigned masculinity to one, and feminity to the other, aspect of the godhead. Such a step was never taken by Talmudic Judaism, or at least such a thought was never clearly formulated or expressed, until the days of the Kabbala. Yet the very fact that all names of God (Yahweh; Elohim; the Holy One, blessed be He; etc.) were masculine, while the name Shekhina was feminine (as were other manifestations of the deity, such as the Holy Spirit, the Word, Wisdom, etc.), inevitably pointed in the direction of such a sexual differentiation, which came about, as it was bound to, with the great medieval mystical movement of the Kabbala.

The latency of the feminine elements in the Jewish God concept for one millennium and a half is a psychologically remarkable phenomenon. From about 400 B.C.E. to 1100 C.E. the God of Judaism was a lone and lofty father-figure, and whatever female divinity was allowed to exist in his shadow was either relegated to a lower plane, or her feminity was masked and reduced to a grammatical gender, as in the case of the Shekhina. Yet in spite of the masculine predominance on the highest level of the Talmudic God concept, popular belief and imagination dwelt in a world peopled and haunted by feminine numina, ranging from lowly and loathsome she-demons to exalted personifications. It is to an examination of these ideas that we next turn.

V

The Kabbalistic Tetrad

Let us now turn to the development of the Hebrew goddess myth in the Middle Ages, when the mythical-mystical figure of a feminine divinity occupied a central place in Jewish religious consciousness.

There are some puzzling factors about this medieval Jewish religious development. One is that it took place in an entirely religion-bound community, whose official doctrines could never have tolerated deviation from strict monotheism. Another, that, on the surface at least, it appears as if the primary factor in the emergence of the goddess figure and her divine family had been mystical speculation about the nature of the deity, which in turn led to the creation of mythical narratives about the relationship among the four members of the supernal Tetrad.

There is, of course, no hard and fast dividing line between mystical symbolism and mythical narrative. On the contrary, these two areas of religious expression imperceptibly merge, and those whose religious inclinations impel them to approach the border region from either side, may suddenly find that they have crossed over to the other. Historical examples show that at times such crossings-over were effected purposely: old polytheistic myths were, in this manner, transformed into mystical theological ideas and thereby fitted into the framework of a narrower, more rigidly monotheistic religion.

The best known, though not always readily acknowledged, example of this type of transformation is the re-emergence of the ancient Near Eastern mythological feature of divine triads (a group of three gods) in the Christian doctrine of the Holy Trinity.

At other times, the searching mind, striking out along unexplored paths of religious discovery, finds itself on the other side, having crossed the invisible border unintentionally and inadvertently. Such an accidental slippage from the realm of mystical speculation into that of mythical narrative occurred in connection with the Kabbalistic interpretation of the mystical meaning of the Tetragrammaton, the secret and most holy four-letter name of God, which to pronounce was considred a mortal sin. An examination of the psychological and traditional channels along which this slippage took place will occupy us in this chapter, together with the attempt to reconstruct the myths of the four divinities constituting the Kabbalistic tetrad. First, however, let us look at the world of the Kabbala in which this tetrad occupied a pivotal position.

1 | *The Kabbala*

The Kabbala was a great Jewish religious movement which reached its literary zenith in the 13th century, and its greatest popularity in the 16th and 17th centuries. Its roots go back to Talmudic notions and ideas, and even beyond them, to doctrines first adumbrated by Philo of Alexandria, the 1st century Hellenistic Jewish philosopher, whose teachings about the Cherubim were examined in Chapter Three. Central to the Kabbala is a secret and esoteric doctrine about the nature of the deity and the relationship between God, World, and Man. While the Kabbala as a whole is deeply mystical, it is speculative rather than ecstatic. It emphasizes the intuitive grasp of ultimate truths, but at the same time demands the most exacting observance of all the laws and rules of traditional Judaism. It stresses the personal religious experience, yet, paradoxically, it considers itself as a body of old, transmitted wisdom, as indicated by the meaning of its very name, Kabbala, literally "Reception," that is, something "received" from ancient masters. In fact, the chain of Kabbalistic tradition is believed to lead back to Adam himself, whose knowledge of all the ultimate secrets was derived directly from divine communication.[1]

The foundations of medieval Kabbalism were laid in Babylonia and Byzantium in the 7th and 8th centuries, when a number of Midrashim with marked Kabbalistic tendencies made their appearance. Several of these (e.g., the *Alpha Beta of Rabbi Akiba* and the *Midrash Konen*) deal with the mysteries of Creation and the structure of the universe. Other writings of the

same period describe the heavens, represented as seven celestial palaces (the so-called *Hekhalot*), and the divine chariot (*Merkaba*) which served as the throne of God. These early ventures into mystical cosmogony, cosmology, and theosophy were transmitted in the 9th century to Italy and Germany, and, soon thereafter, also to Spain, which in the 13th century became the chief center of the Kabbala.

The most important work of the entire Kabbalistic movement, the Zohar, or "Book of Splendor," was written ca. 1286 by Moses de Leon (ca. 1240-1305) in Castile, Spain, but was attributed by him to Shimeon ben Yohai, the 2nd-century Palestinian teacher and mystic. With this voluminous book (it contains close to a million words), written in the forms of a mystical commentary to the Five Books of Moses, in a somewhat artificial Aramaic, Spanish Kabbala reached its culmination. For the subsequent two centuries, however, Kabbalism remained the esoteric preoccupation of a few select individuals. An important new development took place following the expulsion of the Jews from Spain in 1492, which brought about a powerful upsurge of Messianic longings for a redemption, and resulted in the migration of several leading Spanish Kabbalists to the town of Safed in the Galilee. Within a few years thereafter, Safed became the new center of the Kabbala and held this position for a short but remarkable period in the 16th century.

From Safed, the Kabbala spread rapidly to all the Asian, African, and European centers of the Jewish diaspora. It soon became a veritable mass religion, and as such prepared the ground for the Messianic movement led by Shabbatai Zevi (1626–1676) and, a century later, for East European Hasidism, the pietistic-mystical sectarianism which nearly caused a schism in Judaism in the 19th century. Thus Kabbalistic mysticism became one of the most powerful forces to lead the Jewish people forward on its historic course, until Enlightenment and Emancipation, and then Nationalism and Zionism, took over to serve as vital propellants.

In the Kabbalistic doctrine of God, fully developed in the Zohar, the feminine element plays an extremely important role. As Gershom Scholem, the foremost authority on the subject, put it, the introduction of the idea that the Shekhina was the feminine element in God, opposed to "the Holy One, blessed be He," as the masculine element in Him,

> was one of the most important and lasting innovations of Kabbalism. The fact that it obtained recognition in spite of the obvious difficulty of reconciling it with the conception of the absolute unity of God, and that no other element of Kabbalism won such a degree of popular approval, is proof that it responded to a deep-seated

> religious need. . . . It says something for its vitality that despite the opposition of such powerful forces [as the philosophers and the Talmudists] this idea became part and parcel of the creed of wide circles among the communities of Europe and the East.[2]

The Zohar and the later Kabbalistic works are replete with references to the Shekhina, the female divine entity already familiar to us from her appearances in the earlier Talmudic and Midrashic literatures. In the next chapter we shall discuss in detail this feminine divinity whose favorite Kabbalistic name is "the Matronit," i.e., the Matron. What we wish to consider here is the question of the relationship of the Shekhina to God, and the issue of polytheism versus monotheism represented by it. The learned among the Kabbalists were undoubtedly aware of the problem, grappled with it, and succeeded in solving it in a manner satisfactory to them. One can imagine that by extraordinary mental effort they were able to remain unfailingly aware of the absolute oneness of God even while their imagination was assaulted by the most outspoken descriptions of passionate embraces between the male and female "elements" of the deity.

But the learned were always few, while the ignorant and near-ignorant were many. The strength of Kabbalism lay not in what it meant for the select few who were able to devote a lifetime to its study, even as the intellectual elite of the anti-Kabbalists did to the study of the Talmud. The Kabbala's significance lay precisely in the great influence it exerted, from the 16th century on, upon the many, the masses, for whom intensive study was out of the question. If the most conspicuous ideas and teachings of Kabbalism nevertheless reached them, it was by word of mouth and in greatly simplified form. To put it differently, a simpler idea had a greater chance of popular acceptance than a more difficult one. The belief in the Shekhina (or Matronit), the matronly, divine figure, who, in a way, functioned as an intermediary between the People of Israel and God, was a simple, easily comprehended idea. Since it "responded to a deep seated religious need," it won ready acceptance among wide circles in the Jewish communities everywhere. Much more difficult to understand was the complementary doctrine which maintained that God and the Shekhina were one. Lip-service, to be sure, was paid by all to the time-honored orthodox Jewish concept of the Oneness of God. On the logical level, many were even able to assert that the Shekhina and the other elements (of which more below) discerned in God were merely symbols which helped in comprehending the mystery of His nature, or emanations issuing forth from Him, but in no way affecting His fundamental Oneness.

Yet on the deeper level of emotion and imagination, the image of the

wifely and motherly, passionate and compassionate female divinity met with immediate, spontaneous and positive response. Especially to popular imagination, the Shekhina was no mere symbol or emanation, but a great heavenly reality whose shining countenance shoved the theoretical doctrine of the Oneness of God into the background. The deep emotional attachment of the simple, unsophisticated followers of the Kabbala to the Shekhina was comparable to the relationship of the Italian or Spanish villagers to their Madonna. In both cases it cannot be denied that one is faced with the veneration of a goddess, and it is impossible to dispute that she means more for the satisfaction of deep-seated religious emotional needs than God Himself.

Numerous passages in the Zohar, whatever their possible interpretation as mystical speculations about God, struck a responsive chord in hearts yearning for a divine mother-image. Some of these passages deal with the tragic figure of the Matronit which we shall analyze in the next chapter. Others discuss the divine tetrad, the four major persons of the Zoharic godhead, and several of these passages make it appear that the name Yahweh, composed of four letters, was the basis from which the concept of the divine family of four was derived. We shall, therefore, turn next to that most ancient, most holy and forbidden name of God, the Tetragrammaton.

2 | *The Tetragrammaton*

In the Bible, God is referred to by several names, such as El, Elohim, Shaddai, Yahweh, or a combination of these. In the Talmudic period, the most frequently used name of God was "the Holy One, blessed be He." In the Zohar and Kabbalistic literature in general, God is still called "the Holy One, blessed be He," but, in addition, several other mystical divine names appear, which refer to God in relation to various stages in the history of the universe, or designate certain aspects of His being.

The ancient Biblical Tetragrammaton, Yahweh (YHWH), is regarded in the Kabbala as an abbreviated symbol of four divine elements which form part of the deity. The four elements are *Ḥokhma* (Wisdom), *Bina* (Understanding), *Tif'eret* (Beauty), and *Malkhut* (Kingship). Moreover, Wisdom is identified with the Father, Understanding with the Mother, Beauty with the Son, and Kingship with the Daughter. These four divine concepts form the Kabbalistic tetrad.

One passage in the Zohar, for instance, states that "the letter Y in the name YHWH is called Father and stands for Wisdom; the first H is the Supernal Mother, called Understanding; and the W and the second H are the two children, a son and a daughter, who were crowned by their Mother.[3]

A related passage explains:

> Wisdom spread out and brought forth Understanding, and they were found to be male and female, Wisdom the Father, and Understanding the Mother. . . . Then these two united, and lighted up each other, and the H [i.e., the Mother] conceived and gave birth to a Son. Through the birth of the Son the Father and the Mother found their perfection [tiqqun], and this led to the completion of everything, the inclusion of everything: Father, Mother, Son and Daugher.[4]

In yet another Zoharic passage more details are given about the origin of this divine family:

> The Y brought forth a river which issued from the Garden of Eden and was identical with the Mother. The Mother became pregnant with the two children, the W who was the Son, and the second H who was the daughter, and she brought them forth and suckled them. . . . These two children are under the tutelage of the Father and the Mother. . . . After the Mother gave birth to the Son, she placed him before her, and this is why the first H in the name YHWH must be written close together with the W. The Son received a double share of inheritance from his Father and Mother, and he, in turn, nourished the Daughter. This is why when writing the Tetragrammaton in sacred texts, one must bring the W and the second H close together.[5]

In spite of the explicitness of these passages, which is matched and even surpassed by many others to be dealt with further on, all the modern students of the Kabbala interpret them as nothing more than mystical symbolism.[6] They argue that it is in the nature of the Kabbalistic style to speak of aspects or emanations of the One God as if they were independent entities. Since God is known to be wise, they speak of His Wisdom; since He is possessed of understanding, they speak of His Understanding, etc., and to further clarify these attributes, they designate them as Father, Mother, Son, and Daughter.

Two considerations render this interpretation unsatisfactory. One is the "slippage" phenomenon referred to above, which can be observed in many Kabbalistic elaborations of the four "elements" in the deity, dealing with their affairs and vicissitudes, the relationships between them and their reactions to one another. Even if the Kabbalistic tetrad had actually and demonstrably originated in purely mystical speculation, somewhere on the way such a slippage occurred, with the result that the colorful details supplied

about four persons of the deity clearly belong to the realm of myth.

The other consideration which vitiates the mystical symbolic interpretation of the Kabbalistic tetrad is the existence of numerous divine tetrads in other religions with occasional surprising similarities between the myths told about them and the statements made about the four "elements" of God in Kabbalistic literature.

This not only renders it unlikely that what the Kabbala has to say about the tetrad was engendered merely by mystical symbolism, but makes us suspect that the Kabbalistic myths about the tetrad reflect outside, non-Jewish influences. A rapid survey of polytheistic tetrad myths is here called for to substantiate this assumption.

3 | *Ancient Tetrads*

Tetrads, although not as common as triads, are found in several relgious cultures of antiquity. The earliest known group of four related gods is that of ancient Egyptian religion. The father-god, Shu, we read in early Egyptian mythological texts, was the air that carried the sky. His female counterpart was Tefnut, goddess of moisture. Their union produced a son Geb, or Earth, and a daughter Nut, or Sky. Geb and Nut were united in tight marital embrace, until Father Shu separated them by raising the sky up from the bosom of the earth.[7] (See Plate 29.)

Only somewhat younger is the tetrad myth of the Sumerians, the old, non-Semitic inhabitants of Mesopotamia. The precise family relationships of the gods of the Sumerian pantheon is obscure, and in most cases little is known about which god was whose son, husband, father or brother, and which goddess was whose daughter, wife, mother or sister. Nevertheless, it has become clear, primarily thanks to the indefatigable studies of Samuel N. Kramer, that there was a close, first-degree relationship between a group of four gods who were in control of heaven, earth, sea, and air, and who, among them, created all the other cosmic entities.[8] The four were the god of Heaven, An; the great mother goddess Ninhursag; the god of water, Enki; and the god of air, Enlil. That they were a clearly defined tetrad is evident not only from their position of primary creator gods, but also from their continued importance after the emergence of the other gods. It is they who "usually head the god lists, and are often listed as performing significant acts together as a group." Moreover, "at divine meetings and banquets they were given the seats of honor."[9]

An, the heaven-god, was once the supreme ruler of the Sumerian pantheon, but as early as the 3rd millennium B.C.E. his place was taken by Enlil,

the air-god, who is also titled "father of the gods," and "king of all lands." He was also the god of Wisdom, and the ruler of the abyss (absu)—an early indication of the oft-recurring connection between wisdom and water.

Ninhursag was also called Ninmah, Nintu, and Aruru, although her original name seems to have been Ki, meaning "[mother] Earth." She was probably taken to be the wife of An (Heaven), and the two, An and Ki, may have been conceived as the parents of all the gods.[10] In her capacity as the great mother and the earth goddess, Ninhursag was also "the lady who gave birth," the mother of all living things, and especially the mother of the earthly kings. The early Sumerian kings liked to describe themselves as "constantly nourished with milk by Ninhursag."[11]

Enki, king of the watery abyss, calls himself in a paean of self-glorification "the first-born of An,"[12] which would make Ninhursag his mother. However, in another passage of the same long poem, Ninhursag is called "Enlil's sister,"[13] and she calls Enki, "my brother."[14] This apparently reflects another version of the early Sumerian tetrad, according to which An (Heaven) had three children, Ninhursag, Enki and Enlil. The contradiction in the position of Ninhursag, who appears as both mother and sister of Enki and Enlil, can possibly be resolved by referring to the Zoharic explanation of the Tetragrammaton discussed above. The Father ("Wisdom" there too), we shall recall, brought forth the Mother, that is, the Mother was originally the Father's daughter. But then Father and Mother had union, and the Mother gave birth to the Son and the Daughter. Thus the Mother was, at one and the same time, also the sister of her Son and Daughter. It can be conjectured that a lost Sumerian myth may likewise have told how Father An brought forth Ki (Ninhursag) by spontaneous generation (or by masturbation, as Atum was said to have engendered Shu and Tefnut in Egyptian mythology).[15] If so, then Ninhursag, like the Mother in Kabbalism, was both the mother and the sister of her two children.

The tetrad of the Hittites, whose ancient empire centered on the Anatolian plateau and who spoke several unrelated languages, can be mentioned only in passing. The Hittites absorbed so much foreign mythological material that the isolation of original Hittite myths would be a major scholarly task which lies far beyond the present author's competence. However, even a cursory perusal of the readily accessible Hittite myths shows that groups of four gods appear repeatedly. One text-fragment enumerates the four gods Kashku (the Moon-god), Taru (the Storm-god), Hapantalli, and Katakhziwuri. Another appeals to "the mighty gods" Naras, Napsaras, Minkins, and Ammunkis.[16] A Hittite myth of unquestionably Canaanite origin is the one in which the tetrad of Elkunirsa (that is, the Canaanite *El qone eretz,*

"El, Creator of the Earth"), his wife Ashertu (Asherah), their son Baal-Hadad, the Storm-god, and their daughter Ishtar (Astarte or Anath) figures prominently.[17]

An ancient Near Eastern bronze figure of unknown provenance shows a divine tetrad in the form of four human figures rising out of a common stem and held together at their lower legs by a ring. (See Plate 30.)

In the ancient Canaanite pantheon itself the four gods El, Asherah, Baal, and Anath stand out among all the other gods as a clearly recognizable divine family. Thanks to the major archaeological discovery of the Ugaritic tablets at Ras Shamra, near the northeastern corner of the Mediterranean, we have an exceptionally complete picture of the mythological world of the northern Canaanites in the 14th century B.C.E. The chief of all gods was El, the father god, often called "bull of his father." His wife Asherah, also referred to as "Lady Asherah of the Sea," was the mother of all other gods whom she suckled at her breasts. Their son Baal, also called Aliyan, Prince, King, and Rider of Clouds, was the god of rain, and fertility, who periodically died and again came to life. Their daughter Anath, usually referred to as the Virgin or the Maiden Anath, or simply as The Girl, was the goddess of love and female fecundity, as well as of the war and the hunt, who enjoyed fighting as much as she did love-making, was bloodthirsty, tempestuous and unrestrained.[18]

In Greek mythology, Cronus, Rhea, Zeus and Hera seem to have formed the original divine tetrad. Cronus and Rhea were brother and sister as well as husband and wife. After castrating his father Uranus ("Sky"), Cronus ruled in his stead, until he, in turn, was castrated and dethroned by his own son, Zeus, who then became King of the gods, and god of the sky and of thunder. The wife of Zeus was Hera, his sister, goddess of the earth, fecundity, marriage, and women, and worshiped as Maid, Wife, and Widow.

The Roman equivalent of this tetrad was that of Saturn, Ops, Jupiter (Jove), and Juno. Juno's eldest and most common name was Juno Lucina, or Lucetia, referring to her original light-nature. In her capacity as the goddess of marriage, she was also known as Matrona, a name which, of course, reminds us of the Kabbalistic name of the daughter-goddess, the Matronit, who will be the subject of the next chapter. Juno Matrona's principal festival was the Matronalia or Matronales, celebrated on May 1, when husbands and wives would pray to her and offer sacrifices for marital happiness. The priest of Jupiter, the *flamen dialis,* had to be married; his wife was the *flaminica dialis,* priestess of Juno.[19]

Turning now to the great Asian world east of Mesopotamia, and first of all to Iran, we find again the by now familiar tetrad, although in a modified form. The mythical history of the world in Iran begins with Zur-

van ("Time"), a hermaphrodite, who existed prior to heaven, earth, and everything else. For a thousand years Zurvan sacrificed in order to have a son, and finally Ohrmazd and Ahriman were conceived in the womb of his female half. Overjoyed, Zurvan vowed that whichever of his children should emerge first would receive the kingdom from him. It was evil Ahriman who ripped the womb open, and presented himself to Zurvan saying: "I am your son Ohrmazd." Zurvan, however, rejected him, and while he was still talking to Ahriman, the true Ohrmazd was born, whom Zurvan thereupon instructed to rule and order all things.[20]

A divine tetrad figures importantly in Hindu mythology. Shiva is the generative principle, the four-armed and fourlegged great lord of procreation, the gigantic Phallus, identical with the Vedic storm-god Rudra, "the Roarer." His home is in the Himalayas where he lives in perfect marital happiness with his wife, Parvati the Great Mother, symbolized by the female generative organ, and known also by many other names, among them especially Devi (goddess), i.e. *the* goddess par excellence. Parvati assumes terrifying forms also, such as that of Kali; as such she carries in her many arms a great array of weapons, and demands bloody animals and human sacrifices. She is also known as Shakti ("Power"), and, as a medieval ode puts it, "If Shiva is united with Shakti, he is able to exert his powers as lord; if not, the god is not able to stir." Anyone who truly grasps the goddess's complete nature can master the whole universe, because he becomes one with her. In her resides all love. Her devotees call upon her as children addressing their mother, and she cherishes them, taking them to herself, so that they at last become one with her, experiencing a flood of supreme joy, and tasting boundless, intense bliss.

This divine couple had two children: Ganesha, god of wisdom and remover of obstacles, and Kartikeya, god of war and patron of thieves. Shiva's vehicle is the bull Nandi, and Parvati's is a lion.

Shiva, incidentally, is also Nataraja, "Lord of the Dance," who, when attacked by the demon Muyalaka, pressed his toe upon Muyalaka's back, until he broke it, and then, with him underfoot, danced the cosmic dance of creation, maintenance, and destruction.[21]

The last tetrad we shall refer to her is central to Japanese mythology. Izanagi ("The Male Who Invites") and Izanami ("The Female Who Invites") were brother and sister who had union and procreated a great variety of divinities in many different ways. From the left eye of Izanagi, also called the August Male (his sister-wife is also the August Female), was born Amaterasu, the "Heaven Shining," the sun goddess, and from his nose, Susanowo, the "Impetuous Male." These two couples occupy the central place in Japanese cosmology. Amaterasu is resplendent and shining, and receives

from Izanagi the Plain of High Heaven as her dominion. Susanowo is dark, and the rule over the Sea Plain is given to him. He becomes desirous of visiting his mother Izanami, who in the meantime had died of burns suffered in her genitals when she gave birth to the god of Fire and now inhabits the Land of Darkness. Izanagi is furious at this impertinence of his son and banishes him from the land. Susanowo thereupon resolves to take leave of his sister, who, however, mistakes his approach for an attack and meets him fully armed with bow and arrows. Susanowo assures her of his peaceful intentions and suggests that they take an oath together and produce children, which they do.[22]

A number of common features can be distilled from these tetrad myths: the divine tetrad consists of parents and two children, usually a son and a daughter, but occasionally two sons. The four deities making up the tetrad stand for, or are in control of, the major component parts of the world, such as air, moisture, earth, and sky (Egypt); heaven, air, water, and earth (Sumer); or they represent a combination of such major components of nature and of cosmic principles, such as earth, vegetation(?), storm (i.e., rain), and fertility (Hittites); heaven, sea, rain, and fertility (Canaan); time(?), earth, sky, and female fecundity (Greece); sowing (or agriculture), abundance, sky, and marriage (Rome); male principle, female principle, heaven (or sun), and sea (Japan); or else they stand for cosmic principles and concepts, such as time (a hermaphrodite, pointing both backward to the past and forward to the future), light, and darkness (Iran); procreative principle, fertility principle, wisdom, and war (India).

Another recurrent characteristic is that the daughter in several tetrads is a goddess of both love (the fertility principle) and war (the destructive principle); thus in Hittite, Canaanite, and Japanese mythologies; in Hindu mythology, the same double role falls to the mother goddess. In several tetrads the mother goddess is conceived of as clasping her children, both gods and men, to her breast and suckling them (in Sumerian, Canaanite, and Hindu mythologies).

In at least one mythology (Hindu) one of the gods forming the tetrad is Wisdom, and the power of the Father is said to depend on his union with the Mother.

Mention can also be made of the separation of the Son and the Daughter, which in Egyptian mythology (as well as in many others in which no tetrads can be discovered)[23] figures as a precondition for the establishment of the existing cosmic order, and of the representation of creation as a victory of the creator-god over opposing forces (in Iranian and Hindu mythologies).

4 | *The Father and the Mother*

We are now ready to turn to the testimony of the Kabbalistic literature itself, and to review those passages which give evidence of "slippage" from the symbolic into the mythological realm. These passages contain numerous accounts of episodes in the life of the divine Father, Mother, Son, and Daughter, which in their sum total amount to veritable biographies. As we shall see, so many of these episodes are clearly mythological that in the face of their cumulative evidence the contention that all this is merely mystical symbolism and speculation about the "aspects," or "emanations," or even "elements" of a one and only God, must appear as pious fiction. The four entities of the godhead in these passages function as independent persons who address, converse with, act upon and react to, each other. Moreover, the deeds they perform, the experiences they undergo, and the feelings they display are all well couched in unmistakably mythological terms, strikingly similar to the tetrad myths sketched above.

To begin with, let us refer again to the fact that the explanation of the four consonants of the Tetragrammaton is given in sexual-familial terms. The four letters, as we have seen, are not only stated to symbolize (or stand for) Wisdom, Understanding, Beauty, and Kingship (which in themselves could be understood as purely conceptual attributes of God), but are also identified with Father, Mother, Son, and Daughter, respectively. In addition, as we have likewise seen, reference is made to the manner, purely sexual, in which these divine components (or may we already be permitted to call them "persons"?) originated: the Father brought forth the Mother, then copulated with her, and thus the Son and the Daughter were born.

The relationship between the Father and the Mother is discussed in numerous other passages as well, of which a few are presented here:

"Never does the inclination of the Father and the Mother toward each other cease. They always go out together and dwell together. They never separate and never leave each other. They are together in complete union."[24] We have seen above that this mythological motif (or "mythologem") is contained in the Egyptian myth of Geb and Nut, and the Hindu myth of Shiva and Parvati. Here we may add that the mythologem of the World Parents, of the Sky-father and Earth-mother as the progenitors of the universe, of their clinging together in a permanent embrace, of the timeless bliss they enjoy in their complete and ceaseless union, is quite common all over the world,[25] which in itself renders it most unlikely that the author of the Zohar happened by coincidence to hit upon the same idea simply on the basis of his mystical speculations about the meaning of the first two consonants of the Tetragrammaton.

In another Zoharic passage, the sexual union of the Father and the Mother (here referred to as "Tzaddiq," i.e., Righteous One, and his "Female") is described in unflinching physiological detail:

> When the seed of the Righteous is about to be ejaculated, he does not have to seek the Female, for she abides with him, never leaves him, and is always in readiness for him. His seed flows not save when the Female is ready, and when they both as one desire each other; and they unite in a single embrace, and never separate. . . . Thus the Righteous is never foresaken.[26]

The unceasing love between the Father and the Mother, and its tangible expression, their permanent union, earned them the name "Companions" (*re'im*):

> The Father and the Mother, since they are found in union all the time and are never hidden or separated from each other, are called "Companions." . . . And they find satisfaction in permanent union. . . .[27]

The Supreme Mother is called "Companion" (*ra'aya*), because the love of the Father never departs from her.[28]

The marital embrace of the father-god and the mother-goddess is so tight and so permanent that the two give the impression of one body, androgynous in nature, like Zurvan in ancient Iranian mythology. The emergence of this idea in Jewish mysticism can be traced back to Joseph ben Abraham Gikatilla (1248–1305), whose writings influenced the author of the Zohar and who, reciprocally, was influenced by the Zohar.[29] In fact, Gikatilla warned against the belief, held by contemporary or earlier Kabbalists, that the deity actually had the physical form of an androgyne:

> He who understands this mystery will understand all the *Merkaboth*[30] and all the Grades of Emanation which take the shape of receiver and influencer. And this is the mystery of the androgyne.[31] Not as if there was there the actual shape of an androgyne, God forbid that one should believe such a thing and broadcast such a calumny. . . . [But] each Grade of all the Grades of YHWH, blessed be He, has two faces. One face which receives from the one above it, and a second face which emits good to the one beneath it, until it reaches the navel of the earth. Thus, each Grade has two aspects, a [feminine] power of receiving . . . and a [masculine] power of emanating . . . and in this manner the *Merkaboth* are called androgyne. . . . This is a great mystery among the mysteries of the Cherubim, and the mystery of the shape of the Merkaba.[32]

In the sequel the author makes it clear that, when speaking of the androgynous character of the godhead, he has in mind a double body joined back to back, with two front sides looking in opposite directions—the classical, Midrashic concept of the androgyne.[33]

In spite of Gikatilla's warning, however, the Kabbalistic tendency to discern a male and female element in the deity could not be suppressed. In fact, it remained an established doctrine that God consisted of male and female components. Thus we read in the Zohar:

> The Female [component of the godhead] spread out from her place and adhered to the Male side, until he moved away from his side, and she came to unite with him face to face. And when they united, they appeared as veritably one body. From this we learn that the male alone appears as half a body . . . and the female likewise, but when they join in union they seem as veritably one body. . . . [On the Sabbath] all is found in one body, complete, for the Matronit clings to the King and they become one body, and this is why blessings are found on that day.[34]

Moses Cordovero (1522–1570), the influential Safed (Palestine) Kabbalist, expatiates on the subject repeatedly in his *Pardes Rimmonim* ("The Pomegranate Orchard"), which he completed in 1549. Typical of his approach is the following comment on the highest of the ten Divine Emanations, or Sefirot, called Crown: "The Crown itself is comprised of Male and Female, for one part of it is Male, the other Female. . . ."[35]

The view that the deity is androgynous or hermaphroditic in nature, if not in form, must have existed several centuries prior to its first explicit mention by Gikatilla. For we read in an early Midrash that "When the Holy One, blessed be He, created man, He created him as an adrogyne."[36] Since it was a pivotal doctrine in Hebrew religion that God created man in his own image,[37] the statement that man was first created in an androgynous shape must have meant that the deity too was imagined as hermaphroditic. This, however, is merely our inference; in no Midrash is there even as much as a reference or an allusion to the hermaphroditic nature of God. In Kabbalistic literature, beginning with the Zohar, on the other hand, with its penchant for sexualizing the entire spiritual world, the doctrine of the male and the female aspects of the godhead had become commonplace, and almost inevitably crystallized into the concept of the androgynous deity.

But to return to the mythical biography of the divine parents, as a result of the enduring marital embrace, the Supernal Mother became pregnant (again like Zurvan in Iranian mythology) and gave birth to a Son and a Daughter:

> The Supernal H [i.e., the Mother] became pregnant as a result of all the love and fondling—since the Y never leaves her—and she brought forth the W [the Son], whereupon she stood up and suckled him. And when the W emerged, his female mate [the Daughter, represented by the second H in the Tetragrammaton] emerged together with him.[38]

The twin birth of the Son and the Daughter took place, according to another version, in the form of the birth of a single but androgynous being. In other words, the second generation of the godhead duplicated in its original shape that of the first. The passage containing this idea combines theogony with cosmogony by referring to the Son as "Heaven" and to the Daughter as "Earth": "Understanding [i.e., Supernal Mother] brought forth Earth [i.e., the Daughter], but the latter was contained in Heaven [i. e., the Son], and they emerged together, joined together back to back. . . ." Then Heaven took Earth and set her in her proper place,

> and when Earth turned to dwell in her place and became separated from the back of Heaven, she was confused and wished to adhere again to Heaven as in the beginning, because she saw that Heaven was bright while she was dark. But then Supernal Light poured forth, illuminating her, and she returned to her place to gaze at Heaven face to face, whereupon Earth was established and became joyful.[39]

This passage is significant not only mythologically but also cosmogonically. It states, as do the mythical cosmogonies of so many peoples, that the sexual union between the Father-god and the Mother-goddess resulted in the birth of Heaven and Earth. At first, Heaven carried Earth upon his back; then he separated from her and placed her beneath and opposite himself. Earth, dark and desolate, tried to reunite with Heaven in the former position. But Heaven turned his radiance upon her, and, basking in the light reflected from Heaven, Earth was content with her place below, which she has occupied ever since. The basic similarities between this cosmogonic myth and those of other ancient cultures are obvious.

Let us now look at the relationship of the parental couple of the tetrad to their children. The Father and the Mother loved their children exceedingly, adorned their heads with many crowns, and showered them with a flood of blessings and riches. However, the Father loved the Daughter more, while the Mother's favorite was the Son. In fact, the Father's love for his Daughter knew no bounds. He called her not only Daughter, but also Sister, and even Mother, and he constantly kissed and fondled her. For the Mother,

this was too much; she suffered pangs of jealousy and reproached the Daughter, demanding that she cease beguiling her husband.[40]

The wifely jealousy of a goddess is a feature frequently encountered in ancient mythologies.[41] It is a true mythological motif, anchored in an oft-recurring human situation whence it is projected out into the divine realm. To maintain, in the face of the above passage, that the Father, Mother, and Daughter figuring in it are but mystical symbols of the different aspects of the One God requires, to say the least, a tour de force. Apart from the intrinsic evidence of the passage itself, its derivation, too, shows that it considered its protagonists as separate personalities. For, it so happens that we know the classical example after which the passage was fashioned. It is contained in a Midrash on the Song of Songs in which the love of God for Israel is made tangible by comparing it to the overpowering love a King felt for his only daughter. In his boundless love, the King was not satisfied to call his daugher "my daugher," but addressed her as "my sister" and even "my mother." And, this is exactly how God addressed his beloved Israel, the Midrash states and proceeds to illustrate its proposition by citing Biblical passages.[42]

It is on this Midrash that the author of the Zohar based his myth of the exceeding love of God the Father for his daughter, the Matronit, using the identical terms of endearment. There can be little doubt that just as in the Midrash the king and his daughter, standing for God and Israel, are two separate persons, so in the Zoharic myth the two divine figures of the Father and the Daughter were also conceived as discrete and independent personages. The jealousy of the Mother was added by Moses de Leon to the Midrashic prototype of this myth, based probably on his familiarity with similar motifs in other mythologies.

As for the divine Mother's love for her Son, she expressed it by holding him against her breast and giving suck to him, and continuing to do so even after he grew up and was ready to marry:

> As long as Israel is found with the Holy One, blessed be He [i.e., the Son], He, so to speak, is in a state of completeness, and He nourishes himself aplenty by sucking the milk of the Supernal Mother. . . .[43]

Only when the Matronit (i.e., the Daughter) was separated from the King (i.e., the Son) did "the Supernal Mother, too, remove herself from the King and cease to suckle him. . . ."[44]

The Mother-goddess suckling her son (or sons) is, as we have seen, a mythologem frequently recurring in accounts of ancient tetrads.

5 | *The Son and the Daughter*

In many mythologies, the older of the two couples which form the tetrad withdraws at an early juncture to a remote position and leaves most of the troublesome dealings with mankind to the younger divine pair. Because of this, most of the myths telling about the lives of the gods focus not on the parent deities, but on their children, the two younger gods. This is certainly the case in seven out of the nine tetrads sketched above, and this is what we find in the Zoharic mythology as well. The passages dealing with the Father and the Mother, or dwelling on the relationship between them and their Son and Daughter, are relavtively short texts, reiterating or alluding to a very few events. In contrast, the passages concerning the Son and the Daughter stretch into lengthy narratives, describing in detail the relationship between them, and especially the tragic phase of their tempestuous love affair, their separation which came about with the destruction of the Temple of Jerusalem and the exile of the people of Israel. An analysis of this material will be contained in the next chapter. But a summary of those features which bear directly upon the Kabbalistic tetrad belongs to the present context.

The terminology itself is complex and confusing. The Son is called "the King," "the Holy One, blessed be He," Zohararіel (meaning "Splendor of Ariel," Ariel being a name of the altar, and itself meaning "Lion of El"), Adiryaron ("The Mighty One Sings"), Aktariel ("My Crown is El"), Tetrasia ("Four God," referring to the Tetragrammaton, or to God as the ruler of the four elements, air, earth, water, and fire),[45] as well as "Heaven," as we have seen above.

His sister-wife, the divine Daughter, has even more names: Malkhut ("Kingship," the name of the tenth Sefira), Shekhina ("Dwelling"), Matronit (Matron or Lady), "Pearl" (or "Precious Stone"), "Discarded Cornerstone,"[46] as well as the "Community of Israel," "Female," "Moon," "Hart," "Earth," "Night," "Garden," "Well," "Sea," "The Supernal Woman," "The Light Woman." According to Joseph Gikatilla, "in the days of Abraham the Shekhina was called Sarah; in the days of Isaac—Rebekah; and the days of Jacob—Rachel."[47]

The Son and Daughter, or, as we shall refer to them from now on, the King and the Matronit, were destined to marry, like many a brother and sister in divine families. When their marriage took place is not stated, but it seems that it could not be celebrated until Solomon had built the Temple in Jerusalem, which was to serve as their wedding chamber and thereafter as their bedroom.

The problem of incest involved in the marriage of the King and the Matronit arose but did not bother the Kabbalists. Their view was that under ideal circumstances, which, of course, prevail in heaven, all unions are permitted, because "Above on high there is neither incest, nor cutting off, nor separation, nor keeping apart; therefore, above on high there is union between brother and sister, and son and daughter."[48]

While the love between the King and the Matronit was thus licit, it was very different in character from that between their parents. Where the steady, solid love of the elder couple earned them the name "Companions," the love affair of the King and the Matronit was marked by quarrels, temporary separations, and tempestuous reunions, so that the pair was properly referred to as "lovers" (*dodim*).

The reason for many of the difficulties besetting the King and the Matronit was that she became closely associated with the People of Israel (this is why she was often referred to by the name "Community of Israel," Knesseth Yisrael). Hence, when the People of Israel sinned, this resulted in a separation between God, the King, and his wife, the Matronit.

The visible expression of their separtion was the destruction of the Temple, their bedroom. Invisible, but no less painfully felt, was the consequent impairment of the King's power, an idea reminiscent of the notion of Hindu mythology that the male god (Shiva) is powerful only when united with the goddess (Shakti), but is unable even to stir without her.[49] As expressed repeatedly in Kabbalistic theosophy: "The King [i.e., God] without the Matronit is not a king, is not great, and is not praised. . . ."[50] Therefore, the separation of the King and the Matronit was a calamity for both the people of Israel and the godhead itself.

In other mythologies, as well as in the Zohar, it is a commonplace that divine acts influence the fate of men. The reverse of this idea, that human deeds have a spontaneous, almost automatic effect on the fate of the gods, is not, as far as is known to me, a part of pagan mythologies. But precisely this idea plays an important role in Kabbalistic mythology. Two examples, expressing at the same time the close analogy between the marriage of man and woman and that of the King and the Matronit, will suffice:

> The groom and the bride, as soon as they receive the seven blessings under the wedding canopy, become united following the Supernal example. And therefore, he who commits adultery with another's wife damages the union and, as it were, causes a separation on high into two authorities. Because the union of the Community of Israel [i.e., the Matronit] is only with the Holy One, blessed be He [i.e.,

> the King], such an adulterer "Robs his father and his mother"[51]—"his father," this is the Holy One, blessed be He; "his mother," this is the Community of Israel.[52]

That is to say, an adulterer, who causes separation between a man and his wife, wreaks grave damage in heaven also, by causing separation between the divine couple.

The second example is a passage which expresses the idea that a man is supposed to practice *imitatio dei* by marrying and begetting a son and daughter, thus reproducing, in flesh and blood, the divine tetrad; and that, by failing to do so, he "diminishes the image" of God, causing separation between members of the divine tetrad:

> When is a man called complete in his resemblance to the Supernal? When he couples with his spouse in oneness, joy, and pleasure, and a son and a daughter issue from him and his female. This is the complete man resembling the Above: he is complete below after the pattern of the Supernal Holy Name, and the Supernal Holy Name is applied to him. . . . A man who does not want to complete the Holy Name below in this manner, it were better for him that he were not created, because he has no part at all in the Holy Name. And when he dies and his soul leaves him, it does not unite at all with him because he diminished the image of his Master.[53]

6 | *The Tetrad as Myth*

The above analecta will have to suffice at this stage of our efforts to piece together a mythological biography of the divine tetrad of the Kabbala. That we have to do here with polytheistic myths or, at least, myth fragments cannot be doubted. But if so, it remains now to give consideration to the question of the meaning of these myth fragments for the author of the Zohar (and of the other Kabbalistic treatises quoted), and for the followers of the Kabbala, the *m'qubbalim,* who believed in and were deeply influenced by these writings and doctrines. Two problems at once become apparent.

One is that the Kabbala-believing Jews, no less than their co-religionists who disapproved of the Kabbala, were strict monotheists. The tenet that there is only One God was equally axiomatic for both groups. Any question as to the possible polytheistic meaning of the passages quoted above would undoubtedly have met with the most vehement and indignant denial on the part of the Kabbalists, although their opponents were wont to accuse them of precisely such pluralistic heresies.[54] To the believers, however, the

mystical doctrines and the books expounding them simply could not contain anything so blasphemous—indeed, anything that was not in complete accord with the teachings of pure faith first embodied in the Bible.

If it was pointed out to them that this or that passage in the Zohar smacked of polytheistic heresy, their answer was ready: what might seem heresy in a passage was not its *true* meaning, which could be understood only by immersing oneself in the "mysteries" (*razin*) of the hidden truths. To their thought processes, inured to and conditioned by turns of expression such as "this means," "as if," "as it were," and the like, with which every page of the Zohar is replete, any passage, even one speaking quite clearly of two or four deities, would appear to be referring to the One God in His various aspects, the very existence of which was one of the greatest "mysteries."

While such must have been the conscious and habitual mental processes which made the Zoharic doctrine of the tetrad unexceptionable to the Kabbalists, that doctrine struck a different chord in the subconscious realm of emotional response. Man everywhere fashions his gods in his own image, and familism was, and has remained until quite recently, a most important factor, if not the central one, in the socio-psychological image of the Jew. The Jew could not imagine a Jewish life without the family, nor one not centered around the family. The lone, aloof God, adored by the Jews up to the time of the Kabbalistic upsurge, could not satisfy the emotional craving which sought a reflection of earthly life in the heavenly realm. The lone, aloof God, even if cast in the image of the father, even if surrounded by all his heavenly hosts, the angels and archangels, functioning as the heavenly patrons of the elements of which nature and mankind were composed, could not be recognized as a reflection in God of the human condition. And vice versa, human existence, always appearing to Jewish consciousness in the multiple form of man, wife, and children, could not be recognized as the true reflection of God, in whose image man was said to have been created, as long as that God was alone.

The removal of this barrier of non-correspondence was a stroke of genius of Jewish mysticism. The divine tetrad, however successfully explained away on the conscious level, evoked an immediate response on the subconscious emotional level. Within it, the similarity of God and man was established down to small details. By marrying and procreating children, the Jewish man now fulfilled a great God-pleasing deed, not only because God commanded him to do so—that alone, one out of 613 commandments, would not explain the central importance of family life—but because in doing so he engaged in an *imitatio dei,* an emulation of God, of the most intrinsic and highest order. By uniting with his wife, begetting children, and maintaining his family, the Jew acted—now he knew—exactly as God

did, because He too lived on high in a family circle of His own, with His Wife, His Son, and His Daughter. And more than that: by marrying and begetting children, man directly contributed to the well-being of the Divine Family, promoted the happiness and the completeness of the Supernal Couple and their children. The emotional satisfaction derived by the mystic from this belief, however much or little of it was allowed to rise over the threshold of conscious knowledge, contributed in no small measure to the popular appeal of the Zoharic doctrine.

The second problem centers around the authors of the Kabbalistic treatises—and, in particular, the author of the Zohar. Were they aware of injecting polytheistic ideas into Jewish faith and, if so, from where did they (or he) take the doctrine of the divine tetrad? If not, what train of thought led them to these concepts?

Let us begin by assuming, as all or most modern students of Jewish mysticism have, that Kabbalistic theosophy is nothing but the result of mystical speculation about the nature of God, and that the passages describing the Father, the Mother, the Son, and the Daughter and their interrelationships are free inventions created for the purpose of rendering various aspects of the One Divinity intelligible. In this case, we must also assume that the similarities between these inventions and the details contained in the mythologies of other religions about their respective tetrads were due to sheer coincidence. But this is highly unlikely, if not impossible, because the similarities are too numerous, too detailed, and too complex. It is impossible that, beginning with the name YHWH as the only point of departure, mystical speculation should develop a system of a divine tetrad which fits in as completely as the Zoharic one does with all the other ancient tetrads, from Rome in the West to Japan in the East.

We must, therefore, conclude that the author of the Zohar worked with a much greater supply of raw material than the Tetragrammaton alone. From where he drew his knowledge about other tetrads, and how much he knew about them, cannot at this stage be determined. Yet that Spanish Kabbalists were familiar with non-Jewish religious systems, and not only those that flourished around the Mediterranean Basin, is a fact that has been recognized by no less an authority on Jewish mysticism than Professor Scholem, who has pointed out that the teachings of Abraham Abulafia (a contemporary of Moses de Leon; born in Saragossa in 1240, died ca. 1291) "represent but a Judaized version of that ancient spiritual technique which has found its classical expression in the practices of the Indian mystics who followed the system known as *Yoga*" including such features as breathing, body postures, ecstatic visions, etc.[55] If Yoga could influence Abulafia, one is permitted to assume that Indian mythology may have been known to,

and reflected in, the thinking of Moses de Leon. A knowledge of Indian theosophy could have reached 13-century Spain, just as knowledge of Yoga practices, through the intermediacy of the Arabs. As we have seen, it so happens that the Zohar's tetrad shows greater similarity to the Indian than to any other tetrad. The idea that, if not united with the goddess, the God is powerless, found in almost identical phrasing in both the Zohar and Indian mythology, is an especially striking instance.

But if Moses de Leon knew of "pagan" divine tetrads, did he consciously include the idea in his Zohar? To answer in the affirmative would be tantamount to charging him with willful propagation of idolatrous heresies, and I do not believe this was the case. The idea that the Godhead was androgynous by nature was a theosophic doctrine latent in Judaism for many centuries. As we saw above, Philo of Alexandria discerned a male and a female element in the deity as early as the 1st century C.E. Thus when Moses de Leon came to explain the "hidden meaning" and the "true significance" of the Tetragrammaton, he followed old, if indistinct, paths interpreting its first two letters (YH, which in themselves are a short form of the name of God) as referring to the male and female elements in God, identified as Wisdom and Understanding. When speculating about the third and fourth letters, his thinking was influenced by what he knew and remembered of the "pagan", tetrads, and possibly in the first place of the Indian one. The third and fourth letters became identified in De Leon's mind with the mystical offspring of the original divine couple. Had he followed the Indian example, he would have made both children males. But the fourth letter of the Tetragrammaton was an H, like the second one; therefore it, too, had to stand for a female divinity. Thus a son and a daughter were made to form parts of the deity.

Once the four mystical aspects of the deity were delineated, further speculation as to their nature and interrelationships led to that inadvertent slippage referred to in the beginning of this chapter. Probably without being aware of his mental processes, De Leon referred again and again to the four aspects of the godhead, briefly for the most part, but with decreasing restraint, as if they were separate persons. Before long, he felt no hesitation in attributing to the four persons interrelationships and feelings which made sense only if one regarded them as four separate gods, very human in their behavior, emotions, and reactions. In supplying details, De Leon again drew upon his familiarity with other tetrads, whether consciously or otherwise. His cognitive process must have been similar to that of the prophets and poets of the Hebrew Bible who used phrases in praise of God and attributed deeds to Him which had been applied, in exactly the same terms, to the pagan gods Baal and Bull-El by their Canaanite predecessor.[56] As is well

known, in the old days quite a few polytheistic references did in this manner slip into the Biblical image of God, and this is presumably what happened again two millennia later, in the case of Moses de Leon.

To sum up: On the conscious level, De Leon spoke of four aspects of the Godhead, and this is what his theosophic teachings were taken to mean by the everwidening circle of Kabbalists. But, in his endeavor to give emphatic, vivid expression to his ideas, he resorted to a rich array of mythological and sexual imagery. The features of this imagery grew out of De Leon's familiarity with Indian and other pagan tetrads. Without being aware of what he was doing, in speaking of the marriage of the Father and the Mother, the subsequent birth of their Son and Daughter, the emergence out of the Mother's womb of the androgynous Heaven-and-Earth, their separation, the love of the Father for the Daughter, the jealousy of the Mother, the suckling of the King (the Son) and the Matronit (the Daughter), etc., he composed a tetradic myth cycle. He set out to establish a doctrine of quatrinity, of the Divine condition of being fourfold, and ended up with the myth of a tetrad, a group of four separate and independent deities.

If the author, the master himself, was unaware of all this and knew only of the mystical symbolism of the Godhead's four aspects which his teachings purported to explore, one need little wonder that his followers felt no qualms in accepting his doctrines. They *knew* intellectually that whatever they read in the Zohar about the Father, Mother, Son, and Daughter referred, in its true meaning, to the four aspects of the one Godhead. Yet, at the same time, they responded emotionally not to the "true" meaning and purport of the statements, but to what the words actually said. Such simultaneous response on two levels is not an infrequent phenomenon. The Kabbalists not only gained insight into the mythical nature of the Godhead from Zoharic accounts, but also derived a quasi sensuous emotional satisfaction from learning about the sexual and familial life of the divine tetrad, which gave mythical sanction to the corresponding aspects of their own life on earth. And, although this second-level response remained subconscious, it was in large measure due to it that the Zohar, and with it Kabbalism, achieved such remarkable popularity in Judaism.

VI

Matronit— The Goddess of the Kabbala

Let us now turn our attention to the fourth person of the Kabbalistic tetrad, the Daughter, who, in addition to the old Talmudic name of Shekhina, is referred to in Jewish mystical literature by a profusion of names, epithets and appellatives, but most frequently by the Latin loan word *Matronita,* that is "the Matronit," or the Matron. Of the four persons of the Kabbalistic tetrad it is she who plays the greatest role as the central figure in both divine happenings and relationships, and the occurrences through which human fate, and in particular the fate of Israel, is propelled forward. She is the central link between the Above and the Below. She is the person through whom man can most easily grasp the ineffable mystery of the deity, and who most fully identifies herself with the interests, the joys, and the woes, of Israel. She is unquestionably the most poignant, and at the same time most Jewish, expression of the idea of a goddess.

Yet, and this is a striking example of perhaps the most fascinating facet of the history of religious and mythical ideas, there is a detailed similarity between the life history, character, deeds and feelings attributed by Jewish mysticism to the Matronit, and what ancient Near Eastern mythologies have to say about their goddesses who occupy positions in their pantheons.

In myths, epics, narratives, and visual representations these ancient Near Eastern goddesses are described and depicted in clear, realistic, down-to-earth colors, without the veiling effect the mystical approach of the Kabbala has on its goddess figure. A glance at them will, therefore, materially aid our understanding and characterization of the goddess of the Kabbala, the Matronit.

1 | *The Goddess of Love and War*

Three or four examples will have to suffice to introduce to us the goddess who played a central role in the religious ritual as well as popular consciousness of all Ancient Near Eastern people. Her name varied from culture to culture—Inanna in Sumer, Ishtar in Akkad, Anath in Canaan—yet her character remained the same for centuries, even millennia. The life domains in which she primarily manifested herself were love and war, and her personality exhibited everywhere the same four basic traits of chastity and promiscuity, motherliness and bloodthirstiness.

The oldest of them was Inanna, the great Sumerian goddess of love and war, the tutelary deity of Uruk (the Biblical Erech), whose prominence in the Sumerian pantheon was well established by the 3rd millennium B.C.E. That she was regarded a virgin is evident from the two epithets which accompany her name: in myths and other texts she is most frequently called "the maid Inanna" and "the pure Inanna." Yet throughout Sumerian history she was the goddess primarily responsible for sexual love, procreation, and fertility, who freely gave herself to Dumuzi (Tammuz), the earliest mythological ruler of Sumer, and thereafter became the wife of all Sumerian kings. Nor was she immune to the advances of ordinary mortals: an old Sumerian story tells of a gardener who one night managed to take advantage of Inanna's utter weariness and had intercourse with her. Upon awaking in the morning, Inanna was enraged over the indignity, and the vengeance she wrought seems to us to have surpassed all reason. But her behavior was in keeping with her character, for she was a goddess of boundless rage and ruthless destruction, "the lady of battle and conflict," who had "great fury in her wrathful heart." It was she who armed King Hammurabi (ca.1728–1686 B.C.E.) with mighty weapons, and was his "gracious protecting genius." More than a thousand years later, in the days of Nabonidus (555–539 B.C.E.), she was still worshipped at Uruk in a gold-clad cella, driving a chariot to which were harnessed seven lions.[1]

The direct heir of Inanna in Mesopotamia was Ishtar, the great goddess of love and war in the Akkadian pantheon. The identity of the two is attested

by the fact that in some Akkadian texts the two names are used interchangeably. In the Babylonian Ishtar, however, a certain shift occurred in the balance between the virginal and promiscuous poles of her character: her virginal aspect was underplayed, while her promiscuity was emphasized to the extent of making her a divine harlot. In many texts Ishtar is spoken of as the "Cow of the Moon-God Sin," and in this capacity she ruled over the plants, watered them and made them grow. An incantation for childbirth tells of this "Cow of Sin" that she was impregnated by a "restless young bull," and had great difficulty in bearing her young, until two genii of heaven helped her. In her human form, her love easily turned to hate: she first loved then destroyed, a long line of divine, human, and animal paramours, including a lion, a horse, a bird, a gardener, several shepherds, the hero Gilgamesh, Tammuz, etc. She also was the wife of human kings, such as Sargon of Agade. Her influence extended over all mankind and the entire animal kingdom: when she entered the Nether World, neither man nor beast copulated; when she emerged, all of them were again seized by sexual desire. But she was also the mother of the country, who said of herself, "It is I myself who gave birth to my people," and the mother of several gods among whom the Fire-god was the first born. One of her titles was "sweet-voiced mistress of the gods." Yet she was also "the most awesome of the goddesses," "Ishtar of the battlefield," clad in divine fire, carrying the melammu-headwear, who would rain fire on the enemies. It was she who gave victory to her lovers, the Babylonian kings, entrusting her mighty armed forces to them. Among all the arts of war she was specially interested in charioteering: in the early stages of her career she tried to win the love of Gilgamesh by promising him "a chariot of lapis and gold," and more than a millennium later, in the Ptolemaic period, she was still known as "mistress of Horses, lady of the chartiot." When not engaged in love or war she was sitting, awe-inspiringly, on her lion-throne.[2]

The Canaanite Anath, with whose exploits we have become acquainted above in Chapter II, is so close in character and attributes to Inanna and Ishtar that she must be considered as merely the western variant of the great Mesopotamian goddess.

The Persian counterpart of the great virginal-wanton-motherly-warrior goddess was Anahita. Although the phonemic resemblance between "Anath" and "Anahita" is purely coincidental, the worship of Anath may have spread as early as the 1st millennium B.C.E. from the Mediterranean shore as far east as the upper reaches of Euphrates, as indicated by the name of an Assyrian township, Anat (today Ana), a few miles lower down the river from Dura Europos. The worship of Anahita, Herodotus informs us (in a passage in which he makes the curious mistake of writing "Mithra" instead

of "Anahita"), was learned by the Persians from the Assyrians. Other Greek authors state that the cult of Anaitis (as they referred to Anahita) corresponded in every respect to the Babylonian cult of Ishtar, and that the representations of Anaitis were shaped after those of Ishtar.

In the Avesta, the sacred writings which ancient Iranian tradition attributes to Zoroaster (who probably lived in the 10th century B.C.E.) but which did not assume their extant form until the early Sassanian period (3rd–4th centuries C.E.), an entire chapter (Yasht v) is devoted to her. Her full name was Ardvi Sura Anahita, or "The High, Powerful, Immaculate," and she is described as "a beautiful maiden, powerful and tall, her girdle fastened high, wrapped in a gold-embroidered cloak, wearing earrings, a necklace and a crown of gold, and adorned with thirty otter skins." She is, thus, unmistakably a virgin goddess, like her Sumerian, Akkadian, and Canaanite counterparts. Yet her virginity, as theirs, did not prevent her from being also the goddess of fertility: she was the goddess of the fertilizing waters, of a supernatural spring, located in the region of the stars, from which flow all the rivers of the world. She was the one who multiplies the herds and wealth, gives fertility, easy childbirth, and ample milk to women, and purifies the seed of men. She was invoked by marriageable girls and by women at the time of childbirth. Nor was she lacking in the attributes of the harlot, and in her sanctuary at Erez in Akilisene, which contained her golden statue, the daughters of the noble families of Armenia used to prostitute themselves to strangers before their marriage. In Lydia, where she was identified with Cybele, the Great Mother, as well as in Armenia and Cappadocia, because the bull was sacred to her she was confounded with Artemis Tauropolos. And finally, just as Inanna, Ishtar, and Anath, Anahita too was the goddess of war, who rode in a chariot drawn by four white horses, Wind, Rain, Clouds, and Hail, bestowed victory on the combatants and gave them sturdy teams and brave companions. Because of this warlike character of hers, she was identified by the Greeks also with Athene, while as the goddess of fertility she appeared to them as identical with Aphrodite. Most commonly, however, she was called in the Hellenistic world the "Persian Diana" or "Persian Artemis." In astrology, the Iranians themselves regarded her as the personification of the planet Venus. Her cult, according to Berossus, was introduced among the Persians by Artaxerxes II (404-362 B.C.E.), who built for her altars and set up her statues in Babylon, Susa, Ekbatana, Persepolis, Baktra, Damaskos (?), and Sardes. From these places, Persian influence carried her cult westward into the Greco-Roman world. At a later period, she was considered the daughter of Ormuzd, and the benefactor of all mankind, mother of all wisdom and queen.[3]

2 | *The Matronit in Popular-Mythical View*

The same four traits of chastity and promiscuity, motherliness and bloodthirstiness, characterize the Matronit, the daughter-goddess of Kabbalistic literature.

According to Kabbalistic theory, the Matronit is but the lowest of the ten Sefirot, the mystical aspects or emanations of the Godhead which, to some extent, correspond to the Gnostic *aeons*. Yet whatever the primary meaning and origin of the Matronit as a theosophic concept, she has been built up in Kabbalistic literature, and especially in the late 13th century Zohar—the holiest book of Kabbalism—into a palpable individuum whose acts, words, and feelings only make sense if she is considered a true mythological deity. Whatever the intention of the authors of Kabbalistic treatises in creating or developing the female divine figure of the Matronit, one thing is certain: among the Kabbalists there could have been very few, who, while reading or hearing about her uninhibitedly described exploits, were nevertheless able to visualize that she was nothing but an aspect of the manifest nature of the one and only Deity. For the masses of Kabbalists—and Kabbalism was a religious *mass* movement among the Jews from the 15th to the 18th centuries—she undoubtedly assumed the character of a discrete divinity, in other words, she was taken as a goddess, separate and distinct from the male deity who, when contraposited to her, was referred to as her husband, the King. The *popular-mythical,* as against the *scholarly-mystical* view of the Matronit had a marked resemblance to the popular Mariolatry of the Latin countries, where the Virgin is not the Jewish woman whose womb God chose to reincarnate Himself in human form—as the official Catholic doctrine has it—but the Mother of God, herself a goddess, who through the ages never ceased to perform miracles, and to whom, therefore, direct and personal adoration is due. This, precisely was the light in which the Matronit appeared to the uneducated or semi-educated Kabbalistic Jews; in contrast to the divine King who, following the destruction of the Jerusalem Temple, withdrew into the remote heights of heaven and made himself inaccessible, the Matronit remained down here on earth, continued to be directly concerned with the welfare of her people, and could be approached directly, any time, any place. She thus supplied the psychologically so important female divine figure in Judaism, a religion in which this element had been submerged for many centuries prior to the emergence of Kabbalism.

The relatively late reappearance of the goddess—I say reappearance

because, as we have seen in the first two chapters, in Biblical times goddesses did figure prominently in popular Hebrew religion—is in itself a remarkable feat of religious resurgence. Even more remarkable, however, is the reappearance in the figure of the Matronit of the four basic traits of chastity, promiscuity, motherliness, and bloodthirstiness, which place her right alongside the great ancient Near Eastern love-goddesses.

3 | *The Virginal Matronit*

Little can be said about the first of these cardinal features in the portrait of the divine Matronit. Virginity, after all, is a state shred by all human and divine females in an early stage of their life history. It becomes remarkable only if, after reaching full nubility, a woman prefers to remain a virgin and actually preserves her virginal state in an environment, whether earthly or Olympian, where the general atmosphere is one of intensive sexual activity or even promiscuity. It becomes more than remarkable if the feminine figure in question herself engages in such promiscuous sexual activity and yet, at one and the same time, retains her virginity. Yet this is precisely the paradoxical chastity characterizing several ancient Near Eastern goddesses, and this is the trait shared with them by the Matronit.

The Virgin Mary, to whom reference has already been made earlier, also belongs to this category of female divinities, and her veneration can be adduced as an additional example which will further facilitate our understanding of the paradoxical virginity of the Matronit. Mary bore Jesus to God, and several other sons and daughters to her earthly husband Joseph, yet she nevertheless remained "The Virgin" and is adored as such to this day. Similarly with the Matronit, who paradoxically retained her virginity while being the lover of gods and men. Her virginity is spoken of in the Zohar in both figurative expressions and direct statements. The Biblical verse about the "red heifer, faultless, wherein is no blemish, and upon which never came yoke,"[4] is applied to her and explained as meaning that the forces of Evil could never overpower the Matronit, "neither Satan, nor the Destroyer, nor the Angel of Death," all of whom represent the forces of Hell.[5] In contrast to the pagan goddesses who all are said to have succumbed to Satan, she, the Shekhina, is a cup full of blessing of which nobody has as yet tasted, unimpaired, that is, virginal.[6] No stranger is permitted to draw near her, he who tries to approach her suffers the penalty of death.[7] In one aspect the Shekhina is identical with the Holy Land, and in this capacity she was never defiled or enjoyed by a stranger.[8]

4 | *The Lover of Men and Gods*

In sharp contrast and logical contradiction to this picture of the virgin Shekhina is the one which depicts her as being enjoyed, in addition to the divine King who was her lawfully wedded husband, also by Satan, other gods, heroes of Biblical history, and many other men. Yet, and this again is a feature she has in common with ancient Near Eastern love-goddesses, no blame is attached to her because of any of these sundry unions. A goddess behaves in accordance with her divine nature, and the human laws of sexual morality simply do not apply to her—this is the common attitude that finds expression in both the ancient Near Eastern and the Kabbalistic myths. As the father-god El says in an Ugaritic mythical poem "... there is no restraint among goddesses."[9]

In the early mythical ages, we are informed in the Zohar, Jacob became the first husband of the Matronit. However, while Jacob was alive, the union was not consummated because, inveterate polygamist that he was, he continued to have marital relations with his two wives and two concubines even after the goddess attached herself to him. Therefore, only after his death, when his spirit entered the Beyond, did Jacob couple with the Matronit.[10]

With her second husband, things were different. This was none other than Moses, who, once she became his wife, separated himself from his earthly helpmate, Zipporah. Having done this, he was allowed to achieve what Jacob never did: to copulate with the Matronit while still in the flesh.[11]

We hear nothing of the Matronit from the death of Moses—when she took him on her wings and carried him from Mount Nebo to his unknown burial place four miles away[12]—to the time when the Temple was built in Jerusalem. As Solomon labored on the construction of the Sanctuary, the Matronit made her own preparations for her union with her divine husband, the King: she prepared a house for him in which he could take up joint residence with her and which, in a mystical way, was identical with the Jerusalem Temple itself. When the great day arrived, her father and mother adorned her so that her bridegroom should become desirous of her.[13]

The King and the Matronit were not only brother and sister, but twins; in fact, Siamese twins, who emerged from the womb of the Supernal Mother in the androgynous shape of a male and female body attached to each other back to back. Soon, however, the King removed his sister from his back, and she, after a futile attempt to reunite with him in the same position, resigned herself to the separation and to facing the King across a distance.[14]

By human standards a marriage between brother and sister would have

been incestuous; not so in the heavenly realm: there, a Zoharic text informs us, no incest prohibitions exist, and thus it was completely proper and licit for the King and the Matronit to marry.[15]

The wedding, a veritable *hieros gamos,* was celebrated with due pomp and circumstance. The Matronit, surrounded by her maidens, repaired to her couch set up in the Temple, there to await the coming of the groom. The curtains round about were decorated with myriads of precious stones and pearls. At midnight, the tinkling of bells he wore around his ankles announced the coming of the King. As he approached, he was accompanied by a host of divine youths, and the maidens of the Matronit welcomed him and them by beating their wings with joy. After singing a song of praise to the King, the Matronit's maidens withdrew, and so did the youths who accompanied him. Alone, the King and the Matronit embraced and kissed, and then he led her to the couch. He placed his left arm under her head, his right arm embraced her, and he let her enjoy his strength. The pleasure of the King and the Matronit in each other was indescribable. They lay in tight embrace, she impressing her image into his body like a seal that leaves its imprint upon a page of writing, he playing betwixt her breasts and vowing in his great love that he would never forsake her.[16]

Some say, that as long as the Temple stood the King would come down from his heavenly abode every midnight, seek out his wife, the Matronit, and enjoy her in their Temple bedchamber. The Sacred Marriage thus became a daily, or rather midnightly, ritual, performed not by the human representatives of the god and goddess who usually figured in the ancient Near Eastern New Year rituals, but by the two deities themselves. This divine union had unsurpassed cosmic significance: on it depended the well-being of the whole world.[17]

Others say that the King and the Matronit coupled only once a week, on the night between Friday and Saturday. In true mythical fashion, this weekly divine union served as the prototype, in other words, as the mythical validation, of the traditionally practiced weekly union between pious husbands and wives.[18] In the Kabbalistic view, when the learned men, familiar with the heavenly mysteries, couple with their wives on Friday nights, they do this in full cognizance of performing a most significant act in direct imitation of the union which takes place at that very time between the Supernal Couple. If the wife conceives at that hour, the earthly father and mother of the child can be sure that it will receive a soul from the Above, one of those pure souls which are procreated in the divine copulation of the King and the Matronit.[19]

But even more than that. When a pious earthly couple performs the act, by doing so they set in motion all the generative forces of the mythico-

mystical universe. The human sexual act causes the King to emit his seminal fluid from his divine male genitals, and thus to fertilize the Matronit who thereupon gives birth to human souls and to angels.[20] The passage in the Zohar in which this particular thought (or mythologem) is expressed is so replete with symbolic expressions calculated to obscure its true meaning that one gains the impression of purposeful avoidance of clarity in order not to offend sensibilities. The King's seminal fluid is referred to as a "river"; the Shekhina or Matronit as "the Sea" or "Living Creature"; the King's male genital is called "the sign of the covenant," and so forth. Yet the meaning of the whole passage is nevertheless clear: it speaks of the sexual union between the King and the Matronit, and the resultant procreation by them of souls and angels.

Yet another version, still preoccupied with the times of divine copulation, speaks not of a weekly, but of an annual cycle. Every year, we are told, the people of Israel sin with tragic inevitability which enables Samael, the Satan (or Azazel) to bend the Matronit to his will. Samael, in the form of a serpent, or riding a serpent, lurks at all times near the privy parts of the Matronit, in the hope of being able to penetrate her. Whether or not he succeeds in thus gratifying his desire depends on the conduct of Israel. As long as Israel remains virtuous, Samael's lustful design is frustrated. But as soon as Israel sins, as they, alas, are bound to do year after year, their sins add to Samael's power, he glues himself to the Matronit's body "with the adhesive force of resin," and defiles her.[21]

Once this happens, the Matronit's husband, the King, departs from her and withdraws into the solitude of his heavenly abode. This unhappy state of affairs continues until, on the Day of Atonement, the scapegoat, which is destined to Azazel,[22] is hurled to its death down a cliff in the Judaean Desert. Samael, attracted by the animal offered to him, lets go of the Matronit, who thereupon can ascend to heaven and reunite with her husband, the King.[23]

The union between the Matronit and the King is described most graphically in a manuscript entitled *Sefer Tashaq*, written in the early 14th century by a Spanish Kabbalist known only as R. Josef. The central portion of this book is a mystical interpretation of the meaning of the letters of the Hebrew alphabet, including the Tetragrammaton, and an abstruse description of the body of the Matronit. The following brief excerpts are taken from the discussion of the mystical meaning of the letters *zayin* (ז) and *ḥet* (ח).

> After the completion of the holy body of the Holy One, blessed be He, which is the Covenant[24] of the Holy One, blessed be He, He pours out the good oil[25] to the Matronit. . . . The letter *ḥet* is

> open to receive the male, that is, the letter *zayin*, which is called the Covenant. . . . The letter *ḥet* hints at the Matronit: as the woman is closed on three sides and is open on the fourth side to receive her husband, so the letter *ḥet,* which is the Matronit, is open to receive the *vav,* the King, the Lord of Hosts. For the legs of the *ḥet* are the legs of the Matronit, which are open, and the beam on top is the body of the Matronit. And the *zayin* is the Covenant in relation to the *ḥet,* and it is complete, and the letter *ḥet* is as in the human body with its two legs spread out, and the body on top is the beam and this is its image;

> Moreover, woman is also like the letter *he* (ה), but in the letter *he* the son does not cleave to her,[26] while in the *ḥet* he does cleave and suck from her. Likewise when Metatron, the great and precious prince, does not suck from the Matronit, he is called *he*—there is a space between the legs, for he does not cleave to the Matronit. But when he sucks from the Matronit and cleaves to her in union, he is called *ḥet* and is called Metatron.[27] Thus far the mystery of *ḥet*. And how many holy chariots has each letter, for each letter is in the image of the Holy One, blessed be He.[28]

A new chapter in the life of the Matronit opened when her bedchamber, the Temple of Jerusalem, was destroyed. Since her husband, the King, was wont to copulate with her only in the Temple, its destruction meant the sudden disruption of the heretofore intensely pursued love-relationship between the two.[29] This event was a stark tragedy for the divine lovers. The Matronit was banished from her holy abode and from the Land of Israel, the King intoned a bitter lament over his great loss, and the Sun and Moon and all that is above and below mourned and cried with him.[30] The separation of the King and the Matronit denuded them of each other and both

remained in a state of "shameful nakedness."[31] Moreover, since it is a cardinal principle of the physical as well as the metaphysical universe that "blessings are found only where male and female are together," the King, when he thus became deprived of his Matronit, lost stature and power, was no longer King, nor great, nor potent.[32]

Soon, however, in true male fashion, the King was no longer able to endure the misery of solitude, and he let a slave-goddess take the place of his true queen, one of the handmaidens of the Matronit who used to "sit behind the handmill." This slave-concubine, who was none other than Lilith, now assumed rule over the Holy Land, just as the Matronit had ruled over it in former times. This act, more than anything else, caused the King to lose his honor.[33]

As to the Matronit, her misery consisted not only in losing her husband and being banished from her palace and land, but she had to resign herself to being violated in her exile by other gods. And although these unions were involuntary on her part, once the other gods were able to take possession of her, she became tied to them, and the children of those other gods, the gentiles, were able to suckle from her just as the Children of Israel had done while the Temple still stood.[34]

Yet whether at home or in exile, the Matronit is irresistibly attracted to the pious men of Israel, and especially when they are engaged in either of the two most meritorious pursuits: the study of the Law and the performance of good deeds. Men of such caliber make it a rule to sleep with their wives only on Friday night: throughout the six days of the week they live as if they had been castrated and devote themselves to their holy works. But, in doing so, do they not run the risk of unblessedness, since, "blessings are found only where male and female are together"? No, because whenever these men are away from their wives, the Shekhina couples with them. Likewise, when such sages keep away from their wives because of the latter's menstrual impurity, or when they are on a voyage, the Shekhina joins them; never are they deprived of the blessed state of male and female togetherness.[35]

Above (p. 128), we have seen that in the Kabbalistic view Rachel, the beloved wife of Jacob, was identified with the Shekhina. Since Rachel is the suffering mother of Israel, and the Shekhina (or Matronit) is the personification of the Community of Israel (see below, Section 5), the identification of the two had a deep emotional appeal. A special mystical *Kavvana*, a procedure of intense mental concentration, was recommended by Isaac Luria (1534–1572), the leading Kabbalistic master of 16th-century Safed, for the purpose of bringing about the reunification of the exiled Rachel-Matronit with her husband, God the King. This Lurianic *Kavvana* is described by Jacob ben Ḥayyim Tzemaḥ (d. after 1665), a Kabbalist and physician, in his anthology of the customs of Luria:

> One must concentrate with a complete concentration on two things, as a result of which one will be beloved Above and well-liked Below, and a thread of charm will be drawn over him on that day, and he will be accepted into the sacred hall of the Matronit. At first he should concentrate on this: at the beginning of the night, when he goes to sleep, he should think and concentrate on raising up his soul into the mystery of the Matronit and into the mystery of the Female Waters, in order to make Leah copulate with Jacob. And when midnight arrives, he no longer has to cause the Female Waters to rise, and therefore at that time he should concentrate a second time, this time on participating in the anguish of Rachel, for at that time she descends down below, into the [world of physical] creation. Therefore he should at that time weep for half an hour or more about the anguish of Rachel and her banishment and her exile, and about the destruction [of the Temple]. And it is especially proper to concentrate on this: Since we sinned, we cast the souls into the husks [i.e., into the unclean physical world] and forced Rachel, who is the Shekhina, to go down into exile among the husks to gather those souls. . . . Because of our many sins she was forced to descend into exile, and thus we caused her all this. And especially he who is from the root of Cain, in whom there is much of the filth of the serpent [see below, p. 242] into which the souls are sunk, does well to cry and wail much, for he has a greater share in that treacherous act [of causing the exile of the Matronit] than the other roots. . . . And thereafter, from midnight on, let him occupy himself with the Torah until the light of morning. And you should concentrate on bringing gratification and elevation to the Shekhina, to Rachel, who stands outside. And you should bring about her restoration through the Torah with which you occupy yourself at that time, so that she be restored by the time dawn breaks, [and be able and ready] to ascend together with the ascent of the morning prayer, to copulate with her husband [i.e., God] through the power which you added to her during the night. And then you will be called Groomsman of the Matronit, if you concentrate on this unfailingly to participate in her anguish and to restore her.[36]

5 | *The Motherly Matronit*

The third characteristic of the virginal and wanton love-goddesses of the Ancient Near Eastern religions, as we shall recall, is their motherliness. By an apparently paradoxical combination of traits, the same goddess

who remains eternally virginal and who is insatiable in her sexual appetite, is also the mother image, the woman who bears, suckles, rears, and protects both gods and men.

In Kabbalistic mythology the trait of motherliness originally belonged to the second person in the tetrad, the Mother-goddess, the progenitress of both the Son-King and the Daughter-Shekhina,[37] but it was transferred to the Daughter, as a few references will show. The Shekhina-Matronit, we read in the Zohar, is the (spiritual) mother of Israel, and as such she is the embodiment of the "Community of Israel" (the Hebrew term for which, Knesseth Yisrael, has the feminine gender). She lovingly suckles all the Children of Israel, thereby providing them not only with nourishment but also with complete well-being. She is, in fact, called the "Lower Mother" in relation to her people, and in contradistinction from her own mother, who is the "Supernal" or "Higher" Mother. The motherly nature is so strong in the Matronit that she is unable to turn away even from the gentile children foisted upon her: after her exile from Jerusalem, when the "other gods," that is, the deities of the pagans, had their will on her, she gave suck to the heathens just as she had wet-nursed Israel.[38]

6 | *The Warlike Matronit*

The fourth characteristic of the virginal-wanton-motherly ancient Near Eastern goddesses is their bloodthirstiness. In the old mythological texts the maiden goddess of sexual love is often described as possessed of the most appalling cruelty. The close to three millennia which had elapsed between those myths and the period in which the Matronit of the Kabbala flourished have, of course, left their mark. In the medieval sources, the warlike traits of the Matronit are drawn with greater restraint. Yet the archaic feature of bloodthirstiness is clearly recognizable in the Kabbalistic references to the Matronit as the chieftain of the divine armies, and the leader of the supernal forces against the opposing human and infernal powers of evil.

It would be futile at this stage to search for connecting links between the bloodthirsty goddesses of the 3rd and 2nd millennia B.C.E. and the warlike Matronit of the 13th century C.E. The idea of a warlike deity was, of course, nothing strange to Biblical Hebrew faith, but, in keeping with the officially embraced monotheism, all supernatural belligerence was attributed to Yahweh, who therefore is referred to as a "man of War," a slayer of dragons, and victor over human enemies whose life-blood crimsons his garments.[39] In Talmudic times (1st–5th centuries C.E.), although the chastised and subjugated Judaism of the Roman and Byzantine eras had long

ceased to think of God as a warrior, a late faint echo of the ancient pagan goddesses of destruction can perhaps be heard in one of the traits attributed to the Shekhina, the personified Presence of God, imagined as a female entity. She was said to take the souls of exceptionally meritorious individuals who were to be spared the bitterness of being mowed down by the Angel of Death.[40] The remarkable thing in this idea is not the combination of compassion and the snuffing out of human life, but that his function or mercy killing was assigned to the female Shekhina. It was, however, only in the Kabbala that the Shekhina, now conceived as a truly mythical female deity, assumed a character reminiscent of the ancient Near Eastern blood-thirsty goddesses.

In the Zohar it is the Shekhina-Matronit to whom the King entrusts all his warlike activities: when he wishes to take revenge on the idolatrous nations, the Forces of Evil awaken, and the Shekhina becomes filled with blood and metes out bloody punishment to the sinners.[41] In her wars against the pagans the Matronit commands myriads of supernatural soldiers falling into many categories, such as "lords of supernal faces," "lords of eyes," "lords of weapons," "lords of lamentations," "lords of trembling," and other armed warriors with six faces and six wings, all of whom gird terrible swords, whose clothes are blazing fire, and whose flaming scimitars fly all over the world. This was the army which the Matronit led against the Egyptians in the days of the Exodus.[42]

In fact, the King completely renounced all direct control of his forces and placed them under the command of the Matronit. He entrusted to her all his weapons, spears, scimitars, bows, arrows, swords, catapults, as well as all his fortifications, wood, stones, and subordinated all his warlords to her, saying: "From now on, all my wars shall be entrusted to your hands." In keeping with this mandate, when the Great Overlord of the Egyptians, who was none other than Samael, leading his six hundred chariots manned by angry warriors (or "accusers," because this battle was, of course, a spiritual rather than a physical contest), charged the fleeing Israelites, it was the Matronit who led the defense and drove the attackers into the sea. Several generations later, when Sisera attacked the Children of Israel, it was again the Matronit into whose hands the enemy's chariots were delivered and who uprooted them from the world.[43]

In a Midrash which represents a later Hebrew version of the ancient apocryphal Book of Enoch (written probably in 150 B.C.E.), a passage deals with the theme of the warlike Matronit. The Hebrew book in question is called *Sefer Hekhalot* ("Book of the Heavenly Halls"), as well as *Sefer Hanokh* ("Book of Enoch"); it belongs to the rich *Hekhalot* literature which flourished beginning with Talmudic times, and was known to the author of the

Zohar and other Kabbalists. Its frame is the visit that Rabbi Yishma'el paid to the heavenly halls, where he was met and guided by Metatron, the chief "angel of the Face," who is none other than Enoch after his translation. The passage referred to reads as follows:

> R. Yishma'el said: Metatron, the angel, the prince of the Face, said to me: In the seven halls stand the four chariots of the Shekhina, and before each hall stand four camps of the Shekhina, and between each two camps flows a river of fire, and between each two rivers the camps are surrounded by mists of purity, and between each two of them stand pillars of brimstone, and between each two pillars are wheels of flame which surround them, and between each two wheels there are flaming torches. . . .[44]

While the interest of the author, like that of the *Hekhalot* literature in general, is focussed on the description of the marvels seen in the heavenly halls, the idea that the Shekhina-Matronit is in charge of the heavenly chariots and armed camps is clearly attested here as being pre-Zoharic.

As in the glorious past, so in the mystical present of the long exile, the miserable Galuth, the Shekhina-Matronit is the warlike defender and deliverer of Israel. But her power to defeat Israel's enemies depends ultimately on Israel herself. The Shekhina-Matronit is always present in the midst of Israel ready to protect it from all sides and against all nations. But when Israel sins, it thereby weakens the hands of the Shekhina, her strength fails, and the great commanders of the other nations, that is, their heavenly guardians, gain the upper hand. But as soon as Israel repents the Shekhina becomes filled with strength; she shatters the power of all those great commanders, destroys the armies of Israel's enemies, and takes revenge on them.[45]

Closely related to the warlike aspect of the Zoharic Shekhina-Matronit is her appearance as an enormous and monstrous being described by the author of the Zohar in terms borrowed from the Midrashic picture of the Behemoth. This mythical cosmic animal is said in the Midrash to be eating every day the grass of the Thousand Mountains and devouring the many beasts that pasture on their slopes, to be drinking in one single gulp all the waters of the Jordan and quenching its thirst from the huge river Jubal, which issues from Paradise.[46] This mythologem is elaborated in two Zoharic passages which describe the Shekhina-Matronit as a cosmic woman monster for whom the Thousand Mountains are but one single bite, who swallows in one gulp the waters of a thousand rivers, whose terrifying arms stretch out in 24,000 (or 25,000) directions, with her claws ready to tear or kill. In her hair are caught thousands of shields, while her hair itself streaks down and away from her, earning her the epithets "Moon with the hair"

and "Comet with the tail." From this long, Lilith-like hair issue hosts of frightful and threatening warlords grouped under such peculiar names as "lords of weights," "lords of severity," "lords of insolence," and "lords of lords," all of whom are also called "lords of purple." No one can escape from the cruel punishment meted out by them, or by Shekhina herself.

From between the legs of this terrifying woman monster emerges an equally terrifying son, the chief angel Metatron, who reaches from one end of the world to the other, and issue two daughters who are none other than the two infamous queens of the she-demons, Lilith and Naamah.

It is consonant with this terrible aspect of the Shekhina-Matronit that her old Talmudic role of death bringer is also remembered and revived in the Zohar, which repeatedly asserts that the words of the Book of Proverbs (5:5) "Her feet go down to death" refer to the Shekhina, symbolically represented by the forbidden tree which for Adam was a "tree of death.[47]

The warlike, monstrous, and bloodthirsty aspect of the Matronit leads us back, for a moment at least, to the question of connections between Kabbala and Hinduism (cf. above, pp. 132–33). The probability of a connection between the two, and especially between the Kabbala and the Tantric and Shivaic teachings of India, has been further developed in my book *The Jewish Mind* (1977), in which, among numerous other topics, I discuss Kali, the beautiful, but at the same time monstrous, Hindu goddess who is one of the many manifestations of Shakti and who thus far has been mentioned only in passing here (p. 121). Just as Kali is conveniently depicted as black, to emphasize her frightening character, so the Shekhina also, says the Zohar, "at times tastes the other, bitter side, and then her face is dark."[48] Marvin H. Pope, in his monumental new commentary to the Song of Songs (in which, incidentally, he devotes 26 pages [pp. 153–79] to a summation of the argument presented in the first edition of the present book), goes even further in calling attention to the similarities between Tantric hymns to the black and beautiful goddess Kali and certain passages in the Song of Songs (especially 1:5).[49] After an extensive and interesting discourse on "black and beautiful," Pope surveys the surprisingly numerous black goddesses and dwells on the "most notorious of all," Kali of India, who is "beautiful, ever young and virginal, and at the same time horrendous, violent, destructive and insatiable in her thirst for blood and flesh, wine and sexual intercourse." Unquestionably, the verse "I am black and beautiful, O daughters of Jerusalem" (Songs 1:5) is strongly reminiscent of certain Hindu hymns celebrating the swart beauty of Kali, and especially the lines "Dark art Thou like the blue-black cloud Whose face is beauteous as that of Samkarshana [i.e., Shiva]."[50] These comparisons add a new dimension, an unsuspected historical depth, to the relationship between Kabbalism and Hinduism.

Another aspect of this relationship is that, despite the geographic distance that separated the Spanish Jews from India, intrepid Jewish authors such as the Kabbalist traveler Abraham Abulafia (see p. 132), his contemporary the Kabbalist translator and author Isaac Albalag, and others did to some extent familiarize the Spanish Kabbalists with Hindu thought and doctrines.[51]

7 | *Mary and the Matronit*

An interesting parallel to the warlike aspect of the Matronit is represented by the development of the Virgin Mary not only into the supreme ruler of the world but into the patroness or goddess of Christian armed might. At the opening of the Council of Ephesus in 431 C.E., Cyril of Alexandria delivered a sermon in which he described Mary as the mother and virgin "through whom the Trinity is glorified and worshipped, the cross of the Savior exalted and honored, through whom heaven triumphs, the angels are made glad, devils driven forth, the tempter overcome, and the fallen creature raised up even to heaven."[52]

Lest one think that the triumph of heaven and the driving forth of devils attributed to Mary was regarded as taking place on a spiritual plane only, let us refer to Narses (ca. 478–ca. 573), the Byzantine general and officer of Emperor Justinian, who looked to Mary for direction on the field of battle, expecting her to reveal to him the time and hour of attack,[53] and the Emperor Heraclius (ca. 575–641), who bore her image on his banner.[54] As early as 438, a portrait of the Virgin, attributed to St. Luke, was sent from Jerusalem to Pulcheria, and subsequently this portrait came to be regarded as a kind of palladium and accompanied the Byzantine emperors to the battlefield until the capture of Constantinople by the Turks in 1453.[55] In the West, the German Knights *(Deutscher Ritterorden)* chose the Virgin as their patroness.[56]

Pope, in his commentary to the Song of Songs, has pointed out that this role of the Virgin Mary as wargoddess and the use of her picture as a palladium and battle standard

> developed early from the identification with the goddess Athena-Victoria. The Emperor Constantine worshiped Athena and Apollo, who appeared to him at Autun before the Battle of Milvian Bridge. Constantine's *labarum*, under which sign Christianity became a religion of conquest, had as its base the saltire or cross chest bands of the soldier and the war-goddess, which continue to this day as the symbol of the Queen of Battles on flags and military uniforms.[57]

Mary, like the Matronit, was considered as having taken over the royal, governing, and controlling functions of God to the extent that her sovereignty actually eclipsed that of God. She was regarded as the imperatrix of the universe, the ruler of the world, the mistress who commands, and the queen of heaven and earth.[58] John of Damascus (ca. 750) called her the sovereign lady to whom the whole creation had been made subject by her son, so that it be preserved through her.[59] St. Peter Damian (1007–72), the Italian cardinal and Doctor of the Church, calls her *deificata*, i.e., "the deified one," and two hundred years later, Mechthild of Magdeburg (ca. 1210–ca. 1285), the German mystic, goes so far as to call her "goddess."[60]

The parallel between Mary and the Matronit extends to other aspects as well. Like the Matronit, Mary was also considered the spouse of God; like her, she came to be regarded as the mother of men in a general, mystical sense; and like her, she assumed the position of the intermediary between God and men through whom led, if not the only, at any rate the best and easiest, way to God. The old pagan goddess to whom the Israelites sacrificed cakes[61] reawakened among the Christians to new life in the Mary whom the Kollyridians, a 5th-century sect of zealous women, worshiped by carrying cakes in a procession in her honor;[62] and among the Jews in the Matronit-Shekhina, whose identity with Asherah was recognized by Moses Cordovero in 16th-century Safed.[63]

8 | *The Meaning of the Matronit*

We discussed a few of the traits which make up the four aspects of the Matronit—her chastity, her promiscuity, her motherliness, and her warlikeness (or bloodthirstiness)—which are the most important components of her personality. The fact that precisely the same four aspects characterize also the ancient Near Eastern love-goddesses, and that their traces can be rediscovered in the Virgin Mary, makes us pause. Whence, we feel compelled to ask, this resemblance, this persistence of the paradoxical goddess-figure in ostensibly and avowedly monotheistic religions? In trying to answer, the alternative of diffusion *versus* independent invention immediately offers itself. The possibility of diffusion is, of course, present: the prototype was the Sumerian Inanna, whose features can be clearly recognized in the Babylonian Ishtar, the Canaanite Anath, and the Persian Anahita. Hebrew monotheism may have been unable to exorcise the tenacious goddess, and it is not at all impossible that, even if she slumbered for several centuries, she awoke and reclaimed some of her old dues in the figure of Mary in Christianity and in that of the Shekhina-Matronit in Talmudic and Kabbalistic Judaism. Yes, not at all impossible. But how can one prove it,

short of the most elaborate research? And if a connection were proven, what would be gained thereby? There still would remain the question of why precisely *this* goddess achieved such a fabulous secondary career, among all the others just as readily available in the rich ancient Near Eastern pantheons? To answer this, we have to shift from comparative mythology to psychology, and once we do this, the question of diffusion *versus* independent invention becomes irrelevant. For whether or not the Matronit (and Mary) goes back ultimately to Inanna, her coming to life in new and very greatly changed religious environments shows that she answered a psychological need in medieval Ashkenazi or Sephardi Jewry as she had in Sumer of the 3rd millennium B.C.E. How can this psychological need be made tangible?

In trying to answer this question, we shall, of necessity, concentrate on the Matronit-Shekhina, the medieval Kabbalistic goddess-figure, with whom this chapter deals. If we want to consider what the Matronit-Shekhina meant psychologically, we must view her entire mythical character comprised of the four major traits discussed above. They present Matronit-Shekhina as the mythologically objectified projection of the all-round woman, the woman who takes on all the shapes, aspects, and appearances of the human female needed by the male of the species not only for biological survival but equally for his psychological existence. The character of his need, which accompanies him from birth to death, from cradle to grave, changes as he lives out his allotted span. No sooner is he born of her, than he wants to be clasped to her ample, motherly breast and given suck by her. As he grows, he needs her protection and direction. As soon as he becomes aware of woman as the opposite sex, he must have her shine on his emotional horizon in virginal purity. When he has to struggle with enemies or is beset by adversity, he relies, in fact or in fancy, on her to fight the forces of evil that oppose him. When he smarts under frustration or is discouraged by failure, he imagines her as the furious female who can do for him what he himself cannot do, fearlessly plunging into attack and fighting his battles. In the routine of regulated marital sexuality, she imparts metaphysical, even cosmic, significance to the act. When homelife becomes monotonous and stale, she is there with the thousand painted faces of her allure and the ever-present promise of her availability. And when the ultimate exhaustion overcomes him, it is hope of her last kiss which makes him forget the bitterness of dying and instead think of death as the beginning of a new life in a happy Beyond.

The Matronit is thus the projection of everything a woman can be in order to sustain man. She symbolizes in her manifold aspects the great affirmation of life, the basic satisfactions one derives from existence, the

comforts one finds in mother, nursemaid, lover, bride, wife, wanton seductress, warrior-protectress, and opener of the gates of the Beyond.

The fact that the image does not lack its contradictory features, betrays something of the male's ambivalence in his relationship to woman. The Matronit, in common with the great ancient love-goddesses, is both virgin and wanton. Virgin, because man must idealize woman: he wants *his* woman to be virginal, to have waited for him through countless aeons, and to remain virginal and chaste even while yielding to his embrace, and to his alone. Wanton, because at the same time, he imagines the woman whose body holds the promise of lust for him as the embodiment of desirability, loved by men and gods, as one who not merely yields to him but arouses him, makes him follow her into and through the labyrinthine mysteries of love. And, paradoxically, but with a deep inner inevitability, he imagines his virgin bride and wanton woman to be one and the same person and projects both self-contradictory characters into one and the same goddess. A third feature with which the same goddess is embellished is that of the mother. This expresses, if not necessarily Oedipal inclinations, at least the desire to recapture in the beloved's embrace something of the happy security of the infant cuddled in its mother arms.

As if this were not enough, the conflated image of the virgin-wanton-mother, in turn, appears as merely one of the two overall aspects united in the goddess: the love aspect, as against which she has another aspect, a cruel and frightening one, that of the pitiless warrior-goddess who sheds blood, extinguishes life, and enjoys doing this as she does making love. And, what is equally paradoxical, man feels himself attracted by the wrathful countenance of this goddess of battle and blood as much as to the virgin-wanton who beckons to him with her chaste-experienced smile, or to the mother who offers him her ample, nourishing breasts.

The goddess thus speaks to man with four tongues: keep away from me because I am a Virgin; enjoy me because I am available to all; come shelter in my motherly bosom; and die in me because I thirst for your blood. Whichever of her aspects momentarily gains the upper hand, there is a deep chord in the male psyche which powerfully responds to it. Her voices enter man and stir him; they bend man to pay homage to her and they lure man to lose himself in her, whether in love or in death.

VII

The Myth of God and the Shekhina

1 | *Scholars and Myth in the Kabbala*

Students of Jewish mysticism have stated more than occasionally that Kabbalistic and Hasidic mysticism contains aspects, or elements, or features they style "mythical." The founder of the Jerusalem school of these studies, Gershom Scholem, went on record to this effect in both his early and late books on Jewish mysticism and the Kabbala. In his classic *Major Trends in Jewish Mysticism* (first published in 1941), he speaks of "mythical metaphors," which "provide the key for a kind of mystical topography of the Divine realm" in the Kabbala; of the Kabbalistic "revival of myth in the very heart of Judaism"; and even goes so far as to state that "the whole of Aggada can in a way be regarded as a popular mythology of the Jewish universe." He speaks of "ancient mythologems scattered among the fragments" of the German Hasidic writings of the 12th century, of the "mythical account" of God's visible glory given by the 10th-century Italian physician and medical writer Shabbatai Donnolo, and even states that "the Zohar is perhaps the classical example of [the] mythical reaction in the heart of Judaism." He makes reference to the Zohar's "myth of Lilith as Adam's first wife," and claims that mythical elements contained in the Aggada were "of

course duly emphasized and occasionally converted into an entirely new myth" by the Zohar, of which "the mythology of the 'great dragon' (Zohar 2:35a) is very characteristic."[1] Similar statements are scattered throughout Scholem's *Major Trends*, and recur in the later books he wrote on the Kabbala.[2]

Of the younger authors on the subject whose work is available in English, let me mention Louis Jacobs, who in his *Hasidic Prayer* speaks of the "mythological language" of the Kabbala, the whole of which, according to him, is "highly charged mythology." After quoting a passage from R. Zeev Wolf of Zhitomer on the role of the *tzaddiq* in the mystical copulation between the congregation and the Shekhina, effected through prayers, Jacobs remarks: "It is hard to see how much further traditional and Orthodox Jews could go than the above in the direction of mythological expression in prayer."[3]

In these and many other comments of scholars about the mythical "elements," "accounts," "metaphors," etc., in Jewish mysticism, we miss one thing that could and should have served as the capstone of the numerous brief and disjointed references to the mythical in the Kabbala: a presentation in full, in a consecutive narrative form, of at least one of the major Kabbalistic myths to whose constituent elements so many allusions are made. There is certainly no dearth today of studies dealing with Jewish mysticism,[4] but their readers will look in vain for even one single example of a full myth as it can be pieced together from shorter and longer segments and references containing single mythologems, motifs, or other elements, and dispersed all over the Kabbalistic sources. In books dealing with mythologies of other nations and religions, the inclusion of such total presentations of myths is the rule.

The question then arises: why did students of Jewish mysticism who so frequently speak of the mythological character of Kabbalistic descriptions of God, the world, man, and the interrelationships between them, not follow the same path? It is always hazardous to try to fathom the motivations that keep scholars from doing something, yet I believe I can venture a guess: the answer, it seems to me, could lie in the conviction of Jewish scholars of the Kabbala and Jewish mysticism that Judaism differed qualitatively from the religions with which mythologies are usually associated. For them, the world of religion, until the emergence of Christianity, was divided into two mutually incompatible realms: that of polytheistic paganism, and that of monotheistic Judaism. Among Jewish historians of Jewish religion, this view was presented most emphatically and in greatest detail by Y'ḥezq'el Kaufmann in his multi-volume Hebrew *magnum opus*, *Toldot haEmuna haYisr'elit* ("History of the Religion of Israel").[5] Such views are, of course, not confined to Jewish scholars. Historians of religion in general considered

mythology the typical mode of expression of polytheistic religions, whose gods and goddesses conducted themselves in a manner reflecting the mores of the nations that worshiped them. Pure monotheism, whether Jewish or Christian, was seen as centering on the one and only omnipotent, omniscient, and omnipresent God, who demanded a strict moral conduct from the believer, a corollary of which view was the denial of the existence of a mythical dimension as far as the relations of God and the world were concerned. Islam, of course, shares this view, and in its insistence on the absolute oneness of God has radically opposed and extirpated from its official doctrine all traces of pagan Arab polytheism.

Something of this attitude still characterizes Jewish scholars specializing in the study of Judaism in general and Jewish mysticism in particular. Scholem himself, although he almost singlehandedly rescued Jewish mysticism from the contemptuous neglect to which the 19th-century founders of the *Wissenschaft des Judentums* had condemned it,[6] was still influenced by the traditional scholarly view that saw in mythological polytheism a lower, and in a supposedly amythological Jewish monotheism a higher, manifestation of the human religious spirit. The "mythical epoch," Scholem writes, was that of "the childhood of mankind": "the truly monistic universe of man's mythological age" was "alien to the spirit of mysticism" which replaced it, although "to a certain extent . . . mysticism signifies a revival of mythical thought. . . ."[7] The Kabbala itself, says Scholem, "contains, side by side with a deep and sensitive understanding of the essence of religious feeling, a certain mode of thought of primitive mythological thinking."[8]

It is not difficult to understand why scholars such as Scholem and his circle, who saw in the mythical elements in the Kabbala a "relapse into . . . mythical consciousness," and spoke of "primitive mythological thinking," were averse to the task of reconstructing a Zoharic or Lurianic myth and of presenting it in a full and consecutive narrative. In any case it is a fact that they did not undertake it. Scholem is actually apologetic about the mythological elements he discerns in the Kabbala when he finds it necessary to aver that "without attempting anything in the nature of an apology [one] cannot fail to notice that it [the Kabbala] contains . . . a certain mode of thought characteristic of mythological thinking."[9]

2 | *The Central Myth of the Kabbala*

As against views such as this, I do not hold that the myth fragments contained in Jewish mystical literature represent "relapses" into the primitive mentality of a bygone "mythical epoch." Mythopoesis, I believe, is one of the highest types of manifestations of the human creative psyche,

certainly ranking with other types of religious speculation and creativity. In fact, I must confess to deriving a certain satisfaction from having been able to demonstrate, first in my book *Hebrew Myths* (which I wrote jointly with Robert Graves), then in a number of essays, and finally in the present book, that the Jewish creativity in the religious realm extended into the field of mythology as well.[10]

Let me then perform the task from which other students of Jewish mysticism have shied away and reconstruct here in outline the myth of God and the Shekhina, or, as they are often referred to in Jewish mystical literature, the supernal King and Queen, which, I believe, is the central myth of the Kabbala and Hasidism. In piecing together this great myth from the original sources, I am resorting to the Jungian method of utilizing relevant materials irrespective of the differences in time periods to which the sources from which they are culled belong. Here it goes:

> At one moment in the course of His infinite existence, God decided to create the world. Since the All was up to that time totally filled with His being, He contracted Himself so as to make room for the created universe. He created the world for the sake of man, and His self-limitation, involved in the act of creation, showed how great was God's love of man, even before He actually created him.
>
> Once the creation of the world was accomplished, the All consisted of two parts: God and the world.
>
> No sooner did Adam become a sentient being than he began to contemplate the physical and spiritual worlds into which he was placed, and committed a grave sin that ever since has dogged the steps of man. God's spiritual being was comprised of ten *Sefirot* (emanations or aspects), but in contemplating God Adam mistook the tenth and lowest *Sefira*, that of *Malkhut*, or Kingdom, which was the Shekhina, the female manifestation of God, for the totality of Godhead. Since the Creator endowed Adam (and through him men in general) with the power of influencing the condition of the Godhead On High, by doing so Adam caused a fissure to occur between God and the Shekhina. Ever since this first original spiritual sin, man has ever and again repeated it—a mythical event that occurred in *illo tempore* is bound to be repeated, reenacted, again and again—and thus reintroduced, and made even more painful, the separation between God and His spouse, the Shekhina.
>
> When, in the course of history, the People of Israel came into being, the Shekhina, God's divine Matronit, became in a mystical way the Mother of Israel as well as the personification On High

of the Community of Israel. As long as the Temple of Jerusalem stood, it served as the sacred bedchamber in which, every midnight, God the King and His spouse, the Matronit-Shekhina, celebrated their joyous marital union. A detailed description, taken from Zoharic sources, of this union was given above (p. 142). The loving embrace of the King and His Queen the Shekhina secured the well-being not only of Israel but also of the whole world.

Some say that the coupling of the divine King and Queen took place not daily but only once a week, on the night between Friday and Saturday. Others even speak of an annual union between them. However that may be, the divine coupling was, and is, profoundly influenced by human behavior, or, to be more exact, by the comportment of Israel. When Israel sins, these sins force the divine couple to turn away from each other; when the people repent, when they are pious and perform the *mitzvot*, God and the Shekhina turn back to each other and unite in love. When the pious husband and wife down here on earth perform the great *mitzva* of *zivvug*, marital union, the mystical power contained in and issuing from this act enables, and more than that, induces, the King and Queen On High to do the same, and thus to become restored to their pristine unity. However, if Israel sins, the transgressions themselves give power to the forces of evil, to the *Sitra Aḥra*, "the Other Side," represented by Samael, to attach themselves to the body of the Matronit, and thereby prevent her from uniting with her husband, her legitimate spouse, God the King.

When the Jerusalem Temple was destroyed, the Children of Israel went into exile, and the Shekhina-Matronit, in her capacity as the mystical embodiment of the Community of Israel, went into exile with them. This was the greatest tragedy in the life of both Israel and God. For not only was the exile of the Shekhina a catastrophic and immeasurably painful disruption of the unity and completeness of the Godhead, it also led to a diminution of the power, the honor, and the very stature of the divine King Himself. Worse than that: since the masculine nature of God the King made it impossible for Him to remain alone without the company of a female consort, He let the place of His departed Queen be taken by Lilith, the evil handmaid, who was the ruler of hosts of she-demons and who now became the slave-concubine of the King, a position that made her the effective ruler over the Holy Land. This is to this day the condition of God above and of the Land of Israel below, as well as of the exiled Community of Israel and their divine matron, the

> Shekhina. Only the coming of the Messiah will put an end to the suffering caused by this situation to Israel, and to their divine parents, God and the Shekhina.

This, in briefest outline, is the Kabbalistic myth of God and the Shekhina. The Lurianic *kavvanot* ("concentrations") and *yiḥudim* ("unifications") which we shall discuss in Chapter VIII are the ritual counterpart, the *dromenon*, of this great, central, cosmic-spiritual myth of God and the Shekhina. The myth itself, the *legomenon*, emerged fully formed in the Zohar in the 13th century. The ritual was not fully shaped until nearly three centuries later, in the Kabbalistic center of 16th-century Safed. Once the *yiḥudim* had become established parts of the ritual practice of the Kabbalists, they secured the survival of the underlying myth of God and the Shekhina, while the myth on its part supplied the meaning of the ritual and validated it by underlining its significance and imperative nature. Together, the myth of God and the Shekhina and the ubiquitous *yiḥudim* that turned the entire panoply of Jewish ritual into a constantly reenacted series of references to that myth, instilled into the Kabbalistic, and later the Hasidic, believer the conviction that his words and acts had a direct cosmic-mystical influence on the state of the Godhead. Nothing else could have endowed the Jew in exile with a firmer conviction, a greater self-assurance, concerning his own religious value and his crucial spiritual role in the world. To say that this conviction counterbalanced the Jewish trauma of living in Exile as a scorned minority would be an understatement: it filled the Jew with the inner certitude that, despite his suffering in the *Galuth*, he towered high above his Gentile tormentor in every respect that really counted in the realm of the spirit.

VIII

YIḤUDIM— UNIFICATIONS

The term *Yiḥud* ("unification," plural *Yiḥudim*) as used in Kabbalistic and Hasidic literature refers to four different types of rituals. One of them is the enunciation of a rather simple declaratory statement, prior to reciting a prayer or performing a *mitzva* ("commandment"), to the effect that the intention of the person doing so is to bring about the unification of God and the Shekhina. The second is an incantation-like recital of the same or similar formulas for the purpose of exorcising a *dibbuq* ("spirit") from the body of a person possessed by it. The third consists of extremely complex mental exercises in which divine names are combined into one in many different ways for the purpose of thus achieving directly two goals: to unify God and the Shekhina, and to unify the soul of the adept who performs the rite with the supernal soul of God. In this type the *yiḥudim* are performed for their own sake and for the direct effect they themselves are supposed to have. Finally, the fourth type of *yiḥudim* serves expiatory purposes; the atonement of sins, and the purification of the person whom sin has rendered impure.

While some of the *yiḥudim* have their roots or antecedents in antiquity, all of them developed into full-fledged and carefully patterned rites only among the Kabbalists of 16th-century Safed. Irrespective of their diverse

purposes, all four types are based on the doctrine that the Shekhina suffers an exile which she shares with her children, the People of Israel; that the exile is a tragic separation between her and her divine husband, the Holy One, blessed be He, which causes unspeakable pain to both of them; that the *yiḥudim* unite them, or at least diminish the distance between them and thus bring pleasure to both; and that therefore *yiḥudim* are the most important religious acts a man can perform.

We shall now have a closer look at each of these four kinds of *yiḥudim*.

1 | *The Zohar on Unifications*

One of the most remarkable innovations of the Kabbala is the idea that it is the supreme duty—and privilege—of the religiously accomplished man to bring about a unification between God the King and His estranged spouse, the Shekhina (or Matronit). We have seen above something of the Talmudic-Midrashic antecedents of the idea that the Shekhina—originally conceived as God's visible and audible presence on earth—had her abode in the Temple, and that when the Temple was destroyed she was forced to go into exile. We have also learned that the union between man and wife was considered by the Zohar a replica of the union between God and the Shekhina, and, at the same time, the fulfillment of one of the greatest sacred commandments, because it mystically promoted that divine union and thus contributed to the oneness and wholeness of the deity.

However, the Zohar went a significant step farther than this. It expanded the concept of the influence human conduct exerted on the state of the deity from the sexual union between husband and wife to *all acts* performed by man, or, at least, to all religiously meaningful acts. As the Zoharic text puts it, Israel achieved royal rank because of its "diligent efforts ("*hishtadlut*") in the Tora and the commandments to unite the Holy One, blessed be He, and His Shekhina, to bring the King [i.e., God] to His place and to His hosts On High . . ."[1]

According to the Zohar, God and the Shekhina are not only the supreme divine couple, but also the spiritual-mystical parents of Israel. This is stated explicitly in the immediate sequel to the above quoted passage which says that Israel "are the children of the Holy One, blessed be He, and His Shekhina." Of course, the Zohar also holds that Adam himself was not merely the handiwork of God, but an offspring of God and the Shekhina, as hinted at in a passage on the very next page of the Zohar which explains that when Adam "emerged into the world, the sun and the moon saw him and their light faded [*nistam*: literally, "became closed up"], because the apple of the heel [of Adam] darkened their light. Why? Because he came

from the work of the Supernal Sun and Moon,"[2] that is, from God and the Shekhina.

Elsewhere the Zohar instructs the observant Jew who is intent on fulfilling properly the commandments that he must dedicate all his acts to God, to the explicit exclusion of the forces of evil: "Rabbi El'azar said: 'In all the acts of man it is necessary for him that they be for the sake of the Holy Name.' What does 'For the sake of the Holy Name mean'? To pronounce with his mouth the Holy Name over everything he performs, so that everything be in His service, and the Other Side should not alight on it, for it [the Other, i.e., Evil, Side] always lies in wait for men and can alight upon that act."[3]

This, to put it simply, teaches that all acts performed by man are in danger of being seized by "the Other Side," that is, by the evil, Satanic forces. To prevent such an outcome, one must state clearly before performing any act that one does it in the service of God. Below we shall see a concrete example of an act—that of copulation—which must be dedicated in this manner to God to the exclusion of the arch-demoness Lilith (see p. 234. The doctrine attributed by the Zohar to R. El'azar is the background against which that incantation must be viewed.

In the thinking of the author of the Zohar, even the prohibition of adultery is anchored in the conjugal relationship between God and the Shekhina, referred to as the "Community of Israel":

> When [Eve] was prepared for Adam, the Holy One, blessed be He, blessed them . . . like a cantor who blesses the bride with seven benedictions. Hence we learn that the groom and the bride, once they are being blessed by the seven benedictions [which are part of the traditional wedding ceremony], cleave to each other in a manner exemplified On High. Therefore he who goes to join the wife of another damages the coupling, for the coupling of the Community of Israel is with the Holy One, blessed be He, alone. . . . He who joins the wife of another is as if he deceived the Holy One, blessed be He, and the Community of Israel . . .[4]

There is, of course, a principal problem in all these references to the marital relationship between God and the Shekhina, of which the Kabbalists themselves were fully aware: it is the problem presented by the separateness of the Shekhina from the Godhead for the doctrine of the divine oneness. As Isaiah Tishby put it (in my literal translation):

> The Kabbalists . . . recognized the theological danger comprised in it [in the problem of the unity of the Shekhina with the other

> *Sefirot*], and in their considerations of the nature of mystical sin they gave first place—as "the root of rebellion" and as the heretical denial of the principle of the unity of God—to the view that the Shekhina was a separate power, unconnected with the system of the *Sefirot;* but they did not deny the possibility of her separation from the system. The mystery of the mystical union is the mystery of the copulation of the Shekhina with her husband *Tif'eret* ["Beauty," one of the higher *Sefirot*], that is, of her integration into the system of the *Sefirot* without separation (see Zohar 1:12a, etc.), and the religious mission of man is to maintain this union with the *kavvana* ["concentration"] of the prayer and the commandments.[5]

The passage in the Zohar 1:12a referred to reads: "And with all this it must be known that God Almighty is all one without separation. . . ."

I quoted the above explanation in full in order to show the difficulties modern scholars of the Kabbala encounter in trying to reconcile explicit Zoharic statements about the Shekhina with the basic doctrine of divine unity that they, together with the Kabbalists of all ages, including, in the first place, the author of the Zohar, hold inviolate. And indeed, inviolate it is as far as the *doctrine in principle* is concerned. *God is one*—this for Judaism has been, ever since the Biblical *Sh'ma' Yisrael* ("Hear, O Israel . . ."), cardinal and axiomatic, not open to doubt, or even to "a doubt of a doubt," as the Hebrew expression has it. Yet, in view of the profusion of mythological material contained in the Zohar and in other Kabbalistic master works, one must assume that, in order to be able to maintain this principle, the Kabbalistic mind had to have an extraordinary capacity for compartmentalization. On the one hand, it was convinced of the oneness of God; on the other, it could not but accept, and believe in, the elaborate myths telling in striking detail about the relationship between God and the Shekhina, about the arguments they exchanged, the demands they made on each other, etc.

Take, e.g., the so-called "Opening of Elijah," quoted from the *Tiqqune haZohar* (a component book of the Zohar) and printed at the very beginning of numerous editions of Hasidic, Sephardi, and Oriental Jewish prayer books. It is superscribed with the recommendation, "It is good to recite before every prayer the Opening of Elijah, may his merits protect us, Amen! and it is useful for the opening of the heart." Its Aramaic text takes up more than three pages, and contains this passage: "You who sleep in Hebron [i.e., Abraham, Isaac, and Jacob], and you the Faithful Shepherd [i.e., Moses], wake up from the your sleep, wake up and sing to awaken the Shekhina for she is asleep in the Exile. . . . Instantly the Shekhina raises her voice and utters three calls to the faithful Shepherd, and says to him: 'Arise, O Faithful Shepherd. . . .'"

This is followed by a mystical discussion between God and Moses, the gist of which is that ever since the Shekhina, represented by the fourth letter, the H, in the Tetragrammaton (YHWH), went into exile, the Name, i.e., the Godhead, is not complete, but consists only of YHW. These three letters, when written out in full—thus: *Yod He Waw*—have the total numerical value of 39, which equals that of the word *tal*, meaning dew. Next the words in Cant. 5:2, "Open to me, my sister, my love . . . for my head is filled with dew (*tal*)," are attributed to God: it is He who addresses these words to the Shekhina, and what they mean is that God, in the absence of the Shekhina, is only YHW, since according to a rule in the Kabbalistic *gematria* two words whose letters have the same numerical value are equivalent. Hence what the words quoted from Canticles mean is that in them God expresses his love and yearning for the Shekhina, without whom He is incomplete, only *tal*, that is, *Yod He Waw*. Only when reunited with the Shekhina will God again be YHWH (Yahweh).[6]

The passage quoted in the prayer books ends with the words: "Instantly the Faithful Shepherd arises, and the Holy Fathers with him. Thus far the mystery of unification. Blessed be the Lord for ever. Amen and Amen." This, incidentally, is the Kabbalistic explanation of why it is so important to recite all the prayers and perform all the commandments with the *kavvana*, the sacred intention, of unification, of helping the Godhead to become one and complete again.

The complexity of the quoted passage is a good example of the nature of many Kabbalistic doctrines that require considerable mental effort to grasp their import. However, it is a safe guess that the less versed a person was or is in the mystical doctrines of the Kabbala the more he was or is inclined to consider the relationship between God and the Shekhina as analogous to that of flesh-and-blood husband and wife. For the great masses of the Kabbalists, and later of the Hasidim, to whom the mystical doctrines were known only from the brief but frequent references to them contained in the prayers book, the anthropomorphizaton of the Godhead in the two persons of the Holy One, blessed be He, and the Shekhina, and the attribution of a quasi-human character to them and to their interrelationships, was inevitable. This, from a theological point of view, was the great weakness of Jewish mysticism, and this, from a psychological point of view, was its great strength.

2 | *The* Kavvanot *of Luria*

The teaching about the coupling of God and the Shekhina On High, and about the need of striving with all one's acts to bring about, or

at least to facilitate, that divine union adumbrated in the Zohar, was seized upon by Isaac Luria, with whose work we are well familiar by now, and who was the most influential Kabbalistic master since Moses de Leon. Luria expanded the Zoharic ideas into a veritable principle of motivation for the entire sphere of religious activities. He taught that when performing any *mitzva* ("religious commandment"), one must concentrate on its one sacred mystical purpose, which is to bring about the unification of God and the Shekhina. The term *kavvana*, which, as we have seen above, was used by Luria, is a Talmudic technical term describing the principle that when performing a *mitzva* one must do so with the explicit intention (*kavvana*) of fulfilling the *mitzva* in question. If one happened to perform a *mitzva* without such intention, it does not count, and one has to perform it again, this time with the requisite intention.[7] A more complete Talmudic term for the same concept is *kavvanat halev*, that is "concentration of the heart."[8]

In Luria's usage the term *kavvana* was endowed with a highly charged meaning: it came to designate a most intense concentration on the mystical significance of the religious act being performed. This type of *kavvana* had, and still has, its highly visible and audible expression in the body language of the Hasidic Jews, heirs to the Lurianic tradition. E.g., when they pronounce the words *Sh'ma' Yisrael* ("Hear, O Israel"), they close their eyes, press one hand against the face, contract the face muscles surrounding the eyes as tightly as they can, swing the upper part of the body back and forth with rapid and abrupt movements, and ejaculate the last word of the first sentence, *Eḥad* ("One") loudly and explosively. What lies behind this behavior pattern is the conviction that this most sacred confession of faith must be recited with such an intense concentration that it must manifest itself in shaking the whole body and soul.

Luria recommended many *kavvanot* ("concentrations") which came to be considered by all Kabbalists binding instructions, and were collected in a book titled *Sefer haKavvanot* ("Book of Concentrations").[9] He suggested nothing less than the recitation of a fixed formula before the performance of all the *mitzwot*. The formula states explicitly that one's intention in doing so is to bring about the *yiḥud*, unification, of God and the Shekhina. This suggestion is repeated with some variations several times in the *Sefer haKavvanot* and in numerous other sources quoting Luria. A detailed version of it was quoted above (p. 146) in our discussion of the image of the Matronit. A popular short version reads as follows: "For the unification of the Holy One, blessed be He, and His Shekhina, in fear and love, to unite the *YaH* with *WeH* in a complete union, in the name of all Israel, and to raise up the Shekhina from the dust. . . ."[10] *YaH* and *WeH* are, of course, the two halves of the most sacred divine name Yahweh, the first of which

is mystically identified in Kabbalistic doctrine with God the King, while the second stands for the Shekhina. The rupture in the divine name reflects the separation between God and the Shekhina, and their reunion is mystically represented in the union of *YaH* and *WeH*, the reconstitution of the oneness and wholeness of the Godhead.

In the *Sefer haKavvanot* Luria is quoted as having said: "One must always be careful to say before everything, 'For the unification of the Name of the Holy One, blessed be He, in fear and love and awe, in the name of all Israel,' for one must always unite the male and the female."[11]

Ḥayyim Vital (1543-1620), the foremost disciple of Luria, whose writings are the chief source of our knowledge of Luria's teachings, explains in his *Sha'ar haMitzvot* ("Gate of the Commandments"): "Like a son, all of whose intention is to do the will of his Father in Heaven and to give pleasure to Him. This matter can be realized only by him who knows the *kavvana* ["intention"] of the prayer and the *mitzvot*, and, when performing them, concentrates on putting aright the Supernal Worlds, and on uniting the Name of the Holy One, blessed be He, with His Shekhina. . . ."[12]

Ḥayyim Vital returns to the Lurianic *yiḥudim* in others of his books as well. In his *P'ri 'Etz Ḥayyim* ("Fruit of the Tree of Life"), he writes: "And know that it is an act of charity and a prayer to unite the name *YaH* which is separated from *WeH*, to join them together. . . . Therefore, before performing a *mitzva* or an act of charity, one must say: 'To unite the name of the Holy One, blessed be He, and His Shekhina, in fear and love, to join *YaH* with *WeH*, in the name of all Israel. . . .'"[13]

Let us add to these Lurianic instructions concerning the *yiḥudim* a Kabbalistic interpretation of the Eighteen Benedictions, the chief prayers recited three times every weekday and four times on the Sabbath and holidays by all observant Jews, whether Hasidic or not. In the *Zohar Ḥadash* ("New Zohar"), a collection of sayings and texts found in the manuscripts of the Safed Kabbalists and assembled by Abraham ben Eli'ezer haLevi Berukhim, a disciple of Moses Cordovero, the Eighteen Benedictions are stated to serve the purpose of uniting God and the Shekhina. The passage in question reads as follows: "A whispered [or secret] prayer is the 'still small voice' [in which God revealed himself to Elijah, cf. I Kings 19:12]. And since there the King [i.e., God] came, one must rise in His honor, and this is why the prayer [the Eighteen Benedictions] is called *'Amida* ["standing"]. And because of this the Life of the Worlds [i.e., God] is comprised in eighteen benedictions through which is united the Holy One, blessed be He, and His Shekhina, YAHDWNHY [that is, Yahweh and Adonay] . . .[14] Therewith the most important and most frequently recited prayer is declared to serve the one supreme purpose of the Kabbalistic life: the bring-

ing about of the restoration of the unity On High, the *yiḥud* of God and the Shekhina.

3 | *The Spread of the* Yiḥudim

In its original Talmudic formulation the concept of the exile of the Shekhina simply meant that when the Temple of Jerusalem was destroyed and the people of Israel exiled, the Shekhina, God's presence on earth, went into exile with them.[15] In the Kabbala, the exile of the Shekhina, now identified with the Community of Israel, came to play a much more important role, and "to mean that *a part of God Himself is exiled from God.*"[16] The passages in the Zohar that describe this exile, the laments of the heartbroken Shekhina (or Matronit) over her destroyed bed chamber, and her yearning for her husband, God the King, are among the most moving in the entire Kabbalistic literature.[17]

In the later, Lurianic, Kabbala the exile of the Shekhina and her separation from God are given greater cosmic significance. The prefiguration of this tragic event, it is taught, occurred in the very days of Creation, when Adam committed the sin of contemplating only the last *Sefira, Malkhut* (identified with the Shekhina), instead of penetrating the vast unity and totality of all the *Sefirot* in his contemplation. He mistook *Malkhut,* the Shekhina, for the whole of the Godhead, and thus shattered the unity of the Godhead, instead of consolidating it.[18]

The basis of this doctrine is, of course, the Kabbalistic idea that the acts of man—in this case of Adam, the first man—have a fatal effect on the condition of the deity. With Adam's sin began the tragic phase of cleavage in the deity that has been, and is still being, brought about again and again by "the destructive and magical influence of human sin." Thus the exile of the Shekhina became "a symbol of our own guilt, and the aim of religious action must be to end this exile or at least to work in this direction. The reunion of God and His Shekhina constitutes the meaning of redemption."[19] Herein lies the ultimate theosophical ground of the *yiḥudim,* the unifications.

Although it is Isaac Luria who is generally credited with the introduction of *yiḥudim* into the Kabbalistic doctrine and practice, in fact the idea seems to have been floating about in the Kabbalistic atmosphere of 16th-century Safed. It appears, for instance, in the teachings of Moses Cordovero (1522–1570), an older contemporary of Luria, who, although outshone by Luria in brilliance and influence, yet was undoubtedly as important a Kabbalistic thinker as he. It is Cordovero who left behind the most elaborate description of the unificatory purpose of the two daily morning rites of

putting on the *tallith* ("prayer shawl") and the *tefillin* ("phylacteries"). Before performing these rites, Cordovero says, one must recite this:

> For the unification . . . and so as to provide, through the *tefillin* of the hand, brains for the Female of the Small of Face [i.e., the Shekhina], and through the *tefillin* of the head, brains for the Small of Face [God], so that the Bridegroom [God] embrace the Bride [the Shekhina], His left arm under her head and His right arm embrace her . . . And the straps [of the *tefillin*] should be bonds of love between the Bridegroom and the Bride, and let not the sins bring it about that the straps be tied to Samael [i.e., Satan] and his female [Lilith], and all their retinue . . . Behold, I put on the *tefillin* of the head so as to bring all the idolaters under the hand of the Lower Shekhina, and the *tefillin* of the hand so as to bring all the other gods under the dominion of the Upper Shekhina . . ."[20]

An explanation of the concepts and terms appearing in this *yiḥud* would require a full introduction into the world of Cordovero's Kabbala which would lead us far afield from the present subject. However, even without such an excursus the intention of the passage is clear enough: it states that by pronouncing the unification formula the person putting on the *tefillin* ensures that the straps will constitute bonds of love between God and the Shekhina, will unite them, and at the same time prevents Samael and Lilith from using the straps for their nefarious purpose.

As for the dichotomy of the Shekhina into an "Upper" and a "Lower," this is based on the Zoharic distinction between "the Shekhina Above" and "the Shekhina Below." Above, on high, the Shekhina dwells among the twelve Holy Chariots and the twelve Holy Beasts, while below she sojourns among the twelve tribes of Israel. It was this Lower Shekhina who went into exile with the Children of Israel when the Temple was destroyed. However, the two manifestations of the Shekhina, the Zohar teaches, are tied together, so that actually the Upper Shekhina and the Lower Shekhina are one (Zohar 1:159b).

The Kabbalistic doctrines on which Cordovero based the quoted instructions are contained in several of his writings. In his *Shi'ur Qoma* ("Measure of the Stature"), he writes that the acts of the pious induce the Shekhina to copulate with her Husband. In his *Pardes Rimmonim* ("Pomegranate Orchard") he explains: "If a man is pious (*Tzaddiq*), the Shekhina pursues him and unites with him, so that through his good deeds the union [of the Shekhina] with her Husband is aroused. . . . Thus we find that the

arousal of that *Tzaddiq* causes the Supernal *Tzaddiq* [God] to unite with the Shekhina. . . ."

Cordovero also expands upon the Zoharic idea that the Shekhina copulates with the saintly whose prototypes were Jacob and Moses (cf. above, p. 141). He writes in his *Tomer D'vora* ("The Palm Tree of Deborah"):

> Man stands between two females: a lower, physical one who takes from him food, raiment, and conjugal rights, and the Shekhina who stands above him to bless him with all of these things, so that he should be able to give them. . . . Occasionally it happens that a man separates himself from his wife for one of three reasons: 1) because she is menstruating; 2) because he is busy with the Tora and separates himself from her throughout the weekdays; 3) because he is traveling and keeps himself from sin. At such times the Shekhina cleaves to him and is tied to him, and does not leave him, so that he should not be abandoned and separated, for always a complete man is male and female [together], and therefore the Shekhina copulates with him [i.e., joins him].[21]

Even before the publication of Luria's *kavvanot* and his prayer book, Kabbalistic masters came to consider the *yiḥudim* essential for praying with total concentration. Before long, Jews in all parts of the diaspora were reciting the *yiḥudim*, and they continued to do so until, as a consequence of the decline of the Kabbala, and traditional Jewish observance in general, in the 19th century, the *yiḥudim* were deleted from the prayer books of the Enlightened communities of Central and Western Europe. One of the earliest authors to prescribe the recitation of *yiḥudim* was Eliyahu de Vidas, a disciple and close friend of Moses Cordovero. He completed his major *opus*, the *Sefer Reshit Ḥokhma* ("Book of the Beginning of Wisdom") in Safed in 1575. The *Reshit Ḥokhma* is one of the outstanding books on morals in Judaism, and at the same time the work of a deeply thinking and feeling Kabbalist, for whom the Zohar was the major source of inspiration and insight into things religious. On the *yiḥudim* Vidas has this to say:

> Before one performs that *yiḥud*, one must say with one's mouth and utter with one's lips: "I do this thing or this *mitzva* to unite the Shekhina with the Holy One, blessed be He." And let him concentrate on the unification of YAQDWNQY. And in the morning prayer we unite the Shekhina and tie her to *Ḥesed* ["Love," the fourth of the *Sefirot*]. . . . The time of the afternoon prayer is to unite Shekhina with the left arm [i.e., the *Sefira* of Gevura, "Might"], and likewise at night is her unification with the Central Column.

> . . .[22] Thus the essence of our prayers is to unite the Shekhina always with the mentioned entities [*B'ḥinot*]. Also, one must intend every day to unite the Shekhina with the mystery of bed and table and chair and lamp. . . . Behold, this is a comprehensive unification for the rules of the day. . . .[23]

The word YAQDWNQY requires explanation. In other texts it appears in the form YAHDWNHY (see below). The Hebrew letter *qof* transliterated as q) is customarily used as a substitution for the letter *he* (h) when pronouncing or writing the divine name outside the reading of the Bible or of the prayers. Thus *Elohim* ("God") becomes *Eloqim*, and the Tetragrammaton YHWH becomes *Yod Qe Waw Qe* instead of *Yod He Waw He*. The Kabbalistic divine name YAHDWNHY is a composite obtained from combining alternatingly the letters *YaHWeH* with those of another divine name *ADoNaY*, meaning "Lord," which is the customary substitution in pronunciation whenever the name Yahweh appears in writing in the Bible and in the prayers. In Kabbalistic teaching the divine name Yahweh has a masculine, and the name Adonay a feminine connotation. As for the "mystery" of bed, table, chair, and lamp, it indicates that all one's daily activities must be performed with the intention that they, too, serve the unification of God and the Shekhina.

The imperative of exerting all one's mental and psychic powers for the overriding purpose of bringing about the unification of God and the Shekhina became standard in Kabbalistic prayer books from the 17th century on. One of the first of them, and one of the most widely circulated in the Ashkenazi world was that of Nathan of Hannover (16th–17th centuries), titled *Sefer Sha'are Tziyon* ("Book of the Gates of Zion").[24] "In this volume," says Scholem, "the Lurianic doctrines of man's mission on earth, his connections with the powers of the upper worlds, the transmigrations of his soul, and his striving to achieve *tiqqun* ["perfection"] were woven into prayers that could be appreciated and understood by everyone, or that at least could arouse everyone's imagination and emotions."[25] On the unification of God and the Shekhina, Nathan of Hannover has this to say:

> After you have performed the midnight *tiqqun* [prayer in memory of the destruction of the Temple of Jerusalem and for the restoration of Israel], prepare your soul, and subject every limb to the Holy One, blessed be He, and His Shekhina, and make all your body a chariot for the Shekhina, and say with great concentration and thoughts of good: "Master of the World! Behold, I intend to make my whole body a chariot for the Shekhina, so as to unite the Holy One, blessed be He, and His Shekhina (YAHDWNHY) with

> fear and love (YAHHWYHH), to join the name *YaH* with *WeH* in a complete union, in the name of all Israel.[26]

Several points in this paragraph require comment. The concept of a chariot *("merkava")*, that is, vehicle, for God has its roots in Ezekiel's vision of the Divine Chariot (Ezek. 1) as the vehicle carrying God's throne. In its Kabbalistic transformation the term came to be applied to the person of the mystical adept who, by his utter *kavvana* ("concentration"), attracts to himself the Shekhina, the "presence" of God, and thus makes himself a chariot, actually a vessel, for her. The term *merkava* also came to mean the utilization of *gematria*, that is, the combination of letters appearing in words, or the equation of their numerical value. Our text contains two examples of this type of *gematria*, the first of which was explained above. The second, *YAHHWYHH*, is a similar combination of the divine names *YHWH* and *EHYH* (i.e., *Ehyeh*) (Cf. Ex. 3:14), meaning "I am."

One of the most valuable early Kabbalistic anthologies is the *Midrash Talpiyot*, compiled by the Sephardi Rabbi Elijah haKohen of Smyrna (d. 1729), also known as Elijah haKohen haIttamari, after one of his earliest books, entitled *Midrash haIttamari* (first published in Constantinople, 1695). For his *Midrash Talpiyot*, R. Elijah excerpted material from no less than 300 books, and arranged it alphabetically according to subject matter. In the three pages of the section titled *"Anaf Yiḥud"* ("Branch of Unification"), he deals mostly with the profession of the unity of God, and touches only briefly on unification as a rite to be performed. In one paragraph he writes:

> From a manuscript: Before a man performs a *mitzva* he must say with his mouth, "I perform this *mitzva* to unite the Holy One, blessed be He, with His Shekhina," and he should concentrate on the unification of the names *Hawaya v'Adnut* [literally; "existence and mastery," but standing for the divine names Yahweh and Adonay], thus: YAḤDWNHY, and he should will it that thereby she [the Shekhina] should be raised up from the Exile. How? When he goes to the synagogue to pray he should say, "Behold I am going to unite the Shekhina with the Holy One, blessed be He," and thus for the other *mitzvot*.[27]

We are by now familiar with the Kabbalistic combinations of divine names for the purpose of uniting God and the Shekhina, so that the only new element in R. Elijah's manuscript is the instruction that one must recite the formula on the way to the synagogue, elevating thereby the mechanical act of locomotion to a matter of mystical significance.

Outstanding among the 18th-century Kabbalists in whose thinking the

service of the Shekhina with unifications came to occupy a central place was Ḥayyim Yosef David Azulai (1724–1806), the famed Palestinian halakhist, Kabbalistic master, and traveler, known by his Hebrew acronym as "the ḤIDA." His preoccupation with the *yiḥudim* becomes especially evident in his commentary on the Passover Haggada, entitled *Simḥat haRegel* ("The Joy of the Festival"). In it he attributes mystical influences on the Shekhina to practically every rite performed in connection with the Passover and the Seder meal. When burning the *ḥametz*, the "leavened" crumbs found in the house on the day before the Passover, he writes, "It is good to say this: 'Be it the will before You, O Lord, our God . . . [that] just as I remove the *ḥametz* from my house and my property, so, O Lord, our God . . . You should remove all the externals [i.e., evil spirits] and the spirit of uncleanness from the earth, and our evil inclination from us . . . and those that oppose the Shekhina, eradicate them with the spirit of eradication. . . .'"[28]

The Ḥida also refers to the concept of the *tzaddiq* as the chariot for the Shekhina, and to the performance of *mitzvot* "for the purpose of purifying the sparks of holiness and unifying the Lovers [i.e., God and the Shekhina]," and asserts that "full redemption will come for the sake of the Shekhina." He prescribes that before drinking each of the traditional four glasses of wine at the Seder one should say: "Behold, I am prepared and ready to fulfill the *mitzva* of the first [second, third, fourth] glass of the four glasses for the sake of the unification of the Holy One, blessed be He, and His Shekhina, by means of Him who is secret and hidden [i.e., God], in the name of all Israel." The same prayer must be repeated, according to the Ḥida, over eating of the *matza*, the *maror* (bitter herbs), the recital of the story of the exodus from Egypt, the eating of the *afikoman* (the piece of *matza* eaten a the conclusion of the Seder meal), etc.[29] In sum, the whole of the Seder is for the Ḥida a series of rites directed at one and the same sublime aim: the unification of God and the Shekhina.

The Ḥida was also one of the most spirited defenders of the *yiḥudim* against the strictures of R. Ezekiel Landau (see below). According to the Ḥida one should follow the practice of the Jews of Turkey, and recite the *l'shem yiḥud*, for by doing so one "demonstrates explicitly that one's acts are for the sake of God alone, and then there will be no stranger [i.e., evil power] in one's studies or in the *mitzvot* one performs." He takes R. Ezekiel Landau to task for his unrestrained anger at the Hasidim, and his view that "no special intention at all is required, and that all the perfections occur automatically On High, as the results of our acts." As against this, the Ḥida emphasizes that there is no comparison at all between a man who "has the correct intention," and him who merely "carries out the precepts for the sake of heaven," but without such explicit intention.[30]

4 | *Hasidic Masters on the* Yiḥudim

The Hasidic custom of reciting *yiḥudim* originated with the founder of Hasidism, Rabbi Israel Ba'al Shem Tov (1700–1760) himself. The *Sefer Keter Shem Tov* ("Book of the Crown of the Good Name") quotes "the Besht" (spelled in Hebrew BShT, the acronym of Ba'al Shem Tov) as having told about a vision he had: He ascended to heaven where he was told that "I shall not yet die because they have enjoyment On High when I recite unifications down below." Then, the Besht continued, he asked the Messiah whom he encountered in heaven, "When will the Master [i.e., you] come?" And the Messiah answered, "When your teachings spread abroad . . . and all Israel will be able to make unifications and ascension like you. . . ."[31]

Once the *yiḥudim* became part of the world of the Hasidim, the Hasidic masters introduced numerous modifications into their text, and also began to reinterpret them. One of the disciples of the Besht was R. Ya'aqov Yosef of Polonnoye (died ca. 1782), who was rabbi of Shargorod, the second largest Jewish community of Podolia, and was expelled from there in 1748 because he became an adherent of the Besht. Ya'aqov Yosef fought the opponents of Hasidim vigorously and even bitterly, and thus contributed to the rift between the Hasidim and the *Mitnagdim*. In his major work, the *Toldot Ya'aqov Yosef* ("History of Ya'aqov Yosef"), and in other writings, he taught that thoughts of evil only enter the mind in order to enable man to uplift and "improve" or "perfect" them in prayer. He was also much taken by the concept of man as the "chariot of the Shekhina," on which subject he wrote:

> Thus man becomes sanctified to be a chariot for the Shekhina, in body and soul, as [he was] at the Revelation at Mount Sinai. . . . And this is what the Ramban [R. Moshe ben Naḥman, Nahmanides] wrote in the section Aḥare: "He shall live by them [the laws of the Tora]." This is the purpose of man: to purify his matter [i.e., his body] until it becomes a chariot for the Shekhina, in body and soul, as [were] Enoch and Elijah, etc. And this is what is said, "One suspends the study of the Tora for the funeral of a dead person, to separate alien thought from his thought, and thereby to cause the *Q'lippa* ["husk," i.e., evil spirits] to separate from the Shekhina, to enable her to unite with her Husband. This is the true wedding ceremony, and understand it."[32]

Again some elucidations are in place. First of all, Nahmanides, *ad* Lev. 18:5 (where the above quote appears) does not say what R. Ya'aqov Yosef

claims he says. This is what Nahmanides says: "Those who leave all affairs of this world and pay no attention to them, as if they had no body, and their intentions and thoughts are [directed] to their Creator alone, as was the case with Elijah—when their soul cleaves to the Honored Name, will live forever in their body and soul. . . ." The idea that man should make himself a chariot for the Shekhina is taken by Ya'aqov Yosef, not from Nahmanides, but from the post-Lurianic Kabbalists.

Secondly, similarly late-Kabbalistic is the idea that by separating oneself from alien, impure, or evil thoughts one brings about a liberation of the Shekhina from the *q'lippa*, the impure husks, the dark forces of the *Sitra Aḥra*, the "Other Side," that cleave to her and prevent her from uniting with her husband, God. However, as we will see below (p. 231), the concept of the *q'lippa* itself is Zoharic.

A later book of R. Ya'aqov Yosef, entitled *K'tonet Pasim* ("Coat of Many Colors")[33] contains Kabbalistic homilies on Leviticus and Numbers. In it he refers so many times to the Shekhina and to *yiḥudim* that one is left in no doubt as to this subject being a major, or perhaps even *the* major, preoccupation of his.[34] A conspectus of the dozens of passages in which R. Ya'aqov Yosef speaks of the unification of God and the Shekhina—many of them embellishments and elaborations of statements contained in earlier Kabbalistic literature—results in the following picture of his teachings on the subject.

Because of our sins the love relationship between God and the Shekhina has been disrupted. Instead of facing each other as a loving couple does, "they stand back to back, which is the mystery of the double face and of the *dormita*" (p. 18).[35] Through the "hatred and separation below" on earth, a separation was caused between the four letters of God's Name, YHWH, above (p. 19). This divine separation was brought about by the evil inclination (p. 96). However, "when envy, which causes putrefaction and death in the world, is eliminated, there will be peace and unity below, and this will bring about the reunification of God's name above (pp. 60, 96, 97). One must do all that is in one's power to pursue peace in the world, and thus to bring about the unification above (p. 21). Every physical act one performs must be accompanied by "the power of thought to unite the Holy One, blessed be He, and his Shekhina" (p. 54). Through the observance of the Tora and the performance of the *mitzvot* unification is brought about above, and "copulation face to face" of God and the Shekhina (pp. 174–75), as a result of which those above and those below will be blessed (p. 68). In all one's acts "one should concentrate on the unification and coupling of the Holy One, blessed be He, and His Shekhina" (p. 219).

"The Shekhina is the source of all souls." It is the duty of man to

perform the commandments and to have pure thoughts which cause the Shekhina to be liberated and purified from the husks, the impure elements that adhere to her, and thus to be able to join "her lover," God, and to couple with Him (pp. 181–82). This unification On High is also expressed in the unification of the four letters of the name of God, YHWH. "This is the greatest rule in the Tora" (pp. 99, 220).

Also by establishing a loving relationship with his fellow men, a man can bring about unification On High. Any "joining" down below causes unification of the Name of God above (p. 19). One must do this, if for no other reason than out of "pity for the honor of the Name" (p. 19). Even such a physical act as sexual union between man and woman causes On High the unification of the Name into *Eḥad* ("One," p. 220).

A rather complex scheme of "three kinds of copulation" is set up by R. Ya'aqov Yosef to illustrate the close interdependence of copulation down below on earth and Oh High in heaven:

> In every [uttered] word [*dibbur*] there is a unification of the Holy One, blessed be He, and His Shekhina. There are three kinds of words which are called three kinds of copulation [*zivvug*]: 1. Copulation of the King and His Matronit. . . . 2. Copulation of the son and his spouse. . . . 3. Copulation of slave and handmaid. . . . The words of the Tora and prayer, when a man, wrapped in *tallith* and *tefillin*, secludes himself with his Creator—this is a copulation of the King of the World and the Matronit, a union of the Holy One, blessed be He, and His Shekhina. . . . [Mundane] talk is a unification of the slave and the handmaid; words of love between friends are a copulation of the son and his spouse; and when a man devotes himself to Tora and prayers, if he knows that [they are directed to] the Holy One, blessed be He, and His Shekhina, then he ties together [the *Sefira* of] *Malkhut* [i.e., the Shekhina] On High. . . . (p. 247).

As this brief presentation shows, R. Ya'aqov Yosef was almost obsessed with the idea of the unification of God and the Shekhina, and with the religious imperative to dedicate one's life to bringing it about.

A contemporary of Ya'aqov Yosef was R. Elimelekh of Lyzhansk (1717–1787), who had a central role in creating the veneration of *tzaddiqim*, saintly Hasidic rabbis. In his book *No'am Elimelekh* ("The Grace of Elimelekh"),[36] he repeatedly explains that it is a sacred duty to recite *yiḥudim*:

> If one intends to perform a *mitzva*, one must utter with one's mouth in speech that one wants to perform that *mitzva*, and say,

> "For the sake of the unification of the Holy One, blessed be He, and His Shekhina. . . ."
>
> . . . When a man repents and corrects his deeds, he effects through his repentance and study the restoration [*tiqqun*] of the Shekhina. . . . On the day on which he becomes cleansed of his sins he should act for the elevation of the Shekhina, to unite her with the Holy One, blessed be He. . . . One must say, "For the sake of the unification of the Holy One, blessed be He, and His Shekhina. . . ."
>
> . . . This is the reason why we say prior to all our works [i.e., before the performance of all *mitzvot*] and our prayers, "For the sake of the unifiction, etc., in the name of all Israel. . . .[37]

A leading Hasidic master of the next generation, much of whose religious teachings centered on the Shekhina, was R. Moshe Ḥayyim Efrayim of Sudylkov (ca. 1740–1800?), a grandson of the Besht. His book, *Degel Maḥane Efrayim* ("Banner of the Camp of Ephraim"), containing sermons on the weekly portions of the Pentateuch, is a classic in Hasidic literature. In it he writes:

> My grandfather, may he rest in Eden and let his memory be for a blessing for life in the World to Come, said that all things come from the Shekhina, so to speak, and all the deficiencies [*ḥesronot*] a man has should be understood as deficiencies of the Shekhina, so to speak . . . blessed be He and blessed be His Name . . . Therefore all our prayers should be recited for the replenishment of the deficiencies of the Shekhina, so to speak, and then our own deficiencies will be replenished of themselves. This is why the *tzaddiqim* [the saintly Hasidic rabbis] are emissaries of the Matronit [i.e., the Shekhina], for the *tzaddiqim* through their own deficiency know that there is a deficiency in the Shekhina, and they unite her in a complete union. And it is apparent that all the couplings are done by knowing, and this is why coupling is called knowing as in "and the man knew Eve his wife" (Gen. 4:1).[38]

This passage calls for a few brief comments. One is that the author's repeated use of the expression "so to speak" (*kiv'yakhol* in the original), when he mentions the Shekhina shows that he found it necessary to indicate that what he says about the Shekhina must not be taken in a literal sense lest one think that the Shekhina acts independently of God, or that the Shekhina is something other than, and different from, God. The very fact that the author inserted the phrase "so to speak" three times in this short

passage shows that he was aware that in his statements about the Shekhina he came dangerously near the heresy of belief in *sh'te r'shuyot*, "two powers," or two divine authorities, as it is called in Talmudic-Midrashic sources (B. Ḥag. 15a; Gen. Rab. 1).

The second comment is on the author's use of the phrase "Blessed be He and blessed be His Name," abbreviated as *b"h uv"sh* in Hebrew, that is *barukh hu uvarukh sh'mo*, with reference to the Shekhina. This is rather incongruous, for each of the four words has the masculine form in Hebrew, while the Shekhina, both conceptually and grammatically, is feminine. The explanation must be that while speaking of the Shekhina, our author had in mind God, after the mention of whose name the *b"h uv"sh* abbreviation comes almost automatically. Our third comment is that the author once refers to the Shekhina by the name Matronit (i.e., "Matron"), which is usual in the Zohar but rather unusual in Hasidic texts. New also is the recommendation that all prayer should be directed toward the goal of replenishing the deficiencies of the Shekhina (and thus securing her complete union with God); this can be done by *tzaddiqim* through their knowledge which leads to a coupling of God and the Shekhina.

A contemporary of the Master of Sudylkov was R. Levi Yitzḥaq of Berdichev (c. 1740–1810), one of the famous personalities of the third generation of *tzaddiqim*, whose great scholarship won him the respect of even the *Mitnagdim*. His teachings stressed three elements: joy in fulfilling the *mitzvot*, *d'vequt* ("cleaving") to God, and fervent prayer. He used to sing prayers in Yiddish in which he spoke to God in familiar terms, and even dared to address demands to Him. His book of sermons, *Q'dushat Levi* ("The Holiness of Levi")[39] was first published during his lifetime and soon became very popular. In it he refers to "the version of the ARI [Isaac Luria]" of the unification formula as reading, "For the sake of the unification, etc., in fear and in love, and love and fear," and explains that "at first there must be fear, then love, and then, from the love is drawn forth a more internal fear, as is known to those familiar with the hidden wisdom."[40]

To the same generation belonged one of the greatest figures in the history of Hasidism, R. Shneur Zalman of Lyady (1645–1813). Shneur Zalman was the founder of the Hasidic school later to become known as Ḥabad Hasidism. ḤABAD is an acrostic of the words *Ḥokhma, Bina, Da'at*; literally, "wisdom, understanding, knowledge," but meaning, in the Kabbalistic terminology, germinal, developmental, and conclusive knowledge. Ḥabad Hasidism reintroduced a scholarly element into the movement, and made deep inroads into the ranks of the *Mitnagdim*. Shneur Zalman's book *Tanya* (originally called by the author *Liqqute Amarim*, or "Collections of Sayings")[41] is one of the few Hasidic writings that is not a collection of

discourses but a complete, systematic explanation of the author's doctrines. In it he gives a detailed explanation of what is meant by the *l'shem yiḥud* formula:

> This is the explanation of "for the sake of the unification of the Holy One, blessed be He, and His Shekhina, in the name of all Israel": This *kavvana* ["concentration"] must be recited in one's heart. So that one's heart should really desire this supernal unification, there must be in one's heart great love of God alone, to cause Him pleasure above, and not in order to slake one's own soul which thirsts for God, but like a son who exerts himself for his father and mother, whom he loves more than himself. . . . In any case, one must habituate oneself to this *kavvana*, for even if it is not truly and fully contained in one's heart, one's heart wants it truly at least to a very little extent, because of the natural love that is in the heart of all Israel to do everything that is the will of the Supernal, blessed be He. And this unification is His true will, that is, His supernal unification in the emanation [*atzilut*] which takes place through the arousal down below [i.e., in the human realm], through the unification of the divine soul and its integration into the light of God which is clad in the Tora and the *mitzvot* with which she [the soul] is occupied. And they become truly one, as I have written above, for through this also the source of the Tora and the *mitzvot*—which is the Holy One, blessed be He—unites with the source of its divine soul which is called by the name Shekhina. For they are in the capacity of that which fills all the worlds and in the capacity of that which surrounds all the worlds. . . . But as for the unification of his soul and its integration in the light of God to be one, this is what every man of Israel wants truly and fully with all his heart and all his soul, due to the natural love that is hidden in the heart of all Israel, to cleave to God and not to separate and be cut off and separated, God forbid, from the unification of oneness of [God] blessed be He.[42]

The idea Shneur Zalman wishes to express in his convoluted and repetitious style is that by concentrating on the unification, one brings about a union between "the divine soul" and "the light of God," that is, between God and the Shekhina, who together "fill all the worlds." Moreover, Shneur Zalman asserts, every man in Israel carries in his heart a "natural love" of God and the desire to cleave to God. That is to say, the *yiḥudim* have two aims: to unite God and the Shekhina, and to unite the soul of him who performs the commandments with God.

A younger contemporary of R. Shneur Zalman was R. Barukh of Medziboz or Medzibezh (1757–1810), another grandson of Israel Ba'al Shem Tov. Barukh considered himself heir to his famous grandfather, claimed elevated status for the *tzaddiq*, the saintly leader of the Hasidim, and held court in Medziboz in great style, in an autocratic and luxurious fashion, including even the keeping of a "court jester," Hershele Ostropoler. His conduct aroused opposition even on the part of other Hasidic leaders, among them Shneur Zalman himself. Among Barukh's published works is a book titled *Butzina diN'hora*, a title he took from a Talmudic phrase meaning literally "lamp of light," but used in the Talmud in the sense of "wise man."[43] In it Barukh introduces a legal decision by making reference to "the joining of the Holy One, blessed be He, and His Shekhina."[44] Noteworthy in that passage is that Barukh does not use the word *yiḥud* ("unification"), which had become a *terminus technicus* in Kabbalistic and Hasidic literature, but *tzeruf*, that is, "joining" or "combination."

The endless preoccupation of Hasidic masters with the *yiḥudim* resulted in always new interpretations of their meaning, or at least in new variations in it. Occasionally the original meaning of the *l'shem yiḥud* was completely lost in these new interpretations and replaced by abstruse mental exercises. Take for example Avraham Y'hoshu'a Heschel's explanation in his Hasidic anthology entitled *Sefer Liqqute Y'qarim* ("Book of Precious Collectanea"): "The point in the unification is: not to separate the brain from the words, not to mix together evil and good. This is [the meaning of] 'the tree of knowledge of good and evil' (Gen. 2:17), and this is 'And a handmaid that is heir to her mistress' (Prov. 30:23)."

The phrase quoted from Proverbs refers to the Zoharic myth (discussed below, pp. 249–50), according to which, when the Temple was destroyed and the Matronit (Shekhina) "sent away" by the King (God), He took Lilith, the slave-woman or handmaid, in her place. Thus the handmaid became heir to her mistress the Shekhina, and the evil that she symbolized became attached to the good represented by God. As we have seen, according to the Ḥida the *kavvana* ("intention") in performing *mitzvot* must be to separate the evil from the Shekhina and thus to enable God and the Shekhina to reunite. This concept is generalized by Heschel, who interprets the purpose of the *yiḥudim* to be, paradoxically, the separation in general of good and evil in the realm of the divine.

Heschel continues: "And the matter of the couplings and the unifications is like the matter of the supernal waters: know that there is no evil there at all. Why, then, is there any need for our unifications? The explanation is that the Father sees the damage done to the son who walks about worried, without knowledge, that is to say, is not enriched by the [divine]

pleasure. And examine it well! And the matter is clear for those who understand."[45] I must admit that I cannot claim to belong to that elite group as far as this interpretation is concerned.

In a large, four-part, 850-page Hasidic anthology entitled *Sefer Ta'ame haMinhagim uM'qore haDinim* ("Book of the Meanings of the Customs and the Sources of the Rules"), the author collected statements by several *tzaddiqim* on the unifications. Under the heading "Matters of *Tzitzit*" ("ritual fringes"), he makes a statement that clearly shows that in the world in which he moved *all* religious acts were customarily introduced by the *l'shem yiḥud* formula, so that when a *mitzva* was not introduced or not accompanied by it, this was something that required special explanation. He writes:

"The reason why one does not recite 'for the sake of the unification' when one has the opportunity to fulfill the commandment of receiving guests, and why this should be subtracted from all the other commandments. Because receiving guests is greater than receiving the face of the Shekhina. Hence the recitation of 'for the sake of the unification' does not belong there." The author states that he quotes this from the book *Degel Maḥane Efrayim* of R. Moshe Efrayim of Sudylkov.[46]

In his footnotes to this entry R. Shub adds comments taken from other sources. He writes: "In the introduction by the Rabbi, the *Tzaddiq* of Komarno [Yitzḥaq Eisiq of Komarno, d. 1874, the author of numerous Hasidic works], I saw that my teacher, my uncle the saintly master Zevi, used to say over every small or great thing *l'shem yiḥud*, etc. with a full mouth. Even when he drank a little water he stopped and recited several *yiḥudim*. And in the book *Zera' Qodesh (Vayeshev)*,[47] it is written: 'When a man comes to seek Him, blessed be His Name, in prayer, and says *l'shem yiḥud* etc., in the name of all Israel,' thereby his prayer is heard even if he is not a *tzaddiq* [a saintly person], for every intention to walk in the path of the Tora is always counted for him as if he had fulfilled it."

Several hundreds of pages later R. Shub returns to the subject in greater detail. He writes:

> In the book *Zera' Qodesh* ["Holy Seed"] by the Gaon, the saint of Ropsitz [Ropczyce, Poland] (in Vayera) wrote that one must beware when one performs a *mitzva*, lest a turning away toward unfit [*pasul*] thought occur in one's heart, God forbid. . . . And in the book *Derekh Piqqudekha* ["The Road of Your Commands"][48] he wrote thus: "I received from my masters that it is profitable to make a statement prior to performing a commandment. Even when one is alone one should say before one's Creator: 'Master of the World! It is well known to You that it is my wish to do Your will

only, and it is possible that in the midst of my performing the commandment my evil inclination will lead me astray and some other [i.e., foreign] thought will fall into my thoughts to perform that commandment by turning away. Behold I annul that thought and that impure fancy and will of the heart, for my will is truly contained in my bones, and joined to my thoughts to serve with a full service only God alone.'"[49]

In his notes to this entry, R. Shub refers to a tradition according to which "when the saintly *tzaddiq* of S"G[50] ordained the saintly rabbi of Stretyn [Judah Zevi Hirsch of Stretyn (d. 1854?)], peace be upon him, the saintly rabbi of Stretyn told him that he did not understand what is meant by 'For the unification of the Holy One, blessed be He.' And the saintly rabbi replied that the intention is that . . . one must direct all bodily things for the sake of heaven, and this will be the unification of the Holy One, blessed be He, and His Shekhina."

5 | *Opposition to the* Yiḥudim: *The Halakhic Side*

We can deal only briefly with the opposition to the *yiḥudim* put up by some rabbis who were the spiritual leaders of the *Mitnagdim*, the orthodox opponents of Hasidism. The more outspoken among them took up the cudgel against the *yiḥudim*, and engaged the "unificationists" in a battle royal that showed that the issue was for them a matter that touched the very essence of their faith. A summary of the polemic between the two camps is given in Louis Jacobs' book *Hasidic Prayer* in which he shows to what extent the issue of whether one must or must not recite this Lurianic formula stirred up the spirits and contributed to the bitter enmity between the Hasidim and the *Mitnagdim*.[51] Jacobs quotes *in extenso* the view of R. Ezekiel Landau (1713–1793), one of the greatest Talmudic luminaries of the 18th century, who in his *Responsa* not only argued with great determination against the *yiḥudim*, but used the opportunity to voice his all-out condemnation of Hasidism in general. Landau's attack culminates in this passage: "In my opinion this is an evil illness in our generation. As for the generations that preceded our own time, [they] did not know of this formula and did not recite it . . . but in this generation of ours . . . each one says, 'I am the seer, and to me the gates of heaven have opened up, and it is for my sake that the world exists.' These are the destroyers of the generations, and to the generations of their existence I apply the verse, 'The ways of the Lord are right, the just will walk in them but the Hasidim will stumble therein.'"[52]

Actually, the Biblical passage quoted by Landau says, "but the transgressors (*posh'im*) will stumble therein" (Hosea 14:10), but in his wrath against the Hasidim Landau substituted the work "Hasidim" for "transgressors," thereby equating the two.

The Hasidic response to this head-on attack was given by R. Ḥayyim b. Shlomo Tyrer of Czernowitz (ca. 1760–1816), an important Hasidic leader who had profound knowledge not only of mysticism but also of rabbinic literature, and thus was well qualified to refute and reject Landau's strictures. In his book *Sha'ar haT'filla* ("Gate of Prayer"), R. Ḥayyim, instead of attacking Landau, adduces proofs from the Talmud and the Codes to the effect that *kavvana* prior to carrying out a *mitzva* was halakhically required. He further argues that the "fear and love" emphasized in the *yiḥudim* are essential for attaining the full value of the *mitzva* performed. "Love and fear," he says, "are the two wings" which carry the *mitzva* aloft, "like the wings of a bird by which it flies in the whole of the sky beneath the heavens." He concludes by emphasizing the unification, not of God and the Shekhina, but of "His great and holy Name and . . . of the Lower World with the Upper World."[53]

Louis Jacobs, in discussing the basic issue between Landau and R. Ḥayyim, finds two factors in it: one is the meaning of *kavvana*, the other Landau's suspicion that in the Hasidic position there was a trace of Shabbataian heresy.[54] While this is undoubtedly correct, I suspect that, unspoken by either of the two antagonists, the issue went deeper and revolved around an essential difference between the Hasidic and the non-Hasidic understanding of the nature and condition of the deity. The Hasidic *yiḥudim* were based on the Kabbalistic doctrine that taught that the unity and wholeness of the deity were disrupted, and that consequently it was the duty of those who understood the mystery of this tragic development to exert themselves to the utmost to restore the divine unity, or at least to bring God and the Shekhina closer to each other. It was this great, all-pervading mystical purpose and responsibility that became central to Hasidic existence, and found its expression in the innumerable *yiḥudim*. Such teachings were anathema to Ezekiel Landau and the other rabbinic leaders of the *Mitnagdim*. They were, of course, familiar with these Hasidic ideas, but rejected them because, for them, they smacked of heresy, or at least sinful aberration, and this quite apart from any suspected Shabbataian connections or sympathies. This, I believe, was the basic issue underlying the unification polemic: whether or not one believed that the performance of *mitzvot* by observant Jews contributed to bringing together God and the Shekhina, that is, the male and female aspects (or elements) of the deity. Behind it loomed the even larger issue of whether one believed in the entire, complex mystical structure

erected by the Kabbalists around and upon the God-concept, whether one went along with, or opposed, the doctrine of the divine *Sefirot* that underlay the belief in the ability and duty of man to influence the state of God. This deepest aspect of the controversy did not surface often and with clarity, perhaps because it was a much too sensitive one to be dragged into the arena of disputation. Still, the controversy must have revolved around the Kabbalistic teaching that there was tension, there was a problematic relationship, between God and the Shekhina, that the destruction of the Temple of Jerusalem meant a tragic separation between the male and the female aspects (or elements) in the deity, and a diminution of God's powers, and that it was the duty of every true believer and man of piety to perform the *mitzvot* with the explicit intention and for the purpose of unifying God and the Shekhina, or at least to diminishing the rift between them, and thus, ultimately, to perform the greatest possible service, the noblest mystical task, of which man is capable. Had the issue been only the recital or deletion of a sentence in preparation to the performance of *mitzvot*, it would be difficult to understand the animus that went into defending the position of each side. If the controversy was about a basic understanding of the nature of the deity, and the relationship between man and God, the passion displayed by the two opposite camps is not only understandable, but one recognizes that it was inevitable: it dealt, after all, with matters that lay at the very core of Jewish belief and hence of Jewish existence.

The polemic about the *yiḥudim* was carried on for several decades, and died down only when both the Hasidim and their opponents the *Mitnagdim* felt threatened by the spread of the *Haskala* (the Jewish Enlightenment). But even this development did not mean a rapprochement between the two camps. What happened instead was that the Hasidic Jews and most of the tradition-abiding Sephardi and Oriental Jews continued to recite the *yiḥudim*, and to retain some knowledge—whose extent varied with the amount of general Jewish education they received—of the meaning and significance of the unification formula. As against them, the run-of-the-mill Reform, Conservative, and non-Hasidic Orthodox Ashkenazi Jews, from whose prayer books the *yiḥudim* had been excised, in most cases lost even the knowledge that such a thing as *yiḥudim* existed in other Jewish camps, while their spiritual leaders dismissed them as old-fashioned, primitive superstition which was best ignored.

6 | *Influence on the Non-Hasidim*

A simple way to gauge the influence of the unifications on the non-Hasidic Jews from the 18th century on is to have a look at the prayer

books used in those parts of the Jewish world that were dominated by the leading anti-Hasidic rabbinical authorities of the times. The foremost among these was R. Elijah of Vilna (1720–1797), known as "the Gaon of Vilna," whose personality and genius gave a powerful impetus to the rise of the *Mitnagdim*, the "opponents" of the Hasidim. And yet, the *Siddur Ishe Yisrael* ("Prayer Book Fires of Israel"), which follows the rite of the Gaon, contains the *l'shem yiḥud* formula many times. True, out of respect for the Gaon the prayer book carries a footnote to the effect that "according to R. Elijah of Vilna one should not recite any unifications prior to the performance of a commandment," yet this cannot obliterate the fact that even in this prayer book the unifications have an important place.[55]

Another prayer book, which contains the comments of both Elijah of Vilna and R. Akiba Eger (1761–1837), one of the greatest rabbinical authorities of the 19th century and a most prestigious exponent of strictly orthodox halakhic Judaism, is the *Siddur Otzar haT'fillot* ("Prayer Book Treasury of Prayers"). This *Siddur* too prints several times the *l'shem yiḥud* formula.[56]

These two examples should suffice to show the penetration of the *yiḥudim* into the prayer-practice of non-Hasidic, and even anti-Hasidic, Jews from the 18th century on. Other Ashkenazi rabbis were unable to formulate a definite stand either pro or against the unifications. Some of them, even if they did not approve the recital of *l'shem yiḥud*, were of the opinion that for those versed in the Kabbalistic doctrines, the recital of *yiḥudim* was a permissible, or even commendable, rite; others even felt constrained to inform their followers of the Hasidic teachings about those awesome mysteries. Thus in the late 17th century the German Rabbi Y'ḥiel Mikhael Epstein (d. 1707) gives in his prayer book, which contains the Hebrew text of the prayers plus R. Epstein's Yiddish translation, an objective, non-critical description of the Hasidic way of prayer. He writes, among other things: "The Kabbalists wrote: if a man prepares his body for the performance of a commandment, he should say explicitly that he does it for the unification of the Holy One, blessed be He, and His Shekhina. Then, instantly, out of that word a holy angel is created who will help him fulfill that commandment leisurely and easily, and who will become an honest advocate for him before the Holy One, blessed be He. . . ."[57]

R. Epstein himself was of the opinion that the recital of the unifications behoves only those who had penetrated the gates of the Kabbalistic mysteries, yet he considered them so much part of the prayers and other religious rites that he felt constrained to devote considerable space to them in his prayer book. Thus he wrote: "Before wrapping oneself into the *tallith* one should say, 'Behold, I prepare my body for wrapping into the wrap of

mitzva for the sake of the unification of the Holy One, blessed be He, and His Shekhina, in fear and in love, in a complete unification, in the name of all Israel.'" And again, when putting on the *tefillin*, one should say: "For the sake of the unification of the Holy One, blessed be He, and His Shekhina, in a complete unification, in the name of all Israel, behold I put on the *tefillin* to fulfill the commandment of my Creator. . . ." R. Epstein also refers to the concept of making the worshiper's body a "chariot for the Shekhina." He writes: "By putting on the little *tallith*, one's body becomes a chariot for the Shekhina, like the Holy Beasts which carry the throne of honor. And [this is] enough for him who understands."[58] The "Holy Beasts" that carry the throne of God are, of course, "the living creatures" described in the vision of Ezekiel, chapter 1.

One of the most carefully composed, and in traditional Ashkenazi communities most widely used, prayer book is the *Seder 'Avodat Yisrael* ("Order of the Service of Israel") compiled by R. Seligman Beer (1825–1897. His full name in Hebrew was R. Yitzḥaq ben Arye Yosef Dov).[59] The value of this prayer book is greatly enhanced by the fact that its compiler used several dozens of manuscript and printed prayer books in its preparation, and by the copious notes with which he elucidated the text of the prayers. A veiled reference to the *yiḥudim* is contained in a note of his on a brief prayer customarily recited prior to putting on the *tallith*, which begins: "Behold, I wrap myself in a *tallith* of fringes in order to fulfill the commandment of my Creator. . . ." In his footnote to this prayer R. Beer writes that he took it from R. Epstein's prayer book, and from the prayer book of R. Isaiah Horowitz (1565(?)–1630), titled *Seder Sha'ar haShamayim* ("Order Gate of Heaven").[60] R. Horowitz, known as "The Holy Shelah" from the initials of his *magnum opus*, the *Sh'ne Luḥot haB'rit* ("Two Tablets of the Covenant"), which is an ethical guide combining *Halakha* (traditional law), homily, and Kabbala, was one of the greatest Ashkenazi rabbinical authorities, who served in the last years of his life as rabbi of the Ashkenazi community of Jerusalem. His Kabbalism deepened after he settled in Jerusalem and became acquainted there with the manuscripts of Isaac Luria, Moses Cordovero, and Joseph Caro. In his prayer book R. Horowitz refers several times to *yiḥudim*, and states, e.g., that the purpose of circumcision is the unification of God and the Shekhina.

After referring to these two authorities (R. Epstein and R. Horowitz) as his sources, R. Beer states:

> It must be known that all the additional matters [contained] in our prayer book about the benedictions of *tallith* and *tefillin*, to be recited before the benedictions and after them, are not in the man-

> uscripts and in the books of the pious, because they are not prescriptions of the ancients, but merely a custom that has struck roots since the book *Sha'are Tziyon* ["Gates of Zion" of Nathan of Hannover] has become known. In that book is presented another version to be recited prior to wrapping oneself in the *tallith*, and there are in it deep things founded on the mysteries of the Kabbala, and about them R. Epstein said in his prayer book [the *Seder T'filla Derekh Y'shara]* that those who had not entered the gates of the Kabbala should not recite them, but should instead recite the above version, in a simple language, understandable to all.[61]

As these few sample quotations show, Ashkenazi religious leaders could not resist at least to flirt with the desirability of reciting *yiḥudim*.

7 | *The Witness of the Prayer Books*

After Luria, Cordovero, and de Vidas, practically all the prayer books published by and for Sephardi and Oriental Jews contain numerous unifications and other references to the Shekhina. In a sampling of dozens of prayer books identified as following "the version of Isaac Luria" or "the Sephardi custom," or "the custom of Spain," or which were printed by and for Yemenite, Iraqi, etc. Jews, I found that the *yiḥudim* invariably occupied a prominent place.[62] Although these prayer books are of later vintage, they go back to the teachings of the 16th-century Kabbalists, passed on from generation to generation among Sephardi and Oriental Jews. Thus the instructions that the *yiḥudim* have to be recited on many occasions, on weekdays, Sabbaths, and holidays, and their actual recital, constitute a direct heritage of some four centuries.

Among the Ashkenazi Jews the *yiḥudim* became popular through the intermediacy of the Hasidim. Hasidism, as is well known, split East and Central European Jewry into two camps, opposing, and often bitterly fighting, each other. The Hasidim adopted the Sephardi prayer book and *nusaḥ* (version), and thus the unifications became an essential part of their prayers and other rituals. As for the *Mitnaqdim*, many of them, while remaining opposed to Hasidism, could not resist adopting the *yiḥudim*, and did this even in the face of severe condemnation by their own rabbinical leaders.[63]

This placed the average, semi-educated non-Hasidic Ashkenazi Jew in an ambivalent, not to say awkward, position. On the one hand, he followed his rabbi in opposing Hasidism, but on the other he found in his prayer book a permissive (to say the least) attitude with reference to the unifications whose recital, even though he may not have fully understood them,

was stated there to be the proper thing to do for those familiar with the teachings of the Kabbala. Thus, by reciting the *yiḥudim*, the non-Hasidic Jew could feel that he performed rites that endowed him with at least a semblance of being familiar with mysterious teachings about God.

The Hasidic Jew was spared this difficulty. His rabbi, in harmony with his prayer book, instructed him to recite the *yiḥudim*, and he understood that by doing so he was performing a momentous task, a duty of the highest order towards God, a very great *mitzva*. Nor was the recital of the *yiḥudim* a rare or occasional thing for the Hasidic Jew. To the contrary, it was something he was instructed to perform a dozen or more times every day, until it became for him something of a reflex action, just as was the addition of the phrase *zikhrono liv'rakha* ("May his memory be for a blessing") after mentioning the name of a deceased.

To illustrate the frequency with which a Hasidic Ashkenazi Jew recited *yiḥudim*, let me describe what I found in the prayer book my paternal grandfather, R. Moshe Klein of Pata, Hungary, used all his adult life. When he died in Jerusalem in 1928, his much thumbed-through prayer book passed into the possession of my father, from whom I, in turn, inherited it when he died in Tel Aviv in 1953. It is the *Siddur Bet Ya'aqov heḤadash* ("The New Prayer Book House of Jacob"), published in Vienna by H. Ziegelheim (no date), which follows, as stated on the title page, the Sephardi custom. It is, in fact, a late version of the prayer book of the Sephardi Jews which was edited in the 16th century in accordance with the *kavvanot*, the mystical "intentions," of Isaac Luria. It is thus but a late version of the prayer book used by the Kabbalists in 16th-century Safed. On the very first page the worshiper is instructed to recite, prior to wrapping himself in the *tallith*, the unification formula with which we are by now thoroughly familiar, with the appropriate ending, ". . . . behold, I wrap my body into the *tzitzit*."[64] The very next page contains instructions to recite the same formula in connection with the tying of the *tefillin* ("phylacteries") around the left arm and around the head, with the appropriate changes in the closing phrase. This means that the two rituals which introduced the daily prayers were explicitly stated to be performed for the purpose of bringing about a union between God and the Shekhina. In addition, my grandfather's *siddur* contains instructions to recite the *l'shem yiḥud* formula on the following occasions: before beginning the morning prayer, in connection with the sanctification of the New Moon, prior to performing the *kappara* ("atonement") rite on the eve of Yom Kippur, before observing the commandment of the *lulav* on the Feast of Tabernacles *(Sukkot)*, and before entering the *Sukka* ("booth") on that feast, and on many more occasions throughout the liturgical year in connection with all kinds of holiday rit-

uals.[65] All in all, the *Siddur Bet Ya'aqov heḤadash* repeats the instruction to recite the *l'shem yiḥud* formula no less than 15 times, thus prescribing its recitation about 2,000 times a year, and, in addition, has references to the Shekhina many more times.

A glance at the other prayer books that were until one or two generations ago in use in most Jewish communities in the Arab world, shows that they contain the unification formula as often, or even more often, than the *siddur* discussed above.[66]

8 | *The* Yiḥudim *Today*

At the present time the unifications are still being recited by numerous Jewish communities. Among the Hasidim, who so far have succeeded in holding their own against currents of modernization, and to maintain their traditional religious life-style practically unchanged, whether in Israel, in the United States, or in their other, smaller concentrations, the performance of *mitzvot* continues even among the young generation in the same form in which it was practiced by the previous ones. This means that the recital of the unifications is as integral a part of their prayers and other religious rituals as it was in the past. The *yiḥudim* are recited by them in the course of the morning service, prior to wrapping themselves in the *tallith*, and before putting on the *tefillin*, as well as at the beginning of the afternoon and evening prayers, and also on many other occasions in the course of the day which, for the Hasidim, consists of an almost continuous series of observances of *mitzvot* ("commandments"), *dinim* ("rules"), and *minhagim* ("customs").

This being the case, even the most recently published prayer books intended for Hasidic communities contain the *l'shem yiḥud* formula more or less as frequently as did their older traditional prayer books. Apart from this feature, in which they remain tradition-bound, some of their newly issued prayer books are thoroughly modern, in the sense of containing, in addition to the original Hebrew or Aramaic text of the prayers also their English translation, as well as a running commentary on them. The best example is the recently published *Complete Art Scroll Siddur* with "a new translation and anthological commentary by Rabbi Nosson Sherman."[67] This beautifully produced prayer book is used by several Hasidic communities in the United States. At its very beginning it prints the *l'shem yiḥud* formula with the following introductory explanation in English: "Many recite the following declaration of intent before donning the tallis" (and similarly before putting on the *tefillin*), and then follows the usual text of the unification in the original Hebrew-Aramaic, and in an English trans-

lation which reads: "For the sake of the unification of the Holy One, blessed be He, and His Presence, in fear and love, to unify the Name—yud-kei with vav-kei [i.e., *yod-he* with *waw-he*] in perfect unity in the name of all Israel."[68] As we see, the only concession to "modernity" made in this translation is the substitution of the English word "Presence" for the Hebrew Shekhina, which, of course, dilutes and masks the original meaning of the unification formula.

As far as the meaning, or the interpretation, of the *l'shem yiḥud* formula is concerned, a certain erosion is noticeable in many of the communities in which it is still recited. The crucial words, "For the sake of the unification of the Holy One and His Shekhina," have begun to lose their original meaning, and are being reinterpreted in a manner that enables the average congregant to recite them without having to face their full import. I made inquiries among several Hasidic rabbis in the New York area concerning this issue, and received differing explanations of the meaning of the formula. One of them asserted that its meaning was that the religious rite to be performed was "special to God, and not, Heaven forfend, to Satan." This explanation echoes a teaching found in the Zohar to the effect that one must state that a rite is performed in the service of God alone, and that by doing so one prevents Satan from claiming a share in it.[69]

Another Hasidic rabbi explained that the sentence means that the person about to perform the rite wishes to attach himself to the Holy One, blessed be He, that is, it refers to a desired union between the worshiper and God. This interpretation, too, is found in the writings of 18th and 19th century Hasidic masters, as we have seen above. Several others whom I asked evaded direct answer by asserting instead that the Holy One, blessed be He, and His Shekhina were one.

Among the Sephardi and Oriental Jews the situation is different. Some of their congregations maintain traditional orthodoxy, while others have loosened up to varying degrees, and approximate in the style of their observance the Conservative synagogues of the Ashkenazim. My inquiries among Sephardi and Oriental Jewish rabbis revealed some of these differences with reference to the recital of the *l'shem yiḥud* formula. In the more tradition-bound synagogues, old-fashioned, pious *ḥazzanim* ("cantors") still start the services with the *l'shem yiḥud* formula, which is recited likewise by the old-timers in the congregation. The younger cantors and younger members of the community, I was told, no longer recite the formula. As far as understanding it, I was told that "99% of the people do not understand it."

According to a learned young rabbi of one of the Oriental Jewish congregations in New York, the *l'shem yiḥud* formula refers to the *apparent* separation between God and the Shekhina that came about as a result of

the *Galuth*, the Exile. The oneness, unity, and indivisibility of God are so fundamental that to think otherwise would be sheer heresy. However, in the Exile we are like people locked in a windowless room: we are in darkness, and think that this is the state of the world. But once a skylight is opened in the ceiling, sunlight comes flooding in, and all recognize that there is light that pervades the world. Likewise in relation to the Shekhina: in the Exile we are locked in darkness and cannot see the divine glory that embraces the Shekhina and unites her with the Holy One, blessed be He.

The prayer books in use among the Sephardim and Oriental Jews, as a rule, contain full versions of the *l'shem yiḥud*. One of the few which do not include it is the *Siddur Kol Ya'akov: Daily Prayer According to the Minhag of Aleppo (Aram Soba)*, edited by Rabbi David Bitton.[70] Still, even this modern Sephardi prayer book did not completely excise the traditional Kabbalistic concept of the Unification. It retains the lengthy passage from the *Tiqqune haZohar* that is usually included in Sephardi and Oriental Jewish prayer books, titled "*P'tiḥa* [Opening, or Initiatory Discourse] of the prophet Elijah of Blessed Memory," which we have discussed above and which also contains references to the return of the Shekhina to God's Holy City.[71]

Other Sephardi and Oriental Jewish prayer books in popular use at present abound in unifications and references to the Shekhina. Several of these are of modern vintage, not only in the sense that they were printed in the 1970's and 1980's, but also in that in their last pages they include newly instituted Israeli prayers for the welfare of the State of Israel, of its presidents, of the soldiers of the Israel Defense Army, etc. One of these, following the Aleppan *minhag*, is the *Siddur Bet Yosef v'Ohel Avraham* ("Prayer Book House of Joseph and Tent of Abraham"), subtitled "According to the Custom of Aram Tzova [Aleppo] for the Community of the Sephardim and in All Their Places," edited by Ṣāliḥ Manṣur.[72] It prints the *l'shem yiḥud* formula several times, thus, e.g., prior to the text of the *Minḥa* ("afternoon") prayer, as follows:

> For the sake of the unification of the Holy One, blessed be He, and His Shekhina (YAHDWNHY), in fear and love (YAHHWYHH), and in love and fear (AYHHYWHH), to unite the name *YaH* with *WeH* in a complete union, in the name of all Israel. Behold, we come to recite the *Minḥa* prayer which was instituted by our father Isaac, peace be upon him, with all the *mitzvot* that are comprised in it, in order to restore its root in the Supernal Place, to cause pleasure of the spirit to our Creator, and to do the will or our Maker.[73]

The same invocation with but minor variations is contained in the other

most popular and most recently issued *Siddur 'Et Ratzon* ("Prayer Book Time of Good Will"), subtitled "Includes the Prayers for the Whole Year, for Weekdays, Sabbaths, New Moons, and Holidays, according to the Customs of the Sephardim and All the Children of the Oriental Communities in the Land [i.e., in Israel] and Abroad."[74] This prayer book too contains the "Opening [Prayer] of Elijah" with the added comment that "it is good to recite it before every prayer, and it helps in opening the heart." It instructs those who use it to recite the *l'shem yiḥud* before performing the following rites: the daily morning, afternoon, and evening prayers, the reading of the Song of Songs on Friday evening, the Friday evening prayers, the Friday evening *Kiddush,* the eating of the *Ḥallah* (the Sabbath loaf), the Sabbath *mussaf* prayer, the Sabbath *Zakhor,* the three Sabbath meals, the New Moon *mussaf* prayer, the lighting of the Hanukkah candles, the blessing of the new moon, the counting of the 'Omer (on the 49 days between Passover and Pentecost) and the daily recitation of the bedtime *Sh'ma'*. All in all, this prayer book prints the text of the *l'shem yiḥud* no less than 18 times (I may have overlooked one or two), that is, more often than any of the other prayers.[75] A person who conscientiously follows these instructions recites the formula at least some 1,750 times a year.

In addition, this prayer book recommends concentration on the composite divine names AYDHNWYH and YAHDWNHY each time one says Amen at the recital of the Kaddish, that is, five times for every Kaddish, or 15 times daily. It also prints a Kabbalistic diagram in the shape of a seven-branched candelabrum with the same two divine names inscribed above it.[76]

Another likewise very popular Sephardi prayer book, entitled *Siddur Ahavat Tziyon haShalem* ("The Complete Prayer Book Love of Zion"),[77] is almost identical with the above, except that it includes also the readings for the *Tiqqun Ḥatzot* ("Midnight Elevation"), which are prayers of mourning about the destruction of Jerusalem and the return of Israel, and are introduced by the *l'shem yiḥud.*

In conclusion only one comment: Oral testimony of persons familiar with the ritual practices of Hasidic Ashkenazi, Sephardi, and Oriental Jews, and the written witness of the prayer books in use among them, are unanimous in confirming that the unifications are an essential and oft-recited ingredient of their prayers. This, I believe I am correct in interpreting as an indication that the belief in the Shekhina, the exiled spouse of God the King, or of the Holy One, blessed be He, and in the religious duty of bringing about a reunification between them, is also a living part of the belief system of these Jewish communities.

9 | Yiḥudim *in Exorcism*

An additional purpose for which *yiḥudim* were frequently used was the expelling of *dibbuqim* (singular *dibbuq*),[78] spirits of dead persons that were believed to be able to take possession of the bodies of living individuals and thereby cause them great suffering. The existence of this type of belief in spirit-possession and in the possibility of expelling the invading spirit is well known from the New Testament, the writings of Josephus Flavius, and Talmudic literature.[79] The term *dibbuq*, as it became popular after the spread of Lurianic Kabbala, referred only to a spirit of a dead person (and not a demon) who, while alive, committed such grave sins that upon his death his spirit could not enter even Gehenna, but was hurled about from one end of the world to the other by avenging angels. Such a spirit could escape this torment only if it succeeded in entering the body of a living person, which it could do if it found an individual whose transgressions made him vulnerable to being possessed by a spirit. Once the *dibbuq* succeeded in entering the body of such a person, the avenging angels could no longer hurt it, but it, in turn, caused the person in question much pain, erratic behavior, and serious illness. Hence, if signs of *dibbuq*-possession were discerned, steps had to be taken to exorcise the spirit, to expel it from the body of the possessed. The central rite in the complex ritual of exorcism was the recitation, often for hours on end, of *yiḥudim*, accompanied by the blowing of the *shofar*, by adjurations, and often by causing physical pain to the patient.

In his book about *dibbuq* tales in Jewish literature, Gedalya Nigal collected some 90 reports, accounts, and tales about the *dibbuq* (mostly in Hebrew), dating from the 16th to the 20th centuries.[80] From this material it becomes clear that *dibbuq*-possession was a definitely culture-bound phenomenon, that is, as Dr. Nigal observes, *dibbuqim* appeared only in environments in which people believed in their existence. Moreover, both the symptoms of possession by *dibbuqim*, and the methods used to exorcise them, conform to definite patterns, as do the sins for which the soul of a deceased becomes a *dibbuq* (mostly of a sexual nature), and the minor transgressions committed by the living person which enable a *dibbuq* to penetrate his body. In most of the cases the *dibbuq* is masculine, and the possessed person is a young woman.

Dibbuq-possession became frequent in 16th-century Safed, where the Jewish population was acquainted with, and influenced by, the doctrines of the Kabbala. The exorcist had to be a Kabbalistic master, and later a *tzaddiq*, a saintly rabbi of a Hasidic community. Although Ḥayyim Vital, whose

writings contain the first detailed accounts of *dibbuq*-possession, does not call the spirit which takes possession of a person by the name *dibbuq*, he refers to the phenomenon and describes it as a special case of *gilgul*, transmigration of souls.[81]

The drama of exorcism fascinated those who witnessed it, and many of them, as well as of those who functioned as exorcists,left behind detailed records of the procedures. One of the accounts tells about an exorcism that took place in Tiberias in 1833. In it the *dibbuq* himself instructs the exorcist rabbis how to proceed. He says (speaking, of course, from the mouth of the possessed person, in this case a 20-year-old youth): "On Friday night, engage in studying all night, sanctify yourselves, to perform unifications and to cause the supernal powers to couple. . . ."

The exorcists follow the *dibbuq*'s instructions, and say in unison: "With the combinations (*tzeruf*) of the Holy One, blessed be He, and His Shekhina, we stand here today before our master the divine Tanna, Rabbi Meir Ba'al haNes, to sue this evil and recalcitrant spirit. . . ." Nevertheless the struggle between the *dibbuq* and the exorcists goes on for a long time, until at long last they succeed in expelling him.[82]

In many of the accounts telling about the exorcising of *dibbuqim* the central feature of the ritual is the recitation of *yiḥudim*, often repeatedly, and always emphatically.[83] One of these exorcisms took place in Baghdad in 1900, and is reported by R. Y'huda Fetaya, the exorcising rabbi, who, first of all, tries to ascertain whether the person who for twenty years was bothered by "evil thoughts" is actually possessed by a *dibbuq*. The way he does this is by "reciting into the ears of the man possessed the *yiḥud* of the spirit, so that the breath of the *yiḥud* should enter his ear and his limbs, for the breath of the *yiḥud* expels the breath of the *dibbuq*." The exorcist relates: "I recited this *yiḥud* many times over, one after the other, speaking into the ear of the possessed, without interruption, until I became exhausted." He explains that he did this because these "*yiḥudim* are like fire in chaff, and are worse [for the *dibbuq*] than the pain of Gehenna. . . ." Finally, the *dibbuq* was no longer able to suffer the pain, and exited from the body of the patient.[84]

Other examples, too, show that the *yiḥudim* were believed to force the *dibbuq* out of the body of the possessed, and that by being spoken into the his ear they entered the "cavity of the body" and thus forced the *dibbuq* out. Occasionally the recitation of these exorcistic *yiḥudim* went on for several days—in one reported case (from 1913), the exorcist treated a woman patient with *yiḥudim* for no less than seven weeks, while in another his efforts continued for a full year.[85]

As can be seen from the dates mentioned in the reports about exorcisms

and from other sources, *dibbuq*-possession and the exorcism of *dibbuqim* disappeared in the early 20th century.[86] The modernization of the religious atmosphere, to which even the most traditional-bound Jewish circles could not remain immune, seems to have eliminated the belief in *dibbuqim* which was the prime precondition of the occurrence of this type of psychiatric phenomenon, and thus, after a career that spanned almost four centuries, the spirit known as *dibbuq* was finally laid to rest.

10 | Yiḥudim *for Their Own Sake*

Luria's instructions to the effect that one should recite the brief formula of *l'shem yiḥud* "before everything," that is, prior to reciting any prayer or performing any *mitzva*, were intended for the Jewish public at large. For the adepts, the learned initiates, who in the Safed circle of the Kabbalistic masters constituted the intellectual-religious elite, Luria had instructions for an entirely different type of *yiḥudim* whose purpose was, not to make sure that the recital of a prayer or the performance of a *mitzva* served its ultimate aim, the unification of God and the Shekhina, but to achieve, through intense concentration on the *yiḥud* itself, a direct influence on the condition of the Godhead. The basic purpose of these *yiḥudim* was to reunify the *Z'er Anpin* ("The Small of Face," or "The Impatient One"), representing the male aspects of the Godhead, with the *Nuqva diZ'er* ("The Female of the Small One") representing his female aspect.

The Lurianic instructions describing these unifications are extremely complicated. They involve a kind of mental gymnastics, requiring a veritable virtuosity in juggling complex and varying rules of *gematria*—the equation and combination of the numerical values of the letters of Hebrew words, and especially of the names of God—and necessitate keeping in mind an array of artificially derived divine names, of which the ones mentioned above are but elementary examples. Thus these *yiḥudim* constitute, not a rite introductory to prayers or *mitzvot*, but "an independent exercise, detached entirely from the format of traditional prayer and the performance of other *mitzvot*."[87]

Isaac Luria, the chief initiator of these unifications, referred to them as *yiḥudim 'elyonim*, or "supernal unifications." Since their performance required not only intense concentration, but also took up considerable time that otherwise would have been devoted by the adepts to Tora study, the "Holy ARI" (Luria) anticipated objections from his followers, and felt it necessary to reassure them: "Don't say that the study of the Tora is greater, and that it is not seemly to neglect it, because the mentioned matter of the *yiḥudim* is greater than studying the Tora, for it unifies the supernal worlds."[88]

One of the instructions of this type of *yiḥudim* reads as follows: "Behold,

the supernal unification of *Ḥokhma* ["Widsom"] and *Bina* ["Understanding"][89] is that of the name YHWH with *Ḥokhma*, and the name *Ehye* with *Bina*, and the joining of them together thus: YAHHWHYHH. This is the supernal copulation. . . . In sum: Let him [the adept engaging in unifications] place the name YHWH with its four letters before his eyes, and concentrate on unifying the Holy One, blessed be He, and His Shekhina. . . ."[90]

According to Luria, the *yiḥudim* of this type had an immense effect on the spiritual world. Vital writes:

> He who performs a supernal unification, the souls of *tzaddiqim* [deceased saintly men] will cleave to him, and behold, the souls of the *tzaddiqim* will reveal themselves to him. . . . And know that Benayahu ben Yehoyada is the one who is present and reveals himself in all places where a *yiḥud* is being performed, which causes the Female Waters to rise up. And the secret of the matter is that there were many *tzaddiqim* who in their lives were always performing supernal *yiḥudim*. . . . He who performs a unification at a propitious time causes the unification of all the supernal roots, and this is a very high grade. . . .[91]

The passage requires some explanation. Benayahu ben Yehoyada was one of the high officers of King David, the commander of the Cherethites and Pelethites, who is reported to have performed "mighty deeds" (2 Sam. 23:20–22), and who, according to Luria, accompanied "anyone who performed supernal unifications."[92] The raising of Female Waters refers to the power inherent in the *Nuqva diZ'er,* who is the female counterpart of the *Z'er Anpin*. The power that thus ascends from the Female in turn arouses the Male Waters which are the power flowing from the Male to the Female, and thus bring about a union of the two.[93]

According to Luria the *yiḥudim* should be performed either in one's home, or, preferably, at the grave of a departed *tzaddiq*.[94] It so happens that in the neighborhood of Safed there were (and still are) numerous tombs of such holy men as Shim'on bar Yoḥai, Rabbi Akiba, Hillel and Shammai, Shemayah and Avtalyon, Abbaye and Rava. Thus it was not difficult at all for the adepts to go and prostrate themselves on one of these graves as recommended by Luria. The rite consisted of stretching oneself out full length on the grave, and while in that position performing the unifications, combinations of letters, etc.[95]

11 | *Expiatory and Purificatory* Yiḥudim

As for the fourth type of *yiḥudim* it will suffice to mention only briefly that Luria taught that these "supernal unifications" could and should be used for several expiatory purposes. Vital's *Sha'ar Ruaḥ haQodesh*, the main source describing these Lurianic doctrines, contains the texts and instructions of many dozens of *yiḥudim* for the purpose of making an evil person repent, for purifying the soul, and for atoning such grave sins as homosexual intercourse, sleeping with a married woman, and the like.[96] To judge from the number of *yiḥudim* serving these purificatory purposes, the most frequently committed sin among the Jews of 16th-century Safed was homosexuality, to atone which nineteen different *yiḥudim* are recommended. Next to it came adultery with a married woman, which sin is expiated by ten different *yiḥudim*. Vital took many of the texts of the *yiḥudim* he assembled in his book from other leading Kabbalists to whom he always conscientiously gives credit.[97]

By the time Vital wrote this book the *yiḥudim* had become such an important religious ritual that it was found necessary to preface them with a special lengthy prayer, in Aramaic, asking "the Ancient One of the Ancient Ones," that is, God, to accept them.[98]

A detailed presentation of Luria's teachings as to how to perform the "supernal unifications" which he so greatly stressed is contained in a brief treatise written by R. Yosef Tabul and preserved in a manuscript in the library of the Jewish Theological Seminary of America in New York.[99] The Kabbalist Yosef Tabul (or Ibn Tabul, ca. 1545–1600) immigrated from his native North Africa (whence he was also called "Yosef haMa'aravi") to Safed, where in 1570 he became one of the foremost disciples of Luria, and after Luria's death the principal transmitter, next to Ḥayyim Vital, of Luria's teachings. His treatise on Luria's *yiḥudim* begins: "This is the language of my teacher and master Rabbi Yitzḥaq Luria Ashkenazi—may his memory be for the life of the World to Come—which he told me mouth to mouth, word by word, in great secrecy. It is tried and proven, and great is the advantage for him who knows it. And this is his language. . . ."

Then follows an account of Luria's instructions as to how to cleave to the souls of *tzaddiqim* who passed away by "stretching oneself out on their graves" and by "keeping the honored and awesome Name [of God] always in mind, to unite the Holy One, blessed be He, with His Shekhina in fear and love, to unite the *waw* with the *he* by means of the *yod* and the *he*. . . ."

"And behold," R. Tabul continues, "there is no doubt that the *tzaddiqim* after their death, when they dwell in the dust, do not cease from serving

God, but always engage in unifications in the secret of their soul and spirit and ghost,[100] that rise up and unify *Ḥokhma* ["Widsom"] and *Bina* [Understanding"] in the secret of their soul, and the *Tif'eret* ["Splendor"] with the *Malkhut* ["Kingdom"], in the secret of the ghost, and the Female Waters of her [of *Malkhut*] with the secret of their soul, and especially so at midnight when the Holy One, blessed be He, plays with the ghosts of the *tzaddiqim* in the Garden of Eden, as explained in the Zohar in the section *Lekh l'kha. . .*."

In the sequel R. Tabul explains that by performing unifications one achieves a union between one's own soul and ghost and spirit, and those of the *tzaddiq* over whose grave one prostrates oneself. He gives explicit instructions as to how to concentrate on the letters of the name of God (YHWH), and how to combine the letters of this name with the other divine name *Ehyeh,* and the letters of YHWH with the letters of *Adonay.*

In these complicated Kabbalistic mental exercises one feels that the original purpose of the *yiḥudim,* namely the unification of the male and female elements (or aspects) of the Godhead, is lost, and the accent is on the *gematria,* the virtuosity in combining the letters and in producing long and practically unpronouncable divine names to which quasi-magical qualities are attributed.

Next R. Tabul turns to "the *yiḥudim* which my Master taught me, mouth to mouth, word by word, letter by letter," The first of these instructs the adept what to do while reciting the *Sh'ma'* prayer, in order to cause the "Female Waters" to rise to the *Sefira* of *Bina* ("Understanding"). Here the accent is no longer on the unification of God and the Shekhina, but on that of the soul of the adept and the soul of the *tzaddiq* on whose grave the adept lies prostrate with the "supernal root on which both you and that *tzaddiq* depend."[101]

12 | *The Common Man and the Shekhina*

A conspectus of the rich material on the unifications, of which only a sample could be presented above, shows that they were essential parts of the everyday life of most Jews until the general decline in traditional religious observance that set in with the spread of the *Haskala,* the Jewish Enlightenment, in many parts of the Jewish world. The role the *yiḥudim* played in the life of the individual Jew depended, of course, on his general religious orientation. All in all, however, there can be no doubt that there was an intense preoccupation with the *yiḥudim* among all the Hasidim, Sephardi, and Oriental Jews: in their life the *yiḥudim* were a ubiquitous

element, accompanying, as we have seen, practically every moment of their waking hours, and every one of the many *mitzvot* they were expected to perform day after day.

The Kabbalistic authors and Hasidic masters in whose writings is laid down the duty of reciting the *l'shem yiḥud* formula "over everything," as several of them state, are at pains to explain that God and the Shekhina are one. Schooled as they were in mystical thinking, they undoubtedly reached an understanding, satisfactory for their grasp, of the nature of the Godhead, so that for them, despite the constantly referred-to dichotomy between the male and the female aspects or elements in God, and the separation between them that made the unifications such an important religious duty, it was a deep-seated and unshakable tenet that God and the Shekhina were one. It is a fact that they never tire of emphasizing, and insisting on, the ultimate oneness of God, even while instructing their followers to recite unifications many times a day.

But what of the followers, who constituted the vast majority everywhere, in Europe as well as in the Middle East? They, even if possessed of some learning, lacked the ability to understand the sublime mysteries of divine oneness while following the instructions of their spiritual leaders and reciting the *l'shem yiḥud* formula again and again. All they were able to grasp was that by enunciating the hallowed formula they declared that the *mitzva* or other act they were about to perform served always one and the same purpose: that of uniting God and His Shekhina. This is what the formula said, and this is what those who recited it understood it to mean. Can it be that they were aware that the Shekhina they thus strove to unify with the Holy One, blessed be He, was, despite the plain meaning of the words, which must have been clear even to the least educated among them, not a separate entity but a mysterious emanation from, or aspect of, God? That, ultimately, "the Holy One blessed be He, and His Shekhina" was nothing but a figure of speech, and that behind it stood the supernal, majestic, untouchable and unassailable oneness of God? I doubt it. It seems to me that what was carried in the mind of the untutored or semi-tutored Jew as a result of the constant repetition of the unifications was something akin to the mental picture the uneducated Catholic layman had of the deity: his "Lord" was Jesus Christ, the object of his loving adoration was "the Mother of God," and the abstruse doctrine of the three-in-one deity was either unknown to him, or was pushed so far into the background of his consciousness that it played a very minimal role, if it played a role at all, in his religious belief and thinking. The believing mind has an uncanny capacity to remain unaware of logical contradictions inherent in its beliefs. Likewise the Jews managed to be unmindful of the contradiction between their

axiomatic belief in the absolute oneness of God, and their acceptance of what the *yiḥudim* hammered into them many times every day: that the Shekhina was separated from God, and that it was their duty to restore the shattered unity between her and God.

It is a matter of great regret that no documentation is available of what the Jewish folk belief was concerning the Shekhina after the Lurianic doctrines became accepted into the prayer books and thus lodged in the Jewish mind. One can only extrapolate from rare written records left behind by learned men whose writings contain indications or betray traces of what must have been the beliefs of the simple people. One such record is contained in the book *M'gillat S'tarim* ("Scroll of Secrets") written by R. Safrin, which we shall discuss in Chapter IX. Also the very fact that the visions of the earlier Kabbalistic and Hasidic authors fall into a definite pattern—one could, e.g., establish a definite typology of the *maggid*—makes it appear likely that those visions were expressions or products of the general atmosphere of the Jewish communities dominated by Kabbalistic or Hasidic masters and their teachings. *Dibbuq* possession, discussed above, and occurring in other cultures as well, is yet another phenomenon that evinces such patterning. Hence it may not be farfetched to conclude that the *yiḥudim*, which unquestionably were part of the everyday life of the community at large, created a susceptibility to visions of the Shekhina and to experiences of *maggidim* in many more people than would appear from the number of surviving accounts. Many could have had, in fact, must have had, such visionary experiences in order to enable the few learned and talented among them to describe their visions in largely similar terms, and to leave them as a legacy for us to study and ponder.

Visions and hallucinations were, of course, but one type of phenomena in communities for which Kabbalistic and Hasidic mastery was the acme of accomplishment. Beyond that was the psychological effect of the doctrines themselves, of which even the least knowledgeable had to have some inkling. How far this scatter-effect of Kabbalism and Hasidism spread among the *'amkha*, the Jewish population in general, is hard to say for the simple reason that all the surviving documentation pertains to the life and work of the learned elite among the Kabbalists, and of the *tzaddiqim*, the rabbinical leaders enjoying the reputation of saintly men, among the Hasidim. And even the writings left behind by the Hasidic *literati* present not a few problems, especially when one wishes to base on them conclusions with reference to the mental world of the common man, of the Jewish millions, whose enthusiastic support made it possible for the few hundred *tzaddiqim* to devote their lives to studying the Zohar and to mystical speculation, and to enjoy prestige, honor, adulation, and occasionally luxurious living.

Hasidic literature, although it spans less than two centuries, is very voluminous, and is difficult of access because of its language, stylistic peculiarities, ideological premises, and the concepts with which it operates. For these and several other reasons, its scholarly study has barely begun. To subject it to scholarly scrutiny, to something akin to the French *explication de texte*, and, in the first place, to a psychological investigation, could be a matter of considerable importance for an understanding of the Jewish psyche in East and Central Europe in the two centuries after the emergence of Hasidism. A painstaking study of the belief systems, the conceptual constructs, and the fantasy-world of the Hasidim, the learned and the untutored alike, would show what it was that made it possible for them, not only to preserve their mental equilibrium in the midst of, to say the least, trying circumstances, but also to maintain an optimistic outlook, a specific Hasidic version of the zestful enjoyment of life. I am confident that such a study would establish that one of the foundations of this development was the role assigned to the Hasid, even to the simple, ignorant Jew, in bringing together God and the Shekhina by reciting *yiḥudim* ten or fifteen times a day. This belief made him in his own eyes a factor in the mysterious goings-on in Heaven, and thus gave him a sense of importance and value far beyond that which appeared on the surface of things.

IX

The Shekhina as *Maggid* and Vision

1 | *As* Maggid

In chapter IV above we referred to statements made by some Talmudic sages who claimed to have seen or heard the Shekhina in her earthly manifestations, and cited Talmudic and Midrashic passages speaking of individuals and the Children of Israel in general as having "feasted their eyes on the Shekhina," i.e., of having actually gazed at her. These passages—not to mention such Biblical visions of God Himself as those of Isaiah (6:1–5) and Ezekiel (1:26)—made it possible for medieval and later Jewish mystics to claim that their own visionary or auditory experiences of the Shekhina did not go beyond the permissible within the framework of legitimate Jewish doctrine. Inevitably, it was the Kabbalists who put forward such claims and recorded their perceptions of divine sights and sounds.

Early Kabbalistic literature, and in the first place the Zohar, contains numerous accounts of, or references to, heavenly inspiration, in which the Holy Spirit, the Prophet Elijah, the chief angel Metatron, or other angels and heavenly forces, appear and communicate mysteries and other weighty revelations to the favored adept. In the 15th century, the personified source of such revelations assumed the character of a *maggid* (literally, "sayer," or

"teller"), who repeatedly or even regularly addressed the individual Kabbalist in a dream, or spoke from his mouth while he was awake. In the 16th century the five most important Kabbalists of the Safed circle—Joseph Caro, Shlomo Alqabetz, Moses Cordovero, Isaac Luria and Ḥayyim Vital—had their *maggidim* and left behind accounts of their experiences. After them, the *maggid* phenomenon continued well into the 18th century, while other types of supernatural visions occurred even in the the 19th.

The history of *maggidism* has still to be written, but several of the individual Kabbalists who saw images and heard voices of *maggidim* have already come under scholarly scrutiny. It appears that the first master in whose circle the image of the *maggid* crystallized was the 15th–16th century Spanish Kabbalist Yosef Taitazak, who indulged in severe ascetic practices, and reported having received revelations in Hebrew from a *maggid*. After the Spanish expulsion (1492), Taitazak settled in Salonika, where he became the head of a group of disciples whose members subsequently moved to Safed and founded there the great Safed school of Kabbala.[1]

The Kabbalistic master in whose life the *maggid* played the most important role was Joseph Caro (1488–1575), the oldest of the five mentioned above. Caro is the most famous and most influential codifier of Jewish law of all times, whose *Shulḥan 'Arukh* is the last, and to this day authoritative, halakhic code of Judaism. Less well known in non-Kabbalistic and non-Hasidic circles is the fact—somewhat embarrassing for them—that Caro was also a leading Kabbalistic master in 16th-century Safed. He kept a secret Kabbalistic diary for half a century, of which the only surviving fragment was printed under the title *Maggid Mesharim*, that is, "Teller of Truths."[2]

The influence of the *maggid* on Caro was all-encompassing. Not only did the *maggid* communicate to him sermons interpreting the secrets of the Kabbala and passages in the Bible, but also gave him practical help, guiding him in his wanderings in Turkey, directing him to emigrate to Eretz Israel (at the time a Turkish province), and, most importantly from the point of view of the development of the *Shulḥan 'Arukh*, stimulating him to write his halakhic works. The *maggid* also functioned as Caro's mentor in personal matters, encouraged him to live a strictly moral life, and even promised him that he would achieve his great dream—martyrdom, although in fact this was never attained by him.[3]

Caro and his *maggid* are of special interest to us in the present context because Caro identified the divine personage who accompanied him through most of his long life (he lived to be 87) with the Shekhina. In addressing Caro, the *maggid* identified herself as the Mother, the Shekhina, the Matronit—all Kabbalistic terms designating the mystical divine spouse of

God. In one passage, e.g., she says: "I am the mother who chastises her children, I am she who is called Matronit, I am the Mishna, who speaks in your mouth, I am she who dries up the sea, who pierces Rahab, I am the chastising mother, I am the angel who redeems the mystery of Jacob."[4] Although in this passage the *maggid* is identified with the feminine manifestations of God (Mother, Matronit) as well as with the Mishna, in later revelations she prefers to identify herself with the Mishna alone.[5]

Several passages in the *Maggid Mesharim* testify to an erotic relationship between Caro and his *Maggid*-Shekhina. E.g.: "I always embrace you and cling to you"; "I cleave to you and kiss you with love, as it is written, 'Let him kiss me with the kisses of his mouth' (Song 1:2)"; "Come out and meet me, my sister, my fair one, I desire you and love you. . . ."[6] Although Werblowsky, who devoted a whole book to Caro, cautions against reading too much into phrases such as these, since, as he says, they are current in the Midrash and the Kabbala,[7] it is undeniable that the intimate relationship that went on for decades in the imagination of Caro between him and his *Maggid*-Shekhina had a definitely erotic note to it, which, of course, is nothing unusual in the context of mystical experience also outside the boundaries of Judaism. As Louis Dupré put it, "All Western religions have produced mystics of love. Judaism, Christianity, and Islam have known each its own kind of spiritual eros."[8]

Joseph Caro's identification of the *Maggid*-Shekhina with a sacred book, the Mishna, has its historical antecedents in the apocryphal Wisdom of Ben Sirach (Chapter 24) in which *Ḥokhma* ("Wisdom") is identified with another holy book, "the book of the Covenant of the supernal God—the Tora which Moses commanded us as an inheritance of the Community of Jacob" (Sirach 24:23).[9]

The next oldest of the five Kabbalistic masters, mentioned above, Shlomo Alqabetz (ca. 1505–1584), refers in his writings, as we will see (p. 250), to the Shekhina as "our Mother" and to God as "our Father." As for information about the *maggid*, Alqabetz is important because of a piece of writing known as "The Shavu'ot Epistle," in which he describes in detail the auditory manifestation of a *maggid* through the mouth of Joseph Caro which he witnessed and heard in the course of two nights. He writes that on the night of Shavu'ot Caro and he spent all night reading the Bible, then studied the Mishna *Z'ra'im*, and then

> Our Creator enabled us to hear the voice of the speaker in the mouth of the *Hasid* [i.e., Caro], a great voice, clearly enunciating, and all the neighbors heard it and did not understand. And the loveliness was great, and the voice became stronger and stronger,

> and we fell on our faces, and none of us dared lift up our eyes and faces to see because of our great fear. And that voice spoke to us and said: "Hear, O friends, you are the choicest of the choice, my friends and beloved ones, peace be unto you. . . . It is now many years that the crown of my head fell down, and there is nobody to comfort me, and I am cast into the dust and embrace dunghills (Lam. 4:5). But now you have restored the crown to its former state. . . . Behold, I am the Mishna who chastises men, I came to speak to you. . . . Be strong and rejoice in my Tora. . . ." And all of us broke into tears because of our great joy and also when we heard the pain of the Shekhina because of our sins, and her voice was like the voice of a sick person who beseeches us. . . . And then we continued until the light of the morning, and the study did not cease from our lips in joy and trembling. . . .[10]

Several points in this passage of which we quoted only the highlights, call for comment. First of all, it is interesting that although the *maggid* whose voice issues from the mouth of Joseph Caro identifies herself as "the Mishna," Alqabetz and the group recognize in her the Shekhina. Secondly, the whole passage is full of ambivalence: the image has "great loveliness," but at the same time it inspires "great fear." The voice flatters the group, calls them "choicest of the choice," but then strikes a threatening note saying that she "chastises men." She says that the crown of her head fell down and she herself is cast into dust and embraces dungheaps, but at the same time she states that Caro and his group have restored her crown to its former place. She speaks with a "great voice" and yet with the voice of a sick person who "beseeches us." Similarly ambiguous or ambivalent is the reaction of those who hear the voice: they are seized with a great joy, but also cry bitterly over the pain of the Shekhina and their own sins which caused her sufferings. They both rejoice and tremble. I certainly wish a competent analyst would take a close look at this and other similar passages describing the *maggid*'s communications and the reactions of those who received them. But even short of that one thing is quite clear: the image which appears to the group is recognized by them as the Shekhina, and, in fact, cannot be anybody else but the Shekhina. It is the Shekhina, and not the Mishna, who, according to traditional Kabbalistic doctrine with which members of the group were suffused, was cast into dust, who suffered, and who could be restored to her place on high and reunited with her husband, the supernal King, by the performance of *mitzvot*, and, in the first place, by the great *mitzva* of studying the sacred literature with utter concentration. . . .

As we will see below (p. 250), Alqabetz dwelt in his other writings as

well on the plight of the Shekhina, and on the duty of the pious "to bring back our Mother to her place and to her palace." As for the *maggid* of Caro, also the Jerusalem rabbis who wrote *haskamot* ("approbations") to the *Maggid Mesharim* make it clear that she was indeed none other than the Shekhina.[11] Incidentally, as Werblowsky has pointed out, the term *maggid* appears in the writings of Caro and Alqabetz only once or twice. The usual designation for the spiritual persona who addresses Caro is *qol* ("voice"), or *dibbur* ("speech").[12] Interesting is the phrase in which the Shekhina describes herself as being in exile among *saravim v'sallonim,* which is a modified quote from Ezekiel 2:6, where it means "briers and thorns," but which in the approbation of the Jerusalem rabbis to the *Maggid Mesharim,* as Werblowsky suspects, could be a pun and intended to be read *Serbim uS'lavonim,* that is, "Serbs and Slavonians," since the consonants of the two Hebrew words as they appear in the Bible can be read thus as well.[13]

With the third of the group, Moses Cordovero (1522–1570) we have dealt in the preceding chapter, but what he has to say about the *maggid* belongs in the present context.[14] Cordovero wrote a book-length treatise about angels in which he discusses the *maggid* in some detail. He refers to angelic spirit-possession by saying that angels can "clothe themselves into a man," and that such an angel possessing a man is "what people call *maggid.*" By being possessed in this manner, "a person can become a prince, a king, or a prophet . . . and a chariot for the Holy One, blessed be He. . . ." When the Children of Israel went into the field to fight the Philistines, "the Shekhina was with Israel in their war, and her chariot was the mystery of the king." When a person is thus possessed by the Shekhina, "he feels nothing but heaviness of head, no ringing of the ears. . . ."

From this Cordovero concludes that "all the acts of a man must be for the sake of Heaven in thought, so that he straighten his thoughts in those acts for the sake of the unification of his Creator, as is known, and he should utter with his mouth, 'For the sake of the unification of the Holy One, blessed be He, and His Shekhina,' and then perform the act, so that the act should not be spoiled . . . and then the *Tzaddiq* [i.e., God] will alight on that act, and evil will be removed from it."

In the sequel Cordovero touches upon a favorite subject of the Kabbalists, namely that coupling between man and wife must be performed with awe and dedication:

> And this is the great principle in procreation, in the union of man and wife, for there is nothing that promotes the presence of Evil Lilith there as does this act. Because it is a great achievement to beget a child who survives, who builds worlds, rather than to beget,

> in hasty confusion, children of Lilith . . . or to beget evil ones, children of Samael and Lilith, the devastators of the world. . . . One must beware of having strife and quarrel in one's house . . . for then, instantly, Lilith will be present there. And let him [the husband] know that he represents the Supernal Groom, and his wife the Supernal Bride. . . .[15]

We shall see below examples of Kabbalistic anxiety over the interference of Lilith with the sacred act of union between man and wife (pp. 234–35). Here, in Cordovero's teachings, we see the general background of that fear: the concern with the danger that Lilith or some other forces of evil may interfere and "spoil" any pious act performed, and we are told that the method of preventing it is to recite the "unification" formula discussed in the preceding chapter.

Next in chronological order comes Isaac Luria (1534–1572), with whom we are by now well acquainted, and who was by far the most influential of the Safed Kabbalists, and this despite the fact that he spent only the last two years of his life in Safed and that he died at the young age of thirty-eight. He came to be referred to as the "divine Rabbi Isaac," or, from the acrostic of these three words in Hebrew, as *HaARI haQadosh*, "the Sacred Lion." In contrast to the other leading Safed masters, Luria himself wrote next to nothing. The works usually referred to as *Kitve haARI*, "the writings of Luria," were actually written by his disciples, and in the first place by Ḥayyim Vital, who carefully recorded his teachings, creating an extensive corpus of Lurianic works which, in turn, had a unique influence on the development and spread of the Kabbala. Thus it is from books compiled by Ḥayyim Vital that we know of Luria's maggidism, although, in fact, it is difficult to determine where in these books the record of Luria's teachings ends and Vital's own ideas begin.

Moreover, one of the two books which contain most of the information on Luria's *maggid* experiences, the *Sha'ar haYiḥudim* ("Gate of Unifications"), was compiled not even by Ḥayyim Vital but by his son Samuel Vital. The other book, *Sha'ar Ruaḥ haQodesh* ("Gate of the Holy Spirit"), forms one of the eight "Gates" into which Ḥayyim Vital organized Luria's teachings and which he entitled *'Etz haḤayyim* ("Tree of Life"). This work too was reedited and rearranged by Samuel Vital.[16]

The Lurianic doctrine of maggidism as it appears in the Vitals' presentation, has a distinctly non-spiritistic coloration. The *maggid* is not the spirit of a deceased saint or master, nor the audible manifestation of the Godhead, but comes into being as a result of an adept's studiousness, piety, and prayer. As Lawrence Fine put it, "the Voice that a man utters while

engaged in the study of Torah or mystical prayer ascends above, thereby creating a *maggid*. At a later point in time, this created spiritual voice descends below by 'clothing' itself in the mystic's current voice. . . ." or, it joins "with the voice of a departed Zaddik (righteous person) in the world above," and then, having merged, "the two voices . . . descend and speak through the voice of the adept."[17]

In Luria's maggidism, as reported by the Vitals, the *maggid* is not identified with the Shekhina, but has some connection with the *Sefira* of *Malkhut* ("Kingdom"), which, as we have seen, is identified with the Shekhina.[18]

Ḥayyim Vital (1543–1620) was the youngest of the five Kabbalists mentioned. In addition to presenting the Jewish world with the corpus of Luria's teachings, Vital himself wrote voluminously. He held forth in considerable detail about the theory and practice of *yiḥudim*, which he must have done in obedience to his master, Luria, who, he writes in his *Sefer haḤezyonot* ("Book of Visions"), often reproached him for not performing enough of them.[19]

After the appearance of Shabbatai Zevi (1626–1676), the false Messiah, those who continued to believe in him despite his apostasy in 1666, remained true to mainstream Kabbalism inasmuch as they experienced visitations from *maggidim* very similar to those of the non-Shabbataians. One of the leading Shabbataian mystics was Ya'aqov b. Yitzḥaq Serjun (or Tzurgeon; his name is spelled in Hebrew Tzerugun) of Salonika, who, in 1668, described his maggidic visions, or rather hallucinations. These were clearly modelled after the Zohar in which Talmudic sages frequently appear and divulge great mysteries to the company of adepts. However, there is one significant difference: while in the Zoharic visions the sages who appear are the sole apparitions and sources of mystical instruction, in Serjun's visions the sages, either Tannaim or Amoraim, appear in the company of "the Holy Shekhina." As for the contents of the revelations themselves, they all deal with "the sacred soul" of Shabbatai Zevi, the meaning of his apostasy, and related issues.[20]

Somewhat later, but still in the 17th century, revelations of heavenly *maggidim* concerning Shabbatai Zevi and the legitimacy of his messianic mission became frequent among Italian Kabbalists.[21] The usual contents of the communications the Shabbataian visionaries claimed to have received from their *maggidim* were confirmations of the messiahship of Shabbatai Zevi. One of them was Mord'khai Ashkenazi (d. 1701) from Zholkva (Zolkiev), a rabbi, preacher, and Kabbalist who spent some time in Italy and claimed to have received a new reading of the Zohar from heavenly *maggidim*. His book, titled *Eshel Avraham* ("The Tamarisk of Abraham"),

containing Zoharic commentaries, was seen through the press in Fuerth in 1700–1701 by Ashkenazi's patron and fellow Shabbataian visionary, Abraham Rovigo.

Abraham Rovigo (ca. 1650–1713) was himself a recipient of maggidic revelations, and a generous supporter of Kabbalists who claimed to be favored by *maggidim*. He was a wealthy man, a collector of manuscripts and printed books, and had, e.g., the *Sefer haKavvanot* copied for him by his teacher, the renowned poet and Kabbalist Moses Zacuto (ca. 1626–1697).[22] Zacuto lived from 1645 in Venice and was rabbi in Mantua from 1673 to his death. The relations between master and disciple became strained after the apostasy of Shabbatai Zevi, when Zacuto became an opponent of the Shabbataian movement, while Rovigo remained one of the *ma'aminim* ("believers"). Still, the extant letters from Zacuto to Rovigo, dated 1671–1672, show that the two remained friends, and repeatedly discussed Kabbalistic issues. Thus in April, 1672, Zacuto wrote to Rovigo: "I believe I have already informed you about the mystery of the name *luz* ["backbone"], which is the mystery of *Ḥokhma* and *Bina* ["Wisdom" and "Understanding," two of the ten *Sefirot*], of the male and the female. . . ." and continued to expatiate on this esoteric subject.[23]

Other Shabbataian visionaries who received revelations from *maggidim* and were supported by Abraham Rovigo included Issachar Baer Perlhefter and Mord'khai Mokhiaḥ Eisenstadt from Prague (between 1677 and 1681).[24]

A contemporary of these Kabbalists was Abraham Miguel Cardozo (1626–1706), a former Marrano and until 1673 a physician in Tripoli, North Africa, who from 1675 to 1680 occupied a leading position in the Shabbataian group of Smyrna. The Kabbalistic exercises of this group included maggidic visions, which confirmed Cardozo's belief in Shabbatai Zevi, and even prompted him to consider himself, or at least call himself, "Messiah ben Joseph."[25] Like all the Kabbalists of the period, Cardozo too was preoccupied with *yiḥudim*, and in one of his discourses he gives detailed instructions to members of his circle how to proceed in performing "unifications." He tells them to go down to a ravine near Smyrna with R. Eliyahu haKohen, who, he assures them, will be accompanied by his *maggid*. Once there, they should take five stones, "each the size of a fist or bigger," recite the verse "And a river went out of Eden" etc. (Gen. 2:10–14), "for the Shekhina's stones are sapphires," and then place or throw these "stones of holiness" into the river and recite a *yiḥud* addressing God: "You are He who unites the Holy One, blessed be He, with His Shekhina. . . . Be it Your will that You bring near the Shekhina to the Holy One, blessed be He. . . ." The description of the ritual and its explanation takes up several pages in Cardozo's treatise in which he also predicts the appearance of several

maggidim. What is noteworthy in this treatise of Cardozo is that he considers God a separate entity from both the Holy One, blessed be He, and the Shekhina: he instructs his followers to pray to God that He should unite the latter two.

Cardozo not only performed *yiḥudim* but also taught them to his disciples, and instructed them to recite *yiḥudim* on the tombs of *tzaddiqim* so as to receive revelations.[26] Nothing could show more clearly the close connection between *yiḥudim* and maggidic revelations.

The R. Eliyahu haKohen mentioned in Cardozo's treatise is none other than his friend Eliyahu haKohen haIttamari (d. 1729), the famous author of *Shevet Musar* ("Scepter of Chastisement") and of the *Midrash Talpiyot*, which we had occasion to quote. He too was the recipient of *maggidic* communications, and described the image of his *maggid*.[27]

The last flare-up of maggidism took place in the 18th century when it caused a stormy dispute between the poet and Kabbalist Moses Ḥayyim Luzzatto (1707–1746) and his opponents, led by the anti-Shabbataian Kabbalist Moses Ḥagiz (1672–ca. 1751). Luzzatto, whose Kabbalism was tinged with a Messianic coloring, considered his own marriage ceremony as symbolic of the unification of the Shekhina with her divine husband, and claimed that a *maggid* spoke to him while he was awake, and not in a dream. This was a claim the older and more moderate Moses Ḥagiz could not countenance, and felt that he must decry it.[28]

Luzzatto was twenty when he had his first maggidic revelation, and thereafter both his life and his writings were largely determined by his *maggid*. In order to achieve communications from the *maggid* Luzzatto engaged in persistent *yiḥudim* exercises and meditations. Like the other Kabbalists who claimed to have *maggidim*, Luzzatto did not see his *maggid* but only heard his voice as he spoke through Luzzatto's own mouth. However, in contrast to the *maggid* who spoke through the mouth of Joseph Caro and could be heard by all those present, the words that Luzzatto's *maggid* put in his mouth could be heard only by him. After three months of this, the Prophet Elijah appeared to Luzzatto, and gave him eschatological messages. Later the chief angel Metatron, Abraham, Moses, and R. Hamnuna Saba also would address him. Two years after the inception of these hallucinations Luzzatto's maggidism entered a new stage: he was now permitted to submit questions to the *maggid*. Throughout, much of his maggidic communications dealt with Shabbatai Zevi.

In one of his letters (in 1730) Luzzatto wrote to R. Benjamin haKohen Vitale (1651–1730), the Kabbalist and longtime rabbi of Reggio: "I was most diligent about the *yiḥudim*, to perform one *yiḥud* almost every quarter of an hour, and so I continue to this day." Luzzatto took some of his *yiḥudim*

from Nathan of Gaza (1644–1680), the prophet and theologian of Shabbatai Zevi.[29]

Only once in his writing did Luzzatto mention the name of his *maggid:* it was, he says, *Sh'mu'i'el,* which means something like "He who listens to God." A student of Luzzatto, R. Jacob Forti (or Ḥazaq, 1689–1782), who served as chief rabbi of Padua, gives a slightly different version of the *maggid*'s name: he calls him *Shim'i'el.* Such a compound name, ending in *El* (that is, "God"), is a typical angelic name, the like of which were for long current among the Kabbalists. To mention only one other example, the great-grandfather of the Ḥida, R. Isaac ben Abraham Azulai (born in the early 17th century), claimed to have received revelations from an angel named *Y'ho'el,* meaning "Y'ho (short for Yahweh) is my God."[30]

2 | *In Visions*

More or less simultaneously with the appearance of *maggidism* occurred experiences of visionaries who *saw* the Shekhina. Just as the former had its roots in the divine or angelic voices heard by Biblical prophets, and in the *Bat Qol* (literally, "Daughter of Voice"), the divine voice heard by some Talmudic sages, so the latter, as we have indicated above, also had their Talmudic, Midrashic, and even Biblical antecedents.

The earliest example of a visual appearance of a heavenly being in the form of a woman is found in the Midrash *Pesiqta Rabbati.* It is based on the prophetic-poetic image of Zion as the mother of the People of Israel, to which frequent references are made especially by Isaiah, in several of the Apocrypha, and in the earlier Midrash.[31]

The *Pesiqta Rabbati,* a Palestinian Midrash dating probably from the 7th century, contains this passage:

> Jeremiah said: When I went up to Jerusalem, I looked up and saw a woman sitting on top of the mountain, clad in black, her hair dishevelled, crying and hoping that someone would comfort her. And I too was crying and hoping that someone would comfort me. I approached her and spoke to her and said to her: "If you are a woman, speak to me, and if you are a spirit, get away from me!" She responded and said to me: "Don't you recognize me? I am she who had seven sons. Their father went overseas, and while I went up and cried about him, behold another [messenger] came and said to me: 'The house fell upon your seven sons and killed them' [cf. Job 1:18–19]. Now I do not know for whom I should cry and for whom I should dishevel my hair!" I answered and said

> to her: "You are not better than my Mother Zion, who has become a grazing ground for the beasts of the field." She answered and said to me: "I am your Mother Zion. I am the mother of seven, for it is written, 'She that hath borne seven languisheth' (Jer. 15:9)."[32]

In the sequel Jeremiah "proves" to Mother Zion that just as God restored the suffering Job to his former state of well-being, so He will restore and rebuild her as well.

What we have here is a description of a vision supposedly had by the Prophet Jeremiah, in which Mother Zion appears in the shape of a mourning woman who enters into a dialog with the prophet, and even quotes a verse from his book. Her image is so realistic that the prophet mistakes her for a flesh and blood woman, although there must have been something in her appearance that made him suspect that she might be a spirit. Jeremiah had advance knowledge of the existence of a heavenly woman symbolizing Zion, for he says, "You are not better than my Mother Zion . . ." but he still does not recognize the woman whom he sees before him. Hence the "punch line" of the vision: "I am your Mother Zion. . . ."

Some eight centuries separate this description of Jeremiah's vision of Mother Zion from a description of the appearance of the mourning Shekhina vouchsafed to the Kabbalist Abraham ben Eliezer haLevi Berukhim (ca. 1515–1593). Berukhim was born in Morocco, immigrated to Palestine probably before 1565, and became a disciple of Isaac Luria. He was an ascetic and a visionary, and a great devotee of the holiness of the Sabbath, about which he wrote a book, *Tiqqune Shabbat* ("Rules of the Sabbath," published in numerous editions). He also collected sections of the Zohar not included in the Mantua 1558–1560 edition; these were subsequently published under the title *Zohar Ḥadash* ("New Zohar"). The account of Berukhim's vision of the Shekhina is contained in a letter written from Safed by R. Shlomo Shlomel of Dresnitz, himself a well-known Kabbalistic author who settled in Safed in 1602. Apart from the vision, this letter contains indications of the enormous influence Isaac Luria had on the Safed Kabbalists.

> [R. Abraham haLevi Berukhim] would rise every midnight and walk about in the streets [of Safed], and raise his voice crying aloud with a bitter voice: "Arise for the honor of the Name, blessed be He, for the Shekhina is in exile, and our Holy House is devoured by fire, and Israel are in great trouble. . . ." [Once Isaac Luria told him:] "Go to Jerusalem, and there go to the Western Wall, and pour out your prayer and your tears, and then, if you will find favor with your Creator and will merit to see the Shekhina, then you

can be sure that you will live another 22 years."

As soon as R. Abraham haLevi heard this, he instantly sold all the things of his house for the expenses of the trip, and went to Jerusalem, and instantly shut himself up three days and three nights, in fasting and in sackcloth and in great weeping, and did not move from there. And after three days he went to the Western Wall and prayed there, and cried bitterly. And when he lifted up his eyes he saw on top of the Western Wall the shape ["dugma"] of a woman behind her [?], and I don't want to write here in what kind of clothing he saw her, for I fear for the honor of our Creator. And as soon as he saw her in that manner, he fell upon his face on the ground, and cried and wept: "Mother! Mother! Mother Zion! Woe to me that I see you thus! . . ." And so he cried bitterly, and beat upon his face and tore his beard and the hair of his head, until he fainted, fell down, and slept upon his face. Then he saw in a dream that she came and put her hand on his face and wiped away the tears from his eyes, and said to him: "Be comforted, my son Abraham, for 'there is hope for thy future, and they children shall return to their own border' (Jer. 31:17), for 'I will cause their captivity to return and I will have compassion on them'" (Jer. 33:26). And R. Abraham awoke from his sleep, and returned to Safed joyfully and happily, and when the ARI of blessed memory saw him he said to him: "I can see in you that you merited appearances of the Shekhina, and from now on you can be sure that you will live another 22 years." And so it was, for he lived after this 22 years.[33]

The affinity of R. Berukhim's vision with that attributed to Jeremiah by the Midrash *Pesiqta Rabbati* is obvious, despite the new elements contained in the story about the Safed Kabbalist. The words the woman addresses to R. Berukhim are quotations from Jeremiah. Luria identifies the apparition, both before and after the occurrence of R. Berukhim's vision, with the Shekhina. R. Berukhim, however, recognizes in it only "Mother Zion" (as did Jeremiah), and this despite the fact that he himself was daily (or nightly) preoccupied with the pain of the Shekhina, and that the three days of fasting and mourning he engaged in in Jerusalem before going to the Western Wall could have been done only as an expression of his grief over the exile of the Shekhina.

R. Berukhim's vision is divided into two parts: at first, while awake, he sees "Mother Zion," reacts in vehement desperation, and faints. Then, while asleep (or unconscious?), he feels Mother Zion touch his face, wipe away his tears, and hears her address comforting Biblical quotations to him. I

have not come across other instances of such a double visionary experience in both a conscious and an unconscious state one after the other.

It is noteworthy that, as compared to the maggidic revelations, the visual or visionary appearances of the Shekhina are much rarer. This may have something to do with the auditory rather than visual orientation of the Kabbala and Hasidism and their followers. Jewish mysticism is based primarily on the spoken, heard, and written word; visual experiences play a relatively minor role in it. The same holds good in the realm of combatting the "Other Side," as evil powers are referred to, and their dangerous influences: it is primarily verbal methods, prayers, incantations, concentrations, unifications, and the like, that are employed to protect a person or a place from being attacked or harmed, or to rid him or it of the presence of evil spirits, *dibbuqim,* or demons, and only secondarily are visible objects, such as *qame'ot,* amulets or talismans, used, and even if they are, it is the written word on them that makes them efficacious.

Yet withal, occasional appearances of the Shekhina were reported by Kabbalists and Hasidim, even after the 18th-century decline of maggidism. The desire to be vouchsafed mystical visions of the Shekhina produced, at least in some cases, visionary experiences which were then duly put down in writing. A Hasidic master who was most interested in Shekhina visions recorded by, or reported of, leading Kabbalists and *Tzaddiqim,* and who himself has such visions, was the prolific author R. Isaac Judah Jehiel Safrin (or Sifrin, 1806–1874). In one of his books, entitled *N'tiv Mitzvotekha* ("The Path of Thy Commandments"),[34] he describes, among other visions of the Shekhina, the one seen by the 16th-century Kabbalistic master R. Abraham haLevi Berukhim, with which we are by now familiar from the 17th-century account of R. Shlomo Shlomel of Dresnitz (see above). Less inhibited than R. Shlomo Shlomel, R. Safrin supplies some additional details about the woman R. Berukhim saw on top of the Western Wall. She had the "shape of the likeness of a woman dressed in black," and R. Berukhim instantly recognized her as the Shekhina. He did not address her, as in R. Shlomo Shlomel's account, as "Mother Zion," but cried out, "Woe to me that I must see you thus!" and fainted. In his sleep (fainting and falling asleep seem to be the same thing for R. Safrin) R. Berukhim sees that "the Shekhina approaches him in the shape of the likeness of a woman adorned in beautiful clothes, very radiant," and he hears her address to him the same words of comfort quoted by R. Shlomo Shlomel. The major difference between the two accounts is that in the earlier one it is only Isaac Luria who identifies the woman and the Shekhina, while in the later one R. Berukhim himself recognizes her.

Next, R. Safrin quotes the *Sefer haḤezyonot* ("Book of Visions") of

Ḥayyim Vital, which reports a vision of a radiant woman by that chief disciple of Isaac Luria. R. Safrin quotes these lines from the *Sefer haḤezyonot:* Vital saw "a dignified woman *(isha ḥashuva)*, and she was beautiful like the sun, stand in front of me, and she said to me: 'What is it, my son Ḥayyim, why are you crying? I heard *[sic]* your tears, and came to help you.' And she stretched forth her hand, and I cried: 'My mother! My mother! Help me to see the Name [i.e., God], blessed be He, sitting on the throne, the Ancient of Days, whose beard is white like snow, and who is majestic without end. . . .'" Here R. Safrin omits a major part of the story, and continues at the point where God Himself addresses Vital, saying to him: "Ḥayyim, my son . . ." whereupon R. Safrin's quotation breaks off.

Although the quote from Vital, as presented by R. Safrin, does not say explicitly that the radiant woman was the Shekhina, the very fact that Safrin inserts this quotation among others that talk about the appearances of the Shekhina indicates that he interpreted the apparition as the Shekhina. Also, no other woman but the Shekhina could help a person see God.

Checking Ḥayyim Vital's *Book of Visions*[35] I found that R. Safrin quoted rather inaccurately even the small part of Vital's vision he reproduced. Vital gives a lengthy description of a dream he had in the night of Saturday, the 8th of Teveth, 1566, in which he saw a high mountain with its head reaching into heaven, and the Prophet Elijah took him, in a flash, to its top. There a ladder stood leading up to heaven, but once there, Elijah disappears, and Vital sees

> and behold a dignified woman, beautiful like the sun, standing on top of the ladder. And I thought in my heart that she was my mother. And she said: "What is it, my son Ḥayyim, why are you crying? I heard your tears, and came to help you." And she stretched forth her right hand, and lifted me up to the top of the ladder. And I saw, and behold, there was there a big round window, and the flame of a great fire came out of it, sweeping back and forth like the appearance of lightning, with great strength, and it burned everything that was there. And I called out with bitterness of soul to that woman and said to her: "My mother! My mother! Save me from this fire so that it should not burn me!" And she said: "Nobody can save you from this flame but you yourself! Therefore I shall advise you what to do: Place your hand on your head, and you will find there wool, white as snow, and take it and put it into the flaming window, and it will be closed." And she quickly went on. And it seemed to me that the black locks of my head were transformed into wool through some merit in the mystery of "the hair

> of his head like pure wool" (Daniel 7:9). And so I did, and I was able to go on quickly. And within a moment the flame again poured out as before. And then the woman disappeared from my eyes.

Now Elijah appears again and takes Vital to a wondrous place, a miraculous garden, where Vital sees the souls of saintly men in the shape of geese studying the Talmud. In the middle of the garden Vital sees a huge building floating in the air, with a ladder leading up to it. Elijah again disappears, and, Vital continues,

> I alone went up the ladder and entered the door of that building, and saw the Name, blessed be He, sit on the throne next to the middle of the southern wall, and he had the likeness of an Ancient of Days, old, with a beard white as snow, in infinite majesty, and *tzaddiqim* ["saintly men"] were sitting there on the floor before Him on beautiful new couches and carpets, and learned Tora from his mouth. And I knew in my mind that these were saintly men who are called *b'ne 'aliya* ["men of spiritual sublimity"], and they had the form of human beings. They see the face of the Shekhina always, and learn Tora from His own mouth. . . . And when I entered and saw His face I got affrighted and began to tremble. And I fell upon my face on the ground before His feet, and no strength at all was left in me. And He stretched forth His hand, and took hold of my right hand, and said to me, "Ḥayyim, my son! Arise, why do you fall on your face? Fear not. . . ."

Finally Vital entreats God to let him stay with Him, but God says that his time has not yet come and he must return to earth.[36]

As we see, Vital's own account of his dream vision does not identify the woman he sees as the Shekhina, although here too there are hints as to the divine nature and powers of the woman whom Vital at first takes to be his mother. R. Safrin's alleged quote from Vital to the effect that Vital entreated his mother to help him see God is not contained in the original. One must assume either that R. Safrin had before him a different manuscript of Vital's *Sefer haḤezyonot,* or that he did not remember it correctly and attributed to it statements not found in it.

Before returning to R. Safrin's account of visions of the Shekhina I wish to refer to one other mention of the Shekhina contained in Vital's book. In one of his dreams Vital finds himself at the burial of Moses, and in his dream, he says, "I was sad and very troubled in my heart, and said: 'O if I only could merit now to see the radiance of the Shekhina who shields Moses, peace be upon him, and stands here with us. . . . If only my eyes would be opened and I could see. . . ."[37]

To come back now to R. Safrin, he next refers briefly to a vision of the Shekhina had by "the saint, our master the rabbi Levi Yitzḥaq [of Berdichev]": "On the night of Shavu'ot he was granted a vision of the Shekhina, in the shape, etc. And she said to him: 'Be strong, my son Levi Yitzḥaq! Many pains have you endured, but be strong, my son, for I shall be with you. Fear not and be not afraid. . . .'"

A different type of Shekhina vision was seen, according to R. Safrin, by R. Ya'aqov Shimshon of Shepetovka:[38]

> When he was in the Holy Land, he saw the Shekhina in a vision, crying and mourning over the husband of her youth, for she had a husband and he died. And he [R. Ya'aqov Shimshon] awoke from his sleep and said to his companions: "There is in the world nobody today who could be the husband of the living Matronit of emanation, but the saint R. Pinḥas of Koretz,[39] and surely he must have died tonight." And he rent [his garment in mourning], and pronounced the blessing ["Blessed be the True Judge," one is supposed to pronounce when hearing of the death of a dear one], and cried much, for he [R. Pinḥas] was his master. And after a while it became known that these words were indeed true. . . .[40]

R. Safrin's own visions of the Shekhina are recorded by him in two different versions. His book *M'gillat S'tarim* ("Scroll of Mysteries") contains accounts of no less than three visions he had of the Shekhina. On one occasion, he writes,

> In the middle of the day, while I was studying the Gemara *Yebamot,* for the sake of the God of Eternity [*El 'Olam*], to adorn the Shekhina with all my strength, suddenly a great light fell [*nafal*] upon me, and the whole house was filled with light, with a wonderful light, from the inspiration of the Shekhina. This was the first time that I tasted a little of His light, blessed be He, truly, without mistake and confusion, in a wonderful pleasure, a very, very sweet light which no thought can encompass.

On another occasion, R. Safrin writes, "On the eve of the holy Sabbath I dreamt a long dream, and in it [was] the explanation of Psalm 23, 'The Lord answer thee in the day of trouble.' And the essence of the pain was about the limbs of the Shekhina, clad in this pain. . . ."[41]

In a third entry R. Safrin writes:

> The 20th of 'Omer, 5605 [1845]. I was in the town of Duqla. I arrived there in the middle of the night and in darkness. There was

> nobody to take me into his house, until a tanner came and took me in. I wanted to pray the evening prayer and perform the counting of the 'Omer, but could not [do it] there. So I went to the local House of Study and prayed there, and this made me understand the reason of the descent of the Shekhina and her pain when she stood in the street of the tanners [and was greatly humiliated thereby]. And I wept much before the Master of All over the pain of the Shekhina. And because of the intensity of my pain I fainted, and slept a little, and saw in a vision light and great brightness, like the shape of a virgin, adorned, and her light shone, but I did not merit to see her face. And more one should not write. And her light was greater than the light of the sun at noon.[42]

R. Safrin reported of his visit to Duqla in greater detail in his *N'tiv Mitzvotekha,* in a third-person narrative. After he "fainted and fell asleep," he saw the Shekhina

> in a vision of light and splendor and great radiance, such a light that it dimmed the light of the wheel of the sun, etc. She was adorned with twenty-four jewels, and each jewel shone with such a light that the light of the sun grew veritably dark in comparison, in so many kinds of radiance and splendor that the corporeal thought cannot encompass it. And she said, "Be strong, my son," etc. And he was distressed that he was granted to see only a view from the back, and did not merit to receive the face of the Shekhina. And they [?] responded to him, "But you are alive, and it is written, 'For man shall not see Me and live' (Ex. 33:20)."

Here R. Safrin is reminded of another vision he had when he saw the same kind of radiance surround his master:

> And he went about and told in these words: "Such a radiance I truly saw surround my master on New Year's Day which fell on Sunday, and on Monday my teacher and master was not able to blow [the *shofar*], and he arose to pray Minḥa, and his Minḥa prayer was always burning fire, the flame of God, as is known. And when I saw this, I got up from my place and went to the window that was close to the place of my master, to pray there. And after the prayer it was the habit of my master to walk a little up and down, and also to go to the window. And when he turned his face back from the wall I saw on his face a radiance and glow and effulgence like the appearance of the rainbow on high, in shining colors. And fear and trembling came upon me, and I fell backward, and some

> people grabbed me so that I should not fall, and they did not know its reason. And when my master saw my trembling, he turned his face back to the wall, and leaned his head against the wall for two or three minutes, and then turned back, and I no longer saw anything. . . .[43]

R. Safrin's descriptions of his visions are significant more for what they do not say than for what they do. They do not say that the luminous virgin whom he saw was the Shekhina, evidently because that would have been sacrilegious. A 19th-century Hasidic writer no longer had the daring of the Midrashic authors of antiquity who saw nothing wrong in asserting that the Children of Israel "feasted their eyes on the Shekhina" (see above, p. 103), and certainly not of the Hellenistically influenced artist of the Dura Europos synagogue who depicted her as a nude woman holding the infant Moses in her arms (see below, p. 291). Nor did he have the temerity, even in his dreams, to see the face of the Shekhina and of God, "the Ancient of Days," as Ḥayyim Vital claimed to have seen in a dream of his (see above). R. Safrin's dream vision is more modest: he claims to have seen only the back of the Shekhina.

His use of the epithet "virgin" to describe the apparition he saw echoes the well-known imagery of the Biblical prophets in which the person representing a nation or people is referred to as a "virgin," e.g., the "virgin daughter of Zion" (Isa. 37:22; Lam. 2:13), "virgin of Israel" (Jer. 18:13, etc.; Amos 5:2), "virgin daughter of Egypt" (Jer. 46:11), "virgin daughter of Zidon" (Isa. 23:12), "virgin daughter of Babel" (Isa. 47:1). On the other hand, R. Safrin's use of the epithet "virgin" to describe the woman he saw in his vision seems to be in contradiction to the description of the like apparition by the other visionaries whom he quotes and who recognized in her their own Mother Zion. However, looking at the concept of the divine woman from a broad historical perspective, one recognizes that the attribution of both virginity and motherliness to one and the same divine person is precisely what one would expect if the Shekhina of the Hasidim—equated in these visions with Zion, which in turn is but a poetic title for the "Community of Israel" (see above, pp. 129–30)—were but the specific late Jewish variant of the Ancient Near Eastern goddess. That goddess was, as we have seen (above, pp. 136ff.), characterized by four cardinal traits: she was virgin, mother, lover, and warrior, all the four of which recur in both the popular image of the Virgin Mary, and the Kabbalistic concept of the Matronit-Shekhina. Two of these characteristics, those of virginity and motherliness, reappear, or rather have survived, in the Hasidic visions reported by R. Safrin, and the contradiction between them is perceived by the Has-

idic raconteur as little as it was by his many predecessors both within and outside Judaism. With all this, R. Safrin's accounts give us a glimpse, albeit a tantalizingly fleeting one, into how the Shekhina figured in popular Jewish imagination.

As far as R. Safrin personally is concerned, his visionary experiences are an expression of his intense preoccupation with the Shekhina and with *yiḥudim*—this is readily apparent from many passages in his books. He says, for instance, that the effect of a simple act of a *tzaddiq,* such as smoking a pipe, was believed to bring about the unification of God and the Shekhina. He quotes R. Ya'aqov Yosef of Polonnoye to the effect that when the Ba'al Shem Tov smoked his pipe, in each and every movement of his he effected "awesome unifications." And of R. Zevi of Zhidachev he reports that he brought down the Shekhina by merely "smoking the pipe, with all the unifications he performed at those times."[44]

We conclude this rapid and of necessity sketchy presentation of the Shekhina as *maggid* and vision with a report of the quite unusual attitude to the *maggid* phenomenon displayed by Elijah, the Gaon of Vilna (1720–1707). Although the Gaon of Vilna was a militant opponent of Israel Ba'al Shem Tov and of Hasidism, he was a devoted student of the Zohar, was a Kabbalist, and in his adolescence even had a vision of "an image" which made him desist from trying to create a *golem.*[45] The Gaon's most important disciple, R. Ḥayyim of Volozhin (1749–1821), writes about him that "Heaven wanted to deliver unto him supreme mysteries . . . through *maggidim,* masters of mysteries and [heavenly] princes of the Tora [i.e., different kinds of angels], but he did not desire it; it was offered to him, but he refused it. I heard from his holy mouth that many times *maggidim* from Heaven appeared to him, requesting to deliver unto him the mysteries of the Tora without any effort, but he would not hearken unto them." Once, however, it so happened that despite the Gaon's refusal, the Prophet Elijah visited him and "revealed to him great and awesome things."[46]

With the spread of the *Haskala,* the Jewish Enlightenment, the religious atmosphere in which most Jews lived was no longer conducive to either maggidic experiences or visions of the Shekhina. Yet despite the diminution signified by this development, one feature, introduced originally by the Kabbalists, survived in wide segments of the Jewish community, and today still forms an integral part of their religious services. The feature I am referring to is the recital of *yiḥudim,* which we have discussed in the preceding chapter.

X

LILITH

No she-demon has ever achieved as fantastic a career as Lilith, who started out from the lowliest of origins, was a failure as Adam's intended wife, became the paramour of lascivious spirits, rose to be the bride of Samael the Demon King, ruled as Queen of Zemargad and Sheba, and ended up as the consort of God himself. The main features of Lilith's mythical biography first appear in Sumerian culture about the middle of the 3rd millennium B.C.E. What she meant for the Biblical Hebrews can only be surmised, but by the Talmudic period (2nd–5th centuries C.E.) she was a fully developed evil she-demon, and during the Kabbalistic age she rose to the high position of queenly consort at God's side.

1 | *The Background*

The earliest mention of a she-demon whose name is similar to that of Lilith is found in the Sumerian king list which dates from ca. 2400 B.C.E. It states that the father of the great hero Gilgamesh was a Lillu-demon. The Lillu was one of four demons belonging to a vampire or incubi-succubae class. The other three were Lilitu (Lilith), a she-demon; Ardat Lili (or Lilith's handmaid), who visited men by night and bore them ghostly

children; and Irdu Lili, who must have been her male counterpart and would visit women and beget children by them.[1] Originally these were storm-demons, but because of a mistaken etymology they came to be regarded as night-demons.[2]

Lilith's epithet was "the beautiful maiden," but she was believed to have been a harlot and a vampire who, once she chose a lover, would never let him go, but without ever giving him real satisfaction. She was unable to bear children and had no milk in her breasts.[3] According to the Sumerian epic *Gilgamesh and the Huluppu Tree* (dating from ca. 2000 B.C.E.), Lilith (Lillake) built her house in the midst of the Huluppu (willow) tree which had been planted on the bank of the Euphrates in the days of Creation. A dragon set up its nest at the base of the tree, and the Zu-bird placed his young in its crown. Gilgamesh slays the dragon with his huge bronze axe, whereupon the Zu-bird flees with its young to the mountain, and Lilith, terror-stricken, tears down her house and escapes to the desert.[4]

A Babylonian terra-cotta relief, roughly contemporary with the above poem, shows in what form Lilith was believed to appear to human eyes. She is slender, well-shaped, beautiful and nude, with wings and owl-feet. She stands erect on two reclining lions which are turned away from each other and are flanked by owls. On her head she wears a cap embellished by several pairs of horns. In her hands she holds a ring-and-rod combination.[5] Evidently, this is no longer a lowly she-demon, but a goddess who tames wild beasts and, as shown by the owls on the reliefs, rules by night. (See Plate 31.)

In the ensuing centuries Lilith's shape changed again. A 7th-century B.C.E. tablet found at Arslan Tash in northern Syria shows her as a winged sphinx, across whose body is written the following inscription in Phoenician-Canaanite dialect:

O, Flyer in a dark chamber,
Go away at once, O Lili!

These lines are part of an incantation text used to help women in childbirth[6]—one of many extant from the period of the Assyrian Empire and the new Babylonian Kingdom—and they show that by that time the myth of Lilith had all the major features which were elaborated to their fill 2,000 years later by Kabbalistic Judaism.

2 | *Isaiah 34:14*

One brief reference to Lilith, and a doubtful one at that, is all that is found in the entire Bible. Isaiah, in describing Yahweh's day of

vengeance, when the land will be turned into a desolate wilderness, says:

> The wild-cat shall meet with the jackals
> And the satyr shall cry to his fellow,
> Yea, Lilith shall repose there
> And find her a place of rest.[7]

The Mesopotamian and North Syrian material surveyed above supplies the background to this prophetic allusion. Evidently, Lilith was a well-known she-demon in Israel of the 8th century B.C.E., whose name had only to be mentioned to conjure up the beliefs current about her. That she is said to find a place of rest in the desert seems to tie in with the episode recorded in the Sumerian Gilgamesh fragment: after Lilith fled into the desert, she evidently found repose there.

3 | *The Talmudic Lilith*

The information about Lilith contained in the Talmud and the Midrashim of the Talmudic period is meager. One passage states that she had wings[8]; another, that she had long hair.[9] On this basis Rashi (Shlomo Yitzḥaqi), the medieval Talmud commentator (1040–1105), concluded that the Lilin (masculine plural of Lili, whose feminine singular is Lilith), have human form, except that they have wings, in contrast to the demons who have completely human form and eat and drink like humans, and to the spirits who have neither body nor form.[10] It thus appears that, as far as her overall appearance was concerned, Lilith looked very much like the Cherubim. This detail will become significant in connection with the Zoharic myth about the relationship of Lilith to the Cherubim.

Somewhat more is known about the life history of Lilith and her nefarious activities, as they were imagined in the Talmudic period. Lilith, we learn, was Adam's first wife. However, Adam and Lilith could find no happiness together, not even understanding. When Adam wished to lie with her, Lilith demurred: "Why should I lie beneath you," she asked, "when I am your equal, since both of us were created from dust?" When Lilith saw that Adam was determined to overpower her, she uttered the magic name of God, rose into the air, and flew away to the Red Sea, a place of ill-repute, full of lascivious demons. There, Lilith engaged in unbridled promiscuity and bore a demonic brood of more that one hundred a day. God, however, sent after her three angels, Senoy, Sansenoy, and Semangelof by name,[11] who soon located her in the same wild waters in which the Egyptians were to drown in the days of the Exodus. The angels gave her God's message,

but she refused to return. When they threatened drowning her in the sea, she argued: "Let me be, for I was created in order to weaken the babes: if it is a male, I have power over him from the moment of his birth until the eighth day of his life [when he is circumcised and thereby protected], and if a girl, until the twentieth day." The angels insisted however, and in order to make them desist, she swore to them in the name of God: "Whenever I shall see you or your names or your images on an amulet, I shall do no harm to the child." Moreover, she gave her consent to the death of one hundred of her own children day after day—which is the reason why that many demons die every day. This agreement between the three angels and Lilith is the basis for writing the names Senoy, Sansenoy, and Semangelof on amulets hung around the necks of newborn babes: when Lilith sees the names, she remembers her oath and leaves the child alone.[12]

However, in spite of her determined refusal to return to Adam, Lilith soon became attracted to him again, and managed to sleep with him against his will. In the meantime Adam had received Eve as his wife, was persuaded by her to eat from the fruit of the Tree of Knowledge, and was expelled from the Garden of Eden with the curse of death hanging over his head. When Adam became aware that because of his sin God decreed mortality upon him and all his future descendants, he embarked upon a period of penitence which lasted for 130 years. He fasted, refrained from intercourse with Eve, and, in order to mortify his flesh, wore a belt of rough fig twigs around his naked body. He could not, however, control his involuntary nocturnal emissions, which were brought about by female spirits who came and coupled with him and bore him spirits, demons, and Lilin. At the same time, male spirits came and impregnated Eve, who thus became the mother of innumerable demon children. The spirits thus procreated are the plagues of mankind.[13]

It should be noted that the succubae and incubi who sought out Adam and Eve in the 130 years of their self-imposed separation remain anonymous in all the sources dating from the Talmudic period. Yet there is basis to assume that Lilith was regarded as one of Adam's succubae, because her seduction of Adam must have served as the mythical prototype and validation of the belief in her power over men who spent a night alone in a house. The danger to which such a man would expose himself was regarded as so acute that Rabbi Ḥanina, the 1st century C.E. teacher, warns: it is forbidden for a man to sleep alone in a house, lest Lilith get hold of him.[14]

4 | *Lilith of the Bowls*

The relatively scanty Talmudic material about Lilith is complemented by much richer data contained in Aramaic incantation texts found

in Nippur in Babylonia, some 50 miles southeast of modern Hilla in Iraq. Excavations conducted by the University of Pennsylvania brought to light dozens of bowls inscribed with magical texts, several of which are directed against Lilith or Liliths. The bowls date from about 600 C.E.; in other words, they are about a hundred years younger than the text of the Babylonian Talmud (which was compiled ca. 500 C.E.). But there is every reason to assume that such incantations against Lilith were not the product of the 6th century but go back to earlier periods. In Nippur of the 6th century, there was an important Jewish colony (in addition to Mandaeans and other groups), and some of the most interesting bowls were, by their own incontrovertible evidence, inscribed and used by Jews. While the Talmud contains the views of the learned elite about Lilith, these bowls show what she meant for the simple people. It is surprising to see to what extent the sages and the quacks shared the fear of Lilith and the belief in her evil nature.

From a synopsis of the incantation texts it appears that Lilith was regarded as the ghostly paramour of men and constituted a special danger for women during many periods of their sexual life cycle: before defloration, during menstruation, etc. A mother in the hour of childbirth and her newborn babe were especially vulnerable, and therefore had to be protected from the Liliths. The home, arches, and thresholds were favorite haunts where the Liliths lurked ready to pounce on anybody foolish enough to go unprotected. A rough drawing sketched on a Jewish bowl shows Lilith naked, with long loose hair, pointed breasts, no wings, strongly marked genitals, and chained ankles. At night, the female Liliths join men, and the male Lilin women, to generate demonic offspring. Once they succeed in attaching themselves to a human, they acquire rights of cohabitation, and therefore must be given a *get*, or letter of divorce, in order that they may be expelled. Jealous of the human mates of their bedfellows, they hate the children born of ordinary human wedlock, attack them, plague them, suck their blood, and strangle them. The Liliths also manage to prevent the birth of children by causing barrenness, miscarriages, or complications during childbirth. As Montgomery aptly put it over half a century ago, "the Liliths were the most developed products of the morbid imagination—of the barren or neurotic woman, the mother in the time of maternity, the sleepless child."[15]

Let us now turn to a few examples illustrating the manner in which these magic incantations are phrased. The first is the text of the bowl which carries the sketch of Lilith described above (see Plate 32). It reads as follows:

> In the name of the Lord of salvations. Designated is this bowl for the sealing of the house of this Geyonai bar Mamai, that there flee from him the evil Lilith, in the name of "Yahweh El has scattered";

> the Lilith, the male Lilin and the female Liliths, the Hag [ghost?] and the Snatcher, the three of you, the four of you, and the five of you. Naked are you sent forth, nor are you clad, with your hair dishevelled and let fly behind your backs. It is made known to you, whose father is named Palhas and whose mother Pelahdad: Hear and obey and come forth from the house and dwelling of this Geyonai bar Mamai and from Rashnoi his wife, the daughter of Marath.
>
> . . . Be informed herewith that Rabbi Joshua bar Peraḥia has sent the ban against you. . . . A divorce-writ [*gita*] has come down to us from heaven, and therein is found written your advisement and your intimidation, in the name of Palsa-Pelisa ["Divorcer-Divorced"], who renders to thee thy divorce and thy separation, your divorces and your separations. Thou, Lilith, male Lili and female Lilith, Hag and Snatcher, be under the ban . . . of Joshua bar Peraḥia, who has thus spoken: A divorce-writ has come for you from across the sea. . . . Hear it and depart from the house and dwelling of this Geyonai bar Mamai and from Rashnoi his wife, the daughter of Marath. You shall not again appear to them, either in a dream by night or in slumber by day, because you are sealed with the signet of El Shaddai, and with the signet of the House of Joshua bar Peraḥia and by the Seven who are before him. Thou Lilith, male Lili and female Lilith, Hag and Snatcher, I adjure you by the Strong One of Abraham, by the Rock of Isaac, by the Shaddai of Jacob, by Yah [is] his name . . . by Yah his memorial . . . I adjure you to turn away from this Rashnoi, the daughter of Marath, and from Geyonai her husband the son of Mamai. Your divorce and writ and letter of separation . . . sent through holy angels . . . the Hosts of fire in the spheres, the Chariots of El Panim before him standing, the Beasts worshipping in the fire of his throne and in the water. . . . Amen, Amen, Selah, Halleluyah![16]

Only a few comments are needed for the complete understanding of this text. Its intent is clear: Lilith and her company are adjured to leave the house of Geyonai and his wife Rashnoi, never again to return. The Liliths are given a letter of divorce and sent naked, just as Gomer was by her husband Hosea.[17] In another bowl, both female and male demons are given their *get* (letter of divorce) in order thus to rid the house and its inhabitants of them:

> This is the *get* for a demon and spirits and Satan . . . and Lilith in order to banish them from . . . the entire house. Yah . . . cut off the king of the demons . . . the great ruler of the Liliths. I adjure you

> . . . whether you are male or female, I adjure you. . . . Just as the demons write letters of divorce and give them to their wives and do not again return to them, so take your letter of divorce, accept your stipulated share [*ketubba*], and go and leave and depart from the house. . . . Amen, Amen, Amen, Selah.[18]

A medieval story, preserved in Hebrew and Arabic versions, tells of a youth, Dihon ben Shalmon, who marries the daughter of Ashmodai, then gives her a *get* (letter of divorce), whereupon she kills him with a kiss.[19] Rabbi Joshua ben Perahia, whose name is invoked several times in the Nippur bowl, was an early-1st-century B.C.E. sage, who evidently was believed, by the 6th century C.E., to have been a powerful exorciser of demons. The divine names and epithets are either traditional Jewish or very close to them. The concluding lines show that certain elements of the Merkabah ("Chariot") mysticism[20] were familiar matters in 6th-century Nippur.

Another, considerably later text is a classic example of a magic ritual whose integral part is its own validation by reference to a myth. It reads as follows:

Shadai

> Senoy, Sansenoy, Semangelof, Adam, and the Ancient Eve. Out Lilith.[21]
>
> In the name of Y, the God of Israel, the Cherubim-sitter, whose name lives and endures forever. The prophet Elijah was walking on the road and met the Evil Lilith and all her band. He said to her: "Where are you headed for, O you Unclean One, and you Spirit of Defilement, and all your band, where are they going?" And she answered and said to him: "My lord Elijah, I am on my way to the house of a woman in childbirth, Mercada . . . ,[22] daughter of Donna, to give her the sleep of death and to take her child which is being born to her, to suck its blood, and to suck the marrow of its bones, and to seal its flesh." And the prophet Elijah, blessed be his memory, said to her: "With a ban from the Name (i.e., God), blessed be He, be you restrained and be you like unto a stone." And she answered and said to him: "For the sake of Yahweh, release me from the ban and I shall flee and swear to you in the name of Y, the God of Israel, that I shall desist from this woman in childbirth and her child which is being born to her, and shall surely not harm her. And every time that they mention my names, or I see my names written, I and my band shall have no power to do evil or to harm. And these are my names: Lilith, Abitar, Abiqar, Amorpho, Hakash, Odam, Kephido, Ailo, Matrota, Abnukta, Shatriha, Kali, Taltui, Kitsha." And Elijah answered her: "Behold,

> I adjure you and all your band in the name of Y, the God of Israel, [which name in its] numerical value [equals] 613 [or the number of the religious commandments], [the God of] Abraham, Isaac, and Jacob, and in the name of his Holy Shekhina, and in the name of the ten Seraphim, Ophanim, and Holy Beasts, and the ten books of the Law, and by the might of the God of the Hosts, blessed be He, that you and your band go not to injure this woman, or the child she is bearing, neither to drink its blood, nor to suck the marrow of is bones, nor to seal its flesh, nor to touch them, either their 248 limbs, nor their 365 ligaments and veins. Just as she cannot count the stars of heaven, and cannot dry up the waters of the sea. In the name of Him who rent Satan, Ḥasdiel, Shamriel."[23]

The efficacy of the ritual is ensured by reciting the first occurrence of a similar rite, performed by a mythical hero, in this case the prophet Elijah. The structure of the text is identical with the one which validates the efficacy of an amulet inscribed with the names of Senoy, Sansenoy, and Semangelof by telling the story of how these three angels extorted a promise from Lilith to keep away from all places where their names are displayed. As we shall see later, the thirteen additional names of Lilith reappear in medieval Jewish magic.

On a third incantation bowl the name "Lilith Buznai" appears several times.[24] Some four centuries later this name, in the form "Pizna," reappears in the Midrash Abkir. The context of the bowl says: "Charmed art thou, Lilith Buznai and all the goddesses . . . and the 360 Tribes, by the word of the granddaughter of the angel Buznai." Evidently, Buznai was the individual name of a female numen, who is described interchangeably as a Lilith and an angel; she was regarded as a goddess and had a granddaughter who was antagonistic to her. A similar enmity, as we shall see later, existed between the Elder Lilith and the Younger Lilith, according to Kabbalistic mythology.

Lilith's fame and fear spread from Babylonia to the East, into Persia, where magic bowls were used against her by various strata of the population, much in the same fashion as in Babylonia. As in the case of the bowls discussed above, the Persian bowls also talk of Lilith in the singular, as well as of plural "Liliths," as a category of female, harmful, and dangerous demons, in conjunction with male "devils" and male "demons." The following bowl inscription is written in Aramaic, around a picture of Lilith, similar in execution to the one referred to earlier though differing in detail (Plate 33):[25]

> You are bound and sealed, all you demons and devils and Liliths, by that hard and strong, mighty and powerful bond with which are tied Sison and Sisin. . . . The evil Lilith, who causes the hearts

> of men to go astray and appears in the dream of the night and in the vision of the day, who burns and casts down with nightmare, attacks and kills children, boys and girls—she is conquered and sealed away from the house and from the threshold of Bahram-Gushnasp son of Ishtar-Nahid by the talisman of Metatron, the great prince who is called the Great Healer of Mercy . . . who vanquishes demons and devils, black arts and mighty spells and keeps them away from the house and threshold of Bahram-Gushnasp, the son of Ishtar-Nahid. Amen, Amen, Selah. Vanquished are the black arts and mighty spells, vanquished the bewitching women, they, their witchery and their spells, their curses and their invocations, and kept away from the four walls of the house of Bahram-Gushnasp, the son of Ishtar-Nahid. Vanquished and trampled down are the bewitching women, vanquished on earth and vanquished in heaven. Vanquished are their constellations and stars. Bound are the works of their hands. Amen, Amen, Selah.[26]

The evidence of the names of the man for whom the bowl was inscribed and his mother seems to indicate that he was a follower of the Parsi religion. As the text itself shows, Lilith was supposed to threaten Bahram-Gushnasp as a result of a magic spell cast on him and his house by witches who were Lilith's devotees.

In the text of another bowl from Persia, this one written in Mandaic (pagan Aramaic), Lilith is rendered harmless by a still more powerful incantation. She is adjured to cease haunting the house of a certain Zakoy and is immobilized as follows:

> Bound is the bewitching Lilith with a peg of iron in her nose; bound is the bewitching Lilith with pincers of iron in her mouth; bound is the bewitching Lilith, who haunts the house of Zakoy, with a chain of iron on her neck; bound is the bewitching Lilith with fetters of iron on her hands; bound is the bewitching Lilith with stocks of stone on her feet. . . .[27]

5 | *The Birth of Lilith*

While the major characteristics of Lilith, as we have just seen, were well developed by the close of the Talmudic period, it remained for Kabbalistic mysticism to establish a relationship, and quite a close one at that, between her and the deity. In the six centuries that elapsed between the Babylonian Aramaic incantation texts and the early Spanish Kabbalistic writings, Lilith must have greatly extended her influence, for when she reappears in the 13th century she not only commands considerably greater

attention but is surrounded by a larger retinue, and her life history is known in much greater mythological detail.

Her birth, to begin with, is described in a number of alternative versions. According to one, she was created before Adam—in fact, on the fifth day of Creation, because the "living creature" with whose swarms God filled the waters[28] was none other than Lilith.[29] Another version, which ties in directly with the earlier (Talmudic) Lilith image, recounts that she was created by God in the same manner in which, shortly before, he had fashioned Adam. That is to say, God again turned to the earth to obtain raw material, but this time, instead of using the clean earth which was the substance of Adam's body, He—for reasons unknown—took filth and impure sediments from the earth, and out of these he formed a female. As was to be expected, this creature turned out to be an evil spirit.[30]

According to a third version, God originally created Adam and Lilith together in such a manner that the female creature was contained in the male. Lilith's soul was originally lodged in the depths of the Great Abyss, whence she was called forth by God and joined to Adam. When Adam was created and his body completed, a thousand souls from the Left (i.e., Evil) Side tried to attach themselves to him. But God let out a shout and thus drove them off. All this while Adam lay there, a body without a soul, greenish in color. Then a cloud descended, and God commanded the earth to produce a living soul. This God breathed into Adam, who now was able to stand up, and, behold, his female was attached to his side. But God sawed his creature into two, whereupon Lilith flew off to the Cities of the Sea, where she still lurks ready to harm mankind.[31]

Yet another version considers Lilith not as a being created by God, but as a divine entity which emerged spontaneously, either out of the Great Supernal Abyss, or out of the power aspect of God (the *Gevurah* or *Din*), which manifests itself chiefly in the divine acts of stern judgment and punishment. This stern, punitive aspect of God, one of His ten mystical attributes (*Sefirot*), has at its lowest manifestation some affinity with the realm of evil referred to as "the dregs of the wine," and it is out of this that Lilith emerged together with Samael:

> A mystery of mysteries: Out of the power of the glow of Isaac's noon (i.e., the *Gevurah*), out of the dregs of the wine, there emerged an intertwined shoot which comprises both male and female. They are red like the rose, and they spread out into several sides and paths. The male is called Samael, and his female [Lilith] is always contained in him. Just as in the side of Holiness, so in the Other [Evil] Side as well, male and female are contained in one another.

> The female of Samael is called Serpent, Woman of Harlotry, End of All Flesh, End of Days.[32]

In the mystical writings of the two brothers Jacob and Isaac Hacohen of Segovia (Castile), which antedate the Zohar by a few decades, Lilith and Samael are said to have been born by an emanation from beneath the Throne of Glory, in the shape of an androgynous, double-faced being, corresponding in the spiritual realm to the birth of Adam and Eve, who also were born as a hermaphrodite. The two androgynous twin-couples not only resembled each other, but both "were like the image of what is Above": that is, reproduced in a visible form the image of the androgynous deity.[33]

Yet another version connects the birth of Lilith with the creation of the luminaries, carefully avoiding, however, any statement to the effect that God actually created her. The "first light," which was the light of Mercy (another of the ten *Sefirot*), appeared when, on the first day of Creation, God said "Let there be light."[34] When this light became hidden, Holiness became surrounded by a husk of Evil. This idea is expressed by the statement that "a husk [*q'lippa*] was created around the brain," and this husk, in turn, spread and brought out another husk, and this was none other than Lilith.[35]

6 | *Lilith and the Cherubim*

As soon as Lilith was born, or emerged in one of the mysterious ways described above, her longing for male companionship manifested itself. She began to fly about, soaring up into the heights of heaven and again swooping down, until she reached the Cherubim who surrounded God's throne and who, because their faces were like those of small boys,[36] are called in the Zohar "small faces." To them Lilith attached herself, impressing herself into their bodies, and once she succeeded in doing this, she refused to separate from them. But when God created man, which He did in order to bring this world to completion, He forcibly detached Lilith from the Cherubim and made her descend to earth. Lilith, thinking that she would become Adam's helpmate, approached him, but again she was frustrated. For, attached to Adam's side was Eve, whose beauty resembled the beauty of Above. When Lilith saw the complete image of Adam and Eve together, she understood that she had no chance, and fled back up to heaven to reattach herself to the Cherubim. However, by this time the watchers of the Gate of Above barred her way, and God, addressing a stern rebuke to her, cast her into the depths of the sea.[37]

7 | *Lilith and Adam*

As noted above, the older sources do not state clearly that it was Lilith herself who, after her Red Sea sojourn, returned to Adam as his succuba. The later sources, however, know it for a fact that this, indeed, did happen. Adam, we read in the Zohar, succeeded in impregnating Lilith during their early short-lived connubium; then, not having been a suitable helpmeet for him, Lilith left him,[38] to return after a while and force herself upon him. Before doing so, however, she managed to attach herself to Cain and to bear him numerous spirits and demons.[39]

The first medieval source to give the myth of Lilith and Adam in full was the lost Midrash Abkir (ca. 10th century), which was followed by the Zohar and later Kabbalistic writings. Adam, we learn, was a perfect saint, and when he understood that because of his sin—or, as a consequence of Cain's fratricide—death came into the world, he separated from Eve, slept alone, and fasted for 130 years. But Lilith, whose name is Pizna[40]—or, according to the Zohar, two female spirits, Lilith and Naamah—found him, desired his beauty, which was like that of the sun disk, and lay with him. The issue of these unions were demons and spirits, called "the plagues of mankind," who lurk underneath doorways or in wells and latrines, and lead men astray.[41]

According to the mythical cosmology of the German-born Palestinian Kabbalist Naphtali Herz ben Jacob Elḥanan (lived in the second half of the 16th century), in the second of the seven earth-layers, counting from the bottom, dwell

> the giant human figures, tall of stature, who were born of Adam in the 130 years during which he begot demons, spirits, and Lilin. Lilith used to come to him against his will and conceive from Adam [and she bore these beings]. And they are always sad and full of sorrow and sighs, and there is no joy at all among them. And these hosts can multiply [and ascend] from that earth to this world upon which we stand, and [here] they become harmful spirits, and [then] they return there. . . .[42]

That Adam begot with Lilith spirits, demons, and Lilin became a commonplace in the mystical literature of the 14th to 17th centuries, often with the added explanation that it was Adam's own sin which made it possible for Lilith to overcome him against his will.[43]

8 | *Lilith the Succuba*

The next period in Lilith's life was spent in two activities: seducing men and killing children. As to the first, a passage in the Zohar puts it as follows:

> She [Lilith] roams at night, and goes all about the world and makes sport with men and causes them to emit seed. In every place where a man sleeps alone in a house, she visits him and grabs him and attaches herself to him and has her desire from him, and bears from him. And she also afflicts him with sickness, and he knows it not, and all this takes place when the moon is on the wane.[44]

Spontaneous nocturnal emission is the visible sign of Lilith having succeeded in arousing the desire of a man in his sleep and of having satisfied her own lust through him. In doing this, she assumes the shape of either a mature young woman or a young virgin. The issue of such unions are evil spirits:

> She forsakes the husband of her youth [i.e., Samael] and descends to earth and fornicates with men who sleep here below, in the uncleanness of emission. And from them are born demons, spirits, and Lilin, and they are called "the plagues of mankind."[45]

However, Lilith is well capable of seducing men not only in their sleep but also while awake. Once she succeeds, she turns from a beautiful seductress into a cruel fury and kills her victim:

> She adorns herself with many ornaments like a despicable harlot, and takes up her position at the crossroads to seduce the sons of man. When a fool approaches her, she grabs him, kisses him, and pours him wine of dregs of viper's gall. As soon as he drinks it, he goes astray after her. When she sees that he has gone astray after her from the path of truth, she divests herself of all ornaments which she put on for that fool. Her ornaments for the seduction of the sons of man are: her hair is long and red like the rose, her cheeks are white and red, from her ears hang six ornaments, Egyptian cords and all the ornaments of the Land of the East hang from her nape. Her mouth is set like a narrow door, comely in its decor; her tongue is sharp like a sword, her words are smooth like oil, her lips red like a rose and sweetened by all the sweetness of the world. She is dressed in scarlet, and adorned with forty ornaments less one. Yon fool goes astray after her and drinks from the cup of wine

> and commits with her fornications and strays after her. What does she thereupon do? She leaves him asleep on the couch, flies up to heaven, denounces him, takes her leave, and descends. That fool awakens and deems he can make sport with her as before, but she removes her ornaments and turns into a menacing figure. She stands before him clothed in garments of flaming fire, inspiring terror and making body and soul tremble, full of frightening eyes, in her hand a drawn sword dripping bitter drops. And she kills that fool and casts him into Gehenna.[46]

Lilith attempted to play this trick on Jacob, but she was no match for him: "Jacob went to her and came to her place . . . and saw all the ornaments of her house, but escaped from her, whereupon her male, Samael, attacked him and fought him but could not prevail upon him."[47]

Even when a man wishes to engage in lawful sexual intercourse with his wife, the menace of Lilith is present:

> And behold, that hard shell [i.e., embodiment of evil], Lilith, is always present in the bed linen of man and wife when they copulate, in order to take hold of the sparks of the drops of semen which are lost—because it is impossible to perform the marital act without such a loss of sparks—and she creates out of them demons, spirits, and Lilin. . . . But there is an incantation for this, to chase Lilith away from the bed and to bring forth pure souls . . . in that moment, when a man copulates with his wife, let him direct his heart to the holiness of his Master, and say:
>
> "In the name of God.
> O you who are wrapped in velvet [i.e., Lilith],
> You have appeared.
> Release, release!
> Neither come nor go!
> The seed is not yours,
> Nor in your inheritance.
> Go back, go back!
> The sea rages,
> Its waves call you.
> I hold on to the Holy One,
> Wrap myself into the King's holiness."
>
> Then let him cover his head and his wife for one hour. . . .[48]

Some forms of unholiness in sexual intercourse are described by R. Naphtali as follows:

> Lilith, God preserve us, has dominion over children who issue from him who couples with his wife in candlelight, or with his wife naked, or at a time when he is forbidden to have intercourse with her. All the children who issue from such unions, Lilith can kill them anytime she wishes, because they are delivered into her hands. And this is the secret of the children's smiling when they are small—because of Lilith who plays with them.[49]

The counterpart of the magic efforts to protect men from the nocturnal enticements of Lilith, the succuba, is an incantation whose purpose is precisely the opposite: to obtain a succuba for the night with the help of that other demon-queen, Igrath bath Maḥalath. The formula is contained in a 15th-century text which reads as follows:

> "I adjure you, Ograth [i.e., Igrath] bath Maḥalath, Queen of the Demons, with the great, strong and terrible Name, with the name of his holy angels, and with the name of Bilar the heroic, King of the Demons, that you send to me *X*, daughter of *Y*, the beautiful maiden from among your maidens who follow you, whose number is like the number of the days of the year, and with the name of Metatron and Sandalphon, *AAA NNN SSS*." And this must be done either on the eve of Sunday or on the eve of Wednesday. And one must have a separate room, and a clean white bed and clothes, and the room and the bed should be fumigated with aloe wood. And the knowledgeable will understand.[50]

An incantation such as this must have been employed by Rabbi Joseph della Reina in making Lilith herself his lover. This Rabbi Joseph seems to have been a known Spanish Kabbalist who about 1470 attempted to bring about the redemption of Israel by means of a great magico-mystical ritual. Having failed in his noble but extremely dangerous attempt to slay Satan, whose machinations prevented redemption, so the story goes, Joseph despaired of the powers of saintliness and turned to evil ways, bending the forces of the Other Side to his will. The full, folklorically embellished version of Joseph's story written by Solomon Navarro (b. 1606) contains an account of Joseph's love affairs, first with Lilith and then with the Queen of Greece (whence his surname, Della Reina):

> And after this, Rabbi Joseph reached the city of Zidon and dwelt there. And he corrupted his ways, after seeing that his plan [to bring the Messiah] had failed. And especially after hearing the terrible heavenly voice, he despaired of the World to Come, made a covenant with the evil Lilith, and delivered himself into her hands,

and she became his wife. And he made himself impure with all impurities, to the extent of using for evil the Holy Names and the other names and incantations he knew. And he adjured spirits and demons every night to bring him what he wanted. And this is how he conducted himself many days, until he became enamored of the wife of the King of Greece more than of any other woman. And he had her brought to him almost every night, and in the morning he commanded [the spirits] that they return her.

And it came to pass one day that the queen told the king that "Every night in my dream they take me to a place and a man lies with me, and in the morning I find myself in my bed, and I am soiled with an effusion of semen, and I do not know whence this came to me." The king understood the matter, sent for the magicians, and ordered them to watch in the house of the queen with other women, and said to them that they should be prepared and ready with incantations and names of impurity, so as to stop those who would come to take the queen. And they did so and sat watching.

And in that night the demons came as commanded by Rabbi Joseph, and the watchers instantly sensed it and performed acts and adjured them so that they should know what was the matter and what it was about. And the demons said: "We are emissaries of Rabbi Joseph, who dwells in Zidon." Instantly the king sent a commander of the army with letters and a present to the Prince of Zidon [asking him] that he should immediately send him Rabbi Joseph alive, [to enable the king] to take revenge on him by subjecting him to severe torture. And it came to pass that when Rabbi Joseph saw that the evil had overtaken him—and he knew it from the mouth of the demons he had sent even before the writing reached the prince of Zidon—he went and threw himself into the sea and died.[51]

9 | *Lilith the Child-Killer*

Following her rejection by the Cherubim, Lilith remained in the depths of the sea until Adam and Eve sinned,

when the Holy One, blessed be He, brought her up, and she obtained power over those children—the "small faces" of mankind—who deserved to be punished because of the sins of their fathers. She roams all over the world, then approaches the gates of the Garden of Eden and observes the Cherubim watching over the gates. She

> sits down there, next to the flame of the sword, since it was from that flame that she originated. When the flame turns around [indicating that the world has entered into a phase of punishment], she rushes off and again goes roaming all over the world to seek out the children who deserve to be punished. And she smiles at them and kills them. . . .[52]

After the completion of her raids on mankind, Lilith returns to the cities of the sea, her headquarters. Only when ultimately God will destroy the Evil Kingdom of Rome, will she move there to take up her abode in the eternal ruins.[53]

In the meantime, Lilith

> goes out into the world and seeks out children, and she sees the children of mankind and attaches herself to them to kill them and to draw herself into their souls. And as she is about to go into such a soul, three holy spirits [i.e., the three angels Senoy, Sansenoy, and Semangelof] appear there, and they soar toward her and take that soul from her and place it in front of the Holy One, blessed be He, and there [the children] study in front of Him.[54]

Thus, even if the angels are unable to save the child's life, they at least save its soul. To make sure that one's child is in no way harmed by Lilith, one must perform the act of procreation itself in holiness:

> If a man is in a state of holiness, he has no fear of her [Lilith], because the Holy One, blessed be He, sends those three holy angels whom we mentioned, and they watch over the child [which is being conceived] and she cannot harm him. . . . But if a man is not in a state of holiness, and he draws out a soul from the side of uncleanness, then she comes and plays with that child, and if she kills it, she penetrates that soul and never leaves it.[55]

Although the above quotations were taken from the Zohar, the practice of protecting a mother and her newborn child from Lilith with the help of the three angels Senoy, Sansenoy, and Semangelof is considerably older not only in the East but also in the West. The famous mystical treatise *Sefer Raziel (Book of Raziel)*, written or compiled in all probability, by Eleazar ben Judah ben Kalonymos of Worms (1176–1238), contains, e.g., several such incantations. On folio 43a of the 1701 Amsterdam edition, one finds the following instructions:

> Tried and proven for protecting the mother and her child from sorcery and the Evil Eye, and so that in the hour of the birth no

> demon and evil plague should be able to overpower her and her child . . . the seventy names of angels are, as is well known, very efficacious for all kinds of protection. And also the following names and their drawings, as Adam saw them and drew them, are very good for the protection of the mother and child. [See Figure 1.]

Figure 1. Amulet to protect woman in childbirth from Lilith. (From *The Book of Raziel*, folio 43a.)

On the very next page of the *Book of Raziel* are listed the names of the seventy angels, and under them is a sketch showing twice the three angels Senoy, Sansenoy, and Semangelof. It is difficult to make out what the three sketches on the right side represent, but on the left the intention seems to be to show them as bird-headed beings. Over the sketches of the angels the words "Adam and Eve, Out Lilith!" appear twice, and under the picture follows the incantation text, which reads as follows (my translation from the Hebrew):

Figure 1. Amulet to protect woman in childbirth from Lilith. (From *The Book of Raziel*, folio 43a.)

In the name of *EHYE WHA AA BB AO MAK AAA*.

I adjure you First Eve [here an epithet of Lilith] in the name of Him Who is your Creator and in the name of the three angels whom your Creator sent after you and the angel in the isles of the sea, to whom you swore that wherever you will find their names you will cause no harm, neither you nor one of your cohorts and servants, and that [you will not damage] anybody who wears their names. Therefore, in their names and seals set down here, I adjure you and your cohorts and your servants that you cause no harm to the woman in childbirth, N. daughter of N., nor to the child who was born to her; neither during the day nor during the night, neither through their food nor through their drink, neither in their head nor in their heart, neither in their 248 limbs, nor in their 365 sinews. By strength of these names and figures, I adjure you and your cohorts and your servants. [See Figure 2.]

Figure 2. Amulet to protect woman in childbirth from Lilith. (From *The Book of Raziel*, folio 43b.)

As we see, the *Book of Raziel* follows the classical pattern of incantation rituals, which carry in themselves the guarantee of their effectiveness by

Figure 2. Amulet to protect woman in childbirth from Lilith. (From *The Book of Raziel*, folio 43b.)

recounting, or at least referring to, a validating myth. Reference to the old myth about Lilith and the three angels is all that is needed in order to endow the apotropaic measure with unfailing potency.

The myth of Lilith the child-killer remained a potent factor in the lives of the tradition-bound Jews down to the 19th century. To protect the newborn boy-child against Lilith, they would draw a circle with natron or charcoal on the wall of the birth room and write within it: "Adam and Eve. Out Lilith!" At the same time, they would write the names of the three angels Senoy, Sansenoy, and Semangelof on the door of the room:[56]

> If children laugh in their sleep, or if they laugh while they are awake but alone, this is a sign showing that Lilith is playing with them, and especially when this happens on the night of the new moon. Whoever notices that they laugh will do well to tap them on their nose with his finger and say: "Go hence, Pelonith [i.e., Lilith], you have no portion or inheritance here, you have no satisfaction here!" Then let him recite the entire '*Wihi no'am*' prayer, and do thus three times. . . .[57]

Solomon's dominance over Lilith, which became an integral part of medieval Jewish and Muslim Arab demonology, retained an important role in Middle Eastern Jewish exorcisms as recently as the early 20th century. Raphael Ohana writes in his collection of magical remedies:

> In another manuscript book I found written the following: Protection from Lilith. Draw a Seal of King Solomon, peace be upon him, who adjured Lilith that when she would see his seal she and her cohorts would flee, and that she would have no permission to hurt him. And if it be placed on a house, she would not enter it, neither she nor any one of her band. If it be engraved upon pure silver, it is even better. And this is its shape:[58] [See Figure 3.]

The same magic Seal of Solomon protects also the sick against Lilith, if it is ascertained that it is she who caused the ailment.[59]

The same book contains two further suggestions as to methods one can employ in order to safeguard a woman from Lilith:

> If you place a needle close to the wick in the lamp which is in the house of the woman in childbed, she will be safe from the entry of Lilith. Also, if she take the measure which is used to measure the wheat, and place it close to the bed, and if Lilith is there, she will sit on that measure and will not move from her place until

they remove that measure from there. (From a Babylonian manuscript book.)[60]

Figure 3. The magic Seal of Solomon. (From Raphael Ohana, *Mar'e HaYeladim*, p. 94a.)

10 | *Lilith and Naamah*

Lilith's companion in many of her evil exploits is Naamah, another high-ranking she-demon. Her origin is obscure, but as her name Naamah ("the Charmer") indicates, she is a demoness of extraordinary, irresistible beauty.

In the earlier, Talmudic-Midrashic mythology, Naamah is still taken to have been a flesh-and-blood woman, the daughter of Lamech and Zillah, and sister of Tubal-Cain,[61] who earned her name by enticing men with the sweet, sensual sounds of her cymbals to worship idols, although, according to the lone dissenting opinion of Abba bar Kahana, she was a pious and well-mannered woman who became Noah's wife.[62] Naamah is still a human female according to those myths which tell about her role in seducing the sons of God. She was so beautiful that she led the angels astray, and from her union with the angel Shamdon, or Shomron, sprang Ashmodai, who was destined to become the king of the devils.[63]

From being the human mother of Shamdon's demonic brood, Naamah was transformed by the Kabbala into a semi-human, deathless being who,

like Lilith, fulfills the double task of seducing men and strangling children in their sleep. She was so beautiful that

> the sons of man, and even the spirits and demons, went astray after her. R. Yitzḥaq said: Those sons of God, 'Aza and 'Aza'el, went astray after her. R. Shimeon said: She was the mother of the demons, for she came from the side of Cain, and she, together with Lilith, was appointed over the *askara* [strangulation] of children. R. Abba said to him: Did you not say that she was appointed to play with people? He answered: True; she comes and plays with people and at times she bears them spirit-children, and to this day this is her task. R. Abba said: [Since we know that the demons] die like humans, how can she still be alive? He answered: Right, but Lilith and Naamah, and Agrath, the daughter of Maḥalath who came from their side, all continue to live until the Holy One, blessed be He, eradicates the spirit of uncleanness from the world. . . .
>
> Come and see: This Naamah was the mother of demons, and from her side come all those demons who lie with men and take the spirit of desire from them, and she makes sport with the men [in their sleep] and causes them to emit seed.[64]

Naamah and her brother Tubal-Cain were descendants of Cain, and the latter was, of course, the son of Satan by Eve:

> In the hour when Adam with the supernal image, with the holy image, descended, and those of Above and Below saw him, they all approached him and made him king over the world. After the Serpent came upon Eve and injected his impurity into her, she gave birth to Cain. From there descended all the generations of the sinful in the world, and also the demons and spirits came from there. Therefore, all the spirits and demons are half human, while their other half comes from the supernal angels. Also, all the other spirits which were born of Adam are, likewise, half from Below and half from Above. After they were born of Adam, he begot on those spirits daughters who resembled the beauty of those Above and the beauty of those Below. . . .
>
> And there was one male who came into the world from the spirit of Cain's side and he was called Tubal-Cain. And a female came with him after whom the creatures went astray, and she was called Naamah. From her came other spirits and demons, who hang in the air and announce things to those others who are found below. It was this Tubal-Cain who brought murder weapons into the

> world. And as to Naamah . . . she is alive to this day, and her dwelling is among the waves of the Great Sea.[65]

In a mythical image, reminiscent of Dante's Inferno, the Zohar describes Naamah's beauty, which is irresistible even to the most horrid nocturnal monsters: In the darkness of the night, great monsters pursue Naamah: they are Afrira and Qastimon, the two chieftains of the demonic world, who "swim about in the Great Sea and, when night falls, fly away from there and come to Naamah, the mother of the demons, after whom the early divinities went astray. They try to approach her, but she leaps away six thousand parasangs, and takes on many forms in the eyes of men, in order to seduce them."[66]

Once Naamah arrives in our own world,

> she makes sport with the sons of man, and conceives from them through their dreams, from the male desire, and she attaches herself to them. She takes the desire, and nothing more, and from that desire she conceives and brings forth all kinds of demons into the world. And those sons whom she bears from men visit the women of humankind, who then conceive from them and give birth to spirits. And all of them go to the first Lilith and she brings them up. . . .
>
> At times it happens that Naamah goes forth in the world in order to have intercourse with the sons of man, and a man is found in bounds of desire with her and awakens from his sleep and gets hold of his wife and lies with her, and his urge stems from that desire which he had felt in his dream. In such a case the child which is procreated comes from the side of Naamah, because in her desire he was conceived. When Lilith comes and sees this child, she knows what happened, and she attaches herself to him and rears him like those other children of Naamah, and she comes to him many times but does not kill him. . . . For each time when the moon renews itself in the world, Lilith comes and visits all those whom she rears, and makes sport with them, and that man suffers damage at that time.[67]

While Lilith and Naamah thus have become unmistakably evil spirits, at least once more in history they assumed human form. This happened when, in order to try Solomon's wisdom, they took the shape of two prostitutes and went to Solomon asking for his judgment in their quarrel over the surviving child.

Then came two harlots to King Solomon, and they were Lilith and

> Igrath [according to other sources: Lilith and Naamah]. Lilith, who strangles the children because she cannot set up for herself, from one of them, a screen to be a hiding place for her [?]. And the other is Igrath. . . . One night David was asleep in the camp in the desert, and in his dream Igrath coupled with him and bore Adad [identical with Hadad the Edomite]. And when they asked him, 'What is your name?' he answered, "My name is Ad, Ad is my name" [*Ad sh'mi* in Hebrew], and they called him Ashm'dai. He is Ashmodai, the King of the demons who deprived Solomon of his kingdom. . . .[68]

King Solomon, it may be remarked here, "had dominion over the demons, spirits, and Lilin, and knew the language of each . . . and when his heart was merry with wine, he would command the wild animals, the fowl of heaven, and the creeping things of the earth, as well as the demons, spirits, and Lilin, to dance before him."[69]

It was due to Solomon's power over the demons that he was able to resist the Queen of Sheba, who was none other than Lilith.[70] Another country over which Lilith reigned was Zemargad.[71]

11 | *Lilith and Samael*

As we have seen, according to a Zoharic myth, Lilith and Samael emerged in an androgynous form out of the "dregs of wine" of the divine punitive power.[72] Another version which was also current in Kabbalistic circles in the Middle Ages is silent as to Lilith's provenance, but makes her Samael's wife, and the first among his four wives, to boot. Baḥya ben Asher ibn Ḥalawa, the early-14th-century Kabbalistic Bible commentator (died 1340), reports the myth as follows:

> Four women were the mothers of demons: Lilith, Naamah, Igrath, and Maḥalath. Each one of them has her own hosts and classes of spirits of uncleanness, and they have no number. And it is said that each of them rules on one of the four *Tequfot* [i.e., the vernal equinox, the summer solstice, the autumnal equinox, and the winter solstice] of the years, when they gather on a lofty peak near the Mountains of Darkness. Each of them rules on her *Tequfa*, from the hour of sunset until midnight, they and all their hosts. But King Solomon ruled over all of them and called them [his] slaves and slave-women and used them according to his will. And these four women are the wives of Esau's heavenly patron [i.e., Samael],

> and following his example, Esau himself took four wives, as explained in the Pentateuch.[73]

Nathan Spira (died 1662) transmits an interesting variant of the same theme. The four women become the "rulers," in the sense of heavenly patron, of four kingdoms:

> Know that there are seventy heavenly patrons, one appointed over each nation, and they all are under the rule of Samael and Rahab. Rahab was given as his share all the borders of Egypt, which measures 400 by 400 parasangs. Samael was given four kingdoms, and in each of them he has a concubine. The names of his concubines are: Lilith, whom he took as his consort, and she is the first one; the second is Naamah; the third, Even Maskith; and the fourth, Igrath, the daughter of Maḥalath. And the four kingdoms are: first, the Kingdom of Damascus, in which is found the House of Rimmon; second, the Kingdom of Tyre, which is opposite the Land of Israel; third, the Kingdom of Malta, which formerly was called Rhodus; and fourth, the Kingdom called Granata, and some say that it is the Kingdom of Ishmael. And in each of these four kingdoms dwells one of the four aforementioned concubines.[74]

Mixed Egyptian-Arab-demonic descent is attributed to Igrath in a late version of the myth of the four she-demons who rule over the *Tequfot* (i.e., the two equinoxes and the two solstices). When Ishmael grew up, his mother Hagar brought him an Egyptian wife,

> the daughter of Kasdiel, the Egyptian sorcerer. And when Ishmael divorced her, as commanded by his father, she was pregnant and gave birth to Maḥalath. And the mother and the daughter remained together in that desert, which was full of sorcery, and a demon named Igrathiel ruled over it. This demon was attracted to Maḥalath, who was very beautiful, and she conceived and bore a daughter whom she called Igrath, after that demon, Thereafter Maḥalath left the desert and became the wife of Esau. But her daughter Igrath remained in the desert, and she, Naamah, Pelonith [i.e., Lilith], and Nega' rule over the four *Tequfot*. Pelonith fornicates with all men, Naamah only with the gentiles, Nega' only with Israel, and Igrath is sent out to do harm on the nights preceding Wednesdays and Saturdays. But of those who fear God it is said, "And Nega' will not approach your tents."[75]

The marriage between Samael and Lilith was arranged by the "Blind

Dragon," who in Kabbalistic mythology is the counterpart on high of "the dragon that is in the sea."[76] "There is a dragon of Above who is the Blind Prince, and he functions as the intermediary between Samael and Lilith, and his name is *Taniniver* [Blindragon]. . . . It is he who arranges the match between Samael and Lilith. . . ."[77]

Blindragon's place in the mystical hierarchy of demons is described as follows:

> Asimon [a demon] rides on Naamah, and Naamah rides on Igrath, the daughter of Maḥalath, and this Igrath rides on several kinds of spirits and bands of mid-day demons; and from the left there is the shape of a serpent riding on a blind dragon, and this dragon rides on Lilith the wicked, may she be destroyed quickly in our days, amen.[78]

However, the marriage of Lilith with Samael, also known as the "Angel Satan" or the "Other God," was not allowed to prosper. God was apprehensive lest they fill the world with their demonic brood, and to prevent this he castrated Samael. This mythologem, found in several 17th-century Kabbalistic books,[79] is based on the identification of "Leviathan the Slant Serpent and Leviathan the Tortuous Serpent"[80] with Samael and Lilith, respectively, and on the reinterpretation of the old Talmudic myth according to which God castrated the male Leviathan and killed the female in order to prevent them from coupling and thereby destroying the earth. Leviathan the Tortuous, or crooked, Serpent is, to the Kabbalists, Lilith, "who seduces men to follow crooked paths."[81] Once Samael was castrated, Lilith, since "she could no longer couple with her husband," took to satisfying her desire by fornicating with men who experience nocturnal emissions.

In another 15th- or 16th-century Kabbalistic text the Midrashic statement that God "cooled" the female Leviathan is reinterpreted to mean that God made Lilith barren, so that she cannot bear offspring "but is mere fornication."[82]

12 | *The Two Liliths*

The idea that there are many Liliths is, as we have seen, very old. In the Babylonian incantation texts there appear male Lilin, in addition to the female Liliths, who are heirs to the 3rd millennium B.C.E. Sumerian male and female demons similarly named. It remained, however, for the 13th-century Kabbalists to split the person of Lilith herself in two and to distinguish between an Elder and a Younger Lilith.

In the writings of R. Isaac Hacohen, a Spanish Kabbalist who flour-

ished about the middle of the 13th century, we read that the Lilith who was born androgynously with Samael and who became the wife of that "Great Prince and Great King of all the demons," is Lilith the Elder. In addition to Samael, other demons as well are the bedfellows of this Lilith the Elder, who—and this is most remarkable—"is a ladder on which one can ascend to the rungs of prophecy." This can mean only one thing: that Lilith can help those whom she favors—or gain mastery over her—to rise towards, or actually attain prophetic powers. Another numinous figure introduced into this mythology is Qaftzefoni, the Prince and King of Heaven, whose wife is Mehetabel, the daughter of Matred.[83] The daughter of this mysterious couple is Lilith the Younger. There seems, however, to be some confusion between Lilith the Younger and Lilith the Elder, because it is the latter who is called Tzefonit ("Northerner"), which would make her, and not Lilith the Younger, the daughter of Qaftzefoni:

> Know that all the jealousy and altercation between the Princes of Quarrel and the Princes of Peace . . . is on account of Samael and Lilith who is called Northerner (Tzefonit), as it is written "Out of the North, the Evil One shall break forth"[84] Both of them [Samael and Lilith] were born in a spiritual birth as androgynes, corresponding to Adam and Eve—below and above two twin figures. And Samael and Lilith the Elder, who is the same as Tzefonit, are referred to as the Tree of Knowledge of Good and Evil. . . .[85]

The same mid-13th century author, Isaac Hacohen, also asserts that "on rare occasions Qaftzefoni couples with, and adheres to, and loves a creature whose name is Lilidtha," who in a mysterious way resembles Hagar the Egyptian; but whether this Lilidtha is identical with Qaftzefoni's own daughter, Lilith the Younger, cannot be established.

Now, Lilith the Younger became the wife of Ashmodai, King of the demons, and out of this union sprang the great prince Harba diAshm'dai ("Ashmodai's Sword"), who rules over 80,000 demons of destruction and numerous other demon offspring. However, "Lilith the Younger, who has the form of a beautiful woman from head to navel, and from the navel downward is flaming fire—like mother, like daughter—" aroused the desire of Samael. This caused intense jealousy between Samael and Ashmodai, as well as constant fighting between Lilith the Younger and Samael's wife, Lilith the Elder.[86]

Some three centuries after Isaac Hacohen, Moses Cordovero (1522–1570), a leader of the Safed Kabbalists, retells the myth of the two Liliths with the addition of a few interesting details: Lilith the Elder, he says, has

480 bands of demons under her command, the number being derived from the numerical value of the letters L Y L Y T (30, 10, 30 ,10, 400) making up the name Lilith. On the Day of Atonement, Lilith the Elder marches out into the desert and, being the demon of screeching—her name taken as if derived from the verb Y L L, "to scream"—spends the day there screaming. Samael, however, also has a concubine named Maḥalath, the daughter of Ishmael,[87] who has 478 bands of demons at her disposal—again the letters of her name give the clue to this number (M Ḥ L T = 40, 8, 30, 400)—and "she goes and sings a song and a paean in the Holy Tongue. And when the two meet, they fight, on the Day of Atonement, there in the desert, and they taunt each other, until their voices rise to heaven, and the earth trembles under their screams. And all this is brought about by God so that they should not be able to make accusations against Israel [on the Day of Atonement]. . . ."

Lilith the Younger is helped in her fight against Lilith the Elder by her own mother Mehetabel.[88]

The mythological motif of enmity between Lilith and her fellow-demonesses, and the resulting advantage for Israel on the Day of Atonement, is treated by other 16th-century Kabbalists as well. Abraham Galante (died 1560 or 1588), an important Safed Kabbalist and contemporary of Moses Cordovero, recounts the entire story of the annual encounter in the desert between Lilith and Maḥalath, but gives a somewhat different characterization to one of the two chief she-demons: Maḥalath, according to him, is shown by her name to have been a compulsive dancer: as she marches into the desert at the head of her bands of destructive angels, "she goes and dances and gyrates in ring dances" until she and Lilith fall upon each other and engage in a fierce battle.[89]

Lilith's bands, and presumably Lilith herself as well, were imagined in this period as being covered with hair from head to foot, including their faces, but as having a bald pate. Their fourteen names, derived directly from the older incantation texts,[90] are: Lilin, Abito, Abizo, Amo(z)rpho, Haqash, Odam, (I)Kephido, Ailo, Tatrota, Abniqta, Shatrina, Kalubtza, Tiltoi, Pirtsha.[91]

But, to return to the two Liliths: this idea is put forward in a different form by Ḥayyim Vital (1543–1620), a Safed Kabbalist and chief disciple of Isaac Luria. He explains that the original "Lilith the stiff-necked" was the "garb," that is, the shell, the outer and evil part, of Eve, the wife of Adam. But he goes on to say, "there is an even more external [i.e., more evil] Lilith, who is the wife of Samael." In the sequel it is not clear whether Vital speaks of the first or the second Lilith when he says that "there was an angel who was expelled from heaven and he was called 'the flame of the

revolving sword,'[92] and at times he is an angel and at times a demon called Lilith. And since the female rules at night, and the demons rule at night, she is called Lilith" [i.e., Nocturnal].[93]

The notion that Lilith rules at night goes back to the Zohar, where the Biblical expression "dread in the nights" (*paḥad ba-leloth*)[94] is explained as "Samael and his female," i.e., Lilith.[95] What is more interesting in Vital's thinking is that he regarded Lilith and the angel as interchangeable, as appearing once in the shape of one and once as the other, made tangible by the flame of the revolving sword. We shall recall that in the 6th-century C.E. Nippur incantation texts the same numen is called once "Lilith Buznai" and once "angel Buznai,"[96] which is yet another example of the great antiquity of some of the ideas put forward by the medieval Kabbalists. The same idea underlies a passage contained in the Zoharic literature itself which reads: "Come and see: The Shekhina is at times called the Mother, at times the Slave-Woman [i.e., Lilith], and at times the King's Daughter."[97]

In other words, circumstances determine whether one and the same feminine divine essence assumes the form of a good or an evil numen. And, since circumstances constantly change, the goddess appears once as good and once as evil. In a different formulation of the idea, Lilith appears as the "nakedness" of the Shekhina, that aspect of her which preponderates in the period of Israel's exile: "When Israel was exiled, the Shekhina too went into exile, and this is the nakedness of the Shekhina. And this nakedness is Lilith, the mother of a mixed multitude."[98]

13 | *Lilith's Triumph and End*

The hour of Lilith's greatest triumph and the high point in her career came with the destruction of the Jerusalem Temple. When that catastrophe took place,

> the King [i.e., God] sent away the Matronit and took the slave-woman [i.e., Lilith] in her place. . . . Who is this slave-woman? She is the Alien Crown whose first-born God slew in Egypt. . . . She used to sit behind the hand-mill, and now this handmaid is heir to her mistress.[99] Rabbi Shimeon cried and said: "The King without the Matronit is not called King; the King who attached himself to the slave-woman, to the handmaid of the Matronit, where is his honor? . . . He lost the Matronit and attached himself to the Other Place, which is called slave-woman. . . . And this slave-woman was destined to rule over the Holy Land of Below, as the Matronit formerly ruled over it. . . ."[100]

The Zoharic idea that the most terrible outcome of the destruction of the Temple and the exile of Israel was that because of them God was forced to accept Lilith as his consort in place of the Matronit, was further elaborated by R. Shlomo Alqabetz (ca. 1505–1584), the Safed Kabbalist and famous author of the Sabbath-song *Lekha Dodi* ("Come, My Friend"). In his mystical philosophy, Alqabetz attributes it to the sins of Israel that the Shekhina, Israel's mother, had to leave her husband, God, who is Israel's father, and go into exile together with her children. As a result of this separation, God the father consorted with "the slave-woman" (i.e., Lilith), and she became the mistress of His house. The situation was similar to that of a man who had a good wife, the mother of his sons, and then, in his wrath, he turned away from her and went in to her handmaid, who conceived and bore him a son.

"And it is known that there is no glory for a man except with his wife who was destined for him, but not by adhering to handmaids . . . through which he himself is reduced to a lower rung." Likewise, after the Shekhina in exile

> descended to be with us . . . her rival [Lilith] angers her greatly, and she sobs and sighs because her husband [God] does not throw his light upon her. . . . Her joy has fled because she sees her rival in her house, deriding her, to the extent that the mistress became a handmaid, and the handmaid mistress. And when our Father sees our Mother lying in dust and suffering because of our sins, He too becomes embittered in his heart and He descends to save her and make the strangers cease violating her. And now, can there be anybody who sees these things without rending his heart to repent and thus to bring back our Mother to her place and to her palace? . . . [101]

While thus the Zohar and the later Kabbalists who were influenced by it attribute God's degradation through coupling with Lilith to the cosmic consequences of the destruction of the Temple, the pre-Zoharic gnostic Kabbalists, such as Moses of Burgos, placed the same divine Fall in the very days of Creation. For, they maintained, just as on earth below Lilith and Samael procreated demons and spirits with Adam and Eve, so in the Upper Realm "a spirit of seduction issued forth from Lilith and seduced God the King, while Samael managed to have his will on the Shekhina." [102]

Whatever the beginnings of this connubium between God and Lilith, it is to continue until the coming of the Messiah will put an end to it.

A voice is appointed to announce to the Matronit and say "Rejoice

> greatly, O daughter of Zion, shout, O daughter of Jerusalem, behold, thy King cometh unto thee, he is righteous and victorious, lowly and riding upon an ass."[103] . . . For he would not be riding, until that time, in a place which is not his, in an alien place . . . and would remain lowly . . . for until that time the Righteous One would remain without righteousness. But at that time [he and the Matronit will again] couple with each other, and he will become "righteous and victorious" because he will no longer dwell in the Other Side [i.e., will no longer be tied to Lilith]. . . . And God will restore the Matronit to her place as in the beginning. And what will the rejoicing be? Say, the rejoicing of the King and of the Matronit. The rejoicing of the King over returning to her and separating from the slave-woman, and the rejoicing of the Matronit over coupling again with the King.[104]

Those Messianic days will mark not only the reunion of God and the Matronit and the rejection of Lilith, but also the end of Lilith's existence. For, although Lilith has existed ever since the sixth or even fifth day of Creation, she is not immortal. In the Days to Come, when Israel will take revenge on Edom, both she and the Blind Dragon, who arranged the match between her and Samael, will be killed.[105]

14 | *Conclusion*

It is rather difficult to evaluate the position of Lilith in Jewish religion, and her significance for the Jewish believer. The very fact that as late as the 18th, or even the 19th, century the belief in her not only survived but remained a potent factor in religious consciousness and conduct is in itself surprising. That these beliefs and, in all probability, the practices as well retained essentially the same form in which they first appeared 4,000 years previously in Sumer is remarkable. A citizen of Sumer ca. 2500 B.C.E. and an East European Hasidic Jew in 1880 C.E. had very little in common as far as the higher levels of religion were concerned. But they would have readily recognized each other's beliefs about the pernicious machinations of Lilith, and each other's apotropaic measures for driving her away or escaping her enticements.

It is interesting, moreover, to note that both in ancient Sumer and in Kabbalistic Judaism Lilith's career ran very similar courses. She started out in both faiths as a lowly she-demon, whose activities were confined to the nether realms of existence, who was associated with impure nocturnal animals, and who pulled man down to her base level. Then, in both religions,

she succeeded in working herself up, as it were, to higher rungs on the scale of numina, until she became an undoubted goddess in Sumer and the consort of God in Kabbalism. Yet with all these advances in her career, the basic qualities of her personality never changed: she remained the beautiful seductress who joined lonely men in their nocturnal unrest, enjoyed sex with them, and bore them demonic offspring, while she also found enough time to play her lethal games with children, causing them to laugh happily in their sleep and then strangling them mercilessly so as to get hold of, and array herself in, their innocent souls. There can be little doubt that a she-demon who accompanied mankind—or at least a part of mankind—from earliest antiquity to the threshold of the Age of Enlightenment must be a projection, or objectification, of human fears and desires which, in a deeper sense, are identical with those of oft-mentioned "plagues of mankind" said in Kabbalistic literature to be the offspring of Lilith, but recognized by us as her psychogenic progenitors.

The meaning of Lilith becomes more easily comprehensible if one considers the basic similarity between her and the Matronit, the goddess of the Kabbala, whose image was described and analyzed in a previous chapter. Lilith, of course, is the embodiment of everything that is evil and dangerous in the sexual realm, while the Matronit is her exact opposite: a good, even saintly figure. Yet, at the same time, Lilith is also irresistibly attractive, while the Matronit is sternly forbidding and even warlike. A closer look easily discerns the mask-nature of these contrasting characterizations: behind the evil mask of Lilith and the good one of the Matronit, the numen, embodying man's fears and desires, is disconcertingly, yet reassuringly, the same. Her mythical biography, whether it treats her as Lilith or as the Matronit, remains fundamentally unchanged:

Both the Matronit (who is identical with the Shekhina) and Lilith originated, according to the Kabbalistic doctrine, from an emanation of the deity. We also recall the virginity of the Matronit. Lilith, too, is a virgin, or at least assumes at will the bodily form of a virgin when she joins the couch of a sleeping man who embraces her in his unconscious desire. Both the Matronit and Lilith are, on the other hand, promiscuous: no sooner is a man separated, even temporarily, from his wife than the Matronit joins him, couples with him, and thus restores him to that state of completeness which is the privilege and high blessing of the male and female together. Lilith does the same, with the difference, of course, that in contrast to the holy union of man and the Matronit, the union which Lilith enters into with man is an unholy defilement.

Both the Matronit and Lilith are queens: the Matronit, the heavenly queen of Israel; Lilith, the queen of Sheba and Zemargad.

The motherly aspect of both the Matronit and Lilith is expressed in their giving birth all the time to innumerable souls: although again, the souls brought forth by the Matronit are pure and enter the bodies of children conceived by husbands and wives in purity, while those issuing from Lilith are impure and become demons, "the plagues of mankind."

The Matronit, as we have seen, is a goddess of war also; she kills not only the enemies of God and Israel, but also takes the souls of pious men, substituting in their extreme hour for the Angel of Death. Lilith, likewise, is a killer of men and children, and the pleasurable laughter of her victims makes us more than suspect that they enjoy death at her hands as much as they would expiring through a kiss of the Matronit.

The Matronit was the wife of Jacob and Moses; Lilith was the wife of Adam and Cain. The Matronit was also the wife of God—her wedding with him having been signified by the dedication of the Temple of Jerusalem. Lilith, too, became the wife of God, at the hour that same Temple was destroyed. Both of them were also enjoyed carnally by Samael the Satan—the Matronit each time Israel sinned, and Lilith when the Blind Dragon arranged a union between them.

Finally, the images of both the Matronit and Lilith were split in two: a distinction was made between the Upper Matronit and the Lower Matronit, and likewise between the Elder Lilith and the Younger Lilith.

We thus recognize the identity of opposites in Lilith and the Matronit or, as one may better put it, the ambivalence of religio-sexual experience. The same impulse or experience can, in the case of one man, be good, and in the case of the other, evil. In the case of one an act can promote the blessed union between God and his Matronit; in the case of the other, the same act, or what seemingly is the same act, can result in a strengthening of the powers of evil, of the Other Side. Thus it is not only God's will that is inscrutable; man's feet lead him also along unpredictable paths, and he rarely if ever knows whether a step he takes leads him toward God or away from Him.

The interplay between man and the two bafflingly similar antithetical goddesses is indicative of the great unity that exists between the realms of the divine and the human in the mystical Jewish world-view. The All is viewed as an inverted triangle poised precariously on its apex, man. Over him, at the two corners of the triangle's base, hover—at a distance that defies the eye, yet so near as to almost merge with him—God and the Goddess. God is one, but the Goddess, who is part of him, is two: the Matronit and Lilith. She appears like the revolving flame of the Cherubim's sword in the ancient myth: once she shows her Matronit face, once her Lilith visage. The flame revolves so fast that it is impossible to hold in one's

eye a separate picture of either. Although God and the Goddess are one, innumerable strands of attraction and repulsion run back and forth between them, and likewise between man and the deity. Far from "keeping his silence and sustaining the world," this deity is moved by man as much as he moves man, he rejoices with man and suffers with man, and the two aspects of his female component constantly struggle for man and within man.

XI

The Sabbath—Virgin, Bride, Queen, and Goddess

The Sabbath, to which we now turn our attention, is an exceptional figure among the female divinities of Judaism. All the numerous images discussed so far were originally either foreign goddesses and demons (Asherah, Astarte, Anath, Lilith, Naamah) or had their beginnings in Jewish divine attributes which were conceptualized and personified (Shekhina, Matronit). As against them, the Sabbath is a unique example of a day of the week—or more precisely, the name and idea of such a day—having been developed into a female numen and endowed with the character of virgin, bride, queen, and goddess.

1 | *Sabbath and Sex*

The Biblical name Sabbath (*Shabbat*), designating the seventh day of the week, seems to have had some connection with the Akkadian *shabattu* or *shapattu*, the name for the feast of the full moon. Yet neither in Akkadian nor in any other ancient Near Eastern religion was there a weekly feast and day of rest in any manner comparable to the Sabbath.

From a passage in Deutero-Isaiah we learn in what way one was supposed to observe the Sabbath in the early post-exilic period:

If, because of the Sabbath, you turn away your foot
From pursuing business on My holy day,
If you call the Sabbath a delight
And God's holy and honored day,
If you honor it by not following your way
And by not seeking your business
Nor speaking thereof—
Then you will find delight in Yahweh,
And I shall make you ride high
Upon the hills of the earth
And I shall feed you with the heritage
Of your father Jacob—
For the mouth of Yahweh has spoken.[1]

The character and laws of the Biblical Sabbath are validated by the myth of Creation: God created the world in six days, and on the seventh, the Sabbath, He rested; He blessed and sanctified it, and consequently it is the duty of every Israelite to do likewise and to refrain from all work on that holy day.[2] With the passage of time, the restrictive Sabbath laws became more and more stringent. By the 1st century C.E., in some Jewish communities sexual intercourse was included among the acts prohibited on the Sabbath, under the penalty of death.[3] While this prohibition was unable to take root in Judaism (in which, on the contrary, the idea was soon to develop that intercourse with one's wife on Friday night was a sacred duty), it became an important law in several marginal Jewish sects such as the Samaritans, the Karaites, and the Falashas.[4]

In Talmudic Judaism the performance of the marital act on Friday night was considered a very old religious law. According to a Talmudic tradition, one of the ten ordinances introduced by Ezra was that one should eat garlic on the eve of the Sabbath, because garlic makes one happy, multiplies the semen, arouses love, and kills jealousy.[5] Some sages attributed such importance to the performance of the act on Friday night that nothing was supposed to keep them from it. A legendary reflection of this is found in a Talmudic story which tells of Yehuda ben Ḥiyya that he used to spend all his time in the house of study and return home only on the eve of the Sabbath. Whenever he thus went home, a pillar of fire could be seen preceding him. One Friday, however, he became so engrossed in his studies that he forgot about the time and remained poring over his books. When his father-in-law, Rabbi Yannai, waited in vain for the appearance of the pillar of fire, he said: "Turn over his bed, for Yehuda must be dead. Would he be alive, he would never have neglected his marital duty." These words

had the effect of a command issuing by mistake from the mouth of a ruler, which is carried out before he can rescind it, and at that instant Yehuda died.[6]

Thus, as far as sexual intercourse on the Sabbath is concerned, the view that developed in the mainstream of traditional Judaism was diametrically opposed to that held, or to be held later, in several semi-Jewish sects. As we shall see in the course of this chapter, Kabbalism, building on the traditional Jewish view, developed its own approach, which endowed the performance of marital intercourse on the Sabbath with a special cosmic significance and turned the Sabbath itself into a veritable divine queen, the bride of God Himself.

2 | *The Sabbath of Philo*

Philo's comments on the Sabbath begin with a discussion of the significance of the number seven. He refers to the old Pythagorean comparison of the numbers with gods and, in particular, to the likening of seven to the virgin goddess Athena,[7] and utilizes it in his allegorical explanation of the sacredness of the Sabbath, the seventh day. The number seven, Philo points out, is the only one in the "decade" (i.e., the first ten digits) which is neither produced by multiplication with any other number nor produces one within the decade if multiplied by another. And, he goes on to say, "by reason of this, the Pythagoreans, indulging in myth, liken seven to the motherless and ever-virgin Maiden [i.e., Athena], because neither was she born of the womb nor shall she ever bear."[8]

Elsewhere Philo says that since

> it is the nature of seven alone . . . neither to beget nor to be begotten . . . other philosophers liken this number to the motherless virgin Nike, who is said to have appeared out of the head of Zeus, while the Pythagoreans liken it to the Sovereign of the Universe: for that which neither begets nor is begotten remains motionless . . . [and] there is only one thing that neither causes motion nor experiences it, the original Ruler and Sovereign. Of Him, seven may be fitly said to be a symbol. . . .[9]

This rich symbolism of the number seven is transferred by Philo in its entirety to the seventh day of the week, the Sabbath. We are left in doubt as to whether this application was the idea of Philo himself or whether it originated with others. One of the two passages in which Philo discusses the symbolism of the Sabbath is explicitly stated to be a mere recording of what others have invented; the other is phrased so as to indicate that it

contains original thoughts of his own on the subject. In the first he says:

> Some have given to it [the seventh day, the Sabbath] the name of the virgin, having before their eyes its surpassing chastity. They also call her the motherless, begotten by the father of the universe alone [who is] the ideal form of the male sex with nothing of the female. It [seven] is the manliest and doughtiest of numbers, well gifted by nature for sovereignty and leadership. Some give it the name of "season" (or: "decisive time"), judging its conceptual nature from its manifestation in the real of sense. . . . For seven reveals as completed what six has produced, and therefore it may be quite rightly entitled the birthday of the world. . . .[10]

Sabbath as the motherless, chaste virgin does not, of course, jibe well with the excellences of the day marked by seven, "the manliest and doughtiest of numbers"; but as to the sovereignty and leadership which Philo also attributes to the Sabbath, these—as we know from his speculations about the two Cherubim—he regarded as traits of the *female* component of the deity. In the passage in which Philo presents these ideas as his own, he indulges in an even less restrained sexual symbolism:

> The prophet [Moses] magnified the holy seventh day, seeing with his keener vision its marvelous beauty stamped upon heaven and the whole world, and enshrined in nature itself. For he found that she [the Sabbath] was in the first place motherless, exempt from female parentage, begotten by the Father [God] alone, without begetting, brought to the birth, yet not carried in the womb. Secondly, he [Moses] saw not only these, that she was all lovely and motherless, but that she was also ever virgin, neither born of a mother nor a mother herself, neither bred from corruption nor doomed to suffer corruption. Thirdly, as he scanned her, he recognized in her the birthday of the world, a feast celebrated by heaven, celebrated by earth and things on earth as they rejoice and exult in the full harmony of the sacred number.[11]

Here we have a fully developed mythological picture of the Sabbath, whether arrived at by Philo himself or built upon traditions known to him from other sources. The Sabbath is described as a daughter of God, begotten by her Father alone without the participation of any female, and therefore motherless. She is marvelous in her beauty, ever virginal, incorruptible, but, at one and the same time, endowed with sovereignty and leadership. In these features, we shall recognize without difficulty some of the traits which

also characterized other female numina of the Talmudic and Kabbalistic periods.

3 | *The Talmudic Antecedents*

In the Bible, the prohibition of working on the Sabbath is stated in general terms only. In the Mishna and the Talmud, all the activities which count as work, and therefore are prohibited on the Sabbath, are enumerated and discussed in considerable detail.[12] There can thus be no doubt that in the Talmudic period the Sabbath was of primary importance as the weekly day of rest, hallowed by God and observed by men with meticulous scrupulousness, as one of the pivotal religious duties of Judaism.

Yet, in addition to all the legalistic detail, there is one single passage in Talmudic literature which indicates that the personification of the Sabbath as a bride and a queen dates back to the Talmudic times (the two sages mentioned in the passage in question lived in the 2nd and 3rd centuries C.E.):

> Rabbi Ḥanina used to wrap himself [in festive clothes] towards evening on Friday and say: "Come, let us go to receive Sabbath the Queen." Rabbi Yannai used to put on [festive] clothes on the eve of the Sabbath and say: "Come, O bride, come, O bride!"[13]

Other Talmudic passages, while not addressing the Sabbath as a bride or a queen, clearly show that the sages of the Talmudic period related with extraordinary love and affection to the Sabbath day. Sayings such as "He who takes three meals on the Sabbath will be saved from three evils: the pangs of the Messiah, the judgment of Gehenna, and the war of Gog and Magog," or "He who celebrates the Sabbath with enjoyments will be given an inheritance without bounds"[14] express the spirit in which the Sabbath was regarded. Anecdotes about a pious man called "Joseph the Sabbath-lover" are adduced to illustrate the rewards one can expect to reap if one loves and honors the Sabbath.[15] The Sabbath is like the spice which endows the Sabbath meals with a delicious scent.[16] The importance of honoring the Sabbath with a festive table is repeatedly emphasized, and one sage, Rabbi Yose ben Yehuda, a Palestinian teacher of the 2nd century C.E., had this to say about it:

> Two ministering angels accompany a man on Sabbath eve from the synagogue to his house. One is a good angel, the other an evil one. As the man arrives in his house, if he finds the candle burning, the table set, and his bed made, the good angel says: "Be it the

> will [of God] that it be like this on the next Sabbath!" And the evil angel answers "Amen" against his will. If not, the evil angel says: "Be it the will that it be like this on the next Sabbath!" and the good angel answers "Amen" against his will.[17]

In a midrashic passage the Sabbath not only is personified but is contraposited to God:

> Rabbi Shimeon ben Yoḥai said: The Sabbath said before God: "Master of the Worlds! Each day has its mate, but I have none! Why?" The Holy One, blessed be He, answered her: "The Community of Israel is your mate." And when Israel stood before Mount Sinai, the Holy One, blessed be He, said to them: "Remember what I told the Sabbath: 'The Community of Israel is your mate.' Therefore, remember the Sabbath day to keep it holy."[18]

The six weekdays, this Midrash in effect says, constitute three pairs, and the odd Sabbath day received Israel as her mate. Israel was thus promised to the Sabbath in the days of Creation.

The common feature between the Talmud's and Philo's view of the Sabbath is that both personify her as a woman: Philo makes her the virgin daughter of God, who is also the sovereign and ruler of the world; the Talmud presents her as the bride of Israel and a queen.[19]

4 | *The Falasha Sabbath*

The Falashas, the black Jews of Ethiopia, who preserved several sacred books in the Geez language from a period as early as the 4th century C.E., went one important step further than the Talmud in their view of the Sabbath: they not only personified, but they deified her. This development, as has been pointed out, "is analogous to what Hellenistic Jewish and subsequent Gnostic speculation has done with such a concept as wisdom."[20] However, the Falasha deification of the Sabbath has been carried to an extreme never duplicated in either Hellenistic Jewish or Gnostic portrayals of the figure of Ḥokhma-Sophia. The only true analogy to it can be found in the Kabbalistic Matronit and Sabbath figures of the 13th and 16 centuries, respectively.

The Falashas, whose presence in Ethiopia is first attested historically in the 12th century C.E., preserved a primitive Judaism which relies entirely on the Old Testament and the apocryphal Book of Jubilees, includes the practice of animal sacrifices, and knows nothing of the Mishna and the Talmud.[21] One must therefore assume that they were cut off from contact

with the Palestinian-Babylonian-Egyptian mainstream of Jewish life prior to the destruction of the Second Temple in 70 C.E.

The Falasha book *Teezaza Sanbat*, or "Commandments of the Sabbath," is definitely a Jewish book written in Geez, the classical Ethiopian language, and dating in its present form from the 14th century, although it contains material which may go back to the 5th–7th centuries.[22] The framework of the book is the story of Creation, but its bulk deals with the greatness and the glory of the Sabbath of Israel, her adventures, acts, punitive expeditions, and intercessions with God. She is described as the daughter of God, a divine princess, to whom all the angels pay homage and who is exceedingly loved by God Himself. God, we read, "sanctified the Sabbath, glorified her, and blessed her through the Holy Spirit. . . . The Sabbath will rise from her seat on Friday at dawn. . . . the archangels will crown the Sabbath of God, and the priests of Heaven will leap for joy. . . ." Ninety thousand angels will crown the Sabbath of God and bring her down from on high. Because of her, all will rejoice like calves, and all the angels of Heaven will be glad because of the greatness, the splendor, and the glory of the Sabbath of God. The Sabbath will look upon the souls of the just in the garden, and they will rejoice on Friday.

> The souls of the sinners will love her [the Sabbath] in order that she may bring them out of Sheol [hell]. . . .
>
> God said to the archangel Michael: "Go down to Sheol for the sake of the Sabbath rest." When the Sabbath rises from the right hand of God, Friday at dawn, the angels rise immediately with the Sabbath and crown her. While they praise, glorify, and honor her, they fear and tremble greatly. . . .
>
> The Sabbath of Israel said to God, the Lord of Heaven and Earth: "I brought Thee those who believe in me and Thee, show mercy to them for my sake." God answered the Sabbath: "I pity them for thy sake," and He sent them away without shame or humiliation. . . .
>
> Sabbath means: I am God. "It is not the day but I [who says it]" says God. . . .
>
> Sabbath said to God: "Hearken to me, O Lord, [and let me say] but one word. I was with Thee when Thou didst create the Heaven and didst establish the earth upon the rocks with Thy wisdom. . . . O Lord, give me Thy consent and send me not to the unjust, the slanderers, the quarrelsome, and the treacherous. Drive me not away towards those who strike me with their spittle, who sit in the sun, who wash not with water, who cover not their . . . who throw

> away their spittle, quench not their fire, and accept not my commandments. As to their women, they knead their dough, they cook, draw water, crush in the mortar, shout, neglect my commandments, and rebuke their neighbors. . . ."
>
> On the day when God reprimands the children of Adam, the Sabbath will stand at the entrance of Hell in the valley of fire and will say: "By God! May the just be not separated from the sinners before I separate them for my sake. I shall inform Thee of those who rest not and observe not my laws." God said to her: "Numerous are those who committed sins before me." The Sabbath said to God: "Remember not the sins of Thy servants after they observed Thy Sabbath. Thou hast given me for a witness to the people, and Thou hast said through the mouth of Thy servant Moses: 'My Sabbath you shall keep, for it is a sign between you and me throughout your generations.'[23] And Thou hast said: 'You shall keep my Sabbath for it is holy and a rest unto you, and later it will be a witness. Their other faults will not be reprimanded. Verily, I shall forget their sins because of thee, my witness.' Thou shalt not count them among the infidels because of their faults, and Thou shalt not couple them with the unjust. I conjure Thee by Thy glory. Thou hast granted it to me, and Thou wilt not deny it because of Thy justice. I, Thy Sabbath, rose on that day to deliver my menservants and maidservants from among the oppressors and the wicked, for I am merciful. How can he be clean that is born of woman? Not even the sun and the moon are clean before Thee.[24] O Lord, permit me to deliver my servants forever, without limit. Amen."
>
> God said to the Sabbath: "I shall not confound thee and shall not refuse what thou hast asked of me. I grant thee everything that is thine. I say it truly in the name of my justice and of my Sabbath. And now, may they have respite from Hell on that day, since the Sabbath is the witness for those who observe it." Sabbath said to God: "Grant it to me."[25]

After brief references to the glory of God, the creation of Adam, the Fall, and the covenant of Noah, the narrative dwells at some length upon the well-known myth of Abraham and Nimrod,[26] then returns to the sin of Adam, recounts the story of the Golden Calf, and finally takes up again the story of the Sabbath:

> When the Sabbath rose from her seat on Friday morning, 640,000 angels followed her, and she worshiped the Creator. About 4,300

angels praised the Sabbath; 680,000 were to her right, 880,000 to her left. God conversed with the Sabbath. He gave the Sabbath [to Israel] to eat the fruits of the earth,[27] to drink, to rest, to worship, to pray, and to show mercy. God said: "They to whom I gave thee shall descend with thee. They who praise not, are not submissive, invoke not God on my Sabbath, and transgress my laws and commandments shall be coupled with the wicked."

And God said: "They who honor thee are as if they honored me, who dismiss thee are as if they dismissed me, who serve thee are as if they served me, who receive thee as if they received me, who make of the Sabbath a day of delight are considered as if they had made a loan to me. . . ."

The Sabbath said to God: "From Thee come the commandments and the law. . . ." God said: "May [the angels] descend with thee." The Sabbath said to God: "Hearken to me, only one word." God said to his Sabbath: "Yes, I listen to thee. He who celebrates thee and honors thee more than the other days will not have his sins remembered.[28] He who gives alms on the Sabbath, who receives thee after being washed in water, I permit thee to take him from me. To him who gives alms on the Sabbath of God, I shall give the forty-nine gifts I gave to thee."

The Sabbath left the camp of God. God said to the angels, his servants: "Go, descend with her." He sent them, and the angels followed, numbering 240,000. They brought her to earth. They reported the deeds of men to God. . . .

God saw [all this] and said: "The [Sabbath] shall never be worn out, the fruit of the Sabbath shall not perish. Praise me all people." . . .

The Sabbath descended from Heaven to the earth on Friday at the ninth hour [and remained] until Sunday at the rising of the sun so that the earth might see the deeds of the Sabbath. . . .

The Sabbath said to Michael, Gabriel, Ruma'el, and Uriel: "Bring to me all those who are mine, who believe in me, who neglect me not, who observe me and accept me." Michael ran with his hosts, descended and seized all those who belonged to the Sabbath, as the Sabbath had told him. The hosts of Michael fought with the hosts of Berna'el, and with their nails they took these hypocrites, the host of Hell, by the throat. They drove them to the bottom of Sheol and slapped them on the cheeks. They overpowered the hosts of Berna'el and subjugated them according to their deeds. Michael

> then ascended to the Sabbath and said to her: "The riders of Hell assailed me and took me by force."
>
> Thereupon the Sabbath said to God: "O Lord, my Creator, give me power over those who love me, and over those who are mine, and withhold not my servants from me!" God said to the Sabbath: "I shall give thee all those who are mine, as thou has asked me . . . for those who fear God, the Sabbath will stand before Him [and defend] the children of Adam on the last day." And she will say to God: "On that day I shall be witness for those who fear me and know me. And as for those who disregard me and know not God, the hosts of Berna'el will seize them and will throw the sinners into Hell."

The story now returns to the days of creation which came to a conclusion with the Sabbath, and the choice of Israel, whose special task was to keep the Sabbath.

> God said to his Sabbath: "Go, descend to the earth." And the Sabbath descended from the highest heaven to the earth in the midst of Jerusalem. Abel, Enoch, and Melchizedek, the great priest, received her. And all the angels of God crowned her, and then they dispersed in the midst of heaven after having departed from her throne. . . .
>
> When God questions the inhabitants of the earth upon the day of His arrival [the day of the Last Judgment], the Sabbath will stand before Him on behalf of those who fear him. . . .
>
> Sabbath said to God: "Thy name is great forever. Thy name is gracious." God said to the Sabbath: "I am gracious for those who belong to thee." The Sabbath will rise on the day on which God questions those who fear Him and those who fear Him not. Then the Sabbath will intercede for those who belong to her and will say to her Creator: "These are my people; these are my inheritance; these are they who walk in my path, who love me, who believe in me, who neglect Thee not, who find delight in Thee. Now they will enjoy eternal rest. Amen. . . ."[29]

The personification of the Sabbath is a strong element also in another Falasha writing, the so-called *Abba Elijah*. In it we read that God gave the Sabbath the following names: Luminous, Glorified, Honored, Beautiful, Resuscitating, Rejoicing, Beloved, and Guardian; and that the name Sabbath itself means "I am God alone."[30]

So far the old Falasha myth of the Sabbath.

In Ethiopian Jewish and Christian folk belief there is a certain parallelism between Mary and the Sabbath. In an Ethiopian folksong the Sabbath and Mary are considered mothers of a certain hero, while Michael and Gabriel are his fathers.[31] And a Falasha made the following statement: "The mediatrix of the Christians is Mary; ours is the Sabbath."[32]

To recapitulate the main features of the Falasha Sabbath: she is one of the earliest creations of God but, in a mystical sense, is also identical with God, which does not, however, prevent her from engaging in discussions with God. She is also a queen, crowned by the angels and seated on her throne. Those who observe the Sabbath rest and love her are her people, whom she claims from God and whom she rescues from the Last Judgment even if they sinned. To love and honor the Sabbath is the same as loving and honoring God. She orders the archangels to engage in a battle with the hosts of Satan ("Berna'el") in order to save the pious from his clutches. She is so terrifying in her glory that even the angels tremble when they look at her. In brief, she is a veritable goddess.

5 | *The Kabbalistic Sabbath*

As might be expected, the laconic Talmudic allusions to the Sabbath as bride and queen were seized upon by the Kabbalists and developed into a Sabbath mythologem, upon which then was built one of their most important mystical rituals. Although the peak of Sabbath adoration was reached only in the 16th century in the Safed center of the Palestinian Kabbalists, the trend towards it was heralded as early as the 12th century in both poetic and doctrinal exposition.

Abraham ibn Ezra (1092–1167), the famous Hebrew scholar and poet who lived in Spain, Italy, and France, describes in a treatise entitled "Epistle of the Sabbath" that on the night of the 14th of Tebeth, 4919 (December 7, 1158), while sojourning in England, he had a dream in which a man handed him a myrrh-scented letter, saying, "Take this letter which the Sabbath sent you." The poet opens the letter and finds in it a poem in which the Sabbath describes herself as "the crown of the religion of the precious ones" and goes on to enumerate her excellences, such as:

I am the delight of males and females,
In me rejoice the old and the young.[33]

A century later, a certain Menahem ben Jacob composed a poem in which he addressed the Sabbath as queen and bride. This poem was still reprinted in 19th-century editions of the complete prayer book.[34] The lines

> How sweet is your rest, O you Queen Sabbath,
> Let us hasten toward you, come, O anointed bride,

are closely reminiscent of the famous 16th-century Sabbath song *Lekha Dodi*, which was to supplant all the earlier poetic praises of the Sabbath and of which more will be said below.

Also in the 13th century, some Jewish mystics introduced a heterosexual notion into the Sabbath concept, justified by the two verbs which open the Fourth Commandment in the parallel versions of Exodus and Deuteronomy, respectively: "Remember the Sabbath day to keep it holy";[35] and "Observe the Sabbath day to keep it holy."[36] The Book of Bahir, the mystical Bible commentator Nahmanides (Moses ben Naḥman, 1194–1270), and the Zohar all reiterate the idea that the words "Remember" and "Observe" refer to two Supernal Sabbaths, one masculine, the other feminine. As the Zohar puts it: "'The children of Israel shall keep the Sabbath'[37]—this refers to the night, the mystery of the female; and 'Remember the Sabbath day'[38] refers to the day, the mystery of the male."[39]

The feminine Sabbath is, moreover, mystically identified with the Shekhina, or the *Sefira* of Kingship, while the male Sabbath is the *ʿesod* ("Foundation") or *Tifʾeret* ("Beauty"), i.e., the male aspect of the deity. Since the Shekhina is also identified with the Community of Israel, in this manner the Shekhina becomes the bride, or mate, of the Sabbath *ʿesod*.[40]

If we recall that Philo already had discerned a "manly and doughty" aspect in the Sabbath, in addition to her feminine aspects of virginity, beauty, and sovereignty, we find that the Kabbalistic distinction between a male and a female Sabbath is, again, an idea which has its roots in antiquity.

Elsewhere the Zohar describes the preparations one is supposed to make for reception of the Sabbath, the queen and bride, in proper fashion, in order thereby to induce her to come and, at the same time, banish her dark rival Lilith:

> One must prepare a comfortable seat with several cushions and embroidered covers, from all that is found in the house, like one who prepares a *ḥuppa* [canopy] for a bride. For the Sabbath is a queen and a bride. This is why the masters of the Mishna used to go out on the eve of Sabbath to receive her on the road, and used to say: "Come, O bride, come, O bride!" And one must sing and rejoice at the table in her honor. And more than this: there is yet another mystery. One must receive the Lady [i.e., the Sabbath] with many lighted candles, many enjoyments, beautiful clothes, and a house embellished with many fine appointments, for through this

> rejoicing and these arrangements one causes the Evil Handmaid [i.e., Lilith] to remain in the dark, hungry, crying and wailing, wrapped in mourning clothes like a widow. For when the one is fulfilled, the other is destroyed. The Good Inclination is the Holy Matronit, the Holy Kingdom which descends on the Sabbath . . . and the King proceeds to receive her with many hosts. And the Evil Inclination, the Evil Handmaid, remains in the darkness like a widow without her husband, without a chariot. Those about whom it is said that they offered sacrifices and burnt incense to the Queen of Heaven and the stars, which I [God] have not commanded them to do, they worship the Evil Maid who rules on the eve of Sabbaths and Wednesdays. What did they do? They took dark clothes, and darkened the lights and made a mourning on the Sabbath eves. . . .[41]

It is a peculiar, yet again almost inevitable, coincidence that the same night on which the pious prepare to receive Queen Sabbath, and on which God Himself proceeds to unite with her, should also be the time when Lilith roams and seduces men. It is up to man, the passage quoted above seems to say, to make his choice between the holy bride, the Sabbath, and the unholy one, Lilith.

Pope, after quoting the foregoing two paragraphs in his commentary to the Song of Songs, adds:

> The passage, however, by implication, says even more than this. Patai, in his chapter on Lilith makes it clear that she is none other than the evil aspect of the same Goddess whose good side is the Matronit. The mention of the worship of the Queen of Heaven, will allusion to Jer. 7:18, 44:17–19, makes it clear that the reference is to the persistence of the old-time religion, the cult of the Great Goddess, older by millennia than the revelation of the name of the God of Israel. The issue here is whether one performed similar rites in the name of the Queen of Heaven, Inanna-Ishtar, Anat, Atargatis, Venus, or in the name of Yahweh and his Sabbath Bride.[42]

Less than a hundred years after the Zohar, the idea of the Sabbath as God's bride and of God as the Sabbath's bridegroom, was elaborated and made explicit by David ben Joseph Abudarham, a commentator of the prayers and the benedictions, who lived in Seville about the middle of the 14th century. In his exposition of this thought, Abudarham adduces evidence from the special Sabbath prayers, which he reads as alluding to the betrothal of the divine couple. "The Sabbath," he says, "is called bride, and

God is called bridegroom." This can be concluded from the fact that the words "You [God] sanctified the seventh day to your name," included in the Friday evening prayer, actually mean "You betrothed the Sabbath day to Yourself."[43] Similarly, the prayer beginning with the words "Moses rejoiced" was included in the Sabbath liturgy because it refers to the rejoicing of the bridegroom, God, over the bride, the Sabbath; and the prayer "You are one" was included because it refers to the union of bride and groom.[44]

The Zoharic image of God the King proceeding with his innumerable hosts to receive his bride the Sabbath, the Holy Matronit, was subsequently translated into a central weekly ritual among the Safed Kabbalists of the 16th century. They developed the custom of leaving the town on Friday toward dusk and proceeding to the adjacent hills and fields in order to receive the Sabbath in the open. While approaching the queen and bride, the spirits of the marching group would rise to a near-euphoria, and they would begin to intone the *Lekha Dodi,* the Sabbath song which was universally accepted later and is sung to this day in every synagogue on Friday evening. The poem was written, with liberal borrowings from earlier versions, by Shlomo ben Moshe Halevi Alqabetz (ca. 1505–1584), a member of the Safed group of Kabbalists. Like all poems of this sort, the *Lekha Dodi* too is replete with Biblical phrases and allusions to religious ideas, with which one must be thoroughly familiar in order to get its full meaning. The literal prose translation which follows is offered with this author's apologies, in full awareness of his inability to do justice to the poetic and emotional qualities of the Hebrew original.

Come, my friend, to meet the Bride,
Let us receive the face of Sabbath.

"Observe" and "Remember" in one utterance,
The Only God let us hear.
God is one and His name is one,
For renown, glory, and praise.

Come . . .

Come, let us go to meet Sabbath,
For she is the source of blessing,
Pouring forth from ancient days.
The act was the end, in thought the beginning.[45]

Come . . .

King's temple, royal city,
Arise, leave the destruction behind,
Long have you sat in the vale of tears,
Now He will show mercy unto you.
Come . . .

Shake off the dust, arise, put on
The garments of your glory, O my people!
Through the Son of Yishai the Bethlehemite,[46]
Draw nigh to my soul and redeem it!

Come . . .

Awake, awake, for your light has come!
Arise and shine!
Wake up, wake up, sing a song!
God's glory was revealed to you.

Come . . .

Be not ashamed, be not confounded.
Why are you humble, why do you sigh?
The poor of my people will find refuge in you,
And the City will be rebuilt on her mound.

Come . . .

Your spoilers will be despoiled,
All your destroyers will be removed,
Your God will rejoice over you
As the bridegroom rejoices over the bride.

Come . . .

You will spread out to the right and left
And the Lord you will adore.
Through the Man, the Son of Perez,[47]
We all shall be happy and rejoice.

Come . . .

Come in peace, O crown of her husband,
In joy and in jubilation,
Amid the faithful of the chosen people,
Come, O Bride, come, O Bride!

Come, my friend, to meet the Bride,
Let us receive the face of Sabbath.

In addition to this paean, in which the Sabbath is described as God's bride and God as the Sabbath's husband, Psalms 29 or 95–99 were also recited, and sometimes even musical instruments were played. The fields in which all this took place were, through the arrival of the Sabbath-Shekhina, turned into the "sacred apple orchard," which in itself is a mystical manifestation or aspect of the Shekhina,[48] a sacred grove sanctified by the union of God with His bride and producing the souls of the just. The festive procession going to receive the Sabbath outside the town resembled in both form and spirit the processional fetching of the bride in traditional Middle Eastern Jewish weddings by the entourage dispatched by the bridegroom's family to escort her to the wedding canopy.

Pope, in his commentary to the Song of Songs, surmises that this Kabbalistic custom of receiving the Sabbath in the open followed

> an ancient custom of devoting the evening of Friday (Frī[g]day, Frīg being the old Teutonic love-goddess corresponding to Venus) to venereal activity. . . . The emphasis on the open country and the fields outside the town suggests alfresco amour under the benign glow of the Venus star (which helps one to understand the French expression for "out-of-doors," *à la belle étoile*, the beautiful star being Venus). The Bride and Queen greeted at dusk in the open country around Safed, we may plausibly surmise, was the epiphany of the Evening Star, Ishtar-Venus, Queen of Heaven. The question of the Canticle (8:5a): "Who is this ascending from the steppe?" is thus answered. The vesper sortie into the field recalls the invitation of the Canticle (7:12–13): "Come, my love, let us hie to the field . . . there will I give you my love."

So far so good. But in the subsequent two sentences Dr. Pope makes a surmise which forces us to part company with him:

> The euphoria of the procession as they marched to the field singing the hymn composed by Solomon Alqabetz, "Come my love to meet the Bride/The presence [face] of Sabbath let us receive," could lead to "lightheaded" activities if both sexes were present.
>
> Just what was done by the devout mystics after they got to the field is not entirely clear, but one may imagine that in the popular observances there were those who tarried to indulge in the kind of celebration congenial to the Love Queen.[49]

As far as one can conclude on the basis of what we know of the life of the Safed Kabbalists—and whether learned or not, all the Jews of Safed were Kabbalists in the 16th century—these Friday evening excursions to

the fields must have been purely a masculine affair. Thus the open countryside, which mystically assumed the character of the "sacred apple orchard," could have been the scene of nothing more than a highly emotional, but at the same time purely mystical-imaginary union between the male participants in the procession, as representatives of the Community of Israel, and the Holy One, blessed be He, the Divine Bridegroom of that community and of the Sabbath. The passage from the Song of Songs (8:5) quoted in this context by Pope, "Under the apple tree I aroused you, there your mother conceived you," certainly contributed its share to the development of the concept of the "sacred apple orchard," and, as Pope pointed out (p. 192), may in turn have had something to do with the old pagan worship in sacred groves. But in the course of the more than two millennia that had passed since that Biblical scene, Jewish sensibilities had become highly refined, so that any kind of group "celebration congenial to the Love Queen" would have been totally abhorrent to the 16th-century Kabbalists.

By that time, and especially in a Muslim environment such as represented by the town of Safed, the strict separation of the sexes had long been an entrenched and inviolate rule among the Jews. Public intermingling of men and women, whether in the synagogue, in the fields, or elsewhere, was entirely out of the question. This communal emphasis on segregation of the sexes meant that unmarried young men had to, and did, find outlets in clandestine relationships or encounters with women. If and when such affairs became public knowledge, their least consequence was utter disgrace. While no accounts of the sexual behavior of the Safed Jews are extant, there are contemporary documents which allow us to conclude that clandestine illicit sex was the most frequent among the transgressions for which a sinner was believed to incur the punishment of *gilgul,* or transmigration of his soul into the body of an animal or another human.[50]

However, clandestine offenses against an oppressively severe sexual code are one thing, and public sexual celebrations are quite another. While we can thus be practically certain that such group happenings could not, and did not, take place, we have every reason to assume that in those Friday evening excursions to the "sacred apple orchard" there was a strong admixture of erotic elements and libidinous arousal, which did not lead to any sexual activity until later that night, however. Since one of the focal endeavors in the religious life of the Kabbalists was to sanctify, by mystical interpretation, the legitimate sexual relations between husband and wife, whatever libido may have been aroused by the Friday evening group celebrations in the open fields around Safed was channeled into the licit and recommended satisfaction of marital sex after midnight.

Following the end of the evening prayers, the men would return home to be received by their wives—the wife in this instance became for the husband the earthly representative of the Shekhina, with whom he was about to perform that night the sacred act of cohabitation in imitation of, and in mystical sympathy with, the supernal union between God the King and His wife, the Matronit-Shekhina-Sabbath. The return from the synagogue to the home on Sabbath eve was also the occasion on which it was proper to show due reverence to the mother; of Isaac Luria, the great leader and master of the Safed Kabbalists, it is reported that upon entering his home he used to kiss reverently the hands of his mother.

Now the husband would approach the table and pick up two bunches of myrtle, each consisting of three twigs, prepared for the bride and the groom, and then circle the table—all rites imitative and symbolic of observances performed at actual weddings—and sing welcoming songs to the two angels of peace who were believed to accompany him home from the synagogue. The chanting of Chapter 31 (Verses 10–31) of the Book of Proverbs, which followed, had a double significance. Ostensibly, it was meant as a paean to the "woman of valor," the good wife and mother whose very presence in the house, quite apart from all the care she lavished on her family, made it possible for the husband to live a complete Jewish life, in accordance with the oft-reiterated teachings of the Kabbala about the blessed state of male-female togetherness. Beyond that, however, there was a deeper meaning: the "woman of valor" whose excellence is described in the twenty-two alphabetically arranged verses was interpreted as being none other than the Shekhina herself, the divine Matronit, whose image thus was mystically merged with that of the man's own wife.

Next came the recitation of an Aramaic poem containing an invitation addressed to God the King to take part in the festive Sabbath meal. At some time during that meal or following it, the husband chanted another mystical Aramaic poem written by Isaac Luria and describing the union of God the King and his bride, the Sabbath-Shekhina.[51] The first six stanzas read as follows:[52]

Let me sing the praises of Him who enters the gates
Of the orchard of apple trees, holy are they.

Let us invite her[53] now, with a freshly set table,
With a goodly lamp which sheds light on the heads.

Right and left, and the bride in between
Comes forth in her jewels and sumptuous raiments.

Her husband embraces her, and with her *Yesod*,[54]
Which gives her pleasure, he presses her mightily.[55]

Cries and sighs have stopped and ceased,
New faces come, spirits and souls.

He brings her great joy, in a double measure,
Light pours upon her, and blessings on end.

Upon the completion of this song it is customary to this day among the Hasidic Jews who follow the ritual established by "the Holy Lion" (i.e., Isaac Luria) to say this Aramaic prayer:

> Be it the will before the Ancient One, the Most Holy One, and the Most Secret One, and the Most Hidden of All, that the Supernal Dew be drawn from Him to fill the head of the Small Face and to fall upon the Orchard of Holy Apples, in radiance of face, in pleasure and in joy for all.[56]

The several courses of the meal, the drinking of wine, the numerous songs, the "words of Torah," and the after-meal grace took so long that, by the time the family rose from the table, it would be near midnight. And this was as it should be, because it had to be midnight when husband and wife retired to bed in order not to violate the stringent Kabbalistic rule prohibiting cohabitation prior to midnight of the Sabbath. The background of this rule requires some explanation.

6 | *The Mystical Union*

As we have seen in the first section of this chapter, Friday night was considered in the Talmudic period the proper time for scholars to fulfill the religious commandment of marital intercourse with their wives. This must have been an established custom, just as was the daily performance of the marital act by men of leisure, twice weekly by laborers, once a week by donkey drivers, once in thirty days by camel drivers (whose caravans returned home only once in thirty days), and once every six months by sailors (whose extended sea voyages enabled them to return home only at such long intervals). The passage in the Mishna which contains this information[57] is couched in the form of a legal decision as to the frequency of marital intercourse required of people from various occupations in fulfillment of the Biblical law which enjoins a man not to diminish "the food, the raiment, and the conjugal rights" of his wife.[58] The subsequent Talmudic specification to the

effect that scholars must have marital intercourse with their wives on Friday nights underwent further refinements as to the precise time most suited for performance of the act by scholars, and received its final codification as a religious law by Joseph Caro (1488–1575), in his *Shulḥan 'Arukh,* the last great and comprehensive Jewish code, first printed in Venice in 1564–1565. Caro, who was also an outstanding mystic and leader of the Safed circle of Kabbalists, advises that the act should be performed "neither in the beginning of the night nor towards its end, lest the husband hear the voices of people and be brought to thinking of another woman, but in the middle of the night."[59] Although this explanation of the rule to perform the act in the middle of the night is plausible enough, since thinking of another woman while coupling with one's own wife was considered a grave sin, there is much more to it than Caro allows to meet the eye. As his Polish commentator, Abraham Abele Halevi Gombiner (1635–1682), remarked about a hundred years later, "The Kabbalists wrote awesome mysteries [about intercourse] precisely after midnight. . . ."[60]

What these "awesome mysteries" were can be summarized from the basic writings of the Kabbala. They consist of two parts: an earlier one, explaining the mystical meaning of marital intercourse on Friday night; and a later one, specifying the mystical significance of restricting marital intercourse to Friday night after midnight.

The first is found in the Zohar, which casts its teaching on the subject into the form of a reinterpretation of a passage in Isaiah: "Thus saith the Lord concerning the eunuchs who keep My Sabbaths, and choose the things that please Me, and hold fast to My covenant: Even unto them will I give in My house and within My walls a monument and a memorial better than sons and daughters. . . ."[61] The "eunuchs," says the Zohar, are the scholars who study the Law all week long and "castrate themselves for the duration of the six days of the week, tiring themselves out with the study of the Law, and on Friday night they spur themselves to copulation because they know the supernal mystery of the hour in which the Matronit couples with the King." The words "who keep My Sabbaths" mean that those scholars keep themselves waiting for the Sabbath. "Choose the things that please Me" refers to the time of the coupling of the Matronit. "Hold fast to My Covenant" means that they hold onto that part of the godhead which carries the sign of the Abrahamic covenant, the Sefira of the *Yesod,* which stands for the masculine member, and through which the King unites with the Matronit. The Zohar concludes the passage with the words, "Happy is the lot of him who sanctifies himself in this holiness and knows this mystery"—that is to say, happy is he who, knowing this mystery, sanctifies himself by coupling with his wife on Friday night at the time when the King couples

with His Matronit and, by so doing, both imitates the divine act and brings it about, helping the godhead to achieve its mystical unity.[62]

The second part of the mystery, that which pertains to the precise time of copulation, is contained in the 16th-century elaboration of the Kabbalistic doctrine. Isaac Luria, in his discussion of the relationship between the King and the Matronit, whom he calls the Small Face and his Female, respectively, distinguishes two facets or persons in the latter: one, referred to by the name Leah, representing the lower aspect of the Shekhina-Matronit and reaching only as high as the chest of the Small Face; and the other, Rachel, the Shekhina's higher aspect, occupying a face-to-face position with the male deity from his chest upward. The Small Face, incidentally, is also called Jacob or Israel when in juxtaposition to Leah and Rachel.

The Small Face is engaged during the day, and during the night up to midnight, in copulation with Leah which is, mystically, of a low degree. From midnight on, on weekdays, and up to midnight on Fridays, a higher type of copulation takes place between the Small Face and Leah. After midnight on Friday, the Small Face and Rachel copulate, which is the highest kind of union of the male and the female in the godhead. This, therefore, is the time of grace in which a scholar should unite with his wife, making sure that he does so only after having pronounced the words: "I fulfill the commandment of copulation for the unification of the Holy One, blessed be He, and the Shekhina."[63]

Thus, for the Jew reared in the great mystical tradition of his faith, the Sabbath was a day whose pleasures, both physical and spiritual, amply compensated him for the drabness, narrowness, and frequent sorrowfulness of the weekdays. With the Sabbath, a queenly visitor entered even the humblest abode, which, due to her presence, was transformed into a royal palace, with the table set, the candles burning, and the wine waiting. The mistress of the house became mysteriously identified with the Queen Sabbath, who was also identical with the Shekhina, the divine Matronit, God's own consort. As for the master of the house, he felt his chest swell and his consciousness expand due to the "additional soul" which came down from on high to inhabit his body for the duration of the Sabbath. All these supernal presences made man and wife feel part of the great spiritual world order in which every act and word was fraught with cosmic significance, and in which the supreme command of the day was "Rejoice!" When midnight came, and the fulfillment of the commandment to rejoice on the Sabbath found its most intense expression in the consummation of the marital act, this was done with the full awareness not only of obeying a divine injunction, but also of aiding thereby the divinity himself in achieving a state of male-female togetherness which God is just as much in need of as man.

It is certainly a very far cry from the ancient Canaanite mass orgiastic festivals performed in honor of Astarte, the goddess of sexual love and fertility, to the mystically oriented and privately observed celebration of marital sex in honor of the Sabbath, the divine queen and consort of God. Yet, quite apart from the historic development which led from the first to the second in the course of nearly three millennia, one can discover in both at least one common feature which indicates their generic relatedness. Both observances are culturally conditioned and traditionally formulated responses to the basic human psychological need to elevate and sanctify the sexual impulse by attributing to the sex act a higher, a religious, a divine significance. In both, the act becomes more than the end-in-itself that in physiological reality it actually is; it becomes a sacrosanct observance directed at a loftier and greater aim: the exertion of beneficial influence upon the great ultimate realities of the metaphysical world. And in both it is a female deity whose invisible yet omnipresent countenance is supposed to light up into a benign and pleasurable smile when she observes the fervid performance of her favorite rite.

Conclusion

The foregoing eleven chapters have not discussed all the feminine numina who, in one period or another, played a role in the history of Hebrew and Jewish religion. There were, in addition to those treated, such concepts as the "Holy Spirit," closely akin to, yet distinct from, the Shekhina; the "Community of Israel," a personified guardian spirit of the totality of the Jewish people; and "Wisdom, " God's earliest creation and playmate, who had her counterpart in the Greek Sophia; none of these received more than fleeting mention above in various contexts. Several others were not even touched upon, such as the "Word," who also had a Greek counterpart in Logos; the "Daughter Voice" (Bath Qol), through whom God's will was made audible on earth; the Law (Torah), God's beloved whom He made the bride of Moses; the Earth (Adamah), considered in a literal sense the mother of all living; the Mother City, and especially Zion, regarded as the mother of the people; and her counterpart, the Daughter of Zion, who represented the Mother's children, the people of Israel.[1] All of these were personified, all were female and all partook, to a greater or lesser extent, of a numinous character. If they were omitted from the present volume, it was because they did not share, or shared only to a minor degree, those traits which transform a numinous entity into a goddess, that is, into a truly

divine being believed to possess a will of her own and to be capable of acting independently of any other divine power.

Such independent volition and capability of action was attributed to all the goddesses discussed. In reference to the early ones, those who established themselves in the Biblical Hebrew religious consciousness, the question of their dependence on or independence of Yahweh never had to be faced up to squarely. Asherah, Astarte, and Anath, on the one hand, and Yahweh (or Yahweh Elohim), on the other, inhabited two separate realms. Those who believed in the goddesses saw no incompatibility between the sway they held over certain areas of human life and certain departments of nature and the rule Yahweh exercised over others: in the polytheistic view of the divine, gods may compete with, and occasionally conspire against, one another, but they never cast a doubt on one another's existence. And as to those who believed in Yahweh only, for them the gods and goddesses worshiped by others were merely idols, devoid of any significance whatsoever, except the one baleful ability to lead men astray from the path of righteousness.

In the later period, the female divinities occupied a position in relation to God which was similar in one respect to that of Satan: they were capable of independent thought and action—surpassing by far the autonomy of angels, who were believed to be basically no more than the instruments of God's will. Yet there was, of course, the fundamental antithesis between good and evil which separated the Cherubim and the Shekhina from Satan and his cohorts. The independence of Satan's will from that of God was the result of his rebellion against his Master, and his opposition to God was always that of evil to goodness. Not so the female divinities, whose every independent act, even if it brought them into conflict with God, stemmed from their own, different, but equally valid, will to good.

The one exception to this rule is Lilith, the female embodiment of evil, Satan's companion, more deadly than any male devil could ever be. Her realm, dark and sinister, yet full of dangerous allure, stands beyond the control of God. The most powerful archangels, unable to subdue her, could only strike a bargain with her which left her ample room to pursue her nefarious activities.

The world peopled by these goddesses is calculated not only to repel the orthodox believer in the one and only God, but also to frustrate the logical mind. It is not unlike that old orchard of mysteries which the Talmud warns against exploring in the form of the story about the four sages who "entered the Pardes," three of whom came to a bad end. If one is armed only with the sword of logic, one runs the grave risk of being caught on the horns of not one but several dilemmas: not only that of reconciling the

existence of the omnipotent, one and only God with the existence of other equally, or almost equally, potent divinities, and female ones to boot; but also that of rendering two opposing wills-to-good accordant with each other; and that of distinguishing between the good and evil goddess, who is perhaps, after all, but one wearing two different masks.

It is, however, in the nature of religious truth that it transcends logical verities. Faith, luckily for man, can grasp truth intuitively and on a deeper (or, if you wish, higher) level, a level far beyond the reach of the laborious, step-by-step advance of logical thinking. The religious truth of the existence of a once-harmonizing, once-discordant goddess side by side with a one-and-only and omnipotent God was triumphantly manifested in what can be called the Kabbalistic breakthrough. The mystical God-concept of the Kabbala, with its one and yet multiple deity, and its goddess image, the Matronit, whose wifehood to both God and man brought man nearer to God than he could ever get to a lone, patriarchal, male godhead, humanized God and, simultaneously, divinized man.

What ultimately emerges from this conspectus is that, contrary to the generally held view, the religion of the Hebrews and the Jews was never without at least a hint of the feminine in its God-concept. At times, as in the Talmudic and even more so in the post-Talmudic periods, the female element in the deity was effectively pushed into the background. At others, as in the Biblical and again in the Kabbalistic eras, it occupied an important place in popular theology, occasionally even to the extent of overshadowing the male deity or the male component of the godhead. Only in the most recent times, after the Kabbalistic upsurge had subsided, and its last reverberations in Hasidism receded, was the female element eliminated from the God-concept among Reform, Conservative, and non-Hasidic Orthodox Jews, leaving it centered upon a strictly spiritual, but nevertheless inescapably masculine Godhead, upon "our Father in heaven." On the other hand, among the Sephardim, the Oriental Jews, and the Hasidic Ashkenazim, despite the inroads modernism has begun to make in their ranks, the mystical-mythical doctrine of God and the Shekhina has retained its hold, not in the least due to the fact that in these circles the reverence for the teachings of old Kabbalistic, respectively Hasidic, masters is still a powerful influence.

In conclusion, it may be appropriate to append here a comment for the purpose of putting the persistent sexual imagery of the Kabbala in its proper perspective. In the Middle Ages—and from the viewpoint of outlook, mentality, and imagery, the 16th-century Kabbalists were as medieval as the 13th-century originators of the Kabbala—there was nothing unusual about resorting to the symbolism of coitus in speaking of certain cosmic and divine events. Thus, for instance, in the cosmic realm the conjunction

of the sun and the moon—that is, the appearance of these two luminaries close to each other in the sky—was described verbally and visually as a man and a woman in sexual embrace, with an explicitness which today would be considered pornographic, but which in those days was taken for what it was intended: symbolic representations of an otherwise hard-to-imagine event.[2] Or, in the realm of the divine, let us recall the views of St. Peter Damian, the 11th-century cardinal and doctor of the Roman Catholic Church, who maintained that when the Virgin Mary matured, she possessed such charm and beauty that God, filled with passion for her, sang the *Canticles* in her praise, and that subsequently she was the golden couch upon which God, tired out by doings of men and angels, lay down to rest.[3] Two hundred years later, another Italian cardinal, the philosopher and ascetic St. Bonaventure, did not hesitate to call Mary "the spouse of the Eternal Father."[4] And in 1399 Christine de Pisan (1363?–1431), a famous forerunner of feminism, wrote these remarkable lines in her *Epître au dieu d'Amours*:

> Sweet Jesus, heart broken, wounded and dead, was abandoned by all his people except for the women. All the faith remains in a woman, and it is foolishness to speak ill of her, even if only out of respect for the Queen of Heaven, in remembrance of her goodness so noble and so deserving that it entitled her to conceive the Son of God! God the Father gave great honor to woman when He wanted to make her His spouse and His mother, the temple of God joined to the Trinity. . . .[5]

When viewed against this background, the sexual imagery of the union between God and the Sabbath, or between God the King and his consort, the Shekhina-Matronit—or, for that matter, between the Matronit and man—will appear neither offensive nor fantastic. The two-thousand-year-old Jewish tradition of viewing the relationship between God and man as one between husband and wife was, in the course of time, repeatedly transmuted, transformed, expanded, reapplied, and refined. What remained unchanged was the basic approach underlying it all: the overriding, irresistible tendency to view both the physical cosmos and the metaphysical world of the divine in human terms, which inevitably centered on the sexual reference, and thereby to reduce the great awesome mysteries, ever threatening to crush puny man, to a scale and form which he could grasp or with which, at least, he could grapple, thus gaining the self-assurance he needed to survive.

In strictly human terms, then, all the changing forms of the deity, the attribution to him of sexual qualities and functions, the early veneration of goddesses, their transformation into female divine attributes or manifesta-

tions, and their resuscitation at a time when they seemed dead and buried for over a millennium—all this served the one primal and permanent purpose, succinctly expressed first in the Bible and then repeated in numerous elaborations down to the present day: to safeguard human survival through any and every religious law, concept, idea, and endeavor. Let man, this view maintains, keep the statutes and ordinances, even those which bid him look up to a Brazen Serpent, in order that he may live by them.[6] It is under this imperative of life that the historical role of the Hebrew Goddess must be viewed and assessed.[7]

Appendix

The Goddess in the Dura Synagogue?

1 | *The Synagogue and Its Murals*

Excavations conducted on a *tell*, close to the eastern frontier of northern Syria, on the right bank of the Euphrates some 40 miles to the south of its confluence with the Khabur, unearthed the remains of the town of Dura Europos. This was a Roman frontier post for about a century, and in 256 C.E. it fell to the advancing Persians. In order to buttress the city wall against the Persian onslaught, the Romans partly demolished the synagogue that had been built against the wall, and partly filled it with sand, mud, and rubble. It was due to this latter measure that the murals covering the inside walls of the synagogue remained undamaged through almost seventeen centuries, although as soon as excavation exposed them to the elements they began to deteriorate rapidly.[1]

An inscription found in the synagogue itself gives the date of its construction: it was built in 245 C.E., replacing an older and smaller synagogue that had occupied the site for a few decades. Sometime during the eleven years of its existence, all the interior walls of the synagogue were covered with the murals, whose discovery created quite a stir among historians of religion. That the Second Commandment was not interpreted by early Judaism as an absolute prohibition of all pictorial representation of humans and animals was well known before the Dura Europos discoveries. But here was, for the first time, irrefutable historical evidence of the completely unrestrained use of polychrome painted murals showing scenes in which men

and women appeared and interacted. Here were pictures illustrating Biblical stories, executed according to a master plan that utilized all the vertical wall surfaces of the synagogue, including its western walls, in whose center was a scallop-capped niche that originally must have contained the Ark. And, what is more, one of the largest and most elaborate murals flanking the Ark on the left and having the rescue of the infant Moses from the Nile as its subject is centered upon the naked figure of a woman! The Dura discoveries thus occasioned not only a correction in the traditional view of the Jewish historical attitude on representational art, but also a revision of the equally traditional ideas concerning Jewish modesty and bashfulness. It had to be conceded, at least, that Jewish communities existed that had assimilated and incorporated into their traditionally Jewish institutions the Hellenistic attitude to the naked human body and its pictorial representation in the service of religion. (See Plate 34.)

2 | *Goodenough's Interpretation: Anahita*

The three volumes of Goodenough's magnum opus, devoted to the interpretation of the symbolism of the Dura Europus synagogue,[2] contain the most exhaustive and penetrating analysis of the murals. Drawing on his unparalleled familiarity with the art of the Greco-Roman world in general, Goodenough has established beyond doubt that the naked woman, shown standing up to her thighs in the water of the Nile and holding the infant Moses in her arms, "startlingly resembles" the usual representations of the goddess Anahita, the most popular deity of Iran in the Sassanian period.[3] This observation, in itself, does not come as too great a surprise, because Dura Europos was a predominantly pagan city in which the Jews constituted but a small minority, and it was to be expected that their pictorial art should be subject to surrounding influences. As Goodenough points out, they spoke Greek, and their art had an undoubtedly Hellenistic base. Only two doors away from the synagogue, a wall painting found in a house shows Aphrodite (with whom Anahita was identified) with Eros beside her, and these two figures "startlingly resemble" the representation of the woman and the infant Moses.[4] Goodenough concludes that

> to paint the Moses scene the artist drew upon some painting of Aphrodite, who in Dura was probably often called Anahita, with the baby and with female attendants in their peculiar dress. So startling an invasion into the Moses story, for representation in a synagogue, would hardly have occurred as the mere borrowing of a form. The infant is indeed Moses coming out from the ark in the Nile, but he comes out to divine company in the arms of the

> goddess, herself quite as recognizable as though flagged with a written label.[5]

As to the three women standing above "Anahita," Goodenough says,

> I see no reason to doubt that following a Jewish tradition, or originally with himself, the master designer at Dura introduced the Nymphs deliberately and skillfully into the scene of the infant Moses, and did so in order to intensify the notion that Anahita-Aphrodite was drawing from the water a Wunderkind with royal nature at least 'hedged' with divinity.[6]

Goodenough thus argues that the synagogue muralist not merely borrowed the form in which Anahita was usually represented in the pagan paintings, but consciously took the figure of Anahita and introduced it into his painting as if saying: Look, Moses was a "divine child," as clearly proven by the fact that he was fetched out of the Nile by the goddess Anahita, who evidently would perform such a service to none other but a "divine child." The artist's purpose in doing so, Goodenough explicitly states, was to show that Moses was a "Wunderkind," a Miraculous Child, rivaling in his nature the pagan gods whom the Greeks and Romans liked to depict as "Wunderkinder."[7]

3 | *Criticism of Goodenough's Interpretation*

Anahita, as we have seen above, was not merely the Persian counterpart of Aphrodite and of Artemis, but belonged to that ancient Near Eastern type of great goddesses who were virgins and wantons, loving mothers and cruel death dealers.[8] Could it be this goddess whom the Dura Europos muralist represented as holding the infant Moses in her arms? Is such an interpretation, as given by Goodenough, possible in the light of what we know about the Jewish attitude to pagan gods and goddesses?

We know that, following their penetration of Canaan, the Hebrew tribes adopted several local gods, or deities who held sway in neighboring countries, among them the goddesses Asherah, Astarte, and Anath (called the Queen of Heaven).[9] This was bitterly denounced by the Biblical authors and labeled as "awhoring after foreign gods." What, in fact, took place in the early Israelite period was an incorporation of Canaanite gods and goddesses into the popular (as well as court) religion of the Hebrews. However, this phase of their religious history came to an end in the 10th, or at the latest 9th, century B.C.E., after which time no *new* foreign deity was able to

gain a foothold among the Hebrews. They continued, to be sure, for several more centuries to serve the old gods who had won them over in the earlier, more malleable age, but no new adoption of foreign deities into popular Hebrew religion occurred.

After the Babylonian exile (586 B.C.E.), the "foreign" gods underwent a rapid decline among the Jews, although some of the old deities managed to live on, side by side with Yahweh, for another one or two centuries, especially in such relatively isolated places as the military outpost on the Upper Egyptian island of Elephantine. By the time the Hellenistic age arrived, in spite of all the attraction Hellenism held for the Jewish upper classes, it would have been completely out of line with this Jewish religious development, which by then was six or seven centuries old, to incorporate the worship of a new god into the Jewish religious structure. Individual Jews, of course, in every age, became temporarily or permanently attracted to the practices and doctrines of other religions. Apostasy and conversion to other faiths have dotted Jewish history for well over two thousand years. But never since the early Israelite period has Judaism admitted a new god.

These considerations alone contain a refutation of the interpretation of the naked female in the Moses panel of the Dura Europos synagogue as the representation of the goddess Anahita. Even if the 3rd-century Jewish community of Dura lay outside the mainstream of Jewish religious development,[10] the admittance of a pagan goddess in the form of her painted image on a synagogue wall would be totally impossible. As to the centers of Jewish religious development in Palestine and Babylonia, the fear of idolatrous contamination was so strong there that strenuous attempts were made to preclude any contact with idols. An illustration of this attitude can be found in the discussion that began when the Patriarch Gamliel II (flourished about 100 C.E.), on the occasion of his visit to the Hellenistic city of Acre (north of Haifa), made use of a public bath which was decorated with a statue of Aphrodite. The question whether this was permissible still occupied the rabbis after several generations.[11] A Jewish community, such as that of Dura Europos, even if it was only remotely connected with the great Jewish religious centers of Palestine and Babylonia dominated by such a mentality, certainly could not tolerate the representation of a pagan goddess in its synagogue.

What the attitude of the Dura Jews themselves was toward the pagan gods worshiped by the gentiles of their town is clearly demonstrated by another mural in the synagogue. This shows the destructive effect the Ark of the Covenant had on the god Dagon of the Philistine city Ashdod (cf. Samuel 5:4). However, instead of showing the broken pieces of the statue of Dagon, the artist painted the broken images of the principal Palmyrene gods, which were worshiped at Dura. The meaning of this painting was

correctly recognized by Goodenough when he remarked that the artist "succeeded very well in using the incident from [Book] I Samuel to show the collapse of paganism before the reality of Judaism, the collapse of paganism presumably as he knew it directly in Dura itself."[12] Elsewhere Goodenough repeats the same interpretation: "The gods of local paganism collapse before the Ark of the Covenant, the symbol of metaphysical reality in Judaism."[13] It is remarkable, indeed, that he remained unaware of the crass logical contradiction between this statement and the one that precedes it by only three lines, in which he says: "Moses is the divine baby here, with the three nymphs and Anahita-Aphrodite." How, one must ask, did Anahita-Aphrodite escape the fate of the other "gods of local paganism"? How could she be shown standing in triumphant nakedness over the ark (of Moses), when all her divine colleagues lie shattered under the Ark (of the Covenant)? One has only to pose this question in order to recognize that the woman holding the infant Moses in her arms cannot be the *representation* of Anahita-Aphrodite.

A comparison of the "Anahita-Aphrodite" picture with the Dura Europos synagogue murals in which the artist used Hellenistic elements, ideas, or motifs also vitiates Goodenough's interpretation. Neusner, following Goodenough, cites three examples of this artistic procedure.[14] One is the figure of David playing his lyre and surrounded by animals, in which the intrusion of the pagan Orpheus idea is unmistakable. The other is the figure of Moses shown leading the Children of Israel out of Egypt and carrying a staff, which, however, is portrayed as a club. Since the only two Greek heroes ever to carry a club are Theseus and Heracles, Goodenough argues that the Dura muralist "could have put it into Moses' hands only because of its immediate symbolic reference to their [i.e., Theseus' and Heracles'] special characters and to his [i.e., Moses']."[15] The third example cited by Neusner is that of Anahita-Aphrodite holding the infant Moses. However, there is a basic difference between Goodenough's interpretation of David-Orpheus and Moses-Heracles, on the one hand, and of the Anahita-Aphrodite figure, on the other. In the first two, we are shown pagan appurtenances with which the artist endowed the Biblical heroes whose pictures he painted. It was David whom he painted, although the manner in which he executed his painting made David's figure reminiscent of Orpheus. Similarly, in painting Moses, he made use of a feature associated with Heracles and Theseus. That the juxtaposition of the Greek and Hebrew heroes, implied by the borrowing of traits or paraphernalia from the former and attributing them to the latter, must have been based upon a current Jewish view influenced by Hellenism, cannot be doubted. In both cases, however, the Hellenistic features were absorbed and assimilated into the traditional Jewish concepts, which became enriched by them. What the artist says by means

of the Hellenistic references is: Our David was a greater musician than Orpheus, our Moses a greater hero than Heracles.

If Goodenough were correct in his interpretation of the female figure holding the infant Moses, we would have to assume that the artist, in this single case, completely reversed the procedure he followed in the other pictures. For what Goodenough says is that this picture shows Moses being rescued by the pagan goddess Anahita-Aphrodite, that is to say, that the muralist in this case allowed a Biblical story to be assimilated into Greek or Hellenistic or Persian—but in any case, pagan—religious tradition and that he set down the result in his mural, quite uninhibitedly and for everybody to see. Had the artist actually had in mind what Goodenough ascribes to him, he would have been guilty of gross idolatry, and also the congregation that tolerated his mural in the synagogue would have been guilty of the same sin.

4 | *Moses in the Arms of the Shekhina*

If the female figure holding the infant Moses in her arms is not Anahita, who then is she? Before seeking the answer to this question, let us again state clearly that part of Goodenough's interpretation which we accept. There can be no doubt that the muralist did engage in what Goodenough calls a "borrowing of form." In other words, he painted a female figure whose attributes and posture he borrowed from the current representations of Anahita-Aphrodite, and he did this in order to paint an image that could readily be recognized as a *divine* female. Once we accept that this was the artists's intention, we can easily understand why he "borrowed the form" of Anahita-Aphrodite: simply because there was no other form available to him in which to express the idea that a feminine deity cradled Moses in her arms. In Jewish artistic tradition there was certainly no prototype for the pictorial representation of a divine female; in the gentile environment of Dura, it was almost exclusively the Anahita-Aphrodite image that intruded upon the artist's consciousness.

Who then was this goddess-like figure into whose arms the muralist placed the infant Moses? Our answer is that she was the Shekhina.

This conclusion, startling though it may seem initially, can be supported by a number of considerations. The first of these is that the Midrash establishes a very close connection between Moses and the Shekhina, God's feminine aspect, which (or better, who) in the course of the Talmudic period achieved an increasing independence, and in the post-Talmudic period developed into a discrete feminine divinity.[16] In fact, no other human was represented as having had as intimate a relationship with the Shekhina as

Moses. In the Kabbala, this relationship was to culminate in the statement that Moses, and he alone of all men, not only became the husband of the Matronit (= Shekhina), but copulated with her while still in the flesh.[17] In the earlier, Talmudic and Midrashic sources, this idea is adumbrated in the assertion that, of all men, Moses was the only one to whom the Shekhina spoke "every hour without setting a time in advance," and that therefore, in order to be always in a state of ritual purity and readiness to receive a communication from the Shekhina, Moses separated himself completely from his wife.[18]

When Moses died, the Shekhina, we are told, took him on her wings and carried him from Mount Nebo to his unknown burial place four miles away.[19] The Shekhina's function at the death of Moses is paralleled by her ministration to him at his birth. When the daughter of Pharaoh, we read in the Babylonian Talmud, found the ark of bulrushes in which his mother had placed Moses, and opened it, "she saw the Shekhina with him."[20] This tradition is quoted in the name of Rabbi Yose, son of Rabbi Ḥanina, a Palestinian teacher (Amora) of the second half of the 3rd century C.E., whose sayings are contained in both the Palestinian and the Babylonian Talmuds.

The second consideration is that the Midrash lifts the entire scene on the banks of the Nile out of the realm of the anecdotal, which characterizes it in the Biblical narrative, into the realm of the miraculous and mythical. When the mother of Moses placed him in the ark, we read in the Midrash, she put a canopy over him, to take the place of his wedding canopy, because she feared that she would not be granted the sight of his *ḥuppa*. When the handmaidens of Pharaoh's daughter tried to dissuade her from rescuing the child, the Angel Gabriel came and struck them to the ground. The ministering angels in heaven, with all kinds of arguments, reminded God that Moses must be saved. Gabriel gave Moses a blow, so as to make him cry and thereby awaken compassion in the heart of Pharaoh's daughter. Moses himself, although only three months old, had the voice of a youth, and he refused to take suck at the breasts of any Egyptian woman, saying(!): "The mouth which will speak with the Shekhina should suck an unclean thing!?[21]

As for the daughter of Pharaoh, she did not just happen to go down to the river, but was compelled to do so by one of several divine acts. Some say that God sent a severe heat wave over Egypt, and all the Egyptians went down to the Nile to seek relief, among them Batya, the daughter of Pharaoh, with her maidens.[22] Others say that the daughter of Pharaoh suffered from leprosy, or from painful boils, so that she was unable to bear warm water. She therefore went down to the Nile to wash in its cool waves, noticed the ark, and the moment she touched it or the infant Moses, she was cured.[23]

Still others say that she went down to the Nile in order to purify herself from the uncleanness of her father's idol worship and that, unbeknownst to her, she uttered words of prophecy on the banks of the river.[24]

When Batya saw that the touch of Moses cured her of her disease, she said, "This boy is a saint," and decided he must stay alive. Since he who keeps alive a single soul in Israel is considered by God as if he had sustained an entire world, the daughter of Pharaoh was taken under the wings of the Shekhina and was called the Daughter of God, Bat-Ya.[25]

Thirdly, it should be pointed out that the Midrash literature abounds in passages clearly indicating that Moses was considered a "divine child." Miriam, the older sister of Moses, was possessed by the spirit of prophecy and foretold that her parents would give birth to a child who would become the savior of Israel. Thereupon Amram, who for three years had separated from his wife, approached her, and she conceived and bore Moses. When the child was born, the whole house became filled with great light, like the light of the sun and the moon. His parents saw that his appearance was like that of an angel of God. They circumcised him, called him Yequtiel (i.e., "My Hope Is God"), and hid him for three months. When they were no longer able to hide him in their home, his mother made him a little ark, which she placed, with Moses in it, among the reeds on the bank of the Nile.[26]

After taking him with her into the palace, Batya constantly kissed and hugged him, and she loved him exceedingly, for he was very beautiful. All the people at court desired to see him, and once they glimpsed him, they could not take their eyes off him.[27] Prenatal (or even preconceptional) annunciation, angelic countenance, light flooding the house, the healing touch, the ability to speak at the age of three months, irresistible charm and beauty—all these are features that unmistakably place the infant Moses in the "divine child" category.

The fourth consideration is the close association in the Midrash of the Shekhina with a sacred casket or ark. After accompanying Moses in the ark of bulrushes, the Shekhina dwelt in the Ark in which the Children of Israel carried the two Tablets of the Law in the desert. When the tribes rested, the Shekhina had her abode in the Tent of Meeting, the desert Tabernacle, or hovered over it. During these periods, and subsequently in the Land of Canaan, the Shekhina was most closely associated with the Ark of the Covenant. After Solomon completed the Temple in Jerusalem, the Shekhina hovered, or dwelt, over the Ark cover, between the two Cherubim. Some sages held that she was present in the Second Temple as well.[28] The Torah shrines in synagogues were the substitutes for the Ark of the Covenant, and after the destruction of the Second Temple (70 C.E.) the Shekhina, now in

exile herself, sought out these synagogues to serve as her resting places. The significance of this association, Shekhina–Ark–Torah shrine, will become evident when we come to discuss the shape of the ark of bulrushes in the Dura synagogue mural.

Fifth and last, the Shekhina was closely associated with certain Babylonian synagogues. According to Abbaye (a Babylonian teacher who died in 339 C.E.), the Shekhina dwelt alternately in the Shaf Weyatibh synagogue of Nehardea and the synagogue of Huzal. Nehardea was one of the earliest centers of Babylonian Jewry, situated at or near the junction of the Euphrates and Nahr Malka rivers, some 200 miles southeast of Dura Europos; Huzal was located nearby. In these synagogues, the Shekhina was both audible and visible.[29]

Talmudic accounts thus place the Shekhina, in a visible and audible form, in synagogues only 200 miles distant from Dura Europos, and in the same period in which the Dura paintings were executed. As to the Midrashim summarized above under points one through four, although most sources in which they are found are centuries younger than the Dura murals, the oral tradition upon which they are based can easily go back into the 3rd century C.E., or even further. In these Midrashim, Moses is represented as a "Wunderkind"; and the Shekhina is closely associated with Moses, in that she is said to have been with him in the ark of bulrushes; to have spoken to him frequently, possibly daily, during the wandering of the Children of Israel in the desert; to have gone with him physically, dwelling in the casket or Ark containing the Tablets of the Law; to have been his bride; and to have carried him to his burial on her wings.

We have, of course, no way of knowing how much of these Midrashim was known to the Jews of Dura in general, and to their synagogue muralist in particular. There is, however, evidence to prove beyond doubt that some Midrashic embellishments of Biblical stories were known to the muralist, because he included them in his paintings. One case in point is his picturing one of Job's friends in kingly splendor, which conforms not to the Biblical text (in which Job's friends are not further identified), but to the Midrash which states explicitly that Job's friends were kings.[30]

A second example is found in the Moses panel itself, where the two midwives standing before Pharaoh at the right side of the picture are shown wearing the same dresses as worn by the mother and sister of Moses, appearing to the left. Identically clad figures denote the same person in the pictorial idiom of the Dura muralist (e.g., in the Exodus panel he shows Moses three times in identical garb, and in the Ezekiel panel he shows Ezekiel twice in identical garb); but the identifying of Shifra and Pua (the two midwives) with Jochebed and Miriam (Moses' mother and sister) is not Biblical, but

Midrashic.[31] Here again the artist displays his familiarity with the Midrash, and these two instances make it probable or, at the very least, possible that in the scene showing the rescue of the infant Moses from the Nile he also illustrated a Midrash or, rather, the cycle of Midrashim that associates Moses with the Shekhina.

It seems to me that the cumulative force of the evidence adduced above indicates quite clearly that the intention of the artist was to stress the greatness, or even divinity, of Moses by showing him held safely over the water not by a foreign goddess, but by the divine female of Jewish tradition, the constant companion of Moses from cradle to grave, the Shekhina.

The Nile scene gave the artist the finest opportunity to show the infant Moses in the arms of the Shekhina. This was a scene in which, according to the Midrash, the Shekhina was present. However, the muralist could not show the Shekhina with Moses *inside* the ark; that would have been too difficult technically, if not impossible. He therefore proceeded to show the boy carried by the Shekhina, just as she carried him to his burial, a hundred and twenty years later when he died, substituting the figure of the divine female for the unnamed slave-girl whom, according to the Biblical account (Exodus 2:5), Pharaoh's daughter dispatched to fetch the child out of the Nile.

It remains to touch upon, albeit briefly, the nudity of the woman holding the infant Moses in her arms. This is undoubtedly the strangest, in the sense of least Jewish, feature in the entire pictorial cycle of the Dura synagogue. The very fact that the picture of a nude female was admitted into the synagogue shows to what extent the Jews of Dura were Hellenized, accustomed to the nude representation of the deities of their gentile neighbors, in temples as well as private homes. This circumstance made it *possible* for the artist to introduce the nude figure of a woman into the synagogue. What made it *necessary*, once he conceived the idea of showing the Shekhina with Moses, was that he had no Jewish, more modest example to follow in depicting the Shekhina, and that in borrowing the form of a gentile goddess he found only nude figures to copy. Thus the only way he could express that this woman, in contrast to the others appearing on the panel, was a divinity was to show her in the nude, while all the others were represented fully clothed.

5 | *The Ark of Bulrushes, the Ark of the Covenant, and the Temple*

We have left to the last the question of the peculiar form the muralist gave to the ark of bulrushes in the Moses panel. The vessel is clearly not the little ark woven of bulrushes that Jochebed prepared for

Moses (Exodus 2:3), which undoubtedly had a rounded, basketlike shape. What we see instead is a rectangular box, with a triangular gabled roof over its right end.

The peculiar shape of the ark of bulrushes has caught the attention of Goodenough, who commented that the ark is sketched in a manner closely resembling the shape of the sarcophaguses found, e.g., at Beth Shearim, Israel. His explanation is that the artist intended to indicate that Moses, the Redeemer, had died and was reborn to new life.[32]

This explanation seems farfetched to me, because we have no evidence to show that the Dura muralist was familiar with the gabled sarcophaguses or that the idea of the infantile death and rebirth of Moses (a non-Jewish mythologem) was known to him. A much closer comparison would be between the shape of the ark of bulrushes and that of the Temple shown twice on the same wall. In fact, the ark of bulrushes is painted unmistakably in the shape of a miniature Temple.

The same shape was given to the Torah shrine or Ark in most Jewish representations from the 1st to at least the 10th centuries C.E. The oldest, found in the Jewish catacombs of Rome and dating from the 1st to 4th centuries C.E., show the Torah shrine as precisely such a miniature Temple with a gabled roof. In the Beth Alpha synagogue, a mosaic dating from the early 6th century C.E. shows the Torah shrine in the same form, as does a picture in a 10th-century Pentateuch manuscript from Egypt.[33] These examples, which could easily be multiplied, indicate that there was a firm tradition in Jewish art to represent the Torah shrine as a miniature Temple with a gabled roof. The Torah shrine, whose presence in any room turned it into a synagogue, actually symbolized, represented, and substituted for the Temple of Jerusalem, which was destroyed by the Romans in 70 C.E. In the Dura synagogue, the Torah shrine, or at least the niche in which it stood, did not have such a triangular gabled top but was capped by a rounded shell-like semidome. Corresponding to it, the Ark of the Covenant is also shown with such a shell-shaped rounded top. Yet this detail cannot alter the fact that the ark of bulrushes is shown in the shape of a miniature Temple, and it most probably is symbolic of the Temple or its predecessor, the desert Tabernacle.

We now recognize that just as the woman holding Moses in her arms represents the lifelong association of Moses with the Shekhina, so the ark of bulrushes in the shape of a miniature Temple or Tabernacle hints at the greatest religious feat performed by Moses: the building of the Tabernacle, the Sanctuary that served as the prototype for all subsequent Jewish Temples in Jerusalem. The desert Sanctuary was called *mishkan* ("dwelling") because Yahweh was believed to have "dwelt" *(shakhan)* in it or over it in a cloud.[34] It is this idea of the "dwelling" *(Shekhina)* of Yahweh that in time developed

into the concept of the Shekhina, the "dwelling" or "presence" of God, as a separate, feminine divine entity. The nude woman in the Moses mural is shown raising her right arm over the Ark—this is how, with ingenious simplicity, the artist illustrates the mystical concept of the Shekhina hovering over the Tabernacle.

In recognizing that this is indeed what the Dura muralist had in mind in painting the nude woman holding the infant Moses in her arms, we find that in this picture he proceeded exactly as he did in the David-Orpheus and Moses-Heracles murals. As in those two, here also he enriched a Jewish character with features taken from the Hellenistic pictorial imagery of his environment. Far from allowing a pagan goddess to intrude into a Biblical scene, he assimilated, in this picture as well, certain Hellenistic features to embellish the Divine Female, the Shekhina.

6 | *Conclusion*

The above considerations lead up to certain general conclusions with regard to the relationship of the Dura Europos Jews to Hellenism. These conclusions can be subsumed under two categories: first, the extent to which the Jews of Dura accepted Hellenistic cultural features; and second, the traits they rejected as incompatible with their own Jewish religious traditions.

The area from which the Jews of Dura were willing to accept cultural influences is presented in the synagogue murals as that of the pictorial representation of divine, or quasi-divine, heroes in the Hellenistic style. This is considerably more than a mere "borrowing of *form*," because it implies the assertion that the Biblical heroes and other Jewish figures depicted in a form borrowed from Hellenistic representational art were, in fact, as close to being divine as were the Greek heroes or deities whose attributes were borrowed for giving visual expression to the divine quality of the Jewish heroes and other figures.

The belief that some Biblical and post-Biblical heroes were superhuman and quasi-divine was an old Jewish tradition that went back to Biblical times and developed more fully in the post-Biblical period. It was certainly an old, established feature of Jewish religion by the time the Dura murals were painted.

We saw, above, some of the Midrashic traditions that surrounded the birth and infancy of Moses and that leave no doubt as to his quasi-divine character in Tannaitic and Amoraic belief. To them we may add the following generalizations: the typical hero, whether he lived in Biblical or post-Biblical times, was considered in the Talmudic (i.e., Tannaitic and Amoraic)

tradition as being gigantic in bodily size, wielding superhuman strength, enjoying a much longer life-span than ordinary mortals, possessing extraordinary wisdom and beauty, having had (and prevailed in) encounters with angels and demons, and having the power to make even God Himself obey him.[35] People who had this mental image of their own "god-men," when they learned about Greek gods and heroes, felt no qualms over borrowing the latters' traits and attributes when it came to expressing in visual form the divine qualities of a Moses or a David, or depicting the divine female (or: the female in the divinity), the Shekhina.

As against this, the Jews of Dura were rooted firmly enough in their Jewish traditions not to allow the pictorial representation of any pagan deity *as such* to intrude into their place of worship. In all the panels of the Dura synagogue there is not a single example of the representation of a pagan god as such. What are represented clearly and with unmistakable intent are the local idols (i.e., statues of the pagan gods), broken into pieces and lying scattered on the ground before the holy Ark of the Covenant of the God of David. To interpret the woman holding the child as Anahita holding Moses is therefore absurd. For the Dura Jews, Anahita was but another of those idols shown shattered in another panel. To represent her as a living deity and, to boot, as rescuing the infant Moses from the Nile would have been inconceivable.

We thus recognize, in the mirror of the synagogue murals, a community that was Jewish in its religious traditions and observances, whose Jewishness was sufficiently vital and self-assured to allow the assimilation of Hellenistic pictorial art as well as of features attributed by Greek religion to its gods, but that was, at the same time, tradition-bound enough in the manner of Talmudic Judaism to reject the very idea that the Greek gods could be anything more than lifeless images fashioned by human hands.

8. *Judges* 3:5–7
9. The textual evidence as to the nature of "the Asherahs" is equivocal. The Asherahs are said to have been "made" (1 *Kings* 16:33; 2 *Kings* 17:26; 21:3; 2 *Chronicles* 33:3) which indicates that they were artifacts, made by human hands, and not merely natural trees as some scholars believe. The expressions to "set up" (*Isaiah* 27:9; 2 *Kings* 17:10; 2 *Chronicles* 33:19) or even "build" (1 *Kings* 14:23) an Asherah point to the same conclusion. Only once is an Asherah said to be "planted" (*Deuteronomy* 16:21) and the verb there probably means "implanted," that is, set into the ground as one would a pillar. On the other hand, the removal of Asherahs is called "cutting them down" (*Judges* 6:25, 26, 28, 30; 2 *Kings* 18:4; 23:14; *Exodus* 34:13), "hewing them down" (2 *Chronicles* 14:2; 31:1; *Deuteronomy* 7:5), "breaking them into pieces" (2 *Chronicles* 34:4, 7), "burning" (2 *Kings* 23:15; *Deuteronomy* 12:3), "exterminating" (2 *Chronicles* 19:3), "removing" (2 *Chronicles* 17:6), and "uprooting" (*Micah* 5:13) them.
10. *Judges* 6:25, 28.
11. 2 *Kings* 21:3.
12. This is also the conclusion of Reed, *op. cit.*
13. *Judges* 6:25–32. The entire story of Gideon is most instructive in that it illustrates the irruption of Yahwist ideas into the midst of the pre-existing Baal and Asherah worship. The fact that Gideon needed the help of ten men (v. 27) in order to destroy the altar of Baal, cut down the Asherah and build an altar for Yahweh, indicates that the paraphernalia of the Baal and Asherah worship were quite sizable.

    It might be pointed out here that there was a significant difference between the image and the altar. The altar was "the altar *of* the Baal," it did not represent the god, but was merely dedicated to him. As against this, the wooden image *was* Asherah, it represented her in the manner in which a statue of an Egyptian or a Greek goddess represented that deity. It is therefore more than probable that the wooden image called "the Asherah" was carved or in some other way so fashioned as to indicate clearly that it stood for the goddess.
14. See sources in Reed, *op. cit.,* pp. 80–81, 87.
15. *Genesis* 30:10–13. Since Zilpah was Leah's handmaiden, it was Leah's right to name her children, just as it was Leah's right to introduce Zilpah into Jacob's

bed. The text in *Genesis* is extremely laconic, and the exclamations made by Leah and adduced as explanations of the names given to the sons at their birth are purposely kept unclear. Nevertheless, the impression is gained that the names of Zilpah's two sons were originally felt to have had some connection with Canaanite deities. When the first son of Zilpah was born, Leah exclaimed: "By Gad *(baGad)*," and called his name Gad. When, shortly thereafter, Zilpah gave birth to a second son, Leah exclaimed: "By Oshri! (usually translated as "By my happiness!") For women will call me happy." And thus she named him Asher (*Genesis* 30:10–13). The prefix *b-*, used in both cases (*baGad* and *b'oshri*) is the one used when swearing by a god (cf., e.g., "By Yahweh," *Joshua* 2:12; *Judges* 21:7; 1 *Samuel* 24:22; 28:10; 2 *Samuel* 19:8; 1 *Kings* 2:8, 23, 42; "by Elohim," *Genesis* 21:23; 1 *Samuel* 30; 15; *Nehemiah* 13:24; 2 *Chronicles* 36:13; *Isaiah* 56:16).

A deity by the name Gad was worshiped in Canaan, Palmyra, Phoenicia and Arabia as the god of good luck (cf. Robert Graves and Raphael Patai, *Hebrew Myths; The Book of Genesis*, New York, 1964, 45.2). No god by the name Oshri is known. Some scholars, therefore, assume that the text has been editorially emended so that the name of the deity invoked by Leah should conform more closely to the name Asher which it was supposed to explain, and that the original tradition had Leah exclaim: *basherah*—"By Asherah!" (Cf, Reed, *op. cit.*, pp. 80–81, 87). The masculine name Asher may have been derived from Asherah, just as the masculine Astar was from Astarte in Canaanite mythology (cf. ANET, pp. 129, 140; cf. also the Egyptian form Astar for Astarte, ANET, p. 250).

16. 1 *Kings* 3:2–3.
17. Cf. *Views of the Biblical World*, Jerusalem, 1960, vol. 2, p. 213; cf. 1 *Kings* 6:2–10, 15–38.
18. 1 *Kings* 7:13–50.
19. 1 *Kings* 11:4, 6.
20. 1 *Kings* 11:2–4.
21. 1 *Kings* 2:46; 3:1.
22. 1 *Kings* 11:1, 5.
23. Another consideration which speaks against the attribution of idolatry to Solomon's old-age weakness or folly is the accusation of idolatry leveled by the prophet Ahijah the Shilonite—an uncompromising Yahwist—against all Israel: "They have forsaken me," Ahijah says in the name of Yahweh, "and have worshiped Ashtoreth the goddess of the Sidonians, Chemosh the god of Moab, and Milcom the god of the children of Ammon . . ." (1 *Kings* 11:33). We note that Ahijah accuses the Israelites of serving the same three foreign gods whose worship, according to the earlier passage, was introduced by Solomon in his old age. But while Solomon was said merely not to have gone "fully" after Yahweh, the people as a whole are charged by Ahijah with having "forsaken" Yahweh. It would, therefore, seem that while the royal court worshiped both Yahweh and other gods, the people did not worship Yahweh at all, but served only those other gods. It is hard to imagine that this should have come about as a result of the people imitating the court: popular religion in the Middle East was (and still is) notable for its slowness in accepting changes. It is far more likely that the popular idolatry of Solomon's day was by that time an old tradition which had spread among the Hebrews as a result of their prolonged contact with the nations of Canaan.

24. 1 *Kings* 11:5.
25. 1 *Kings* 11:33; 14:15.
26. 1 *Kings* 11:29–39.
27. 1 *Kings* 12:25–33.
28. 1 *Kings* 14:9, 15.
29. 1 *Kings* 16:32–33. In connection with Jezebel's father Ethbaal we again encounter the by now familiar confusion of Asherah and Astarte. From the account in the *Book of Kings* it is evident that Ethbaal and his family must have been the devotees of Asherah, for only this explains the introduction into Samaria of Asherah worship by Ahab in honor of his wife Jezebel, Ethbaal's daughter. Yet according to Menander, as quoted by Josephus Flavius (*Contra Apionem* 1:18), Ethbaal was the King of Tyre (and not of Sidon), and he was a priest of Astarte.

54. *Micah* 5:11–13.
55. 2 *Kings* 21:3–7; cf. 2 *Chronicles* 33:3–7, 15, 19.

56. Cf. above, p. 15.
57. *Deuteronomy* 7:5; 12:3; cf. *Exodus* 34:13.
58. *Deuteronomy* 16:21–22.
59. 2 *Kings* 23:4, 6, 7, 13, 14; cf. 2 *Chronicles* 34:3, 4, 7. In 2 *Kings* 23:7 the masoretic text has "he demolished the houses of the *qedeshim* that were in the house of Yahweh, where the women wove houses *(batim)* for the Asherah." Apart from the question of how can houses be woven, stylistically it is well-nigh impossible that the word "house" should appear three times in one and the same sentence. The Septuagint has *"stolas,"* i.e., garments, for *batim,* which may be based on an original *badim,* i.e., "linens." The expression "(a person) clothed in linens" *(badim)* appears as a standing epithet for a mystical figure in *Ezekiel* (9:2, 3, 11, etc.) and *Daniel* (12:6, 7). Thus it may well be that, from time to time, the Asherah statue was dressed in new linens, and that women considered it a pious act to busy themselves with weaving the material for these garments, on looms set up for this purpose in certain chambers in the Temple compound. The weaving of ritual vestments was a woman's task in Babylonian temples (cf. Woolley, *Antiquaries' Journal* 5: 393), at Hierapolis in Syria (Lucian, *De Dea Syria* 42), and in Greece (Gressmann, *Zeitschrift für die alttest. Wissenschaft,* 1924, pp. 325 ff.). It seems that also in Ugarit the makers of sacred vestments had a role in the temple ritual (cf. John Gray, *The Legacy of Canaan,* p. 156, and *I and II Kings,* Philadelphia, Westminster Press, 1963, p. 507).

    As to the *qedeshim,* most Biblical scholars consider the term to refer to sacred prostitutes of both sexes, and not merely males. I am inclined to read it as "male sacred prostitutes," for had the Biblical author wished to refer to both male and female functionaries he would, in all probability, have said *"qedeshim uqedeshot"* using both the masculine and the feminine plural forms of the noun *qadesh.* The function of the *qedeshim* had something to do with the fertility cult centering in the figure of the mother-goddess Asherah. Possibly, their services were made use of by childless women who visited the sanctuary in order to become pregnant. Such pilgrimages to holy places for the purpose of removing the curse of barrenness have remained an important feature of popular religion down to the present day among Moslems, Jews and Christians alike in all parts of the Middle East. The *qedeshim* may have also functioned in rites of imitative magic in the fertility cult, whose purpose was to ensure fruitfulness in nature, the coming of the autumn rains, the growth of the crops, the multiplication of domestic animals, etc.

    Fertility goddesses had male attendants or priests in ancient Near Eastern religions, and, in the case of the *qedeshim* in the Jerusalem Temple, one of their tasks seems to have been to supervise the work of the women weaving linens for Asherah, which, therefore, was done in the chambers of the *qedeshim.*
60. *Jeremiah* 2:8, 23; 7:9; 9:13; 11:13, 17; 12:16; 19:5; 23:13, 27; 32:29, 35.
61. 2 *Kings* 23:13.
62. *Jeremiah* 17:2.
63. *Ezekiel* 8:1.
64. *Ezekiel* 8:1–18.
65. Cf. vv. 6, 13, 15.
66. The word "jealousy" undoubtedly refers to Yahweh: it is His jealousy that the image arouses. The word "image" (*semel* in Hebrew) first occurs in a Deuteron-

omic injunction prohibiting the making of a "a statue *(pesel)*, the form *(t'munah)* of any image *(semel)*, the likeness *(tabnith)* of male or female; the likeness of any beast which is on the earth, the likeness of any winged fowl which flies in the heavens; the likeness of any fish which is in the water under the earth" (*Deuteronomy* 4:16–18). *Semel* therefore means here an image which represents a member of one of the four major realms of the animal kingdom, and which is made for idolatrous purposes.

In the *Book of Chronicles,* probably under the influence of Ezekiel's use of the term *semel,* the Asherah image set up by Manasseh is called, not merely "Asherah" as in the original account (2 *Kings* 21:3), but "the statue *(pesel)* of the image *(semel)*," and, the second time briefly "the image (*ha-semel;* 2 *Chronicles* 33:7, 15). The identification of Ezekiel's "image of jealousy" with Manasseh's "image of Asherah" is implicit in the terminology of *Chronicles*.

67. Following the publication of the earlier editions of this book there was a considerable revival of interest in the worship of female deities in ancient Israel and in Judaism in general. About Asherah herself several studies have been published. Cf. e.g. John Day, "Asherah in the Hebrew Bible and Northern Semitic Literature," *Journal of Biblical Literature,* Vol. 105, No. 3 (1986), p. 386; William G. Dever, "Asherah, Consort of Yahweh? New Evidence from Kuntillat 'Ajrud," *Bulletin of the American Schools of Oriental Research (BASOR),* Vol. 255 (1984), p. 21–27: "Recent archaeological discoveries provide both texts and pictorial representations that for the first time clearly identify "Asherah" as the consort of Yahweh, at least in some circles in ancient Israel. . . . We cannot avoid the conclusion that in Israel Yahweh could be closely identified with the cult of Asherah, and in some circles the goddess was actually personified as his consort"; J. R. Engle, *Pillar Figurines of Iron Age Israel and Asherah-Asherim,* Diss. 1979, Ann Arbor, 1981; Mordekhai Gillulah, "L'Yahweh Shomron ul'Asherato," *Sh'naton l'Miqra ul'Heqer haMizrah haQadum,* Jerusalem: M. Newman, 1979, pp. 129–37: "It is likely that the Asherah was considered for generations a legitimate object of worship both in Judah . . . and in Israel. . . . One cannot avoid the conclusion that she was considered the consort of Yahweh, or that at least in a certain period they joined her to him as his mate" (my translation from the Hebrew); K. Jaroš, "Zur Inschrift Nr. 3 von Hirbet el-Qom," *Biblische Notizen,* Vol. 19 (1982), pp. 30–41; André Lemaire, "Who or What Was Yahweh's Asherah?" *Biblical archaeology Review,* Vol. 10, No. 6 (Nov./Dec. 1984), p. 42, quotes an inscription which reads "Blessed be Uriyahu by Yahweh and his Asherah," which must have been an old popular blessing formula repeated several times; Ze'ev Meshel, "Did Yahweh Have a Consort?" *Biblical Archaeology Review,* Vol. 5, No. 2 (March/Apr. 1979), pp. 24ff. reports of the excavations at Kuntillat 'Ajrud in the Northern Sinai, just south of the Israeli-Egyptian border, where large pithoi (storage jars) were found with inscriptions containing the names of El, Yahweh, Baal, Asherah, and the phrase "May you be blessed by Yahweh and by his Asherah" (the finds seem to date from the late-9th- or early-8th-century B.C.; Ziony Zevit, "The Khirbet al-Qom Inscription Mentioning a Goddess," BASOR, Vol. 255 (1984), pp. 39–47: an inscription from ca. 750–700 B.C. which should be read: "Uriyahu the governor wrote it. May Uriyahu be blessed by Yahweh my guardian and by [his Asherah]. Save him [save] Uriyahu."

The papers listed above seem not to have been available to Steve Davies when he wrote his essay "The Canaanite-Hebrew Goddess," in Carl Olson (ed.), *The*

Book of the Goddess, New York: Crossroad, 1983, pp. 68–79. Davies paper is devoted mostly to Asherah, and he summarizes my findings from an earlier edition of *The Hebrew Goddess*. However, he attributes to me more than I ever claimed. He says: "Raphael Patai's well researched and fascinating book *The Hebrew Goddess* makes a case that there was a female form of deity throughout Hebrew and Jewish history" (p. 74). I never made such a "case." What I said was that "the religion of the Hebrews and the Jews was never without at least a hint of the feminine in its God-concept" (see above, p. 279). Thereafter I speak of "the early veneration of goddesses, their transformation into female divine attributes or manifestations . . ." (pp. 280–81). Incidentally, Davies misuses the term "Hebrew culture," when he says that "Hebrew culture has consistently been defined in terms of acceptance of the God Yahweh and the rejection of other gods" (p. 74). The acceptance of the god Yahweh was certainly an important, even crucial, element of "Hebrew culture" (or, rather, religion), but the rejection of other gods, i.e., the worship of Yahweh as the *only* God, characterized only the culture of the Yahwist minority. Unbiased reading of the Biblical text, combined with the archaeological evidence (as indicated above), shows irrefutably that the great majority of the people, including most of their kings, princes, priests, and prophets, did *not* reject other gods. Yet, of course, it would be fallacious to exclude all these people from "Hebrew culture." They were all Hebrews, speakers of the Hebrew language, heirs to Hebrew traditions, members of Hebrew tribes or descent groups—in a word, carriers of Hebrew culture—but they were followers of varying assortments of deities chosen from among Yahweh, Baal, Asherah, Astarte-Anath, the Queen of Heaven, to name only the most popular ones.

68. Published in the *Journal of Biblical Studies*, Vol. 105, No. 3 (1986), pp. 395–408.

4. ANET, 131.
5. ANET, 144.
6. ANET, 130, where, in view of the above-mentioned prosodic rule, the missing part of the name should be restored as "(Ana)th," rather than "(Ashtore)th" which is the first choice of H. L. Ginsberg.
7. ANET, 15.
8. ANET, 249–50.

9. ANET, 250.
10. W. F. Albright, *Amer. Journal of Semitic Languages and Literatures*, Jan. 1925, p. 82.
11. ANET, 249–50.
12. ANET, 250.
13. ANET, 320. Chemosh was regarded as the local Moabite manifestation of the deity known in many lands as Baal ("Lord") or Molech ("King"), as evidenced by the name Mesha king of Moab gave to one of the cities he built: he called it Beth-Baal-Meon, i.e., House of the Baal of Meon. It is not likely that a zealous devotee of Chemosh like Mesha would have named a city he built after another god. Cf. *Entz. Miqrait*, s.v. Molech; ANET, 321.

18. I.e. Beth 'Ashtarah, *Joshua* 21:27.
19. 1 *Chronicles* 11:44.
20. E.g., 'Anathoth; see below, p. 62.
21. *Joshua* 9:10; 12:4; 13:12, 31; *Deuteronomy* 1:4; 1 *Chronicles* 6:56.
22. *Genesis* 14:5.
23. E.g., the 17th century B.C.E. figurine from Nahariah, see Plate 9.
24. The original meaning of the word *'ashtaroth* can be established with the help of four passages in *Deuteronomy* (7:13; 28:4, 18, 51) in which it occurs in a poetic context. In each of the four passages the phrase "the *'ashtaroth* of your flock" is paralleled by "the increase of your kine." According to the rules of Hebrew prosody, the word "increase" *(sheger)* must have roughly the same meaning as *'ashtaroth*. On the other hand, *sheger* (which has its cognate verb-root in Aramaic meaning "to send forth") is a synonym of *reḥem*, the well-known Biblical word for "womb" (*Exodus* 13:12). Thus both *sheger* and *'ashtaroth* can mean only "womb," or by transference "that which issues from the womb." Cf. U. Cassuto, *Perush 'al Sefer Sh'mot*, Jerusalem, 1959, p. 105. From *"reḥem"* is derived the Biblical Hebrew noun *"raḥam,"* meaning "she of the womb," or "girl" (*Judges* 5:30), and a similar Ugaritic noun meaning the same (Kramer, *Mythologies*, 187). Similarly, from *'ashtaroth* is derived the Canaanite name of the Goddess 'Ashtoreth, meaning "She of the womb," a most appropriate name for a goddess of fertility.
25. The name Baal is derived from a Semitic verb which originally meant "to take possession sexually."
26. When the goddess is styled "the maiden," this epithet is usually followed by her proper name Anath: "the maiden Anath." It seems that a knowledge of the original meaning of the name Astarte, namely "girl," lingered, and that it was therefore found clumsy to refer to the goddess as "the maiden Astarte" which would have meant "the maiden girl."
27. *Judges* 2:13.

28. *Judges* 10:6.
29. *Samuel* 7:3–4, 10–13; 13:10.

47. *Judges* 3:31; cf. 5:6.
48. ANET, 130–31. For another explanation of the name Shamgar ben Anath, see Eva Danelius, "Shamgar ben Anath," *Journal of Near Eastern Studies,* July 1963, vol. 22, pp. 191–93.
49. Cf. above, p. 56.
50. *Jeremiah* 44:15.
51. *Jeremiah* 44:15–19.
52. *Jeremiah* 7:17–18.
53. Zimmern, *Keilinschriften und das Alte Testament,* 3rd ed., pp. 441 f., 425; ZATW 6, 301–08.
54. The mold and a modern cast made of it are pictured in *Views of the Biblical World,* vol. 1, Chicago-New York, 1959, p. 290.
55. A certain reinforcement for the above conjecture can be found in Rabbinic tradition according to which the show-bread *(Lehem panim* which was offered up daily in the Temple (*Exodus* 25:30) was baked in a mold, cf. Mishna Menahot

11:1; B. Menahot 94a, 97a; cf. Mishna Demai 5:45; Num. Rab. 4:14. The precise translation of the name of this bread-offering is "bread of the Face" (i.e., of God). This is how, e.g., Father de Vaux explains the meaning of the term in his *Ancient Israel,* New York-Toronto-London, 1961, p. 442. The mold in which the bread was baked must have given it a shape which had some relation to its name. If so, it becomes quite likely that the cakes for Astarte were prepared in a similar manner.

56. 2 *Kings* 23:13; cf. above, p. 45.
57. 2 *Kings* 22:3. According to the less plausible version of 2 *Chronicles* 34:3: in the eighth year of his reign.
58. *Jeremiah* 1:2.
59. Cf. *Entz. Miqrait*, s.v. M'lekhet Hashamayim.

61. ANET, 491, n. 9.
62. For instance, when Arsames, the satrap of Egypt, left in 410 B.C.E. on a visit to Darius, the priests of the Elephantinian male god Khnub instigated the destruction of the temple of Yaho in Elephantine, cf. ANET, 492.
63. ANET, 491.

Chapter III | *The Cherubim*

1. 1 *Kings* 22:39.
2. See Lucas n. Grollenberg, *Atlas of the Bible,* London, 1957, figure 214; and E. Auerbach, *Wüste und gelobtes Land,* Berlin, 1936, II. pl. V.
3. Cf. Hugo Gressmann, *Altorientalische Bilder zum Alten Testament,* 2nd ed., Berlin-Leipzig, 1927, plate 497.
4. Cf. e.g. Hugo Gressmann, *Die Lade Jahwes,* Berlin-stuttgart-Leipzig, 1920, pp. 64–65; and *Entz. Miqrait,* s.v. K'rubh.
5. Cf. Entz. Miqrait, s.v. K'rubh.
6. 1 *Samuel* 1:24.
7. *Exodus* 25:17–22; 37: 6–9; *Numbers* 7:89. The size of the Cherubim is not stated but one can reach an estimate on the following basis: The height of the Ark was 1½ cubits (2¼ feet), and, we are told in *Exodus* 25:10, 20, that the wings of the Cherubim covered the Ark from above. If we assume that the Cherubim knelt on both sides of the Ark in a position resembling that of the genii of the Samarian ivory plaque, their height in this position must have been about 5 feet, so as to allow their wings to meet over the Ark. This would give us also a wing-length of about 5 feet (from the shoulder of the Cherub to the tip of the wing), in which case the wing would extend horizontally beyond the knee about 2 feet, and the 3¾ feet (or 2½ cubits) length of the Ark would have precisely enough room in the space between the knees and under the wings of the Cherubim.
8. *Exodus* 26:1, 36:8. Each of these curtains measured 28 cubits (42 feet) from top to bottom and 4 cubits (6 feet) in breadth (*Exodus* 26:2; 36:9). If, as seems probable, each curtain was decorated with one pair of Cherubim, the latter must either have been pressed closer together than the Cherubim over the Ark, or were

smaller in size. The curtains were many-colored: fine twined linen, blue, purple and scarlet, "the work of the skilful workman" (*Exodus* 26:1; 36:8, 35).

9. *Exodus* 26:31–35.
10. 1 *Kings* 6:23–28; 2 *Chronicles* 3:11–13; 5:7–8.
11. 1 *Kings* 8:6–7.
12. 1 *Chronicles* 28:18. The Cherubim themselves were "*tza'atzu'im* work" (2 *Chronicles* 3:10), an expression rather difficult to understand. In all probability, however, the word *tza'atzu'im* is derived from a root related to the Arabic verb *tzagha*, to form, to practice the art of the goldsmith, in which case the phrase means "a work of plastic form" or "work of sculpture."
13. 1 *Kings* 6:29–35; 2 *Chronicles* 3:7.
14. 2 *Chronicles* 3:14.
15. 1 *Kings* 7:29, 36, 37, 39. While we learn nothing positive about the shape of the Cherubim from this passage, we nevertheless can conclude something about them by elimination: since it enumerates three types of figures: lions, oxen *and* Cherubim, the latter were neither lion-shaped nor ox-shaped, as some Biblical scholars opined. Cf. e.g., Tur-Sinai, *Entz. Miqrait*, s.v. Aron; Graham-May, *Culture and Conscience*, Chicago, 1936, 248–57; etc.
16. *Ezekiel* 41:18–20, 23, 25.
17. Cf. Raphael Patai, *haMayim (Water)*, Tel-Aviv, 1936, p. 107.
18. ANET, p. 130, 131.
19. *Psalm* 68:5; 104:3–4.
20. *Isaiah* 19:1.
21. *Psalm* 18:11.
22. 1 *Chronicles* 13:7.
23. *Habakkuk* 3, and esp. vv. 7, 8, 15.
24. Cf. *Canticles* 1:9.
25. Mekhilta diR. Shim'on, 51–52, 54; Mid. Wayosha, 52; cf. Robert Graves and Raphael Patai, *Hebrew Myths: The Book of Genesis*, New York, 1964, p. 12.
26. *Genesis* 3:24; cf. Graves-Patai, op. cit., 12.d.
27. *Ezekiel* 28:12–19; cf. Graves-Patai, *op. cit.*, 8.a., 1–4.
28. *Exodus* 40:34–38.
29. *Exodus* 24:15–17.
30. 1 *Kings* 8:10–11.
31. *Ezekiel* 9:3; 10:1–22. The details of Ezekiel's vision defy interpretation, although it is clear that his description of the wheeled quadrangular Cherub-chariot is based on certain cultic objects some of which were excavated in Babylonia. The theme of a jewel-bedecked Cherub is exclusively Ezekelian (10:1, 9; 28:13–14, 16), as is the idea that the bodies of the Cherubim are full of eyes. Perhaps the eyes, as the "stones of fire," are based on bejewelled Cherubim figures? The association of "glowing stones" with divine beings is found already in *Isaiah* (6:6) who calls his six-winged angels, not Cherubim but "Seraphim," i.e. "fiery beings."
32. *Exodus* 25:22.
33. The dates commonly given for Philo's birth and death used to be 30 B.C.E. and 50 C.E., respectively. Recently, however, this birth-date has been proved to be too

early and ca. 15 B.C.E. has been substituted for it, while his death date has been moved down to ca. 45 C.E. Cf. Moses Hadas and Morton Smith, *Heroes and Gods,* New York, 1965, p. 129.

34. Philo, *De Spec. Leg.* I. XIII, sec. 72, Loeb Class. Libr. p. 141.
35. Philo, *De Vit. Mos.* II. XVI, sec. 76ff., Loeb Class. Libr. p. 487. A late echo of this interpretation is found in *Zohar Hadash,* Tiqqunim (Warsaw: Lewin-Epstein, no date), p. 95a: "They are Wisdom and Understanding, which are the faces of the Cherubim."
36. Philo, *On the Cherubim* VII. 21–24; IX. 27–30; Loeb Classical Libr. ed. pp. 21–27; cf. also *De Vit. Mos.* II. 98–99.

38. *Proverbs* 8:22.
39. Philo, *On Drunkenness,* VIII. 30 and IX. 33, Loeb ed. pp. 333–335; cf. p. 337; *De Spec. Leg.* 1.96, p. 155.
40. Philo, *On the Cherubim* XIV. 49, Loeb p. 39.
41. Philo, *Vit. Mos.* 3:8; *Quaest. in Gen.* 57.
42. *Psalm* 103:13.
43. *Proverbs* 30:17; *Ezekiel* 19:2. The attribution of softness to the father and toughness to the mother seems to go back in the Near East to a much earlier period than that of Philo. In the mythology of ancient Ugarit (14th century B.C.E.), the father of a mythical group of griffons or vultures is designated by a name which is interpreted by Th. Gaster as "softie," while the name of the mother of the griffons means, according to him, "toughie." Cf. Th. Gaster, *Thespis,* New York, Doubleday Anchor Books, pp. 362–63. In ANET, 154, H. L. Ginsberg makes no attempt to translate or interpret the Ugaritic names of the vultures' father *(Hargab)* and mother *(Samal)*.
44. G. Scholem, *Major Trends in Jewish Mysticism,* New York, 1961, p. 37.

54. *Op. cit.* p. 167.
55. In considering what the Talmudic sources have to say about the Cherubim, one must look at the Talmudic reports in general on the differences between the

Solomonic Temple and the one built after the return from the Babylonian exile. To begin with, it has to be pointed out that the sages of the Talmud as a rule referred to the Temple of Solomon as the "First House," or "First Temple," and to the post-exilic Temple as the "Second House," or "Second Temple." In using the latter term, they rarely added any qualifying clause which would make it clear whether they referred to the Temple built by the Babylonia returnees in 520–515 B.C.E., to the Temple as restored by the Maccabees in 165 B.C.E., or to the Temple as completely rebuilt by Herod in 20–12 B.C.E. This lack of precision in itself causes certain difficulties when trying to place Talmudic statements into their proper historical background.

With the above reservation in mind, let us quote the key passage which deals with the question of whether there were any differences in equipment between the First and the Second Temples. According to Shemuel ben Inya (a Palestinian Amora of the early 4th century C.E.) the following features of the First Temple were absent from the Second: "The Ark, the Ark-Cover, the Cherubim, the Fire, the Shekhina, the Holy Spirit, and the Oracular Breastplate." This opinion, however, is contradicted by the general statement immediately following to the effect that those enumerated features "were indeed present (in the Second Temple) but were of no help," and by the preceding special reference to the "the Fire of the woodpile" on the altar, about which R. Ḥanina, the adjutant high priest (2nd half of the 1st century C.E.) said that while the Fire on the altar in the First Temple crouched like a lion, in the Second Temple he himself saw it crouching like a dog (B. Yoma 21b).

These and similar passages indicate quite clearly that the Tannaim, i.e. the Palestinian sages of the 1st and 2nd centuries C.E. whose words are incorporated in the Mishna, had definite traditions concerning the Temple, which were no longer understood by their heirs and successors, the Amoraim, who lived in the 3rd to 5th centuries either in Palestine or in Babylonia, and whose words are contained in the Palestinian Talmud and the Babylonian Talmud respectively. When a sage like R. Ḥanina, who also happened to be a high functionary in the Temple (as his name, "Segan hakohanim," i.e., adjutant high priest, indicates), states that he himself saw the Fire on the altar, one will have to rely on him rather than on the statement of Shemuel ben Inya who lived in Babylonia almost three centuries later.

56. B. Baba Bathra 99a.

57. B. Yoma 54a. Rabh Qetina's statement was found objectionable by Rabh Ḥisda (another Babylonian Amora of the late 3rd century) on the grounds that such a procedure would have violated the Biblical commandment (*Number* 4:20) which warned: "They (i.e. the priests) shall not go in to see the holy things while they are uncovered." However, Rabh Naḥman (a contemporary of Rabh Ḥisda) had an answer to this objection: a bride who is still in her father's house is bashful toward her groom; once she lives in her husband's house, she is no longer bashful toward him. Likewise the children of Israel, while they were in the desert, were bashful and would not look at the Shekhina—the visible "Presence" of God, represented by the Cherubim; once they settled in their land, they could feast their eyes on her.

This being settled, a new question arises: does Rabh Qetina speak of the First or the Second Temple? If of the First, there was no veil in it (this was the accepted Talmudic view, 2 *Chronicles* 3:14 notwithstanding, based on 1 *Kings* 6:16 which

was interpreted as referring to a partition *wall* between the Holy and the Holy of Holies). If, however, he spoke of the Second Temple, in that there were no Cherubim (this in accordance with the view of R. Shemuel b. Inya quoted above). The first, anonymous, answer is that the reference is to the First Temple, and that the Veil mentioned was the Veil of one of the doors. The second answer, given by Rabh Aḥa bar Ya'akov (a Babylonian Amora of the early 4th century), holds that Rabh Qetina spoke of the Second Temple, and that he referred not to the Cherubim of the Ark, but to the Cherubim engraved on the walls of the Temple as stated in the Book of Kings (1 *Kings* 6:29, 35).

This explanation is followed by a masterly reinterpretation by Rabba bar Rabh Shila (an early-4th-century C.E. Babylonian Amora) of one of the phrases appearing in the description of Solomon's Temple. The bases of the lavers, we are told in 1 *Kings* 7:36, were decorated by engraved Cherubim, lions and palm trees, "according to the space of each, with wreaths." The words in quotes, "*k'ma'ar ish w'loyoth*" in Hebrew, are read by Rabba "*k'ish ham'ure b'liwya (shelo)*," that is the Cherubim were "like a man intertwined with his wife."

58. B. Yoma 54b.

59. Lam. Rab. Petihta sec. 9; *Pesiqta diRabh Kahana* ed. Buber, Lyck, 1868, pp. 137b–138a; ed. Mandelbaum, New York, 1962, I, 301; Yalqut Shimoni to Isaiah sec. 474, to Zephaniah sec. 567.

In its midrashic form the tradition seems to refer to an incident that took place at the time of the destruction of the First Temple or somewhat prior to it. It is a midrash to *Lamentations,* Jeremiah's songs of woe over the destruction of the First Temple, and the Ammonites and Moabites mentioned in them figure among the peoples who launched an attack on Jerusalem shortly before Nebuchadnezzar besieged the city in 598 B.C.E. (2 *Kings* 24:1–2). However, a scrutiny of the events recorded in the *Books of Kings, Chronicles,* and *Jeremiah* fails to disclose any occurrence such as the one taken for granted in the above passages, namely a penetration of gentiles into the Holy of Holies of the Temple prior to its destruction. The only juncture at which such an event could have conceivably taken place was the siege of Jerusalem by Nebuchadnezzar in 598 B.C.E. The two accounts of this event, contained in the *Book of Kings* and in *Chronicles* are so different as to be irreconcilable, but historians tend to accept the one contained in *Kings* as reflecting what actually transpired. According to that account, King Jehoiakim of Judah (reigned 608–598 B.C.E.), shortly before his death rebelled against Nebuchadnezzar, who thereupon set out to punish him. The Babylonian army reached Jerusalem soon after Jehoiakim's death, and laid siege to it. This was more than Jehoiakim's son and successor, the eighteen-year-old Jehoiachin, could endure, and he threw himself on the mercy of Nebuchadnezzar, thereby saving his city and country from destruction, although he himself was taken into captivity to Babylon.

The narrative in *Kings* is so explicit in detailing what happened at that tragic hour in Jerusalem's history that we can be positive that had the Temple been entered by Nebuchadnezzar and thereby desecrated for the first time since it was built, this would certainly have been recounted by the historian. We are told that, when Nebuchadnezzar arrived at Jerusalem, young king Jehoiachin "went out to the king of Babylon," with his mother, princes, officers and servants, all of whom Nebuchadnezzar took to Babylon as his captives. We are further informed that

Nebuchadnezzar took away all the Jewish soldiers, craftsmen and smiths, a total of ten thousand persons. (In *Jeremiah* 52:28 the more realistic figure of 3,023 is mentioned.) Finally, we are apprised that Nebuchadnezzar took all the treasures from the House of Yahweh and the king's house, and cut in pieces all the vessels of gold which Solomon had made for the Temple (2 *Kings* 24:8–16). On this latter point, *Chronicles* again has a divergent tradition; Nebuchadnezzar carried off the vessels of the House of Yahweh and put them into his temple in Babylon (2 *Chronicles* 36:6–7, 10). The version of *Kings* seems here too to be more reliable: what Nebuchadnezzar was interested in was, not to acquire cult objects for this temple, but to obtain gold: he, therefore, did not hesitate to break the large golden vessels into pieces so as to be able to transport them more easily.

One can thus reconstruct what happened: Nebuchadnezzar demanded, obtained and took away all the gold vessels of the Temple and the Palace, just as the Egyptian Pharaoh Shishak had done in the days of Rehoboam (928–911 B.C.E.), more than three centuries previously (1 *Kings* 14:25–26). If we check back to the account of Solomon's Temple construction, we shall find enumerated a large number of "pure gold" vessels: altar, table, candlesticks, lamps, cups, snuffers, basins, pens, etc. (1 *Kings* 7:48–50), which went under the collective name "all the vessels that were in the House of Yahweh"—practically the same phrase used in connection with their removal by Nebuchadnezzar: "all the gold vessels which Solomon, King of Israel, had made in the Temple of Yahweh as Yahweh had said." The Cherubim were not touched by Nebuchadnezzar because they were not of solid gold: they were made of olive-wood, and merely overlaid with gold (1 *Kings* 6:23, 28). Even if the gold overlay of the Cherubim still existed 350 years after they were made, and was not replaced by brass, as Solomon's golden shields were by his son Rehoboam (1 *Kings* 14:27), it was of small value compared with the many solid gold vessels delivered to Nebuchadnezzar by Jehoiachin. It is, therefore, safe to assume that, whether or not Nebuchadnezzar's officials supervised the removal of all gold vessels from the Temple, the Cherubim were not disturbed, and certainly not dragged out in derision into the streets.

We thus conclude that the Cherubim-incident was merely agadically connected to the First Temple, and that the event to which it referred must have taken place in the days of the Second Temple to which all the three Amoras quoted above have reference. However, we cannot go along with them in interpreting both statements—the one referring to the showing of the Cherubim to the people during their presence in the Temple at the three feasts of pilgrimage, and the one describing the dragging out of the Cherubim into the streets—as having the Cherubim-reliefs decorating the walls of the Temple as their subject. This interpretation became necessary only because several Babylonian Amoras accepted as axiomatic the view that there were no Cherubim in the Holy of Holies in the Second Temple, just as there was no Ark, Ark-cover, Fire, Shekhina, Holy Spirit, and Oracular Breastplate in it. However, as we have seen, this view is contradicted by more reliable, firsthand eyewitness accounts as to the presence of the Fire, and by the general assertion that all the enumerated features did, in fact, exist in the Second Temple as well.

As to the Cherubim, Rabh Qetina's statement is unequivocal: the Veil was rolled up and the Cherubim behind it were shown to the people. The Veil is, of course, the curtain separating the Holy from the Holy of Holies. If all that had

been meant by Rab Qetina was that the Cherubim engraved on the walls of the Temple were shown to the people, there would have been no need to roll up any veil: The walls were not covered by veils or curtains, and, if they were adorned with reliefs of Cherubim as were the walls of the First Temple, i.e. from the outside as well as the inside (1 *Kings* 6:20), all the Israelites could see them from their courtyard, without even having to approach the Temple building itself.

Secondly, if we assume that there were no Cherubim on the outer walls of the Temple, but there were on the inner walls of the *hēkhal* (the Holy Hall), and that Rabh Aḥa bar Ya'akov (above, p. 84) referred to these, we run up against yet another difficulty. By consulting any modern reconstruction of the floor plan of the Herodian Temple, one at once notices that the line of vision from the court of the Israelites (which was the closest non-priests were allowed to approach the Temple) through the two doors between the *ulam* (vestibule) and the *hēkhal* (Holy Hall), into the *hēkhal* itself was tightly hemmed in by the large altar of burnt offerings which stood on the southern side, and the eight tables used for the preparation of the sacrifices which occupied the northern side of the Court of Priests (cf. M. Avi-Yonah, *Sepher Y'rushalayim,* Jerusalem, 1956, vol. I, pp. 399, 406). Due to the narrowness of this line of vision, the two side walls of the *hēkhal* were not visible to people outside, in the Court of Israelites. The only part visible was the Veil which was stretched across the back end of the *hēkhal*. When the Veil was rolled up, the Cherubim behind it, in the Holy of Holies *(devir)*, became visible.

Thirdly, if Shimeon ben Laqish also refers to Cherubim decorating the walls in relief, how did the foreigner "take them out" and carry them around in the streets in cages? Rashi (ad B. Yoma 54b), to be sure, comments that "they folded them down from the wall" but this explanation is forced.

Moreover, the showing of the Cherubim to the awestruck pilgrims, and the taking them out in sacrilegious derision and displaying them to the profane crowd of the marketplace, have about them the feel of a deep mystery and its wanton desecration; they make sense only if they refer to a unique group of statuary that was so holy that it was normally hidden in the dark interior of the adytum.

69. Cf. e.g., Jellinek, *Betl haMidrash*, I. p. 31–46.
70. Cf. Moses Hadas, *Aristeas to Philocrates*, New York, 1951, p. 54. According to the earlier estimate of Emil Schürer, *op. cit.*, III 611, it was written in ca. 200 B.C.E.
71. Cf. Schürer, *op. cit.*, III. 609.
72. S. Zeitlin, editorial note in Hadas, *Aristeas to Philocrates*, p.71.
73. *Ant.* XII: 2: 5, 9, 10, 11, 15.
74. *Aristeas* 51–82 and 320; Hadas, *op. cit.* pp. 121–131, 225.
75. Cf. *Exodus* 25:23–28; 1 *Kings* 7:48.
76. Hadas, *op. cit.* p. 123. Aristeas and, following him, Josephus devote many pages to the description of the table. We learn that it was decorated with egg designs, garlands of all kind of fruit, visibly projecting clusters of grapes and ears of grain, also dates and apples, olives and pomegranates, etc. "They worked stones of the colors of the several species to resemble the shapes of the fruits . . ." The legs had lily-shaped capitals; there were leaves of ivy intertwined with acanthus, and "all the parts were carefully made and fitted, the ingenius art corresponding to truth to such a superlative degree that if a breath of wind blew, the leaves stirred in their place, so closely was every detail modelled on reality" (cf. Hadas, *op. cit.* pp. 125–27.) Josephus largely repeats *Aristeas*' description of the table, adding that the intricate "sculptures" representing the many types of fruit were so life-like "that you would guess they were nowise different from real tendrils; for they were so very thin and so very far extended at their extremities that they were moved with the wind and made one believe that they were the product of nature, not the representation of art" (Josephus, *Ant.* XII:2:9). It must have been these decorations which inspired the later Talmudic legends about golden trees planted by Solomon in the Temple which brought forth fruit and thus provided nourishment for the priests (B. Yoma 21b, 39b; Yer. Yoma 41d; cf. Num. Rab. 11:3; 12:4; Mid. Tanḥuma Num. ed. Buber, p. 33; Cant. Rab. 3:9; Josephus, *Ant.* VIII:5:2; cf. Patai, *Man and Temple*, pp. 90, 101).

    For our present purpose it is interesting to note that the "living golden trees" motive represents another example of the attribution by the Talmudic sages to the First Temple of a feature which was introduced only into the Second Temple, and at a relatively late date at that. This strengthens our argument that the exhibition of the Cherubim in cages in the marketplace, attributed by the Talmudic sages to the First Temple period, actually took place likewise in the days of the Second Temple, during the sack of Jerusalem by Antiochus Epiphanes.

90. *Midrash haGadol,* ed. M. Margulies, Jerusalem, 1956, p. 580. The original of the word translated above as "breasts" is "*vashdotam.*" Margulies in a footnote states that he does not know what this word means. My suggested translation is based on the following considerations: the context shows that the word must mean a part of the human body. The *alef* inserted between the *v* and the *sh* seems to be a *mater lectionis* for *a,* as is frequently found in *Midrash haGadol,* e.g., the name Raba is spelled, not in its usual form RBH, but RABH. The feminine plural suffix *-ot,* instead of the usual dual suffix, appears in the text in the word preceding *vashdotam,* namely *yadotam* ("their hands"), while one would expect *y'dehem* and *sh'dehem.* These deviations from standard Hebrew mask, but cannot obliterate, the meaning of the word *vashdotam,* i.e. "their breasts."

6. 1 *Kings* 8:12–13; 2 *Chronicles* 6:1–2.
7. The technical term for the visible appearance of Yahweh in the sanctuary or in any other place chosen by Him is the verb *shakhan,* meaning to dwell, or abide. In the great and famous Sinai theophany (*Exodus* 24:16), "Yahweh's glory dwelt *(shakhan)* on Mount Sinai"; and subsequently He commanded Moses to build Him a sanctuary "that I may dwell *(w'shakhanti)* among" the Children of Israel (*Exodus* 25:8). Following the conquest of Canaan, God took up His abode on

Mount Zion, and is referred to by *Isaiah* (8:18) as "Yahweh Zeboath who dwells *(shokhen)* in Mount Zion." Zion is God's holy mountain: "I am Yahweh your God, dwelling *(shokhen)* in Zion My holy mountain," says *Joel* (4:17). In the *Psalms* (135:21) this concept becomes the basis for a divine epithet: "Blessed be Yahweh out of Zion, the Jerusalem-dweller *(shokhen)*, Hallelujah," just as in an older poetic context He is called "the thornbush dweller" (*Deuteronomy* 33:16).

8. The Tabernacle is often called *ohel mo'ed*, "Tent of Meeting," or simply *ha'ohel*, "the Tent," as well. It seems that the oldest Elohistic tradition used the term "Tent of Meeting," while the more recent Priestly tradition preferred the archaic term *Mishkan*, "dwelling" (cf. de Vaux, *Ancient Israel*, pp. 294–95), thereby giving emphasis to the idea that Yahweh actually "dwelt" *(shokhen)* in the desert sanctuary.

69. *Proverbs* 24:29; Lev. Rab. 6.1
70. Since the passage in Lev. Rab. 6.1, quoted above, speaks of the "Holy Spirit," and not the Shekhina, Gershom Scholem is technically correct when stating that Midrash Mishle (see below) contains the first and only midrashic reference to a dif-

ferentiation between God and the Shekhina. Cf. Scholem, "Zur Entwicklungsgeschichte der kabbalistischen Konzeption der Shekhinah," *Eranos Jahrbuch* 1952, vol. 21, Zurich, 1953, p. 59. In substance, however, he is in error, because, as pointed out above, the differentiation between God and the Holy Spirit, found in Lev. Rab. 6.1, is essentially identical with a differentiation between God and the Shekhina.

71. Midrash Mishle ed. Buber, p. 47a, quoting *Proverbs* 22:29; cf. Mishna Sanhedrin 10.2 on the three kings (Jeroboam, Ahab and Manasseh) and four commoners (Balaam, Doeg, Ahitophel, and Gehazi) who have no share in the World to Come, and B. Sanh. 104b.
72. Bereshit Rabbati, ed. Albeck, p. 27. The same midrash is found much earlier in a Hebrew version of the *Book of Enoch,* where, however, the crucial passage reads "I removed my Shekhina from their midst." Cf. Jellinek, *Bet haMidrash* II. 114.
73. *Exodus* 24:10.
74. Midrash haGadol *Exodus* 555; cf. B. Qiddushin 49a, and Tosafot *ibid.* beginning with "Ham'targem"; *Arukh,* s.v. Tirgem.
75. *Psalms* 103:13.
76. *Isaiah* 66:13.
77. Pesiqta Rab. 139a.
78. See above, pp. 77–78.
79. Lam. Rab. Introduction, 25.
80. Lam. Rab. Introduction, 24.
81. Pesiqta diRabh Kahana, ed. Mandelbaum, p. 4.
82. Aboth diRabbi Nathan, ed. Schechter, p. 102, and see parallel sources in the notes.
83. B. Baba Bathra 17a; cf. Cant. Rab. *ad* 1.2 (5)
84. Deut. Rab. 11.10 end.
85. B. Sota 13b; Sifre Deut. 355.
86. Cf. below, chapter VI. "Matronit."
87. Albright, *Archaeology and the Religion of Israel,* p. 85.
88. Plural: *Genesis* 18:2, 4, 5, 8, 9, 16, 22; singular: *Genesis* 18:1, 3, 10, 13, 14, 17–21, 23–33.
89. *Genesis* 19:1ff., 13. Cf. on this entire problem Aubrey R. Johnson, *The One and the Many in the Israelite Conception of God,* Cardiff, 1942. Johnson shows that the same vacillation between singular and plural is found also in other ancient Near Eastern religions, pp. 28–31.
90. Cf. above, p. 78.

Chapter V | *The Kabbalistic Tetrad*

1. Cf. G. Scholem, *Major Trends in Jewish Mysticism*, New York, 1961, pp. 20ff.
2. *Op. cit.*, p. 229.
3. *Zohar* III. 290b. My translation in the text above is free. It renders the sense of the passage instead of trying to give a literal translation which would be clumsy

and difficult in English. The same procedure was followed in the rendering of most passages quoted from Kabbalistic literature.

4. *Zohar* III. 290a.
5. *Zohar* III. 65b.
6. Cf. Scholem, *op. cit.*, pp. 211ff.; I. Tishby, *Mishnat haZohar*, Jerusalem, 1957, I. pp. 98ff.; R.J. Zwi Werblowsky, *Joseph Karo—Lawyer and Mystic*, Oxford University Press, 1962, pp. 206ff.

Chapter VII | *The Myth of God and the Shekhina*

1. Gershom Scholem, *Major Trends*, pp. 13, 29, 31, 34, 87, 113, 157, 174, 391.
2. Gershom Scholem, *On the Kabbalah and Its Symbolism*, New York: Schocken Books, 1965, index, s.v. Myth; Scholem, *Kabbalah*, The Jewish Publication Society of America-/Quadrangle Books/The New York Times Book Co., 1974, index, s.v. Myth, mythology.
3. Louis Jacobs, *Hasidic Prayer*, pp. 24, 127–28.
4. Among the Kabbala scholars whose work is available only in Hebrew I wish to refer in particular to the two-volume anthology of my old friend Isaiah Tishby, entitled *Mishnat haZohar* ("The Wisdom of the Zohar"), Jerusalem: Mossad Bialik, 1957–61), in which he undertook the difficult task of presenting systematically the vast Zoharic material according to subject matter, e.g., "The Godhead," "The Evil Side," "Creation," etc. A section in it deals with the Shekhina. Yet even Tishby shares with other Jewish scholars the reluctance to present in consecutive narrative the Zoharic myth of God and the Shekhina, or any other Zoharic myth for that matter.
5. Eight volumes, Jerusalem: Mossad Bialik, 1937–57. A one-volume abridgement by M. Greenberg, titled *The Religion of Israel* (1960), is available. Kaufmann's main thesis is that Israelite monotheism was an entirely new, *sui generis*, phenomenon in religious history, and that from its very beginnings Israelite monotheism was devoid of any element of polytheistic mythology. It so happened that in 1942–43, when Kaufmann was working on his book, I was just completing vol. 2 of my book *Adam waAdama* ("Man and Earth in Jewish Custom, Belief and Legend"), (Jerusalem: Hebrew University Press, 1943), in which I presented Biblical and Talmudic myths woven around the concepts of Mother Earth and man's relationship to the earth. During the 1942–43 academic year our work-places were next to each other: Kaufmann taught at the *Reali* High School in Haifa, and I served as academic secretary of the *Technion* Institute of Technology, just a few steps away. We met quite a number of times and discussed issues that preoccupied both of us, but we never saw eye to eye on them, nor could we in any way influence each other. After 1943 I had no more contact with Kaufmann, but I did register my disagreement with his approach in three book reviews I wrote about his book. See *Ha'Olam* (Jerusalem), June 20, 1940, and Sept. 17, 1942,

and *Edoth ("Communities"): A Quarterly for Folklore and Ethnology* (Jerusalem), July, 1946, vol. 1, no. 4, pp. 256–57.

6. Cf. e.g. Heinrich Graetz, *History of the Jews*, vol. iv, Philadelphia: Jewish Publ. Soc. of America, 1956, in which he terms Moses de Leon, the author of the Zohar, "pernicious" (p. 10), the Zohar a "notorious forgery" (p. 12), a "farrago" (p.14), which "propagated a gloomy superstition" (p. 22), and more the like. I cannot at the moment lay my hands on the German original of Graetz's *History*, but I remember from my reading it many years ago that somewhere in it he calls the Zohar a *Logbuch*, that is, a "book of lies." Other scholars of the early *Wissenschaft des Judentums* school, such as Zunz, Geiger, Luzzatto, and Steinschneider, were no more charitable in their condemnation of the Zohar.
7. Scholem, *Major Trends*, pp. 7–8.
8. In the sequel the apologetic note in Scholem's view of "the mythical" in the Kabbala is even stronger. He writes, "It is indeed surprising that in the very heart of Judaism ideas and notions sprang up which purported to interpret its meaning better than any others, and which yet represent a relapse into, or if you like a revival of, the mythical consciousness" (*ibid.*, p. 22).
9. Scholem, *op. cit.*, p. 22. Cf. also the critical analysis of Scholem's position on religion by Gershon Weiler, "On the Theology of Gershom Scholem" (in Hebrew), in *M'dina v'Ḥinnukh* ("State and Education"), Tel Aviv, 1979, pp. 181–92.
10. Cf. Robert Graves and Raphael Patai, *Hebrew Myths*, New York: Doubleday, 1964; R. Patai, "What Is Hebrew Mythology?" *Transactions of the New York Academy of Sciences*, 2nd ser., Vol. 27 (Nov. 1964), pp. 73–81.

Chapter VIII | Yiḥudim—*Unifications*

31. Israel Ba'al Shem Tov, *Keter Shem Tov*, reprint, B'ne B'rak, 1947, p. 5.
32. Ya'aqov Yosef of Polonnoye, *Toldot Ya'aqov Yosef*, Warsaw, 1881, p. 248 (end of *Behar*).
33. First published in Lemberg, 1866. Critical edition by Gedalya Nigal, Jerusalem, 1985.
34. Cf. index of Nigal's edition, s.vv. *Yiḥud, Yiḥudim, Yiḥud v'Zivvug, Matronita, Perud, Sh'khina*.
35. In speaking of the "mystery of the double face" Ya'aqov Yosef takes up a theme that was first touched upon by the Midrash (Gen. Rab. ed. Theodor, p. 55; cf. Robert Graves and Raphael Patai, *Hebrew Myths*, 10.1, and above, p. 125), and then elaborated by Gikatilla and the Zohar (cf. above, pp. 124–25). The androgynous original man is paralleled in Kabbalistic teachings by the similarly androg-

ynous Godhead. What Ya'aqov Yosef says is that while the exile lasts God and the Shekhina are turned back to back, thus they are *du-partzusim*, that is, like a Janus head. Moreover, God is asleep: this is the mystery of the *dormita*, of the (divine) sleep. However, he continues, "When He will want to rebuild the Temple," God will awaken, and then God and the Shekhina "will turn face to face," and thus the wholeness of the Godhead will be restored and Redemption will come about.

58. *Op. cit.*, 10b, 23b, 24b.
59. The *Seder 'Avodat Yisrael* was published in Roedelheim, Germany, 1868, and reprinted by Schocken Books in 1937 (no place of publication).
60. First published in Amsterdam, 1717, and then reprinted several times, e.g., in New York, 1954.

61. *Seder 'Avodat Yisrael*, p. 55, note.

62. Cf. e.g., *Siddur Tora Or v'im Sha'ar haKolel . . . Nusaḥ haARI* ("Prayer Book The Tora Is Light with the Universal Gate . . . Version of Isaac Luria"), Vilna, 1896. This prayer book contains, in addition to the *yiḥudim*, numerous other references to the Shekhina. The same is the case with the following sampling of other prayer books:

    Seder l'Shalosh R'galim k'Minhag haS'faradim ("Order for the Three Pilgrims' Festivals according to the Custom of the Sephardim"), 1857.

    Seder Or Zaru'a T'filla l'Khol haShana k'Minhag S'farad ("Order Sown Light, Prayer for the Whole Year according to the Custom of Spain"), Jerusalem, 1987.

    Seder Sha'ar haShamayim ("Order Gate of Heaven"), by Isaiah Horowitz ("the Shelah") (1565?–1630), Amsterdam, 1717 (reprint, New York, 1954). On p. 277 the purpose of the rite of circumcision is stated to be the unification of God and the Shekhina.

    Siddur T'filla ("Prayer Book"), by the Yemenite Rabbi Shalom Shar'abi, reprint, Jerusalem, 1964.

    Siddur Or miTziyon Nusaḥ S'farad ("Prayer Book Light from Zion, Version of Spain"), Jerusalem, 1968.

    Seder T'fillat Y'sharim 'im Sharḥ fi 'l-'Arabī ("Prayer Book the Prayer of the Righteous Ones, with a Commentary in Arabic as Spoken in Baghdad and Its Environs and the Cities of India and China. . ."), ed. and transl. by Ṣāliḥ Ya'qūb Manṣūr, Jerusalem, 1938.

    Seder Minḥa v'Arvit l'Shalosh R'galim ("Order of the Afternoon and Evening Prayers for the Three Pilgrims' Festivals . . . according to the Custom of Baghdad"), ed. Yitzḥaq Yosef Ḥayyim A'budi, Livorno: Sh'lomo Belforte, 1935. On p. 90 the blessing recited when seeing a leafy tree is stated to have as its purpose "the Unification of God and the Shekhina . . . "

    Siddur K'nesset Yisrael haShalem b'li Dillug . . . k'Minhag Q"Q haS'faradim v'khol 'Edot haMizraḥ . . . ("Prayer Book the Complete Community of Israel Without Omission . . . according to the Custom of the Holy Congregations of the Sephardim and All Oriental Communities, according to the Version of Isaac Luria"), ed. Yosef ben Aharon Ḥasid, Jerusalem, 1980. This prayer book is used at present (1988) by the Israeli Jewish Communities Center of Forest Hills, N.Y., founded by Bukharan Jews.

100. I suggest the use of these three terms—soul, spirit, and ghost—for the Hebrew *nefesh*, *n'shama*, and *ruaḥ*.

101. Here we must leave R. Tabul's brief but most valuable presentation of Luria's unifications, but before doing so I would like to remark that if a scholar were to undertake the task of preparing an annotated English translation of it, he would perform a valuable service to the scholarly world.

Chapter IX | *The Shekhina as* Maggid *and Vision*

1. Gershom Scholem, "HaMaggid Shel R. Yosef Taitazak," *Sefunot*, Vol. 11 (1971–77), pp. 67–112.
2. First published in Lublin, 1646.
3. Cf. Joseph Dan, "Maggid," in *Encyclopaedia Judaica*, Jerusalem, 1972, 11:698–701, and literature there in the bibliography.
4. As quoted by Werblowsky, "*LiD'muto shel haMagid shel R. Yosef Qaro*," *Tarbiz*, Vol. 27 Nos. 2–3 (Jan. 1958), p. 314: *idem*, *Joseph Karo*, pp. 167, 175. The drying up of the sea and the piercing of Rahab are taken from Isa. 51:9–10, where these heroic acts are attributed to "the arm of Yahweh."
5. Werblowsky, *Joseph Karo*, p. 275.
6. Werblowsky, *Tarbiz*, *loc. cit.*
7. Werblowsky, *Tarbiz*, *loc. cit.*; repeated in his *Joseph Karo*, p. 268.
8. Louis Dupré, "Mysticism," in *Encyclopaedia of Religion*, New York: Macmillan, 1987, 10:254.
9. Bernard Lang in his *Wisdom and the Book of Proverbs: A Hebrew Goddess Redefined*, New York: Pilgrim Press, 1986, argues that *Hokhma* ("Wisdom"), which figures prominently in the Biblical Book of Proverbs (1:20–33; 8:1–36; 9:1–18), was an "apparently pale goddess" who was later "reinterpreted or redefined" as a "purely poetic figure" (p. 5; cf. also pp. 6–7). Apparently in support of his argument Lang puts at the head of his first chapter a quote from Hermann Gunkel: "The sages had a kind of female patron deity of whom they sometimes spoke; Hebrew tradition calls her 'Wisdom'" (p. 3, quoting Gunkel, *Zum religionsgeschichtlichen Verständnis des Neuen Testaments*, Göttingen: Vandenhoeck and Ruprecht, 1903, p. 26). In view of his interest in ancient Hebrew polytheism, Lang's assertion that among the gods worshiped by the Israelites "there was only one goddess: Astarte, who was probably also called Queen of Heaven," is surprising (p. 5, referring to *Jer.* 44:18, and to Wolfgang Heimpel, "A Catalogue of Near Eastern Venus Deities," *Syro-Mesopotamian Studies*, Vol. 4 (1982), p. 71). What about Asherah, whose worship is well attested from the pre-monarchic period down to the days of the first Exile? See above, pp. 34–53. Lang simply ignores her, although he refers briefly to her Ugaritic equivalent, Athirat, El's consort, who, he says, "may indeed be Wisdom's mother" (p. 64). And, one more question: "Lady Wisdom" and "Lady Folly" (Lang's translations) appear juxtaposed as two opposites in *Prov.* 9:1 and 13. If "Wisdom and Folly are the two powers vying for favor with students" (as Lang says, p. 86), and "Lady Wisdom" is an ancient Hebrew goddess, why should the same status not be accorded to "Lady Folly"? Why is she merely a "harlot," a "figure of fiction," created by the poet? (pp. 100, 108).

Thus, despite Lang, I still maintain that *Ḥokhma* in the Bible and the Apocrypha is nothing more than a personified hypostasis, and never developed within Judaism "into a veritable female deity."

10. As reprinted in Isaiah 6. Abraham haLevi Horowitz's *Sh'ne Luḥot haB'rit*, Jerusalem, 1969, vol. 2, pp. 88a–89a.
11. 2nd ed. Venice, 1654.

16. Montgomery, *op. cit.*, pp. 155–56, bowl no. 8.
17. *Hosea* 2:5.
18. Jehuda L. Zlotnik, *Ma'ase Yerushalmi*, Jerusalem, 1946, p. 33.
19. *Op. cit.*, pp. 66–67.
20. Cf. G. Scholem, *Major Trends in Jewish Mysticism*, New York, 1961, pp. 40ff. In an Arabic incantation text against the Qarina (the Muslim equivalent of Lilith), King Solomon is said to have called his vezir and cousin Asaf ibn Barakhia, in whose name we recognize Joshua ben Perahia, and commanded him to write an amulet to ward off the demoness and all her helpers, cf. H.A. Winkler, *Salomo und die Karina*, Stuttgart, 1931, p. 18.
21. Gottheil, whose transcript was published by Montgomery, reads, *Yahweh Qadmonah Hayin Lilith*. It seems to me, however, that these words should be read *wHawah qadmonah hutz Lilith*, giving the famous Jewish magical incantation formula as translated above.
22. Montgomery misunderstood this name. In later Jewish magic it has become a commonplace to arrange a formal sale of a child whose life was threatened by an evil spirit and to call him Mercado, i.e., The Sold One, if a boy, and Mercada, if a girl.
23. Montgomery, *op. cit.*, pp. 258ff. My translation. A very similar incantation is reprinted in as recent a popular remedy-book as Raphael Ohana's *Mar'e haY'ladim*, Jerusalem, 1908, p. 61b.
24. Cf. Montgomery, *op. cit.*, pp. 252–53.
25. Cf. Cyrus H. Gordon, "Two Magic Bowls in Teheran," *Orientalia*, vol. 20, Rome, 1951, pp. 306–15.
26. Cf. Gordon, *op. cit.* pp, 306–07, whose translation was followed above, with a few slight changes.
27. Cf. Gordon, *op. cit.*, pp. 309–10. Lilith appears on numerous other bowls as well, Cf. Gordon, *Orientalia* 10 (1941), pp. 120–21, 279, 289 (where "male and female Liliths" are mentioned), 339, 340 ("Lilin," masculine plural), 347 ("Liliths"), 348 ("male and female Liliths"), 351 ("I adjure thee, O Lilith Hablas, granddaughter of Lilith Zarnay"), 353 ("bewitching female Liliths"), 354, 356.

47. *Zohar* i. 148b, Sitre Torah.
48. *'Emeq haMelekh*, Sha'ar Tiqqune haT'shuvah, ch. 11, p. 19c. The mythical references in this incantation are clear enough. The statement that Lilith is wrapped in velvet may refer to the scarlet dress which, as we just saw, Lilith was believed to wear when trying to seduce men. The admonition that she should return to the raging sea whose waves call her, refers to the well-known myth according to which Lilith's permanent abode is in the waves of the Red Sea.
49. *'Emeq haMelekh* 84b.

52. *Zohar* i. 19b. The turn of the flame is reminiscent of the turning of the Cherubim themselves: according to the Talmudic view (B. Baba Bathra 99a) when the Cherubim turned their faces toward each other, this showed that Israel obeyed the will of God; when Israel sinned the Cherubim turned their faces away from each other. The smile of Lilith is reflected in the smile that one can observe on the faces of sleeping children. Therefore, according to Jewish folk-belief, one should wake such a child, whereupon Lilith will flee.

28. Cf. B. Shabbat 118b.
29. Leslau, *op. cit.*, pp. 16, 17, 18, 19, 21, 23–24, 30–32, 36, 37–38.
30. *Op. cit.*, pp. 42, 45. A comparison between the Falasha Sabbath and the Mandaean Sunday, also personified and in many ways paralleling the former, was made by L. Troje, "Sanbat," in Richard Reitzenstein, *Die Vorgeschichte der christlichen Taufe*, Leipzig and Berlin: Teubner, 1929, pp. 328–77. He also pointed out (p. 347) that the expression "Sabbath of God," found in the *Teezaza Sanbat*, goes back to Philo of Alexandria, *De Cherub*. 87. In that passage (Loeb Class. Libr. ed. p. 61) Philo says that "Moses often in his laws calls the Sabbath, which means 'rest,' God's Sabbath." In fact, in most of the pertinent passages, the Hebrew expression is "the seventh day is a Sabbath *unto* the Lord" (*Exodus* 20:10; 31:15; 35:2; *Leviticus* 23:3). However, in *Exodus* 31:13 and *Leviticus* 19:3 the expression "my Sabbaths" occurs, put in the mouth of God. Thus Troje's conclusion that the expression "God's Sabbath" was coined by Philo, is only partly correct.
31. *Op. cit.*, p. 143, note 9.
32. *Op. cit.*, p. 147, note 95.

40. *Zohar* ii. 63b.
41. *Zohar* iii. 272b.

42. Pope, *op. cit.*, p. 175.
43. The Hebrew word "*qiddashta*" which appears in the Sabbath benediction, means both "you sanctified" and "you betrothed."
44. David ben Joseph Abudarham, *Sefer Abudarham*, Prague, 1784, p. 45a.
45. This line alludes to the midrash according to which the Sabbath existed in God's thought even before the creation of the world, although, coming as it did after the six days of creation, it was the end and completion of the Creator's work.
46. The son of Yishai (Jesse) the Bethlehemite was, of course, David; but the poet alludes to a more distant son, or descendant, of Yishai, namely, the Messiah whose early coming was a very real expectation among the Safed Kabbalists.
47. Another allusion to the Messiah. David was a descendant of Perez (or Pharez).
48. This is based on B. Taanith 29b. The concept of the Shekhina as the Sacred Apple Orchard is closely paralleled by the Catholic view of Mary as the Olive Tree, expressed, e.g. by St. Alfonso Maria di Liguori (1696–1787) as follows: "... Mary was called the olive tree, like a fair olive tree in the plains (*Eccles.* 24:19), for as the olive tree produces nothing but oil, the symbol of mercy, thus from the hands of Mary nothing but graces and mercies proceed." See Barry Ulanov (ed.), *The Way of St. Alphonsus Liguori*, New York, 1960, p. 87. This book carries the "Imprimatur" and "Nihil obstat" of the archdiocese of New York.
49. Pope, *op. cit.*, p. 175.
50. Cf. e.g., Ḥayyim Vital (1542–1620), *Sha'ar haGilgulim* ("Gate of Transmigrations"), Przhemysla, 1875, pp. 15a–b.
51. Cf. G. Scholem, *Eranos Jahrbuch*, vol. 19 (1950), pp. 154ff.
52. This poem is printed in the prayer books following the Lurianic tradition, e.g. *Siddur Tora Or v'imSha'ar haKolel*, Vilna 1896, pp. 55a–56a.
53. I.e., the Sabbath, who is identified with the Shekhina and is God's bride.
54. This is a daring simile: *Yesod* ("Foundation"), one of the ten *Sefirot*, corresponds to the penis in the human body. It is said to be "hers," because it is through it that God unites with his bride, the Sabbath-Shekhina.
55. The Aramaic original has *katish* which means not only "presses" as translated above, but also "penetrates" or "deflowers," as in Yer. Qiddushin 59a top.
56. *Siddur Tora Or*, Vilna, 1986, p. 56a.
57. M. Ketubot 5:6.
58. *Exodus* 21:10; cf. R. Patai, *Sex and Family in the Bible and the Middle East*, New York, 1959, pp. 43ff., 158ff.
59. Joseph Caro, *Shulḥan 'Arukh*, Oraḥ Ḥayyim sec. 240.
60. Cf. Magen Abraham, a commentary printed in the standard editions of the *Shulḥan 'Arukh*, Oraḥ Ḥayyim, to sec. 240.
61. *Isaiah* 56:4–5.
62. *Zohar* ii. 89a. The above interpretation largely follows that of I. Tishby, *Mishnat haZohar*, Jersualem, 1961, ii. 537–38.
63. Ḥayyim Vital, *'Etz Ḥayyim Sha'ar haK'lalim*, 12–13; and other passages quoted by S. A. Horodezky *HaMistorin b'Yisrael;* Tel Aviv, 1961, iii. 98; cf. also Shabbetai of Rashkow, *Seder T'filla miKol haShana*, Kortez, 1794, pp. 157b–258b. The rest of the day is also devoted to communion with the world of the divine. In the

Kiddush, or Sanctification, of the second Sabbath meal, taken in the morning of the Sabbath, after returning from the Morning and Mussaf prayers in the synagogue, the Holy King, the Holy Ancient One, the Holy Apple Orchard (i.e. the Sabbath-Shekhina), and the Small Face are invited to participate in the meal (*Siddur Tora Or,* Vilna, 1896, pp. 78b, 82a). The same invitation, in a somewhat different wording, is extended again for the third meal, taken on the afternoon of the Sabbath following the return from Minha prayer in the synagogue. According to another view, the first meal was given in honor of the "Female of the Small Face," i.e., the Shekhina; the second, in honor of the "Holy Ancient One," and the third, in honor of the "Small Face" (cf. Isaiah haLevi Horowitz (ca. 1565–1630), *Sh'ne Luḥot HaB'rit,* Amsterdam edition, reprinted in New York, 1946, i. 139b).

The third meal was usually lingered over until the time came to return to the synagogue for the evening prayer. At this prayer it was customary to protract the singing of the word *Barkhu* ("Bless You") as long as one's breath allowed, because the completion of this word signified the precise moment at which the Queen Sabbath departed, and this they would try to postpone as long as possible (cf. Isaac of Vienna (12th–13 centuries), *Or Zaru'a;* Jacob Segal (15th c.), *Minhage Maharil,* as quoted in Baruch (ed.), *Sefer haShabbat,* pp. 59, 65).

Although with the appearance of three stars on the darkening sky the Sabbath was definitely over, two more ceremonies remained which extended her felt presence far into the night. One was the *Havdalah* ("Separation"), performed by each family head in his home, in the presence of his wife and children. This consisted of lighting a bunch of elaborately woven wax candles, drinking a cup of wine, and smelling sweet herbs, all to the accompaniment of appropriate benedictions. The Polish Kabbalist Isaiah haLevi Horowitz quotes his own father to the effect that "One must sing the *Havdalah* to a good and beautiful melody in order to bid the Queen farewell in joy and in song. Also, for the same reason, it is our custom to perform the rite standing, although one could do it sitting down, because one must be standing up in order to accompany her. . . And one adds a part of the weekday to the holy day at the outgoing of the Sabbath in order to teach and to show that one is reluctant to let the Holy Guest go, and that it is difficult to part from him. Therefore one holds him back, and from most of the houses accompanies him with songs and paeans. . ." *(Sh'ne Luḥot haB'rit, op. cit.).*

It was the custom of the Hasidim of East Europe "to spend the time from sunset to the hour of the evening prayer (on the Sabbath afternoon) in songs and praises of great joy, and they used to dance and frolic in their great happiness in honor of the Queen Sabbath as she was leaving, in the same manner in which she was received. This resembled the musical entertainment of a bridegroom and bride. And this is what every wise man would do in his congregation to honor the Queen, and this is a wonderful charm *(segulla)* to reduce the disturbers of their souls and to assure themselves of a happy and joyous week. . ." (Baruch, *op. cit.,* p. 82).

Following the *Havdalah,* several traditional songs were sung, and then came the time for the last ceremony regarded as part of the Sabbath observances although the Sabbath itself had ended at nightfall. This was the festive meal called *S'udat M'lawe Malka* ("Meal of Farewell to the Queen"), which, like the three earlier Sabbath meals went back to Talmudic tradition (cf. B. Shabbath 117b–118a, 119b) and was regarded by Joseph Caro as a religious duty (*Shulḥan 'Arukh,* Oraḥ

Hayyim, sec. 300, and the commentary of Sha'are Teshuva *ad loc.*). Among the Hasidim, who regarded the time spent at this meal and its attendant merriments as part of the Sabbath, the *M'lawe Malka* was the occasion for much gaiety, feasting, and dancing protracted far into the night.

| *Conclusion*

1. Mother Earth and the city (Zion) as the mother of the people are discussed in detail in Raphael Patai, *Adam waAdama,* Vol. II. Jerusalem, 1943, pp. 65–120.
2. Cf. C.G. Jung, *Gesammelte Werke* Zurich-Stuttgart, 1958, vol. 16, pp. 263ff., "Die Conjunctio."

4. Cf. Hastings (ed.), *Dictionary of the Bible,* s.v. Mary, p. 290.
5. Cf. Christine de Pisan, 'L'épître au dieu d'Amours," in Robert Bossaut (ed.), *La littérature morale au Moyen Age,* Paris: Librairie Larousse, 1935, p. 93. My translation.
6. *Leviticus* 18:5; *Numbers* 21:8–9.
7. Let me mention only in passing that in recent years there have been remarkable stirrings among Jewish feminists in the direction of attributing feminine traits to God and introducing the worship of such a feminine deity in religious services. E.g., one such prayer says: "Blessed is She who spoke and the world became . . ." which is simply a transposition into feminine gender of the traditional Jewish prayer; "Blessed is He who spoke and the world became. . ." But then it continues: "Blessed is She who in the beginning gave birth. . . Blessed is She whose womb covers the earth," which is not merely a transformation of God into a Goddess, but the attribution—even if only metaphorically—of female physical-biological functions to Her. Note that in no traditional Jewish prayer is God referred to as having "begotten" the world, or as possessing masculine genitals. Cf. Rita Gross, "Female God Language in a Jewish Context," *Davka* 17, reprinted in Carol P. Christ and Judith Plaskow (ed.), *Womanspirit Rising,* New York: Harper & Row, 1979; Naomi Janowitz and Maggie Wenig, "Sabbath Prayers for Woman," in *op. cit.*, p. 176.

Raphael Patai is an internationally known anthropologist, Orientalist, and Biblical scholar. He was born in Budapest and studied at the University of Budapest (Dr. Phil., 1933), the University of Breslau, the rabbinical seminaries of Budapest and Breslau, and the Hebrew University, Jerusalem (Ph.D, 1936). He subsequently taught at the Hebrew University and founded and directed the Palestine Institute of Folklore and Ethnology; in 1947 he came to the United States, where he now lives.

Dr. Patai has served as professor of anthropology at Dropsie College and Fairleigh Dickinson University, and as visiting professor at the University of Pennsylvania and at Columbia, Princeton, Ohio State, and New York universities. In addition to several other posts, he has been director of research for the Theodor Herzl Institute and editor of the Herzl Press. Dr. Patai is the author of more than six hundred articles and many books, among them *The Messiah Texts* and *Gates to the Old City*, copublished by Wayne State University Press and Avon Books, *On Jewish Folklore*, published by Wayne in 1983, and *The Myth of the Jewish Race* (with Jennifer Patai), revised edition published by Wayne in 1989.
